1-8½×2¾ in. *malleable* iron last.
1-7×2¼ in. *malleable* iron last.
1-5¼×2 in. *malleable* iron last.
1-steel shoe hammer.
1-best steel shoe knife.
1-pair good quality men's half soles.
1-pair good quality boys' half soles.
1-pair good quality women's half soles.
1-leather head patent peg awl handle.
1-peg awl.
1-stabbing awl handle.
1-stabbing awl.
1-sewing awl handle.
1-sewing awl.
1-pkg. ⅝ in. heel nails.
1-pkg. ½ in. clinch nails.
1-pkg. ⅝ in. clinch nails.
1-pkg. 2-oz. shoe tacks.
1-pkg. shoe needles.
1-ball shoe thread.
1-ball shoe wax.
1-bunch bristles.
4-pairs heel plates, assorted sizes.
1-bottle leather cement.
1-bottle rubber cement.
1-wrench for peg awl handle.
1-set directions for half soling.

LAP LASTS.

Pointed Toe, Cast Iron, Japanned.

No. 10—Small, 2½×5 in. and 2¾×5½ in., w't per doz. 24 lbs.....per dozen $1.50
No. 11—Medium, 2¾×5 in. and 3×5¾ in., w't per doz. 30 lbs...per dozen 2.10
No. 12—Large, 3×5½ in. and 3¾×6 in., w't per doz. 36 lbs.....per dozen 2.70

Round Toe, Cast Iron, Japanned.

No. 21—Medium, 2¾×4½ in. and 3×5¼ in., w't per doz. 33 lbs....per dozen $2.10
No. 22—Large, 3¼×5¼ in. and 3¾×5¾ in., w't per doz. 42 lbs...per dozen 2.70

COBBLERS' OUTFITS.

No. 10—Consisting of 27 articles, as enumerated above, packed securely in a wood box, w't per doz. 138 lbs., per dozen..... $21.00

Contents.

1-iron stand for lasts.
1-last for men's work.
1-last for boys' work.
1-last for children's work.
1-pair men's half soles.
1-pair boys' half soles.
1-pair women's half soles.
1-shoemaker's hammer.
1-shoemaker's knife.
1-patent peg awl handle.
1-peg awl.

1-ball shoe wax.
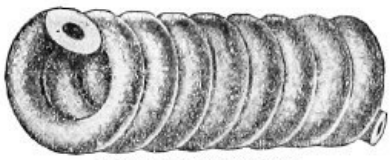
3-pkg. clinch nails, ½, ⅝, ¾ in.
1-pkg. heel nails.
4-pairs heel plates, assorted.
6-harness needles.
1-harness and saw clamp
1-box slotted rivets, assorted.
1-rivet set for same.
1-belt punch.
1-soldering iron.
1-handle for same.
1-bar solder.
1-bar resin.
1-bottle soldering fluid
1-copy directions.

These outfits can be used for boots, shoes, rubber, harness and tinware.

PACKING.



"OUR VERY BEST."

Red Core, Round Spiral. In 12 Foot Coils.

No. 31 CVD—Sizes	3/8	1/2	5/8 in.
Coils to a box	1	1	1
W't per box	1	1½	2½ lbs.
Per pound	$0.86	.86	.86
No. 31 CVD—Sizes.	3/4	7/8	1 in.
Coils to a box	1	1	1
W't per box	4	5	7 lbs.
Per pound	$0.86	.86	.86

A first quality round rod packing for most exacting steam service, especially with high temperatures and pressures. A heat and oil proof core of rubber, the outer material being non-hardening under heat.

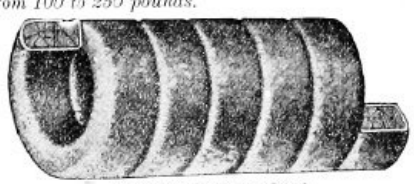
This packing retains its softness and life until worn out.

"OUR VERY BEST."

Diagonal, for High Pressures. In 12 Foot Coils.

No. 32 CVD—Sizes.	3/8	1/2	5/8 in.
Coils to a box	3	2	2
W't per box	6	7¼	10½ lbs.
Per pound	$1.60	1.60	1.60
No. 32 CVD—Sizes.	3/4	7/8	1 in.
Coils to a box	1	1	1
W't per box	7¼	9½	12¼ lbs.
Per pound	$1.60	1.60	1.60

Has a cushion of duck and rubber, and diagonal wedge rings, is designed for use with pressure of from 100 to 250 pounds.



"OUR VERY BEST."

Diagonal, for Low Pressures. In 12 Foot Coils.

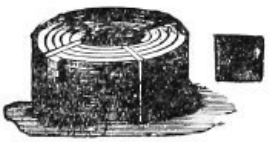
No. 33 CVD—Sizes.	3/8	1/2	5/8 in.
Coils to a box	3	2	2
W't per box	6	7¾	10 lbs.
Per pound	$1.30	1.30	1.30
No. 33 CVD—Sizes.	3/4	7/8	1 in.
Coils to a box	1	1	1
W't per box	7½	9½	12 lbs.
Per pound	$1.30	1.30	1.30

Has a cushion of finest flax, braided, for use with pressures not exceeding 100 pounds. Are well adapted to steam, air, and water service.

"OUR VERY BEST."

Sectional Red Tubular Gasket.

No. 34 CVD—Sizes.	3/8	1/2	5/8 in.
Coils to a box	5	4	3
W't per box	6	9	9¼ lbs.
Per pound	$0.90	.90	.90
No. 34 CVD—Sizes.	3/4	7/8	1 in.
Coils to a box	2	2	1
W't per box	9½	12½	8 lbs.
Per pound	$0.90	.90	.90



"OUR VERY BEST."

Special or Fine Square Duck. In 24 Foot Coils.

No. 36 CVD—Sizes	1-4	5-16	3-8	7-16 in.
W't per Coil	1	1¾	2¼	2¾ lbs.
Per pound	$0.90	.90	.90	.90

No. 36 CVD—Sizes	1-2	9-16	5-8	11-16	3-4 in.
W't per coil	4	4¾	5¾	7¼	8½ lbs.
Per pound	$0.90	.90	.90	.90	.90

No. 36 CVD—Sizes	13-16	7-8	15-16	1 in.
W't per coil	10	11¾	13½	15 lbs.
Per pound	$0.90	.90	.90	.90

A superior quality of packing made of fine duck and white rubber especially designed for hydraulic steam pumps.

Common Square Duck. In 24 Foot Coils.

Sizes	1/4	3/8	1/2	5/8 in.
W't per coil	¾	1¾	3	4¾ lbs.
Per pound	$0.70	.70	.70	.70

Sizes	3/4	7/8	1 in.
W't per coil	6½	9	12 lbs.
Per pound	$0.70	.70	.70

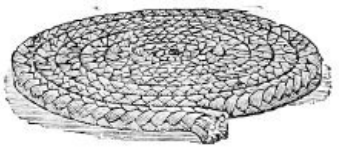
Made of a good grade of dark rubber and canvas, for all ordinary use.

Stranded Hemp, Untarred.

B* American, ¾ in., 7½ ft. to the pound, per pound $0.20

B Italian, ¾ in., 7½ ft. to the pound, per pound .30

ABOUT TWENTY-FIVE POUNDS IN A COIL.



"OUR VERY BEST." Flax.

CVD—Sizes	1/4	3/8	1/2	5/8	3/4	in.
Length per coil	30½	23½	18	15	12¾	ft.
Coils to a box	5	4	3	3	2	
W't per box	7	7¼	7¾	8¾	7¼	lbs.
Per pound	$0.60	.60	.60	.60	.60	

CVD—Sizes	7/8	1	1¼	1½	in.
Length per coil	11	9¼	7	6	ft.
Coils to a box	2	3	2	1	
W't per box	8	7	8	5	lbs.
Per pound	$0.60	.60	.60	.60	

Made from long fibre flax, braided in the most approved and skillful manner, lubricated with the finest quality cake tallow, is largely used on hydraulic elevators, where the work is severe. It is also well adapted for use in the water end of pump.

"REV-O-NOC." Flax.

REVONOC—Sizes	1/4	3/8	1/2	5/8	3/4	in.
Length per coil	30½	23½	18	15	12¾	ft.
Coils to a box	5	4	3	3	2	
W't per box	7	7¼	7¾	8¾	7¼	lbs.
Per pound	$0.45	.45	.45	.45	.45	

REVONOC—Sizes	7/8	1	1¼	1½	in.
Length per coil	11	9¼	7	6	ft.
Coils to a box	2	3	2	1	
W't per box	8	7	8	5	lbs.
Per pound	$0.45	.45	.45	.45	

Lubricated with the finest quality cake tallow, is used quite extensively and found to give very good satisfaction.

'OUR VERY BEST."

Square Spiral. In 12 Foot Coils.

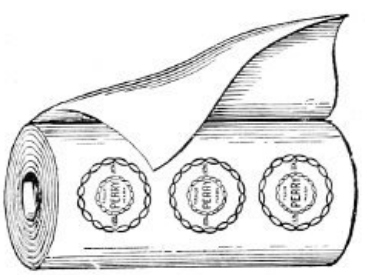
No. 26 CVD—Sizes	1-8	3-16	1-4	5-16	3-8	7-16 in.
W't per box	3/4	½	¾	1	1¼	2½ lbs.
Per pound	$1.20	1.20	1.20	1.20	1.20	1.20

No. 26 CVD—Sizes	1-2	9-16	5-8	11-16	3-4 in.
W't per box	2¾	2¾	4	4	4 lbs.
Per pound	$1.20	1.20	1.20	1.20	1.20

Made of the finest quality linen duck, heavily frictioned and treated (not boiled) with a special compound, graphite finish.

ONE COIL IN A BOX.

SHEET.



"OUR VERY BEST." Red Rubber.

CVD—Thickness	1-16	3-32	1-8 in.
W't per sq. yd	6	9	12 lbs.
Per pound	$1.00	1.00	1.00

Is the highest quality in every respect and equal to any brand manufactured.

Cloth Insertion.

Thickness	1-32	1-16	3-32 in.
Ply	1	1	2
W't per sq. yd	3	6	9 lbs.
Common grade, per pound	$0.25	.25	.25
High grade, "	.40	.40	.40

Thickness	1-8	3-16	1-4 in.
Ply	2	3	4
W't per sq. yd	12	18	25 lbs.
Common grade, per pound	$0.25	.25	.25
High grade, "	.40	.40	.40

Cloth Both Sides.

Thickness	1-32	1-16	3-32 in.
Ply	2	2	3
W't per sq. yd	3	6	9 lbs.
Common grade, per pound	$0.25	.25	.25
High grade, "	.40	.40	.40

Thickness	1-8	3-16	1-4 in.
Ply	3	4	5
W't per sq. yd	12	18	25 lbs.
Common grade, per pound	$0.25	.25	.25
High grade, "	.40	.40	.40

The weights given are the approximate weight of the common grade. High grade, though lighter, is much more desirable on account of the longer service it will give.

LEATHER, RUBBER AND CANVAS BELTING.

LEATHER.

11	86	2.64	2.64		2.64
12	94	2.88	2.88		2.88

"Our Very Best" is made strictly short lap. The pieces are cut not longer than 4 ft. 2 in., and stretched so that they may be in length up to 4 ft. 6 in. Is suitable for any place where any high-grade belt can be used.

Eclipse is made of pure oak leather. This belting is as thick in appearance as **O.V.B** *of the same width. It is used ordinarily in slow running machinery where the load is comparatively easy.*

Standard and Agricultural grades are made from the first and second cuts of the shoulder, will run as straight as pure oak leather, but with much less strength, as thickness would show.

Weights given above are for "Our Very Best" grade. The Eclipse weighs about 10%, the Standard about 20% and the Agricultural about 33⅓% less.

A Rule for Measuring Belting in the Roll.

Add to the diameter of the roll in inches the diameter of the hole in the center of the roll. Multiply this sum by the number of coils in the roll, and this product by 1.32. The three figures on the left represent number of feet in the roll.

This rule applies to any kind of belting, rubber, canvas or leather, and to any ply of belt.

RUBBER ENDLESS THRESHER.

Four Ply.

The Extra is made of 30 oz. duck and the best grade rubber friction.

Amherst is made of 28 oz. duck and a good medium grade of rubber friction. The Standard is a cheaper grade made from 24 oz. duck for light work only.

Weights given above are approximate of the Extra grade. The Amherst about 10%, the Standard about 20% less.

A FULL ROLL OF BELTING MEASURES FROM 400 TO 450 FEET.

A 3 to 9 point belt lacer means 3 to 9 points on a side.

ONE HUNDRED INCHES IN A BOX.

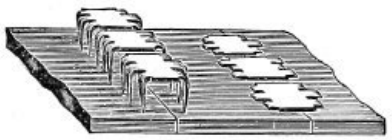
BELT LACING, LACE LEATHER, BELT DRESSING, ETC.

BELT LACING.



STAR, Steel.

No. 00S—For light leather, rubber or cotton belts, $\frac{3}{16}$ to $\frac{1}{4}$ in. thick, $\frac{3}{8}$ to 3 in. wide, w't per 100, $\frac{7}{16}$ lb...per 100 $0.80

No. 0S—For light leather, rubber or cotton belts, $\frac{1}{4}$ to $\frac{3}{16}$ in. thick, $\frac{1}{2}$ to 3 in. wide, w't per 100 $\frac{3}{8}$ lb.....per 100 1.00

No. 1—For single leather, 3 ply rubber or cotton belts, 1 to 5 in. wide, w't per 100 $\frac{3}{4}$ lb.....per 100 1.20

No. 2 —For heavy single or light double leather, 4 ply rubber or cotton belts, 1 to 8 in. wide, w't per 100 $1\frac{3}{8}$ lbs., per 100..... 2.00

No. 3 —For double leather, 4 to 6 ply rubber or cotton belts, 1 to 12 in. wide, w't per 100 $2\frac{1}{4}$ lbs.....per 100 3.40

No. 4 —For heavy double leather, 6 to 8 ply rubber or cotton belts, 1 in. wide and up, w't per 100 $3\frac{7}{8}$ lbs....per 100 5.00

No. 5 —For extra heavy double leather, 6 to 8 ply rubber or cotton belts, $1\frac{1}{2}$ in. wide and up, w't per 100, $6\frac{1}{2}$ lbs., per 100..... 9.00

No. 6 —For extra heavy double leather, rubber or cotton belts, from $\frac{1}{2}$ to $1\frac{1}{4}$ in. thick, $1\frac{1}{2}$ in. wide and up, w't per 100, $10\frac{1}{2}$ lbs.....per 100 12.00

The zigzag principle insures a strong and elastic joint and at the same time will run over the smallest pulley without strain on the belt where the teeth enter.

The eight sizes of the Star cover the entire range from the lightest belt $\frac{3}{8}$ in. wide to the widest heavy double belt, one size being sufficient for all belts of the same thickness.

It is quicker to apply. You can cut your belt and have it running in less time than it takes to punch holes for lacing.

NO. 00, TWO; BALANCE ONE HUNDRED IN A BOX.

"REV-O-NOC," Wire.

No. 20 REVONOC—For belts from 1 to $2\frac{1}{2}$ in., w't per box $\frac{1}{4}$ lb.....per box $0.36

No. 21 REVONOC—For single belts 5 in. and under w't per box $\frac{1}{4}$ lb.....per box .36

No. 22 REVONOC—For all single belts wider than 5 in., also for all double belts under 8 in., w't per box $\frac{3}{8}$ lbs. per box .36

No. 23 REVONOC—For all double belts above 8 in. in width, w't per box $\frac{1}{2}$ lb. per box .36

Is a genuine LX composition wire lacing of silver color. It possesses all the qualifications needed to make it in every respect adapted to the purpose. Its tensile strength being 2000 lbs. it will stand a far greater strain than is even estimated in the driving capacity of a belt.

FIFTY FEET IN A BOX.

LACE LEATHER.

Cut Rawhide.

Rawhide Sides.

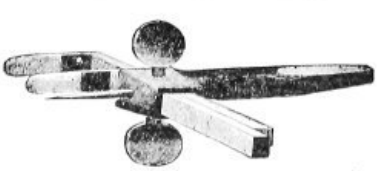
Extra Quality, average size 18 sq. ft. average w't per side 5 to 10 lbs., per square foot..... $0.30

LACE LEATHER CUTTERS.

No. 6—Japanned, adjustable knife to cut $\frac{3}{16}$ to $\frac{3}{4}$ in. wide and any thickness to $\frac{1}{8}$ in., w't per doz. 3 lbs....per dozen $7.50

ONE DOZEN IN A BOX.

WASHER CUTTERS.



No. 350—Extra quality, heavy, polished, with 2 thumb screws, w't per doz. 8 lbs.....per dozen $15.00

HALF DOZEN IN A BOX.

HOT BELT DRESSING.

"REV-O-NOC."

REVONOC—5 lb. Cans.....per pound $0.45

Is not sticky or gummy and dirt will not adhere to it, will preserve and keep the belt soft and pliable, maintaining long life, the most perfect dressing for belts known.

STICK BELT DRESSING.

"REV-O-NOC."

REVONOC—1 lb. Sticks.....per pound $0.50

Made from the grease which is extracted from sheep's wool before woven into cloth, only the pure animal grease is used as it is free from alkalies and acids.

Being in stick form, in a thin cardboard cone, held against the moving belt, the friction melts and spreads, the cardboard removes the dust and prevents the dressing from melting too fast. No waste; no time lost heating. Beneficial to the leather in that it restores the animal fat taken from the hide in the process of tanning.

ONE DOZEN IN A CASE.

BELT CEMENT.

"REV-O-NOC."

REVONOC—1 lb. Cans.....per pound $0.75

Is a new departure in this line owing to its great adhesive qualities, made from the finest gelatines procurable and so condensed that it takes twice the quantity of water to reduce to proper consistency for use. It makes a joint as soft and pliable as any part of the belt. It is quick in solution and will keep in any climate.

ONE DOZEN CANS IN A CASE.

PULLEY COVERING CEMENT.

"REV-O-NOC"

For Iron or Wood Pulleys.

REVONOC—$1\frac{1}{2}$ lb. Cans.....each $2.25

Canvas will not come off, the only satisfactory way to cover a pulley, quick and easy to apply, sufficient to cover ten square feet of surface.

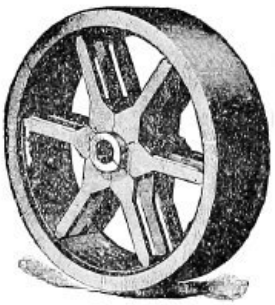
GILBERT WOOD SPLIT PULLEYS.

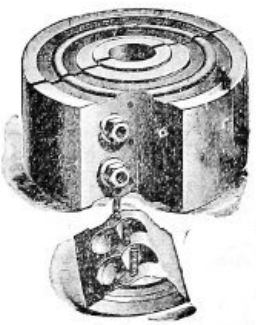


Style "B."

Style "B" Pulley—Made entirely of thoroughly seasoned maple and finished with two coats of shellac varnish. The rim is both nailed and glued.

Each spoke is securely dovetailed into and glued in the rim, and is set in a line running direct from the center of the shaft to the rim—thus affording its utmost support. Every pulley is perfectly balanced and cannot get out of round. They are furnished with the only bushing that gives a perfect bearing on the entire circumference of the shaft. By using different bushings, the same pulley may be made to fit different sizes of shafting. Made in sizes from 12 inches in diameter up. See next page how to order.

Style "C" Pulley—Made entirely of thoroughly seasoned maple and finished with two coats of shellac varnish. It is bolted together—the nuts on the clamping bolts being covered with sectional blocks which cannot get out of place. When putting the pulley on a shaft, all its parts are accessible from the face. By using different bushings, the same pulley may be made to fit different sizes of shafting. Made in sizes from 3 to 12 inches in diameter. See next page how to order.



Style "C."

It has been clearly demonstrated by practical experience that maple presents a better surface than any other wood adaptable for pulleys. It is very hard, close and fine grained. The face of a maple pulley in use soon takes a high polish, which gives more perfect contact to belt, thereby enabling it to transmit the same power with less tension.

Reducing the tension prolongs the life of the belt, and effects a great saving in power by reducing the friction of the journal and the strain on the shafting.

From the way in which they are constructed, Gilbert pulleys cannot get out of round, and must excel all other kinds of wooden pulleys in correctness of balance and trueness of running.

Wooden pulleys, being considerably lighter than iron pulleys, cause less friction of the journal and less strain on the shafting.

These pulleys meet with little atmospheric resistance, as the spokes are set to cut the air, not to fan it and collect dust, as the spokes of many other pulleys do. This makes a greater difference in the power required than is generally supposed.

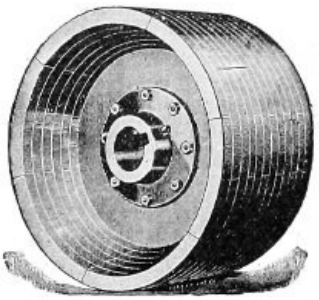
Can be put on or taken off the shaft very easily, simply and quickly. Will withstand a greater degree of heat or of moisture than other wooden pulleys, on account of the material of which they are made and the way in which they are built and finished.

Will also withstand more severe shocks and greater compression than any other pulleys.

They have the only perfect compression shaft fastening. The wood takes a tighter hold on the shaft than set screws do, but, unlike them, does not injure the shaft. On all the pulleys over 14 inches in diameter, plates are used instead of washers for the nuts on hub clamping bolts, thus distributing the compression over the entire length of the hub.

GILBERT WOOD SPLIT PULLEYS.

Style "A."



Style "D."

WE DO NOT LIST STYLES "A" AND "D" PULLEYS, BUT WILL MAIL PRICES AND INFORMATION ON APPLICATION. THESE ARE SHIPPED DIRECT FROM FACTORY.

HOW TO ORDER PULLEYS.

In ordering, please state:
1st, style; 2nd, diameter; 3rd, width of face; 4th, exact size of shaft; 5th, kind of face (crown or flat). **Unless otherwise specified,** crown face will be sent.

No. 6 CVB	17	2¼ lbs.	1.75	17	2¾ lbs.	2.25

These chains are made from hard drawn basic steel wire so that the links are not only alike in appearance but alike in hardness, resulting in uniform strength and durability. They are absolutely rust-proof. The finish has much the appearance of pure aluminum. The rustless coating is put on by packing the chain in air tight cylinders where it is roasted for several hours, making the surface of the metal into a hard rust-proof alloy that cannot be scaled off.

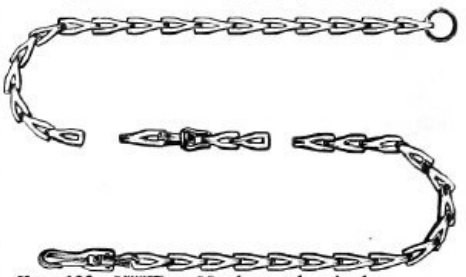
REVONOC TIE-OUT CHAINS

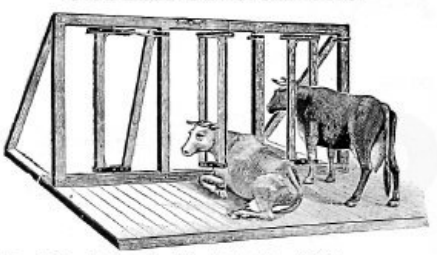


No. 130 REVONOC—30 ft., galvanized, with stake ring, snap and swivel, w't per doz. 51 lbs.....per dozen $16.50

These chains are very heavily dipped galvanized, "not plated."

No. 20—AJAX, 20 ft., polished, with stake, ring, snap and swivel, w't per doz. 30 lbs.....per dozen 9.10
No. 30—AJAX, 30 ft., polished, with stake ring, snap and swivel, w't per doz. 54 lbs.....per dozen 14.50

CATTLE STANCHIONS.



No. 500—Swing, height 4 ft. 4 in., 6½ in. neck space, high carbon angle steel top and bottom cross-pieces, hardwood uprights, steel parts securely bolted to uprights and held in position by malleable iron castings, with latch automatic in operation.....per dozen $25.00

The latch is automatic in operation. It is only necessary to push the right-hand upright into a perpendicular position, when the lock will fall immediately into locking position and the stanchion cannot be unlocked in any way except by the operator.

This swing stanchion not only locks itself shut but it also locks itself open, no springs being used in either case. The stanchion being open to allow the animals to leave the stalls, remains locked open so that they can re-enter, and the stanchion cannot swing until the animal is again locked in it.

★ 1 in.	31,350 lbs.	1,134 lbs.	11.00
★1 1/8 in.	37,500 lbs.	1,484 lbs.	11.00

Tested and certificate furnished. This chain is made of refined and rerolled iron, that is very tough and fibrous, and will stand a tensile strain of 53,800 lbs. to the square inch. Welded with special care and dollied. This chain may be depended upon where strength and durability are required.

CABLE COIL CHAIN.

Special Steel Loading.

DIAMETER, EXACT	PROOF TEST.	AVERAGE W'T PER 100 FT.	PER 100 LBS.
9/32 in.	1,750 lbs.	80 lbs.	$33.00
5/16 in.	2,125 lbs.	100 lbs.	27.00
11/32 in.	3,500 lbs.	129 lbs.	25.00

"Dredge," Dollied and Blacked.

DIAMETER.	PROOF TEST.	AVERAGE W'T PER 100 FT.	PER 100 LBS.
★ 1/2 in.	9,000 lbs.	225 lbs.	$22.00
★ 5/8 in.	13,500 lbs.	453 lbs.	20.00
★ 3/4 in.	18,500 lbs.	637 lbs.	20.00
★ 7/8 in.	25,000 lbs.	910 lbs.	20.00
★ 1 in.	32,850 lbs.	1,134 lbs.	20.00
★1 1/8 in.	39,500 lbs.	1,494 lbs.	18.00

Tested, and certificate furnished. This is the best chain made, the iron used in special or dredge quality is refined and rerolled. It is tough and fibrous, made hard to prevent wearing rapidly. This iron will stand a tensile strain of 54,500 lbs. to the square inch. The welding of special or dredge quality chain is entrusted only to the most experienced workmen. It is carefully inspected, both before and after testing. The tensile or breaking strain is about double the proof strain; safe working load half the proof tests.

Genuine Imported Swedish Iron.

DIAMETER.	PROOF TEST.	AVERAGE W'T PER 100 FT.	PER 100 LBS.

Twist Link, with Ring and Swivel.

Nos.	13	14	14½	15	16
Size.	6½-8-3	6½-10-2	7-8-1	7-10-2	7-10-1
Diameter	7/32	¼	9/32	¼	9/32 in.
W't per pair	5	6	9	7	9¾ lbs.
Per pair	$0.89	1.06	1.25	1.23	1.37

Straight Link, with Hook and Swivel.

No. 24—Size 6½-10-2, diameter ¼ in., w't per pr. 7¾ lbs. ..... per pair $1.06

Mexican Twist Hook.

No. 25—Size 6½-6-3, diameter 7/32 in., w't per pr. 4½ lbs. ..... per pair $0.85

The figures used above designate in a condensed manner the size and length; thus 6½-10-2 is understood to mean 6½ ft. long, 10 links to the foot, No. 2 the wire gauge. Our chains are Western Standard and contain one less link per foot than indicated; thus an 8 link chain has but 7 links per foot. The links on the end are always a trifle longer than in the center.

Electric Welded, Straight Link with Ring, ¼ Inch High Grade Drawn Wire.

No. 104—6½ ft., 10 short links per foot, 8 end-links 2½ in. long, w't per pr. 6½ lbs., per pair $1.25
No. 105—7 ft., 10 short links per foot, 8 end-links 2½ in. long, w't per pr. 7 lbs. " 1.45

These chains are made from ¼ in. exact size high grade drawn steel wire. The short links are 1¼ in. long inside. There are eight end links 2½ in. long. Every chain is tested to 1000 lbs. or 2000 lbs. to the pair.

The chains are guaranteed against defects in material or welds. Defective chains will be replaced or money refunded.

These traces are stronger than No. 1—9/32 or No. 0—5/16 hand welded traces, so that a dealer can cut down his stock and carry but one size, as that will fill all requirements.

HALF TRACE OR BUTT.

Western Standard, Bright, Straight Link with Ring and Malleable Swivel.

No. 44—30 in., 10 links per foot, No. 2 wire gauge, diameter ¼ in., w't per doz. prs. 34 lbs., per dozen pairs $5.75
No. 46—30 in., 10 links per foot, No. 1 wire gauge, diameter 9/32 in., w't per doz. prs. 40 lbs., per dozen pairs 6.50

Western Standard, Bright, Straight Link with Hook and Malleable Swivel.

No. 144—30 in., 10 links per foot, No. 2 wire gauge, diameter ¼ in., w't per doz. prs. 34 lbs., per dozen pairs 6.25
No. 146—30 in., 10 links per foot, No. 1 wire gauge, diameter 9/32 in., w't per doz. prs. 40 lbs., per dozen pairs 7.00

The number of links to the foot and size of wire gauge correspond with the same number of full length trace chains given above.

WAGON STAY.

No. 14—¼ in., black, with hook, length 27 in., w't per doz. prs. 40 lbs. ..... per dozen pairs $4.00
No. 15—5/16 in., black, with hook, length 27 in., w't per doz. prs. 54 lbs. ..... " " 4.50
No. 16—⅜ in., black, with hook, length 30 in., w't per doz. prs. 76 lbs. ..... " " 6.50

STRETCHER.

No. 40—5/8×2½ in., w't per gro. 100 lbs., per gross..... 11.00

CHAIN HOOKS.

Round, Best Quality Soft Steel, Hand Made.

For Chain	1-4	5-16	3-8 in.
W't per gro.	43	84	144 lbs.
Per gross.	$25.00	26.00	29.00
For Chain	**7-16**		**1-2 in.**
W't per gro.	180		216 lbs.
Per gross.	$36.00		38.00

Grab, Best Quality Soft Steel, Hand Made.

For Chain	1-4	5-16	3-8 in.
W't per gro.	43	84	144 lbs.
Per gross.	$25.00	26.00	29.00
For Chain	**7-16**		**1-2 in.**
W't per gro.	180		216 lbs.
Per gross.	$36.00		38.00

The eyes are punched with a hot chisel, thus preserving all the metal and giving the full strength, which is not possible in a cold punched hook, where the metal punched out is lost.

ROUND CHAIN HOOKS are designed to allow the chain to run through the eye as in the loop of a lariat, and permits the chain to be drawn taut. GRAB HOOKS catch the chain between the links to shorten it or to join two chains together.

MALLEABLE "S" WRENCHES.

Ribbed Pattern.

No. 70—Openings 3/8 and ½ in., length 6 in., w't per doz. 3½ lbs.....per dozen $0.35

HALF DOZEN PAIRS IN A BOX.

STEEL SHAFT ENDS.

Japanned, With Nickel Shaft Tips.

No. 10—Buggy size, w't per doz. 19 lbs., per single dozen..... $6.00

No. 20—Surrey size, w't per doz. 22 lbs., per single dozen..... 8.00

For repairing broken shafts, used also on new work to prevent breaking.

How the Shaft Looks When Finished.

This device consists of two thick steel tubes the inner tube having a hickory filler and being pressed into the outer tube in such a way that the shafts will break in any other place than where repaired. It strengthens, and being neatly japanned, gives a leather finish to new and old work and is the quickest and best way of repairing a broken shaft.

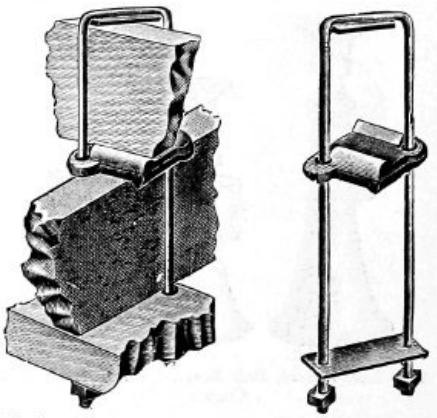
HAY RACK BRACKETS.

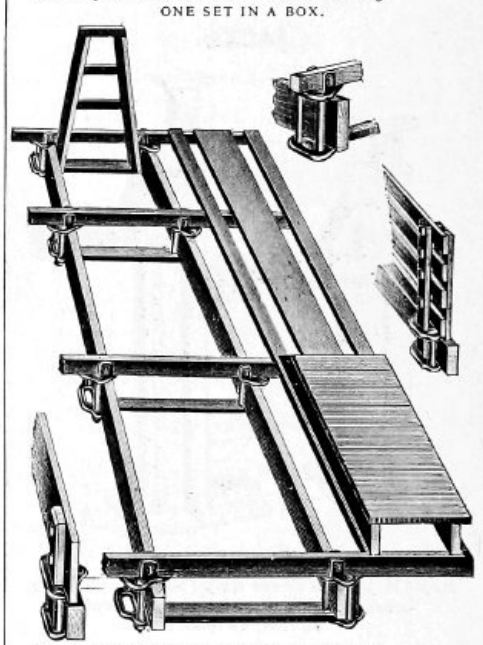


No. 1—Consists of eight 14 in. wrought steel clamps, to clamp 2x4 in., 2x8 in. and 2x4 in., complete with brackets, upper washers, lower clips and nuts, w't per doz. sets 204 lbs. per dozen sets $24.00

No. 2—Consists of eight 16 in. wrought steel clamps, to clamp 2x6 in., 2x8 in. and 2x4 in., complete with brackets, upper washers, lower clips and nuts, w't per doz. sets 222 lbs., per dozen sets 25.20

These brackets make the strongest hay racks, as the wood is not weakened by boring holes for bolts where strength is most essential. By their use lighter material can be used. A hay rack made with these brackets is stronger and much more rigid than one made in the old way.

ONE SET IN A BOX.



No. 5—SWAN'S "4 in 1," malleable iron, 8 top plates with keys, 8 bottom plates, stake loops and rail support fasteners, 24⅜x10½ in. bolts to clamp 2x8 in. timbers, full directions for building with each set, w't per doz. sets 336 lbs., per dozen sets..... $48.00

A wagon bed built with these brackets may easily be converted into a regular wagon box, a hay, wood or hog rack. They are supplied with stake loops and rail support fasteners, which hold the parts firmly and securely in place. A frame constructed with these brackets will not come unfastened.

ONE SET IN A BOX.

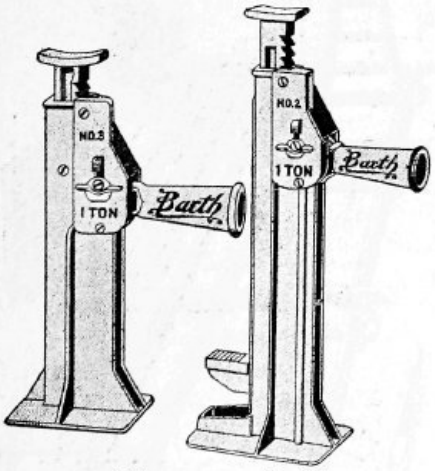
JACKS.



Nos. 03 and 01. No. 02.

BARTH, Highest Grade Malleable Iron, Carefully Selected and Thoroughly Tested, Double Action, Reversible.

No. 03—Height (rack down) 10½ in., rise of rack 7 in., capacity 1 ton, w't per doz. 78 lbs. ..... per dozen $24.00

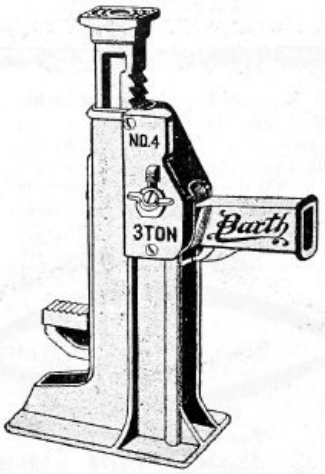
No. 01—Finished with two coats Spartan red enamel, otherwise same as No. 03, w't per doz. 78 lbs.. per dozen 27.00

These jacks are light, durable and strong; adapted for any kind of pleasure cars or light power trucks with low wheels.

No. 02—Height (rack down) 14½ in., rise of rack 11 in., capacity 1 ton, w't per doz. 108 lbs. ..... per dozen $33.00

Designed especially for a wagon jack and an all around farm jack of one ton capacity, also useful for high wheel automobiles.

JACKS.



BARTH, Highest Grade Malleable Iron, Carefully Selected and Thoroughly Tested, Double Action, Reversible.

No. 4—Height (rack down) 14 in., rise of rack 8 in., capacity 3 tons, w't per doz. 240 lbs. ..... per dozen $72.00

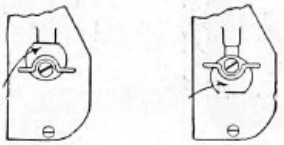
For lifting farm machinery, small traction engines, heavily loaded drays, motor trucks, brewery or coal wagons. An invaluable tool for the progressive thrasherman.

No. 5—Height (rack down) 18 in., rise of rack 11 in., capacity 6 tons, w't per doz. 396 lbs. ..... per dozen $108.00

Especially adapted for heavy traction engines and separators. It is compact and light in weight making it easy to handle.

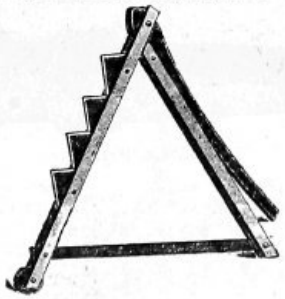
No. 6—Height (rack down) 20 in., rise of rack 12 in., capacity 10 tons, w't per doz. 816 lbs. ..... per dozen $240.00

For use around the heaviest traction engines, ditching machines, for house movers, contractors, mining, transfer and truck companies, or any person engaged in moving heavy machinery.



To Raise. To Lower.

To raise, turn eccentric flat part up.
To lower, turn eccentric flat part down.



MILLER'S, Wagon, Selected Ash, Bolted.

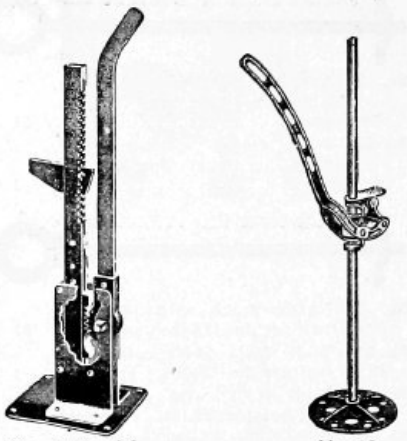
No. 111—1 in., capacity 2,000 lbs., w't per doz. 120 lbs. ..... per dozen $12.00

No. 112—1½ in., capacity 3,000 to 5,000 lbs., w't per doz. 156 lbs., per dozen 18.00

No. 113—2 in., capacity sufficient for use in raising traction engines and other machinery, w't per doz. 180 lbs., per dozen 27.00

HALF DOZEN IN A CRATE.

WAGON JACKS.



Nos. 1, 2 and 3. No. 18.

Japanned Steel, Operated by Compound Levers, Lifting Perpendicularly.

No. 1—Capacity 900 lbs., w't per doz 60 lbs. ..... per dozen $15.00

No. 2—Capacity 1,800 lbs., w't per doz. 125 lbs. ..... per dozen 22.50

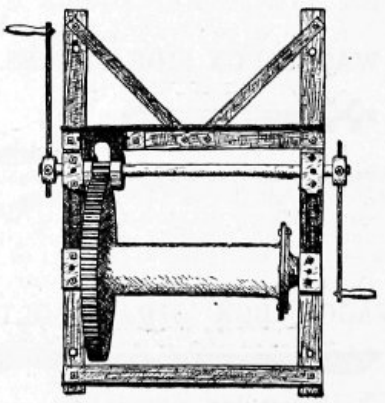
No. 3—Capacity 4,000 lbs., w't per doz. 168 lbs. ..... per dozen 50.00

No. 18—WINNER, 28 in., steel upright, iron base and lever, will lift 800 lbs., w't per doz. 66 lbs. ..... per dozen 18.00

The Winner may be operated entirely with one hand. Wherever stopped there it becomes instantly locked. Loosened instantly by raising the lever to upright position. One full throw will raise the load about 2 in.

HALF DOZEN IN A CRATE.

HOISTING CRANES.



No. 2—Single back geared, 4x14 in. cast winding drum, 1 in. cold rolled steel shaft, 32x24 in. steel frame, adjustable cranks, 1½x16 in. gear wheel, with heavy cogs, 2 in. pinion wheel, with 5 heavy steel teeth, w't 125 lbs., each. $18.00

One man can raise 1,000 lbs., and two men can raise 2,000 with ease. It is a strong, powerful and useful machine for farmers, contractors, hardware men, butchers, creamers, implement and feed stores.

MISCELLANEOUS HARDWARE SUPPLIES.

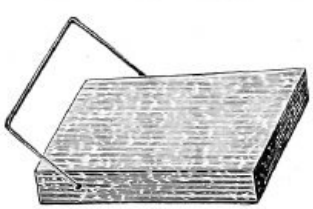
FELLOE OILERS.

No. 3—Galvanized iron, nested 3, 3½, 4 and 4½ in. wide, length 23 in., w't per doz. 18 lbs. ..... per dozen $5.50

No. 2—Cast iron, length 29 in., for ordinary 2 in. tires, w't per doz. 100 lbs. ..... per dozen $9.00

No. 1—Cast iron, length 33 in., for wide tires, w't per doz. 240 lbs., per dozen 18.00

FOOT WARMERS.



Soapstone, with Wire Bail.

Nos.	2	3	4	5
Size	7x9	8x10	8x12	10x12 in.
W't per doz.	100	125	150	175 lbs.
Per dozen	$4.37	5.00	5.62	6.25

ONE DOZEN IN A CRATE.

MECHANICS' AND HARDWARE MEN'S SOAP.

Wenzelmanns', made from pure vegetable oils, in bars weighing about ½ lb., w't per box 12 lbs., per box of 25 bars. $3.00

Removes stove polish, paint, oil and hardware dirt in general. Good for cleaning cases and windows.

Contains less lye than other soaps, is a mild but quick cleanser, has a healing effect on the skin, leaving it soft. Lathers freely in either hard or soft water.

Goes twice as far as other soap. Prepared especially for busy people, hardware men, printers, miners, plumbers, engineers, painters, foundrymen, railroadmen, tinners, carpenters, mechanics, blacksmiths, farmers and all who get dirty hands.

WE DO NOT BREAK BOXES.

AXLE GREASE.

In Boxes.

Hub Lightning	per gross	$ 7.50

ONE THIRD GROSS IN A CASE. WEIGHT 75 LBS. PER CASE.

AXLE GREASE.

"OUR VERY BEST" Graphite, in Lithographed Tin Cans.

1 lb., one third gross cans in a case, w't per case 70 lbs. ..... per gross $16.00

3 lb., two dozen cans in a case, w't per case 90 lbs. ..... per gross 38.00

It is made from pure lubricating oils, contains no lumps, and has great wearing qualities. This grease contains a large percentage of graphite, which is unsurpassed as a lubricant. It will not run or gum, and is not affected by heat or cold. It is adapted for light and heavy wagons, drays and farm machinery. The graphite adheres to the spindle and prevents the grease from running.

The engraving on the left shows the complete point with gauze and jacket on; the one on the right shows the point punched with elliptical holes before the gauze is put on. These points have the holes punched a uniform distance apart, are galvanized outside and in after the holes are punched, are, therefore, non-corrosive.

"STAR POINTER" FORCE PUMPS.

Satisfactory Results Guaranteed.

Such is our confidence in the ability of "Star Pointer" Pumps to satisfy under any and all conditions of the farm or village that we guarantee them absolutely satisfactory.

In buying a pump the following vital points should be taken into consideration:

1. Quantity of water to be handled.
2. The amount of power necessary to operate.
3. The pump should be capable of delivering water to elevated position whether this point is near or distant.
4. Depth of water from surface and ability of pump to receive and deliver it with a minimum of exertion.
5. Possibility of using a hose nozzle without the necessity of using a small supply cylinder but a cylinder of satisfactory capacity.
6. The power required should not be beyond that of the ordinary daily wind.

Star Pointer Pumps will prove satisfactory not only in the results obtained but in ease of operation. More water can be moved with less exertion or power than with any other pump made. We have found by actual tests that our power pump will operate with one horse power under conditions that require three to four horse power with others.

They will permit a greater plunger load and deliver water at a greater distance and a higher elevation with less exertion or power than any other. When the water is confined within the pump for the purpose of causing force or velocity, it creates a pressure in the pump and the operator is lifting water against pressure which requires more and more exertion with each stroke of the handle to overcome.

Star Pointer Pumps discharging water through a nozzle or line of pipe do not cause the water to be confined between the upper pipe or cylinder to give force or velocity of the water. The water is discharged from the pump as rapidly as supplied by the cylinder, hence no surplus of water is allowed to stand in the pump or in the lift pipe supplying the cylinder; thus, only the actual weight of water in the connecting pipe from the cylinder to chamber is to be overcome. This makes it possible to use greater capacity cylinder, also to place cylinder at a greater depth.

Other force pumps confine water between the pump and lower cylinder in order to obtain force or velocity. Under this condition, the greater the diameter of cylinder and lower the depth the cylinder might be placed, increases the plunger load, making it impossible to use hose and nozzle or permit water to be carried to an elevation on account of the enormous power that would be necessary.

By actual test with a power gauge attached to a pump equipped with a 3½ inch cylinder and ⅜ inch discharge port, the handle being operated at the rate of sixty 6 inch strokes per minute, no pressure was indicated, showing that the water was discharged as rapidly as it entered the pump. Under these conditions, the same velocity was obtained that would have been had 50 lbs. hydraulic pressure been used. With a ¾ inch hose and full opening a ten foot stream was obtained, without any pressure being indicated. With the discharge port of 3/16 inch and water traveling 58 feet from end of nozzle, a pressure of only 15 lbs. was shown.

These tests were made with a pump taken from stock and not one chosen for this particular purpose.

Pump manufacturers generally specify the use of a certain diameter of cylinders for various depths of wells. They also specify the use of small diameter of cylinders regardless of depth of wells where windmill power is used.

We do not specify small cylinders for deep wells but do advise the use of *large* ones. This means quantity of flow without increased effort. Cylinders of different dimensions are listed which are used under a pump of the same size and construction, as the pump itself will handle the water supplied by the larger cylinders. We list the different cylinders to suit the requirements of wells of different bores from 2½ inches and larger.

We do not hesitate to make our guarantee broad. All Star Pointer Pumps are sold on their merits. All we ask is that the pump be properly set with pipe connections right, and that the well have sufficient quantity of water in it.

Thousands of Star Pointer Pumps sold on these conditions are still giving satisfaction and none has been returned. They are an easy lift pump in addition to a force pump of great power. Where they are known it is the experience of dealers that the public will have no other. A pump being a necessity the one that satisfied all users is a trade maker, and a credit to the dealer.

Directions for Setting Pumps.

The Star Pointer Pumps are placed in the well the same as all lift pumps having a detached cylinder. We ship pump with cylinder attached All necessary pipe and rod can be furnished by us if so desired. We suggest that the cylinder be placed within 10 or 15 feet of the water. In shallow wells a set length can be made of this pump and can be so shipped by us, if so orderded.

The cut will show how to determine the length of pipe and rod necessary for pump in any well. Length of cylinder used in these figures is 10 inch; caps included make 14 inches over all, therefore if longer cylinders are used, deduct the additional length and use that figure in computing.

HOW TO ASCERTAIN LENGTH OF PIPE AND ROD REQUIRED FOR PUMP.

All Star Pointer pumps extend 4½ ft. below the platform, consequently this should be deducted from the depth of the well. The cylinder is 14 in. long and as the pipe should not extend closer than 1 ft. from the bottom of the well so that 6½ feet can be deducted from the distance from the platform to the bottom of the well, which would give the required amount of pipe. The cylinder can be placed anywhere within the vacuum limit, which is 27 or 28 ft., but in practice it is best to place it about 15 ft. above the average surface of the water. The rod (3-8 or 7-16 in.) necessary can be ascertained by deducting the length of pipe below the cylinder from the total length of pipe required.

EXAMPLE—To find the quantity of pipe and rod necessary for a well 75 ft. deep, containing 3 ft. of water: See illustration at left of page.

From 75 ft., the depth from platform to bottom of well, deduct the following: 4½ ft., distance from platform to bottom of pump; 14 in., total length of cylinder; 1 ft. distance from bottom of well to lower end of suction pipe; giving total of 6 ft. 8 in. to be deducted, leaving 68 ft. 4 in., amount of pipe needed.

Deduct from 68 ft. 4 in. (quantity of pipe required) 17 ft. (length of suction pipe), leaving 51 ft. 4 in., amount of rod required.

"STAR POINTER" FORCE PUMPS.

(See page 653 for General Description.)

Satisfactory Results Guaranteed.

No. 205.

Hand Power, Double Acting, Anti-Freezing. For Deep or Shallow Wells.

This is a hand force pump of excellent design and the best seller on the market, built on a most up-to-date scientific principle which makes it possible for us to supply a pump that fills a long felt want. Every user of this pump becomes an everlasting friend and causes the Star Pointer to be the prevailing pump in the community. It is *used as a lift pump or for forceing water through a hose, with less effort* than any other pump on the market.

Children eight years old have operated this pump where cylinders were down 150 feet.

It is provided with upper and lower brass cylinders, so that the flow is divided between the upward and downward strokes of the handle. The water filling the upper cylinder and not discharged from the spout on down stroke of handle, is discharged on the up stroke, giving an even steady flow from the spout.

The relative sizes of lower and upper cylinder can be proper for the reason that the upstroke of the handle is easy as well as the downstroke, making it the easiest pump to operate in deep or shallow wells even with the use of hose. The discharge pipe is 1 inch in diameter, the air chamber is 1¼ inches in diameter and of ample length.

The base being adjustable, the distance between the spout and platform can be increased to suit conditions.

Where the opening in the well is less than 8 inches, a well pit must be provided for. (For 6 inch cased well see page 654A, No. 500.)

The materials used are the very best grey and malleable iron castings, steel rods, heavy seamless brass tubing and high class workmanship. From base to bottom of chamber is 4½ ft.; from base to spout 21 in. Painted maroon color and neatly striped with gold.

	SIZE	UPPER CYLINDER	LOWER CYLINDER	SUCTION PIPE	STROKE	TAPPED FOR LEAD PIPE	SHIPPING W'T	EACH

Pump Standard only, tapped for 1¼-in. pipe..... each 14.00

We furnish cylinder 12 in. long without extra charge when specified.

Where set length is wanted specify in order, no extra charge.

The pump is provided with 3-8 inch rod coupling, 7-16 inch coupling furnished if preferred.

Windmill or Hand Power, Double Acting, with Three-Way Valve, Anti-Freezing, Steady Flow.

No. 305.

These pumps are designed to be used with windmill, gasoline engine or hand power. Any eight-foot windmill will operate this pump in a light wind, bringing the water from deep well to elevated tank at any distance. They work so easy by hand that you are independent of your windmill in case of accident.

The water is discharged as rapidly as supplied by each stroke, consequently no surplus of water is created in the pump, to obtain a force of the water, thus power is not increased in forcing water through one inch underground pipe to elevated or distantly located tanks. Stream being even and steady, no back pressure or pounding is created in pipe or pump.

Satisfactory results are guaranteed with three-inch cylinder under any eight-foot windmill in wells where water stands 100 feet or more from the surface. In the average well we recommend the use of 3½-inch cylinder, which means water in satisfactory quantities for stock purposes.

This pump is handsome and symmetrical in design. They are set the same as any three-way or lift pump. All parts are made extra heavy at such points where the greatest strain would be brought to bear, giving a pump of light appearance but of sufficient strength to withstand all abuse that it might be subjected to, worked by power or for deep well.

The upper cylinder is screwed tightly into a flange which is bolted securely to the chamber of the pump, these are interchangeable in size, so any size can be used to suit size of lower cylinder. By removing the two bolts, cylinder can be removed in replacing the valve, without removing pump from well. The three-way lever is provided with roller bearing, thus avoiding sticking from rust or sleet.

All three-way seats are brass, thus insuring a long life to the rubber three-way valve. The flat rod is of steel and extra long, thus giving a stiff, straight stroke. All material is of the very best, all light parts are malleable iron, painted maroon and neatly striped with gold.

Elbow connection to underground pipe is of heavy malleable iron, of sufficient strength to withstand the strain where the ground under the platform settles. If stroke longer than 10 inch is wanted, upper and lower cylinders can be supplied to suit condition at slight additional cost.

Where opening in well is less than 8 in., a well pit must be provided for. (For 6 in. cased wells, see page 654A, No. 600.)

No. 500.

Double Acting, Hand Power, for 6-Inch Cased Wells, Anti-Freezing.

(Internal Bore, 5⅝ in.)

Used as a lift pump or for forcing water through hose, it operates with less effort than any other pump on the market. It is of excellent design, built on scientific principles, and fills a long felt want. It is built to be used in 6-inch cased wells, where internal diameter of casing is 5⅝ inches, allowing casing to come flush with platform or base of pump.

It is provided with adjustable base, which admits of increasing distance between platform and spout so as to suit any condition.

It is provided with upper and lower brass cylinders, so that the flow is divided between the upward and downward strokes of the handle. The water filling the upper cylinder and not discharged from the spout on down stroke of handle, is discharged on the up stroke, giving an even steady flow from the spout. The discharge pipe is 1 inch in diameter, the air chamber is 1¼ inches in diameter and of ample length.

The materials used are the very best grey and malleable iron castings, steel rods, heavy seamless brass tubing and high class workmanship. From base to bottom of chamber is 4½ feet; from base to spout 21 inches. Painted maroon color and neatly striped with gold.

Pump Standard only, tapped for 1¼ in. pipe.....each $12.00

The pump is provided with 3-8 inch rod coupling, 7-16 inch coupling furnished if preferred.

Double Acting, Windmill or Hand Power, for 6-inch Cased Wells, Without Three-Way Valve, Anti-Freezing.

(Internal Bore, 5⅝ in.)

This is a double acting, anti-freezing force pump, for use with wind mill, gasoline engine or hand power, giving a steady even flow.

Any eight-foot windmill will operate this pump in a light wind, bringing the water from deep well to elevated tank at any distance.

These pumps are set the same as any three way or lift pump. The water is discharged as rapidly as supplied by each stroke, consequently no surplus of water is created in the pump, to obtain a force of the water, thus power is not increased in forcing water through one inch underground pipe to elevated or distantly located tanks. Stream being even and steady, no back pressure or pounding is created in pipe or pump.

The manufacturer guarantees satisfactory results with three inch cylinder under any eight foot windmill in wells where water stands 100 feet or more from the surface. In the average well we recommend the use of 3½-inch cylinder, which means water in satisfactory quantities for stock purposes. These pumps work so easy by hand that you are independent of your windmill in case of accident.

This pump is handsome and symmetrical in design. All parts are made extra heavy at such points where the greatest strain would be brought to bear, giving a pump of light appearance but of sufficient strength to withstand all abuse that it might be subjected to, worked by power or for deep well.

The upper cylinder is screwed tightly into a flange which is bolted securely to the chamber of the pump. These are interchangeable in size, so any size can be used to suit size of lower cylinder. By removing the two bolts, cylinder can be removed in replacing the valve, without removing pump from well.

The flat rod is of steel and extra long, thus giving a stiff, straight stroke. All material is of the very best, all light parts are malleable iron, painted maroon color and striped in gold.

No. 387.

Hydraulic Windmill Regulator, Windmill or Hand Power, with Three-Way Valve and Hose Attachment.

With this regulator pump a water works system can be installed on any farm at the small expense of laying pipes. Have tanks located at points where needed, keep your windmill oiled and bolted up and the Star Pointer Regulator will keep tanks full. A float valve is required in each tank to prevent overflow. One pump and windmill will do the work of many. Plans for pipe system furnished on application.

This pump is specially designed for windmill use, but can be operated by hand. It is large, heavy and strong, built for extremely hard work. The hydraulic features are all placed below the platform protected from the weather and cattle. No levers used. The furl wire line of draft is direct from the hydraulic cylinder to the lever of the vane of the windmill, doing away with complicated devices which require excessive pressure in hydraulic cylinder, to overcome the slight resistance in pulling mill out of gear.

As this pump is easily operated by hand, it requires but little power of the windmill. The mill will go out of sail and into sail in extremely light wind, at the same time will operate when the wind is heavy. Simple of construction, positive in operation and can be depended upon, either for direct stroke or geared mill, large or small. The pump is regularly tapped for 1¼ inch pipe; if wanted for 2 inch tubular well it is tapped for 2 inch pipe. In this instance, base is arranged for the withdrawal of plunger and valve without removing pump from well.

The construction of this pump is identical with that of our No. 305 and is as easily operated in deep wells.

The hydraulic cylinder is fitted for the average mill requiring up to fifteen inches of travel of furl wire to pull mill out of sail. If greater travel of wire is required, so specify and it will be supplied at slight additional cost.

Made of best materials, painted maroon with gold stripes.

Tapped regularly with 1¼ in. lead pipe, 2 in. furnished if preferred.

For mills requiring 16 to 20 in. of wire travel add to list $1.00. For 20 to 24 in. of wire travel add to list $2.50.

Connecting rod coupling 3-8 inch, larger size furnished if desired.

Pump Standard only, tapped for 1¼ in. pipe. . . . . each $23.00

Hydraulic Regulator, Windmill or Hand Power.

Perfectly controllable in any wind.

A child can operate it as a hand pump.

The No. 400 regulating pump is of the same construction for pumping as our Nos. 305 or 387. The feature of this pump is in our new style regulator as cut shows. Chain weight and sheave are dispensed with.

There is no adjustment of levers or weights, the travel of lever will cause the furl wire to be drawn up to 28 inches, thus taking care of all makes of windmills, even those requiring a reel, where levers could not be used on account of extreme length necessary.

Any one can place this pump, as the setting is identical with setting of common lift pump. The furl wire passing down through platform at side of base of pump is attached to lever of regulator. Throw windmill to the wind and when tanks are filled the hydraulic cylinder will automatically pull mill out of sail whether the travel of wire be 7 inches or up to 28 inches. Tank must be fitted with float valve to prevent overflow.

The most simply constructed hydraulic regulator on the market.

No. 705.

Windmill or Hand Power, Double Acting, Anti-Freezing, for 2 Inch Tubular or Driven Wells.

These pumps are designed to be used with windmill, gasoline engine or hand power, for any depth of well.

It has all the essential efficient features of our No. 305 and is designed for the removal of the valves and rod from the well pipe without removing the pump head from the well.

By removing the segment in base and upper cylinder from the pump standard you can draw from the well the rod with valves attached up through the base of the pump, making it a quick and easy matter of repairing.

SIZE.	UPPER CYLINDER	STROKE	SUCTION PIPE	SHIPPING W'T.	EACH
No. 705—2 with three-way valve..	1¼× 8 in.	6 in.	2 in.	100 lbs.	$15.50
No. 705—6 with three-way valve..	1¼×12 in.	10 in.	2 in.	100 lbs.	16.00
No. 705—2 without three-way valve	1¼× 8 in.	6 in.	2 in.	100 lbs.	13.50
No. 705—6 without three-way valve	1¼×12 in.	10 in.	2 in.	100 lbs.	14.00

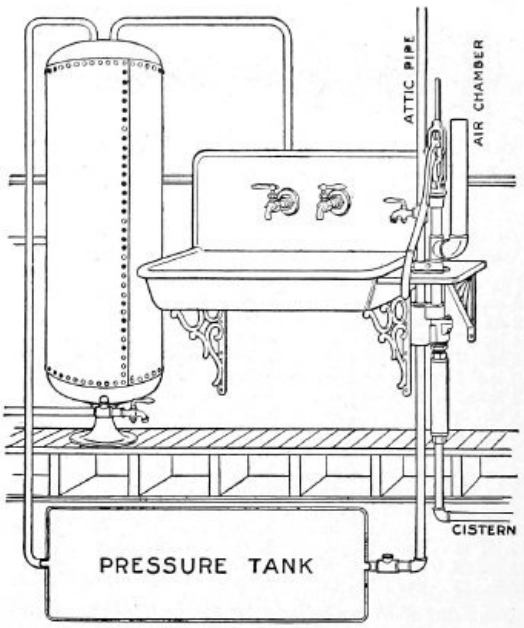
If cylinder or valves are wanted with pump add the following list to the above:

Two leather pappet plungers, with vail top pappet check, Eureka cylinder, 2 in., 12 in. stroke.....each $4.00

Without three way valve deduct $2.00.

The style of cylinder used would be the Eureka, a segment pipe cylinder, on tubular well valves.

Specify style of coupling wanted for wood or steel rod. If not specified, 3-8 inch steel rod coupling will be shipped.



Double Acting, for Kitchen, Basement or Laundry.

For forcing water into tank in attic or by use of pressure tank, force water through an ordinary pipe system through the house. Water can be taken from cistern or well, either or both, same may be located at a distance from house, providing the water in well stands within 28 feet from base of pump. (These pumps have been used where the source of water was 470 feet from pump on a level. Suction pipe 1¼ inches.)

A child can pump water to attic tank with capacity of 10 barrels at an elevation of 100 feet (if necessary) in forty minutes with little effort With pressure tank, fifty pounds pressure can be obtained very easily. This pressure will cause water to be discharged from a faucet at an elevation 100 feet. Fifteen pounds pressure will cause water to flow from faucet at 33 feet elevation. This is far in excess of actual conditions in the average house.

This pump will give you the advantages of bath room and all accessories. Illustration shows the pump located beside a sink in a kitchen with a range boiler. Note the pipe extending upward marked attic pipe. This pipe is the one that would be used if tank were located in the attic. The faucet as shown on pump over sink is where the water would be discharged from well or cistern if water was not taken from tank. A hose could be placed upon this connection and used in case of fire.

Cut also shows pressure tank attached to ceiling of cellar under kitchen. This tank could be placed at any place desirable, as water from it would be forced to any part of premises so piped. Any size tank can be used; same governed by demand for water. When pressure tank is used, the attic pipe is not necessary. This pump is constructed on the same lines as our hand and power pump, and has all the forcing qualities with a limited effort required to operate. Is double acting. From base to bottom of suction cylinder is 28 inches, base is 6½ inches wide and 8 inches long in direction of handle. The spout is 6 inches above base of pump.

To repair this pump remove pin from connecting rod to handle, then remove lower cap of cylinder and the rod with all valves can be taken from pump. We furnish this pump in either white or maroon enamels, neatly striped in gold. White finish will be shipped unless otherwise specified. It is extremely ornamental in design and noiseless in operation

No. 800—Complete with 3 -inch cylinder, w't 60 lbs.....each $17.00
No. 800—Complete with 3½-inch cylinder, w't 60 lbs..... " 18.00

One pump can be connected with well and cistern and water drawn from either by placing a shut off valve in each suction pipe.

Use 2 inch flush cap cylinder for 2½ inch inside well casing. Use 2½ inch flush cap cylinder for 3 inch inside well casing. Use 3 inch flush cap cylinder for 3½ inch inside well casing. Use 3½ inch flush cap cylinder for 4 inch inside well casing.

When style of cap is not specified, we ship 2 and 2½ inch flush, 3 and 3½ inch full.

These cylinders are carefully made of materials that are calculated to give the best possible service. Satisfactory results are fully guaranteed and a single trial will convince the user of their superiority. We have absolute confidence in these cylinders and recommend them as the best on the market.

The plungers are so constructed that leather valves are not bent in operation, but move up and down with valve weight, thus clearing all ports in seat. Sand hardening will not prevent the use of these leathers.

All strokes are full, no possibility of blank or partial strokes.

The valve being limited in angle and alignment with the plunger rod it cannot be thrown out of position or stick by constant usage. The cup leather retains its original shape, lasting for a long time, its only wear being on the side in contact with the smooth barrel of cylinder. Seats are made of leather, valves of rubber and cannot corrode or gum as all seats of either brass or iron do, causing destruction of valve.

Spider of brass provided with ring striker instead of lugs, prevents any possibility of sticking.

The seating is positive and the cylinder always kept trimed.

Note special low lists on cylinders.

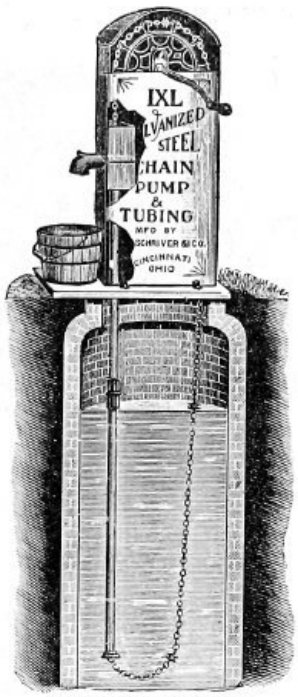
WELL CURBS, PUMP PLATFORMS AND TUBING.

WELL CURBS.

No. 20.



Showing No. 30 in Use.

Galvanized Steel, Painted and Varnished.

No. 20—GEM, made of 4 pieces of steel, height 36 in., diameter 14½ in., extension base 8×16 in., spout 1¾×6½ in., 10 fork roller wheel, diameter 10½ in., w't packed 27 lbs.....each $3.25

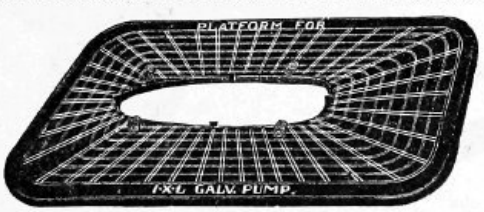
No. 30—IXL, made of 3 pieces of steel, height 40 in., diameter 16 in., base 9×17 in., spout 1¾×6¾ in., 10 fork roller wheel, diameter 12 in., w't packed 40 lbs.....each 4.75

Covered with two coats of paint and varnished. Will not rot, rust, warp or fall to pieces. No rivets or solder used in construction. All parts securely locked by seams and will not come apart.

PUMP PLATFORMS.

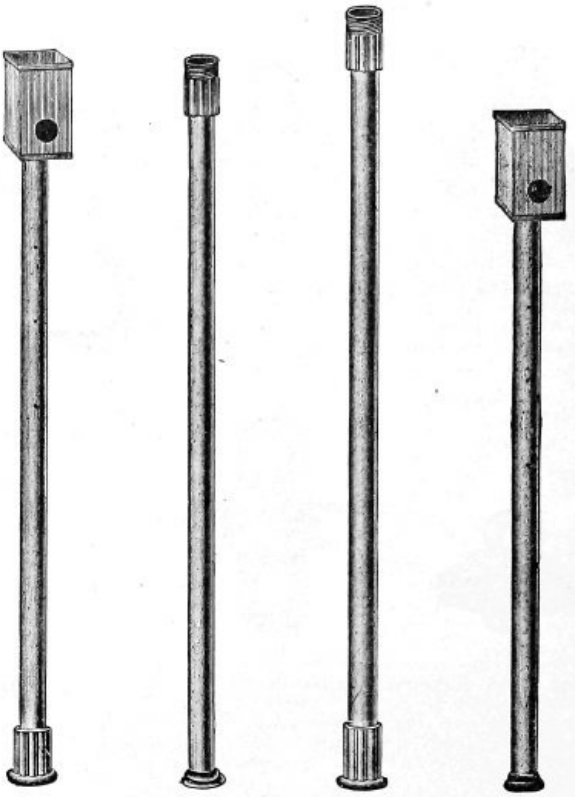
No. 21—12½×20 in., cast iron, japanned, for Gem pumps, w't 9 lbs.....each $1.25

No. 35—29x31 in., cast iron, japanned, for Gem pumps, w't 48 lbs.....each $5.00



No. 31—33×35 in., cast iron, japanned, for IXL pumps, w't 80 lbs., each..... $7.00

IXL PUMP TUBING.



No. 33. No. 34. No. 35. No. 36.

42 Gauge Galvanized Steel, Adapted to all Well Curbs.

No. 33—Reservoir, with half coupling, 5, 6, 7, 8, 9 and 10 ft. lengths, to be used in connection with funnel tubing in wells from 10 to 19 ft. deep.....per foot $0.11

No. 34—Funnel, with half coupling, 6, 8 and 10 ft. lengths, to be used in connection with reservoir tubing in wells from 10 to 19 ft. deep.....per foot .11

No. 35—Plain, with half coupling on each end to connect ends of Nos. 33 and 34 respectively, 8 and 10 ft., used in wells deeper than 19 ft. to lengthen reservoir and funnel tubing to required depth.....per foot .11

No. 36—Reservoir with funnel, 9 to 10 ft. lengths, to be used without couplings in wells 8 and 9 ft. deep.....per foot .11

Leaves the water clear and pure, will not rust, rot, or accumulate filth, never freezes. Weighs only ½ lb. to the foot and can be used in wells as deep as 40 ft. Can be used with any style of pump curb, wood or iron, as the stirrup on all other curbs will fit the square reservoir box.

To get proper length of tubing for cistern, add 1 ft. to depth of cistern from platform to bottom. This will give proper allowance for tubing in curb and the right distance it should hang from bottom.

PRICE PER FOOT DOES NOT INCLUDE COUPLINGS.

Showing Couplings and Method of Attaching.

No. 38—Extra couplings for connecting IXL tubing.....per pair $0.25

Cast Iron, Improved Waste Connection.

No. 58—Inches,	16x24	16x28	16x30	18x30	18x36	20x30	20x36
Weight,	25	28	33	35	39	36	44 lbs.
Each,	$6.50	7.50	7.75	8.50	9.50	9.00	10.50

When the waste pipe requires forcing out, or repairs are needed, the strainer can be quickly and easily detached, without disturbing the joint between waste pipe and sink. The strainer bolts have brass nuts at bottom to avoid setting with rust. The waste pipe is connected with the collar, the strainer being separately fastened. With most sinks, when the waste pipe requires forcing out it is necessary to disconnect the pipe and draw it and the tap out of the door of the casing below, thus injuring the pipe and trap. Frequently the bolts have to be cut off; in consequence the collars are often broken and sometimes the sink.

SINK COUPLINGS.

For Iron Pipe.

No. 1—Cast iron, for 1¼ in. pipe, w't 8 lbs., - each $0.50

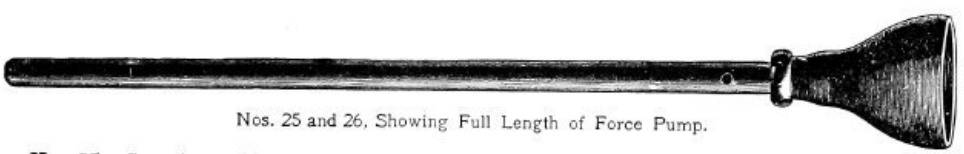
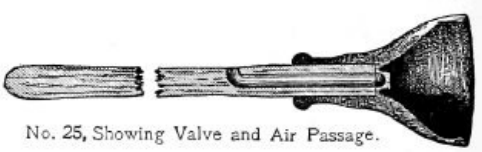
HANDY FORCE PUMPS.



Nos. 25 and 26, Showing Full Length of Force Pump.

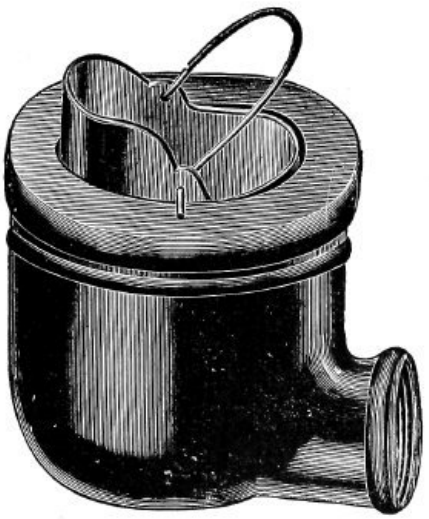


No. 25, Showing Valve and Air Passage.

No. 25—Seamless rubber cup, 4 in. in diameter, long handle, with valve, weight per dozen 30 lbs., - - - per dozen $24.00
No. 26—Seamless rubber cup, 4 in. in diameter, long handle, without valve, weight per dozen 30 lbs., - - - " 18.00

The Handy force pump has demonstrated its practicability and extreme usefulness. It is one of those very simple inventions which have revolutionized previous methods. It is a standard tool for the plumber, hotel and flat owner, and should be in every house where running water is used. It will clean the trap of any sink, wash bowl, urinal or closet in a minute, and used occasionally keeps traps clean and prevents sewer gas and sickness.

SWIVEL WATER CONDUCTORS.



No. 100—Cast iron, japanned, swivel with wire loop, can be attached to any iron pump spout, threaded for 1¼, 1½ or 2 in. pipe, w't per doz. 48 lbs., - - per dozen $6.00

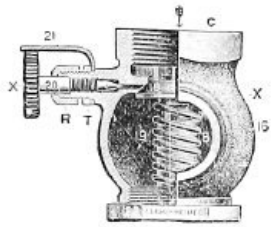
Size,	3½	4	★4½	★5	★6 in.
Weight,	1⅜	2½	3	4	5½ lbs.
Each,	$3.50	4.00	5.00	6.00	7.00

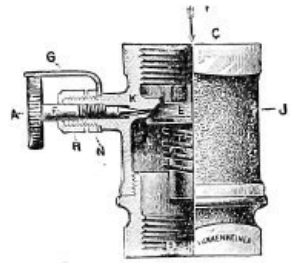
No screws or rivets, made of best material, light, strong and simple. Cutters arranged so as to be always in direct contact with the metal of the flues, will override any irregularities of the tubes such as blisters and welds. The blades have a long shearing cut with a tendency like a plane to work in deeper, which keeps the knives always sharp. The size given is the outside diameter of the boiler flue for which the cleaner is intended, all boiler flues being designated by the outside diameter.
★*Special sizes not carried in stock, but made to order only.*

LUNKENHEIMER GENERATOR VALVES.



Plain Angle Pattern, for Two Port Two Cycle Gasoline Engines Only, Brass.

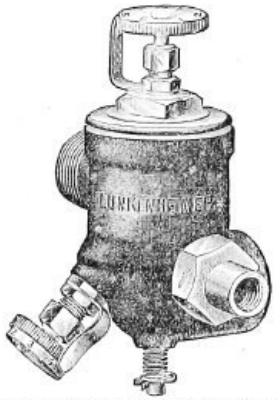
No. 779—Pipe connection	½	¾	1 in.
Inlets tapped for pipe	⅛	¼	¼ in.
Each	$2.60	3.30	4.00
No. 779—Pipe connection	1¼	1½	2 in.
Inlets tapped for pipe	¼	¼	¼ in.
Each	$4.80	6.00	7.50



Plain Vertical Pattern, for Two Port Two Cycle Gasoline Engines, Brass.

No. 780—Pipe connection	½	¾	1 in.
Inlets tapped for pipe	⅛	¼	¼ in.
Each	$2.60	3.30	4.00
No. 780—Pipe connection	1¼	1½	2 in.
Inlets tapped for pipe	¼	¼	¼ in.
Each	$4.80	6.00	7.50

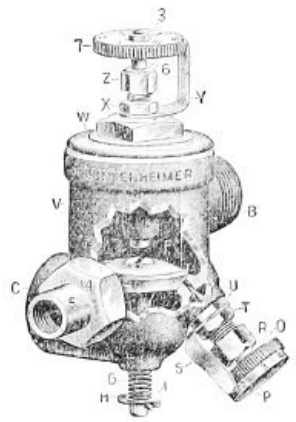
The plain pattern valves illustrated above are the original and simplest forms of generator valves. Although they do not contain the improvements of the "Nonpareil" valves they are nevertheless well made and reliable.



"NONPAREIL," Type B, Right Hand, with Regulation for Lift of Disc, No Throttle Valve, for Gasoline Engines, Brass.

No. 79—Size	½	¾	1 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$4.25	5.25	6.25
No. 79—Size	1¼	1½	2 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$7.75	9.40	14.00

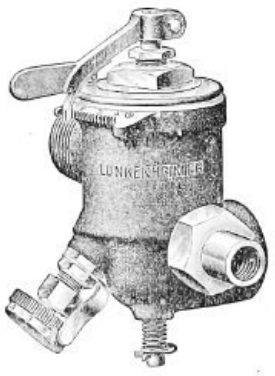
These valves are provided with an adjusting stem to control the lift of the disc, thus regulating the quantity of air drawn into the engine. (See general description at bottom of first column, page 660.)



"NONPAREIL," Type B, Left Hand, with Regulation for Lift of Disc, No Throttle Valve, for Gasoline Engines, Brass.

No. 78—Size	½	¾	1 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$4.25	5.25	6.25
No. 78—Size	1¼	1½	2 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$7.75	9.40	14.00

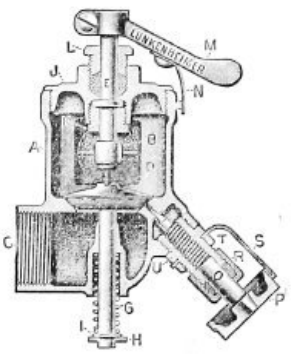
These valves are the same in construction as the No. 79, except that they are left hand. (See general description at bottom of first column, page 660.)



"NONPAREIL," Type A, Right Hand, with Sliding Throttle Controlling the Outlet Passage, No Regulation for Lift of Disc, for Gasoline Engines, Brass.

No. 81—Size	½	¾	1 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$5.00	6.25	7.50
No. 81—Size	1¼	1½	2 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$9.00	11.20	15.90

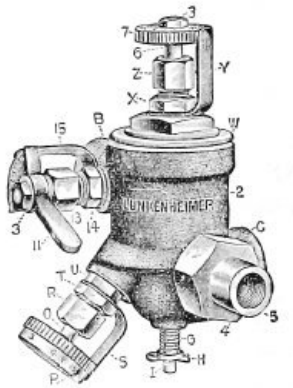
The special feature of this valve is the revolving throttle for controlling the speed of the engine by regulating the supply of mixture. (See general description at bottom of first column, page 660.)



"NONPAREIL," Type A, Left Hand, with Sliding Throttle Controlling the Outlet Passage, No Regulation for Lift of Disc, for Gasoline Engines, Brass.

No. 80—Size	½	¾	1 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$5.00	6.25	7.50
No. 80—Size	1¼	1½	2 in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$9.00	11.20	15.90

This valve is the same in construction and use as the No. 81, except that it is left hand. (See general description at bottom of first column, page 660.)



"NONPAREIL," Type C, Right Hand, with Means for Regulating Lift of Disc and Butterfly Valve in Outlet Passage, for Gasoline Engines, Brass.

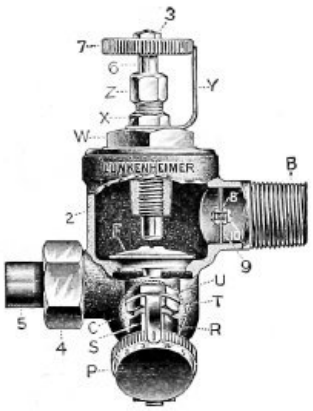
No. 77—Size	¾	1	1¼ in.
Union connection tapped for pipe	⅛	⅛	⅛ in.
Each	$6.75	8.50	10.00
No. 77—Size	1½		2 in.
Union connection tapped for pipe	⅛		⅛ in.
Each	$11.50		16.00

This style of valve is provided with three adjustments, the gasoline needle valve for controlling the gasoline, an adjusting stem for regulating the quantity of air by governing the lift of the disc, and a butterfly throttle for regulating the quantity of mixture drawn into the engine.

The throttle lever is provided with a notched sector and dial for securing the setting of the valve. (See general description at bottom of first column, page 660.)

VALVES AND COCKS.

LUNKENHEIMER GENERATOR VALVES, Continued.



"NONPAREIL," Type C, Left Hand, with Means for Regulating Lift of Disc and Butterfly Valve in Outlet Passage, for Gasoline Engines, Brass.

No. 76—Size..	¾	1	1¼ in.
Union connection tapped for pipe....	⅛	⅛	⅛ in.
Each.....$6.75		8.50	10.00

No. 76—Size..	1½	2 in.
Union connection tapped for pipe.....	⅛	⅛ in.
Each.....$11.50		16.00

Same in construction and use as the No. 77 valve, except that it is left hand. (See general description below.)

GENERAL DESCRIPTION OF "NONPAREIL" GENERATOR VALVES.

To meet the various requirements of the gasoline engine trade, we offer the following types A, B and C in generator valves.

They are made in right and left hand patterns, with the inlet to the rear and the needle valve in front; the right hand pattern has the outlet to the left, while the left hand pattern has the outlet to the right.

Only the highest grade of bronze composition is used in their manufacture, and the metal is distributed in correct proportions throughout.

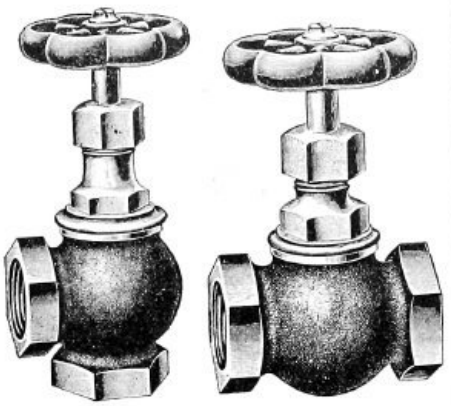
The discs are made of a very hard and tough bronze composition having a tensile strength of about 50,000 pounds.

The mushroom shape makes them stronger and also prevents leakage of gasoline around the guide stem. The discs are provided with a screw driver slot for regrinding when worn.

"Nonpareil" valves cannot be excelled for the two-port two cycle engines, not even by a good carburetor. They have also been used with success on four cycle and three port two cycle engines.

The different features of types A, B and C are described under their respective illustrations.

GLOBE AND ANGLE VALVES.



No. 111, Angle. No. 110, Globe.

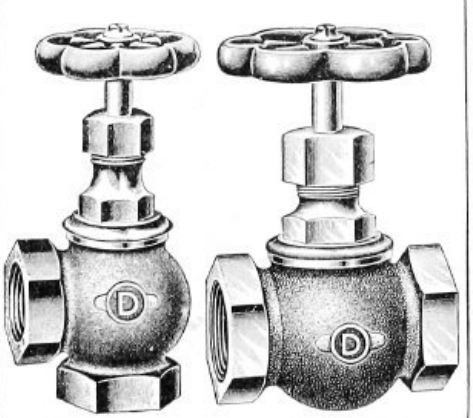
REGULAR, Good Grade Steam Metal, Milled Hexs and Bonnet, Black Japanned Wheel, Angle.

No. 111—Size..	¼	⅜	½	¾ in.
Each.....$0.72		.77	1.00	1.26
No. 111—Size..	1	1¼	1½	2 in.
Each.....$1.80		2.52	3.50	5.30

REGULAR, Good Grade Steam Metal, Milled Hexs and Bonnet, Black Japanned Wheel, Globe.

No. 110—Size..	¼	⅜	½	¾ in.
Each.....$0.72		.77	1.00	1.26
No. 110—Size..	1	1¼	1½	2 in.
Each.....$1.80		2.52	3.50	5.30

The above valves are all tested and suitable for low pressure steam, or water.



No. 102, Angle. No. 101, Globe.

EXTRA QUALITY, High Grade Steam Metal, Milled Hexs, Bonnet and Stuffing Box, Hard Metal Discs, Black Japanned Wheel, Angle.

No. 102—Size..	¼	⅜	½	¾ in.
Each.....$0.72		.77	1.00	1.26
No. 102—Size..	1	1¼	1½	2 in.
Each.....$1.80		2.52	3.50	5.30

EXTRA QUALITY, High Grade Steam Metal, Milled Hexs, Bonnet and Stuffing Box, Hard Metal Discs, Black Japanned Wheel, Globe.

No. 101—Size..	¼	⅜	½	¾ in.
Each.....$0.72		.77	1.00	1.26
No. 101—Size..	1	1¼	1½	2 in.
Each.....$1.80		2.52	3.50	5.30

These valves are tested to 200 lbs. hydraulic pressure and are suitable for 125 lbs. steam working pressure.

GATE VALVES.

EXTRA QUALITY, High Grade Steam Metal, Milled Hexs, Bonnet and Stuffing Box Nut, Double Discs, Black Japanned Wheel.

No. 119—Size..	½	¾	1 in.
Each.....$1.30		1.75	2.50

No. 119—Size..	1¼	1½	2 in.
Each.....$3.50		5.00	7.50

These valves have double discs that seat parallel without grinding and with instant release, tested to 200 lbs. hydraulic pressure and suitable for 125 lbs. steam working pressure. The mechanical construction of this valve is equal to any gate valve on the market.

STEAM COCKS.

No. 130, Square Head. No. 131, Flat Head.

EXTRA QUALITY, High Grade Steam Metal, Plug Thoroughly Ground Into Body, Square Head, Milled Hexs.

No. 130—Size..	¼	⅜	½	¾ in.
Each.....$0.85		1.00	1.25	1.70
No. 130—Size..	1	1¼	1½	2 in.
Each.....$2.35		3.70	4.85	7.30

EXTRA QUALITY, High Grade Steam Metal, Plug Thoroughly Ground Into Body, Flat Head, Milled Hexs.

No. 131—Size..	¼	⅜	½	¾ in.
Each.....$0.85		1.00	1.25	1.70
No. 131—Size..	1	1¼	1½	2 in.
Each.....$2.35		3.70	4.85	7.30

These cocks are tested to 200 lbs. hydraulic pressure and are suitable for 125 lbs. steam working pressure.

VALVES, COCKS, INJECTORS AND GAUGES.

CHECK VALVES.

No. 103, Horizontal.

No. 106, Vertical.

EXTRA QUALITY, High Grade Steam Brass Metal, Milled Hexs and Bonnet, Horizontal.

No. 103—Size..	¼	⅜	½	¾ in.
Each	$0.65	.70	.90	1.15
No. 103—Size..	**1**	**1¼**	**1½**	**2 in.**
Each	$1.60	2.25	3.15	4.75

EXTRA QUALITY, High Grade Steam Brass Metal, Milled Hexs and Bonnet, Vertical.

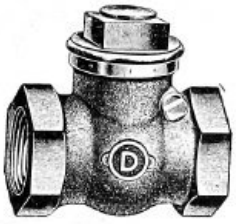
No. 106—Size	⅜	½	¾	1 in.
Each	$0.77	1.00	1.26	1.80
No. 106—Size		**1¼**	**1½**	**2 in.**
Each		$2.52	3.50	5.30

The check valves illustrated above are all tested to 200 lbs. hydraulic pressure, suitable for 125 lbs. steam working pressure.

REGULAR, Milled Hexs and Bonnet, Hard Metal Discs, Brass, Horizontal.

No. 112—Size..	⅜	½	¾	1 in.
Each	$0.70	.90	1.15	1.60
No. 112—Size		**1¼**	**1½**	**2 in.**
Each		$2.25	3.15	4.75

Suitable for low pressure steam, or water.



EXTRA QUALITY, High Grade Brass Steam Metal, Milled Hexs and Bonnet, Swing Pattern.

No. 105—Size..	⅜	½	¾	1 in.
Each	$2.15	2.25	2.75	3.50
No. 105—Size		**1¼**	**1½**	**2 in.**
Each		$4.25	5.50	7.50

These valves are tested at 200 lbs. hydraulic pressure and suitable for 125 lbs. working pressure.

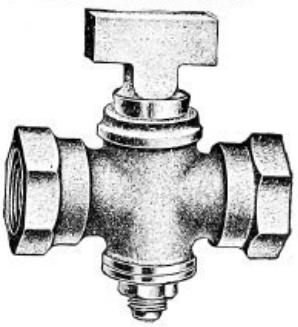
GAS SERVICE COCKS.

EXTRA QUALITY, High Grade Brass Metal, Thoroughly Ground Plug, Flat Head.

No. 132—Size..	⅜	½	¾	1 in.
Each	$0.85	.95	1.15	1.50
No. 132—Size		**1¼**	**1½**	**2 in.**
Each		$2.25	3.10	5.00

Tested and suitable for low gas or water pressure.

ROUGH STOPS.



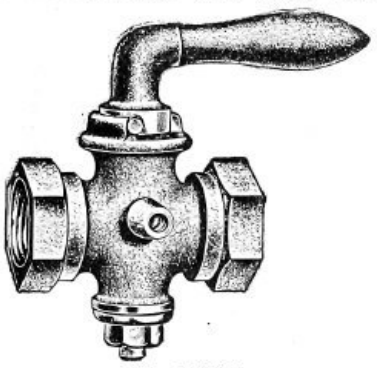
No. 144.

REGULAR, Good Grade Brass Metal, T-Head, Thoroughly Ground Plug.

No. 144—Size..	⅜	½	¾	1 in.
Per dozen	$15.00	17.00	26.00	38.00

REGULAR, Good Grade Brass Metal, Lever Handle, Thoroughly Ground Plug.

No. 145—Size..	⅜	½	¾	1 in.
Per dozen	$15.00	17.00	26.00	38.00



No. 144CW.

REGULAR, Good Grade Brass Metal, T-Head, Thoroughly Ground Plug, with Check and Waste.

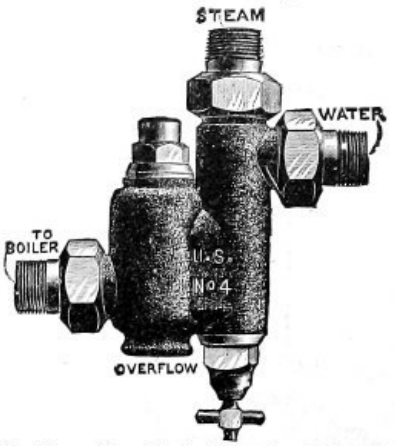
No. 144CW—Size	⅜	½	¾	1 in.
Per dozen	$17.00	19.00	28.00	41.00

REGULAR, Good Grade Brass Metal, Lever Handle, Thoroughly Ground Plug, with Check and Waste.

No. 145CW—Size	⅜	½	¾	1 in.
Per dozen	$17.00	19.00	28.00	41.00

The above stops are equal to other makes of high grade goods, and are tested and suitable for ordinary city water pressure.

U. S. AUTOMATIC INJECTORS.



U. S., Heavy Brass Body, Adapted to Either Side of Boiler, Regular Style, Equipped with Drip Cock to Prevent Freezing.

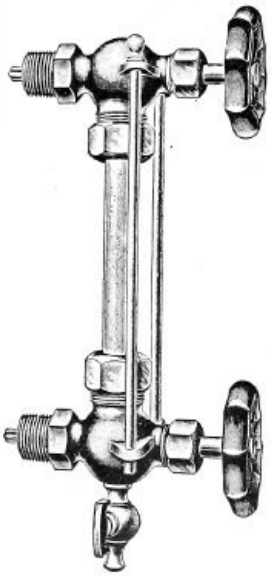
NOS.	PIPE CONNECTION INCH	H. P. BASED ON ORDINARY TUB BOILER.	H. P. BASED ON 30 LBS. WATER PER H. P. PER HR.	CAP. PER HR. 1 TO 3 FT. LIFT, STEAM PRESSURE 60 TO 80 LBS. MAX.	CAP. PER HR. 1 TO 3 FT. LIFT, STEAM PRESSURE 60 TO 80 LBS. MIN.	EACH.
1	⅜	4 to 8	6 to 12	90	55	$10.00
2	½	8 to 16	10 to 20	135	65	18.00
3	½	12 to 22	15 to 30	180	100	20.00
4	¾	17 to 32	22 to 45	260	140	25.00
5	¾	20 to 45	25 to 60	355	170	30.00
6	1	40 to 65	45 to 80	475	300	40.00
7	1	45 to 80	50 to 100	600	350	45.00
8	1¼	50 to 100	60 to 135	800	425	55.00
9	1½	75 to 135	85 to 165	1000	525	60.00

The drip cock used on all U. S. injectors is a very important feature. It drains the injector when not in use and thus prevents freezing. By leaving it open the injector can be started even though the check valve leaks. This is impossible without the drip cock.

Another feature is the construction of the disc valve on the delivery tube, which being cup shaped, is forced to rise to its seat by the jets of water thrown against it from beneath.

Complete description and directions for applying and operating are furnished with each injector.

ONE IN A BOX.



WATER GAUGES.

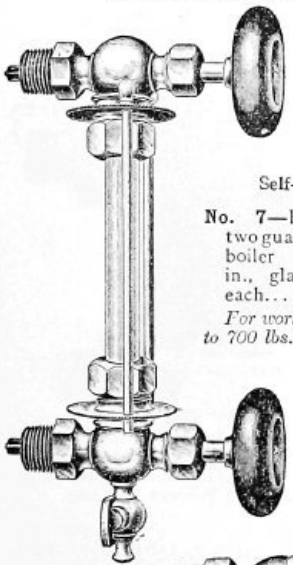
Self-Cleaning.

No. 5 — Bronzed body, two guards, iron wheel, boiler connection ½ in., glass ⅝×12 in., each..... $3.00

For working pressure up to 700 pounds.

GAUGES, VALVES AND COCKS.

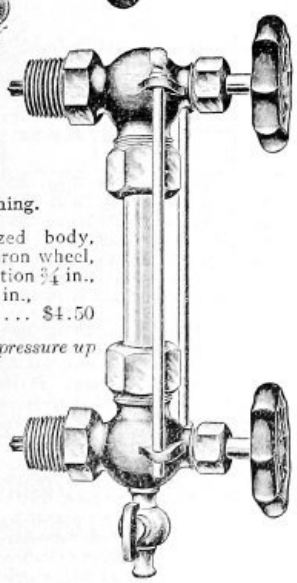
WATER GAUGES.



Self-Cleaning.

No. 7—Polished body, two guards, wood wheel, boiler connection ½ in., glass ⅝×12 in., each..... $4.25

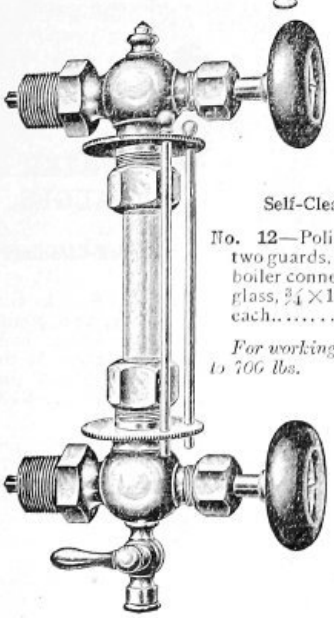
For working pressure up to 700 lbs.



Self-Cleaning.

No. 10—Bronzed body, two guards, iron wheel, boiler connection ¾ in., glass ¾×16 in., each..... $4.50

For working pressure up to 700 lbs.

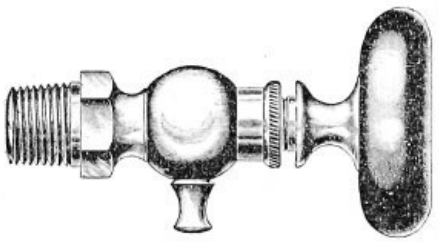


Self-Cleaning.

No. 12—Polished body, two guards, wood wheel, boiler connection ¾ in., glass, ¾×16 in., each..... $5.50

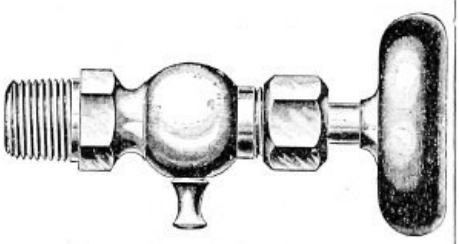
For working pressure up to 700 lbs.

GAUGE COCKS.



Compression, WITHOUT Stuffing Box, Wood Wheel, Threaded for Iron Pipe.

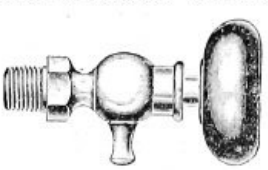
Nos.	02	03	04
Threaded for pipe	⅜	½	¾ in.
Each	$0.95	1.00	1.25



Compression, WITH Stuffing Box, Wood Wheel, Threaded for Iron Pipe.

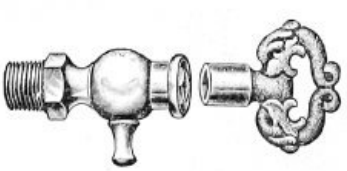
Nos.	05	06	07
Threaded for pipe	⅜	½	¾ in.
Each	$1.20	1.30	1.45

RADIATOR AIR VALVES.



Compression, Wood Wheel, Threaded for Iron Pipe.

No. 3—⅛ in..... each $0.16

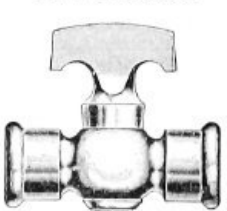


Compression, Iron Key, Threaded for Iron Pipe.

No. 4—⅛ in..... each $0.15

Extra keys, for the above..... " .06

AIR COCKS.



No. 038—¼ in., finished brass, T-head, double female ends..... each $0.70

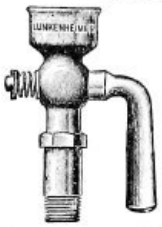
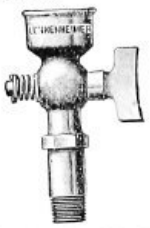
LUNKENHEIMER PRIMING, OIL AND GREASE CUPS.

PRIMING CUPS.





No. 820, Lever Handle. No. 821, Tee Handle.

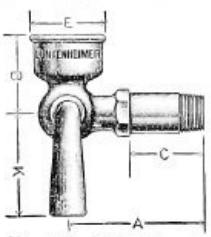
Brass, for Gasoline Engines, Long Shank, Lever Handle.

No. 820—Size	00	0	1
Threaded for pipe	⅛	⅛	⅛ in.
Each	$0.75	.85	.95
No. 820—Size	**2**	**3**	**4**
Threaded for pipe	¼	¼	⅜ in.
Each	$1.10	1.40	1.65

Brass, for Gasoline Engines, Long Shank, Tee Handle.

No. 821—Size	00	0	1
Threaded for pipe	⅛	⅛	⅛ in.
Each	$0.70	.80	.90
No. 821—Size	**2**	**3**	**4**
Threaded for pipe	¼	¼	⅜ in.
Each	$1.00	1.30	1.50

This pattern can also be had with shank on left hand instead of right. Sizes and lists the same as No. 702. When ordering specify No. 367.



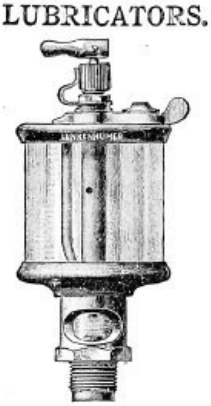
No. 702, Right Hand.

Brass, for Gasoline Engines, L Shank, Lever Handle.

No. 702—Size	00	0	1
Threaded for pipe	⅛	⅛	⅛ in.
Each	$0.85	1.00	1.15
No. 702—Size	**2**	**3**	**4**
Threaded for pipe	¼	¼	⅜ in.
Each	$1.35	1.60	1.90

The most efficient and satisfactory cups on the market. The shanks are made long enough to permit the lever to hang downward when cock is closed. The even tension of the spring keeps the key from sticking or working loose.

LUBRICATORS.



IMPROVED "PARAGON", Glass Body, Sight Feed, for Gas, Gasoline, or Oil Engines.

No. 553—Size	1½	2	3	4
Threaded for pipe	¼	⅜	⅜	⅜ in.
Capacity	1½	2½	4	5 oz.
Each	$2.00	2.80	3.50	4.00
No. 553—Size	**5**	**6**		**8**
Threaded for pipe	½	½		¾ in.
Capacity	10	18		32 oz.
Each	$5.40	7.00		14.00

OIL CUPS.

"PIONEER", Slide-Top, Glass Body, Cast Brass, Highly Finished.

No. 515—Size	000	00	0	1
Threaded for pipe	⅛	⅛	⅛	¼ in.
Capacity	¼	½	⅝	1 oz.
Each	$0.70	.75	.80	1.00
No. 515—Size	**1½**	**2**	**3**	**4**
Threaded for pipe	¼	⅜	⅜	⅜ in.
Capacity	1½	2½	4	5 oz.
Each	$1.25	1.50	1.90	2.40
No. 515—Size	**5**		**6**	**8**
Threaded for pipe	½		½	¾ in.
Capacity	10		18	34 oz.
Each	$3.10		4.00	8.50

Pioneer oil cups are especially adapted for traction engines, steam rollers and other machinery of like character.

They are easily filled and regulated, and will not come apart when used on jarring machinery.

"SENTINEL", Snap Lever, Sight Feed, Glass Body, Straight Shank, Brass.

No. 546—Size	0	1	1½
Threaded for pipe	⅛	¼	¼ in.
Capacity	⅝	1	1½ oz.
Each	$3.00	3.25	3.50
No. 546—Size	**2**	**3**	**4**
Threaded for pipe	⅜	⅜	⅜ in.
Capacity	2½	4	5 oz.
Each	$3.75	4.25	5.25
No. 546—Size	**5**	**6**	**8**
Threaded for pipe	½	½	¾ in.
Capacity	10	18	34 oz.
Each	$7.25	9.25	20.00

The "Sentinel" cup is handsome in appearance and thoroughly strong and substantial in construction.

This cup will not shake to pieces when placed on jarring machinery.

A very important feature is, that when set to feed a given amount of oil, it will hold up to its rate of feed until the cup is entirely emptied.

OIL CUPS.

"CHAMPION" ROD, Adapted for Crank Pins and Similar Bearings, Brass Body with Two Glass Sides.

No. 591—Size	1	2	3
Threaded for pipe	¼	⅜	½ in.
Capacity	1¼	2½	5 oz.
Each	$1.40	2.00	2.60
No. 591—Size	**3½**		**4**
Threaded for pipe	½		¾ in.
Capacity	8		12 oz.
Each	$3.50		4.00

The "Champion" cup is constructed on lines radically different from anything heretofore designed for this purpose.

The construction is simple; the body has a glass on each side to enable the engineer to see at a glance how much oil is in the cup, and the feeding arrangement consists of a tube, with a regulating valve at top, screwed into the base of the cup and connected with the oil hole in the shank.

GREASE CUPS.

"IDEAL," Automatic, for Engine Crank Pins, Journals, Etc., Highly Finished Cast Brass.

No. 510—Size	00	0	1	2
Threaded for pipe	⅛	¼	¼	⅜ in.
Capacity	⅓	1	1½	3 oz.
Each	$1.50	2.00	2.50	3.20
No. 510—Size	**3**	**4**		**5**
Threaded for pipe	½	½		¾ in.
Capacity	6	10		18 oz.
Each	$4.30	6.00		12.50

The leather packed plunger is so made that it is easily withdrawn when cup requires refilling. The spring and plunger are conveniently controlled by the handle which is provided with an automatic lock arrangement to prevent its jarring from position on stem.

GREASE CUPS.

LUNKENHEIMER.

"JEWEL," Automatic, Brass, for Bearings, Shaftings, Loose Pulleys, Etc.

No. 511—Size.....	00	0	1
Threaded for pipe ..	⅛	¼	¼ in.
Capacity	⅓	1	1½ oz.
Each.....	$0.80	1.00	1.30

No. 511—Size.....	2	3	4
Threaded for pipe ..	⅜	½	½ in.
Capacity	3	6	10 oz.
Each.....	$1.70	2.30	3.20

The Jewel cup was designed to meet the demand for a simple and inexpensive automatic cup. The base is of cast brass, and the top of tubing and spun brass. It is provided with a simple feed-regulating screw adjustable to suit any kind of grease.

"TIGER," Plain Brass, Adapted for Jarring Machinery.

No. 513—Size.....	00	0	1
Threaded for pipe ..	⅛	¼	¼ in.
Capacity	½	⅔	1 oz.
Each.....	$0.70	.90	1.15

No. 513—Size.....	2	3	4
Threaded for pipe ..	⅜	½	½ in.
Capacity	2	3½	5 oz.
Each.....	$1.50	2.15	2.90

The "Tiger" grease cup is of cast brass and well adapted for jarring machinery and is unsurpassed where a simple, compact and efficient cup is desired.

By screwing down the cap, the grease is forced to the bearing.

EMPRESS.

"EMPRESS," Plain Compression, Regular Pipe Thread, Polished Brass.

No. 100—Size.....	00	0	1
Threaded for pipe ..	⅛	¼	¼ in.
Capacity	½	⅔	1 oz.
Each.....	$0.70	.90	1.15

No. 100—Size.....	2	3	4
Threaded for pipe ..	⅜	½	½ in.
Capacity	2	3½	5 oz.
Each.....	$1.50	2.15	3.50

"EMPRESS," Plain Compression, Regular P e Thread, Rough Brass.

No. 101—Size.....	00	0	1
Threaded for pipe .	⅛	¼	¼ in.
Capacity	½	⅔	1 oz.
Each.....	$0.56	.74	.96

No. 101—Size.....	2	3	4
Threaded for pipe ..	⅜	½	½ in.
Capacity	2	3½	5 oz.
Each.....	$1.28	1.76	3.00

"EMPRESS," Plain Compression, Regular Pipe Thread, Natural Finished Steel.

No. 102—Size.....	00	0	1
Threaded for pipe ..	⅛	¼	¼ in.
Capacity	½	⅔	1 oz.
Each.....	$0.50	.65	.80

No. 102—Size.....	2	3	4
Threaded for pipe ..	⅜	½	½ in.
Capacity	2	3½	5 oz.
Each.....	$1.05	1.45	2.00

The Empress line of grease cups is pressed from sheet metal making them stronger than castings and free from air holes and other defects. The "lugs" on caps insure a "sure grip," and also gives them an artistic appearance.

They are adapted for all jarring machinery, and have proven satisfactory in every instance.

EMPRESS.

"EMPRESS," Ratchet Compression, Lug Cap, Regular Thread, Rough Brass.

No. 103—Size.....	000	00	0
Threaded for pipe ..	⅛	⅛	¼ in.
Capacity	¼	½	⅔ oz.
Each.....	$0.90	1.10	1.35

"EMPRESS," Ratchet Compression, Lug Cap, Regular Thread, Natural Finished Steel.

No. 104—Size.....	00	0
Threaded for pipe ..	⅛	¼ in.
Capacity	½	⅔ oz.
Each.....	$0.80	.95

These cups are designed to use in places where there is excessive vibration.

"EMPRESS," Spring Compression, Highly Finished Brass.

No. 105—Size.....	00	0	1
Threaded for pipe ..	⅛	¼	¼ in.
Capacity	½	1	1½ oz.
Each.....	$1.50	2.00	2.50

No. 105—Size.....	2	3
Threaded for pipe ..	⅜	½ in.
Capacity	3	6 oz.
Each.....	$3.20	4.30

"EMPRESS," Spring Compression, Natural Finished Steel.

No. 106—Size.....	00	0	1
Threaded for pipe ..	⅛	¼	¼ in.
Capacity	½	1	1½ oz.
Each.....	$1.30	1.50	1.75

No. 106—Size.....	2	3
Threaded for pipe ..	⅜	½ in.
Capacity	3	6 oz.
Each.....	$2.00	2.75

These cups have a special leather packing on plunger, insuring a tight smooth working joint. The spring pressure is regulated by the handle and the feed to bearing by screw in the shank which is readily adjusted for grease of any density. Being pressed from sheet metal they are stronger and much more durable than a cast cup.

PLAIN AND HOSE BIBB COCKS.

COMPRESSION PLAIN BIBBS.

Polished Brass, T Handle, Threaded for Iron Pipe, Flange Shoulder.

Nos	872	873	874
Size	½	⅝	¾ in.
W't per doz.	10½	12½	17½ lbs.
Per dozen	$13.00	16.00	20.00

No. 872 will fit ½ in., and Nos. 873 and 874, ¾ in. pipe.

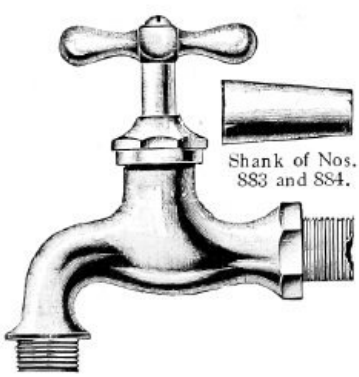
Nickel Plated Brass, T Handle, Threaded for Iron Pipe.

Nos	872N	873N	874N
Size	½	⅝	¾ in.
W't per doz.	10½	12½	17½ lbs.
Per dozen	$15.50	18.50	22.50

No. 872N will fit ½ in., and Nos. 873N and 874N, ¾ in. pipe.

HALF DOZEN IN A BOX.

COMPRESSION HOSE BIBBS.



Shank of Nos. 883 and 884.

Polished Brass, T Handle, Threaded for Iron Pipe, Flange Shoulder.

Nos	892	893	894
Size	½	⅝	¾ in.
W't per doz.	10½	13	16 lbs.
Per dozen	$15.00	18.00	22.00

No. 892 will fit ½ in., and Nos. 893 and 894, ¾ in. pipe and hose coupling.

Nickel Plated Brass, T Handle, Threaded for ¾ in. Iron Pipe and Hose Coupling, Flange Shoulder.

Nos	893N	894N
Size	⅝	¾ in.
W't per doz.	13	16 lbs.
Per dozen	$20.50	24.50

Will fit ¾ in. pipe and hose coupling.

Polished Brass, T Handle, Plain Tapered Shank to Solder, for Lead Pipe, Flange Shoulder.

Nos	883	884
Size	⅝	¾ in.
W't per doz.	13	16 lbs.
Per dozen	$18.00	22.00

Will fit ¾ in. pipe.

HALF DOZEN IN A BOX.

FULLER PLAIN BIBBS.

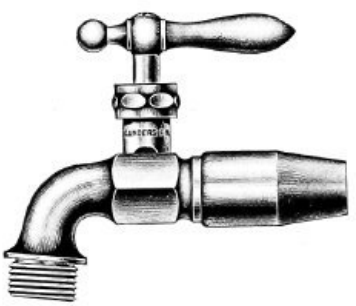
Polished Brass, Lever Handle, Plain Shank to Solder, for Lead Pipe.

Nos	970	975
Size	½	⅝ in.
W't per doz.	12	13 lbs.
Per dozen	$21.00	24.00

Will fit ½ and ¾ in. pipe.

HALF DOZEN IN A BOX.

FULLER HOSE BIBBS.



Polished Brass, Lever Handle, Plain Shank to Solder, for Lead Pipe.

Nos	990	995
Size	½	⅝ in.
W't per doz.	12	13 lbs.
Per dozen	$24.00	28.00

Will fit ½ and ¾ in. pipe and hose coupling.

HALF DOZEN IN A BOX.

FULLER PLAIN BIBBS.

Polished Brass, Lever Handle, Threaded for Iron Pipe, with Flange Shoulder.

Nos	971	973
Size	½	⅝ in.
W't per doz.	13	14 lbs.
Per dozen	$21.00	24.00

Will fit ½ and ¾ in. pipe.

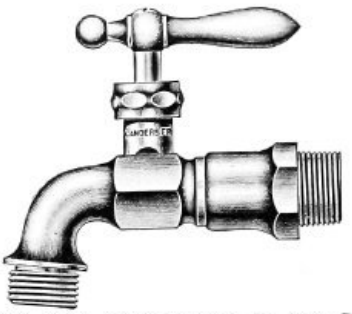
Nickel Plated Brass, Lever Handle, Threaded for Iron Pipe, with Flange Shoulder.

Nos	971N	973N
Size	½	⅝ in.
W't per doz.	13	14 lbs.
Per dozen	$25.00	28.00

Will fit ½ and ¾ in. pipe.

HALF DOZEN IN A BOX.

FULLER HOSE BIBBS.



Polished Brass, Lever Handle, for Iron Pipe, with Flange Shoulder.

Nos	991	993
Size	½	⅝ in.
W't per doz.	14	15 lbs.
Per dozen	$24.00	28.00

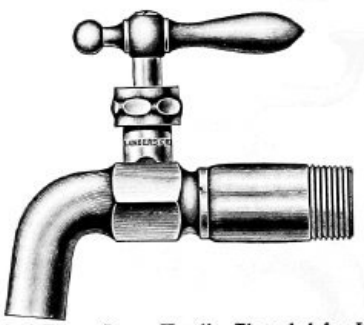
Will fit ½ and ¾ in. pipe and hose coupling.

Nickel Plated Brass, Lever Handle, Threaded for Iron Pipe, with Flange Shoulder.

Nos	991N	993N
Size	½	⅝ in.
W't per doz.	14	15 lbs.
Per dozen	$28.00	32.00

Will fit ½ and ¾ in. pipe and hose coupling.

FULLER PLAIN BIBBS.

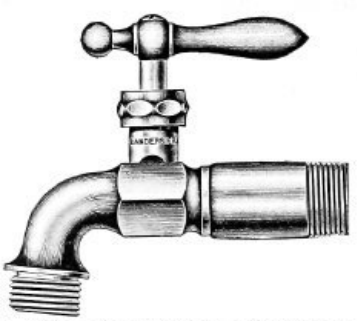


Polished Brass, Lever Handle, Threaded for Iron Pipe, S. O. T.

Nos	972	974
Size	½	⅝ in.
W't per doz.	12	13 lbs.
Per dozen	$23.00	27.00

Will fit ½ and ¾ in. pipe.

FULLER HOSE BIBBS.



Polished Brass, Lever Handle, Threaded for Iron Pipe, S. O. T.

Nos	992	994
Sizes	½	⅝ in
W't per doz.	12½	13½ lbs.
Per dozen	$26.00	31.00

Will fit ½ and ¾ in. pipe and hose coupling.

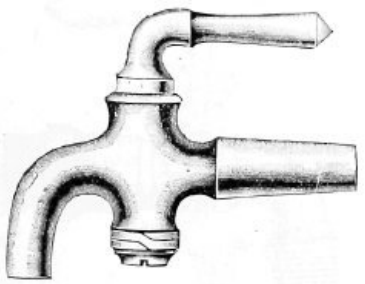
HALF DOZEN IN A BOX.

For Fuller rubber balls see next page.

The size given on bibb cocks is inside diameter. ½ in. size will fit ½ in. pipe. ⅝ and ¾ in. will fit ¾ in. pipe. S. O. T. is a term known to the plumber trade and means "screw on tail."

BRASS COCKS AND FAUCETS.

PLAIN BIBB COCKS.



Polished Brass, Lever Handle, Tapered Shank, to Solder.

Nos	230	231	232	
Size	¼	⅜	½	in.
W't per doz.	4½	6	7	lbs.
Per dozen	$13.50	15.50	18.00

Incubator thermometers are used between the temperatures of 100 and 105 and if inaccurate between these temperatures incalculable loss is bound to result. Our tubes are thoroughly seasoned and tested and we guarantee the permanent accuracy of every thermometer.

ONE DOZEN IN A BOX.

WEATHER STRIPS.

REV-O-NOC METALLIC STITCHED

"REV-O-NOC."

Width	⅜	½	⅝	¾ in.
Average w't per 100 ft.	3¼	3½	4¼	5 lbs.
Per 100 ft.	$2.50	3.00	3.25	3.75

In the REV-O-NOC metallic weather strip the rubber is secured by teeth. It is made of zinc and a much better quality of rubber than is usually found in weather strip. It is neat in appearance and not affected by the weather. The metal is corrugated and turned at both edges, making it very stiff. The rubber is clamped in position and securely held by the saw-tooth edge of the metal, and will not pull out. It has been used largely by railroads and is recommended as the very best yet produced.

ONE HUNDRED FEET IN A PASTEBOARD BOX, SIZE 18×18 IN.

ALASKA METALLIC STITCHED.

Width	½	⅝	¾ in.
W't per 100 ft.	2½	3¾	4¾ lbs.
Per 100 ft.	$2.25	2.65	3.25

The "Alaska" is the simplest form of metallic weather strip. It is made of one piece of sheet zinc, corrugated for strength. The rubber is securely fastened to the metal by teeth or barbs (ten to the inch) which are punched through the rubber and clinched on the other side. It is light, has sufficient strength to preserve its shape, and can be pulled out of package perfectly straight. Holes are punched 2½ in. apart for tacks. When the saving in freight and waste is taken into consideration, dealers will find that the "Alaska" is as cheap as the wood strip, with the advantage of furnishing their trade a much better article.

ONE HUNDRED FEET IN A PASTEBOARD BOX, SIZE 12×12 IN.

GALVANIZED DOOR BOTTOMS.

DAISY, Automatic, Galvanized Iron, Reversible.

No. 28—2 ft. 8 in., w't per doz. 22 lbs. ..... per dozen $18.00
No. 30—2 ft. 10 in., w't per doz. 24 lbs. ..... " 18.00

They come down over the threshold ,so that no matter how large the opening it is entirely covered. They are reversible and can be used on doors opening either to the right or left. The strip is controlled by an automatic rod, which on hitting the jamb, forces the bottom strip firmly against the base.

Packed complete with screws and nails

No. 43—Grade 3, ALL CLAMP HOCKEY, welded steel blades, tempered, upper parts of crucible steel, polished and nickel plated, 9½, 10, 10½, 11, 11½ and 12 in.....per pair $4.00

ONE PAIR IN A BOX. AVERAGE WEIGHT 2¾ LBS.

No. 63—Grade 3, SAFETY EDGE HOCKEY, best quality cast steel blades, highly tempered, upper parts of crucible steel, polished and nickel plated, 10, 10½ 11 and 11½ in.....per pair $5.00

In the construction of these hockey blades the several blades strengthen without adding weight, and blades are of high temper. The safety edge foot plate prevents slipping, having an extension projecting beyond the inside edge of shoe sole, which is ground off to conform to shape of sole, after skate is fastened for use. With each pair of skates two pieces of steel are furnished for use on outer side of sole.

ONE PAIR IN A BOX. AVERAGE WEIGHT 2½ LBS.

No. 66—Grade 3, CANADIAN HOCKEY, best quality throughout, edges beveled, superior finish, blades warranted hard, polished and nickel plated, 9½, 10, 10½ 11, 11½ and 12 in.....per pair $5.00

A popular Canadian Pattern.

ONE PAIR IN A BOX. AVERAGE WEIGHT 2 LBS.

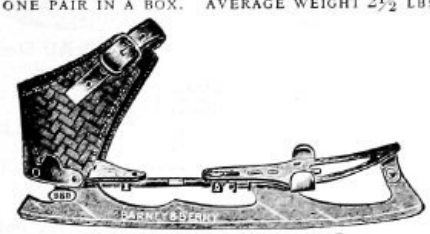
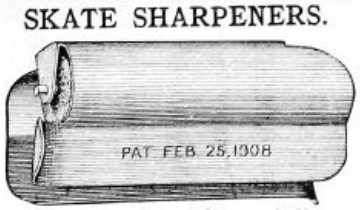
ONE PAIR IN A BOX. AVERAGE WEIGHT 2½ LBS



No. 55—Grade 3, LADIES' AMERICAN CLUB LOCK LEVER, ribbed blades, steel faced, highly tempered and warranted, best quality tops, best quality russet grain leather heel straps, embossed, stitched and lined, nickel plated heel bands, polished and nickel plated, 9, 9½, 10 and 10½ in.....per pair $5.00
ONE PAIR IN A BOX. AVERAGE WEIGHT 2¾ LBS.

SKATE SHARPENERS.



No. 10—PERFECT, *for hollow grinding*, blued steel holder, projecting lugs, flexible grinders, rotary emery wheel, per dozen.....$1.50
No. 15—PERFECT, *for flat grinding*, otherwise same as No. 10.....per dozen 1.50
Will grind the hardest tool steel runner and positively will not soften it. The projecting lugs give an ideal grip; the guides being flexible, can be pressed to fit the thickness of any skate runner. Emery wheel is of best emery and corundum.
ONE DOZEN ON DISPLAY CARD.

SLED SKATES.

No. 1—Children's extension, polished cold rolled steel, adjustable from 6½ to 8 in., russet leather straps.....per pair $0.60
Made especially for the use of children in early efforts to skate. Extension allows it to be fitted to the foot of any small child. Forward part has no bolt or rivet heads where the soles of feet must rest, but a smooth surface.
ONE PAIR IN A BOX. WEIGHT 1½ LBS.

ANKLE SUPPORTS.

No. 5.

No. 5—Heavy russet leather, laced front, men's, boys' and ladies', w't per doz prs. 3¾ lbs.....per doz. prs. $12.00
ONE DOZEN PAIRS IN A BOX.
No. 2—Model B, grade 2, nickel plated, russet leather, w't per doz. prs., 6 lbs., per doz. prs.....$14.40

No. 2.

The lower part should be riveted to heel plate of skate, and a hinge plate connecting with upper part is made in line with the ankle, allowing the free forward and backward movement essential for easy skating. Strap is attached to guard which slides freely up and down, while absolutely preventing ankle from turning sidewise.

It can be attached to any ordinary lever skate, and it is only necessary to drill two small holes in heel clamp corresponding to those in support and fasten securely by means of the rivets which accompany supports.
ONE IN A BOX.

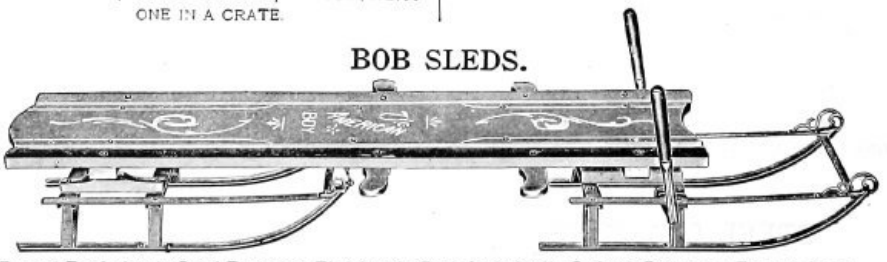
ONE DOZEN IN A BOX.

BOB SLEDS.



Round Back Angle Steel Runners, Finished in Red, Artistically Striped, Japanned Braced Steel Frame, with Steering Device and Brake Attachment, Wood Top Handsomely Finished in Colors and Beautifully Hand Decorated.

No. 205—84×9½×14 in., 2 knees, 4 passenger, w't 60 lbs., - - - per dozen $192.00

The patent steering and brake attachments give the rider complete control of the bob and preclude the possibility of an accident. The malleable handles with which this bob is guided are located on each side of the operator, and are readily dropped down out of the way when desired. The steering device is much more safe and convenient than those that are made rigid and stand directly in front of the operator. The brake attachment is simple in construction, yet very effective, and is placed under the sled board, entirely out of the way of the passengers. The pressure is applied to the brake with the feet of the operator.

ONE SIXTH DOZEN IN A CRATE.

"REV-O-NOC" JUVENILE WAGONS.

The REV-O-NOC Juvenile wagon is made for hard service, and we believe it to be an advance over anything offered. It will appeal to any boy. The solid and substantial wood wheels add much to the appearance and effect. The bright coloring extending over all parts of the wagon instead of the body merely, gives it the character of a regular express wagon, which other boys' wagons do not possess.

The Body.—The sides are made of 24-gauge steel, firmly secured to the bottom. It is reinforced at the top edge with heavy steel wire. The bottom board is made of extra heavy hardwood lumber, thoroughly seasoned and kiln dried. This bottom cannot check. The bolsters and reinforcements are hardwood stock, 1¼ inches thick, securely bolted. The axles are $\frac{9}{16}$ inch open-hearth steel. The circle plate and fifth wheel are malleable iron in place of the usual flimsy steel construction. The two heavy wrought-steel braces which run from the rear and front axles to the bottom of the box give solidity to the bolsters. Handle is made of rock elm with new wrought-steel loop grip, another meritorious feature of this wagon.

Wheels.—These are made of the highest grade hardwood stock; the felloes are ¾ inch rock elm; the hubs are fitted with steel boxes and caps. The tires are ¾ inch heavy oval open-hearth steel, and are shrunk onto the wheels by expensive machinery, seating all the spokes and making a very solid wheel.

Finish.—The body, wheels and handle are painted in a bright vermilion and striped with black and yellow. The body is ornamented with gold stripes, and the inside is painted green. A first quality varnish gloss paint is used, and care is exercised in the striping.

We have endeavored in the manufacture of the REV-O-NOC to make it the strongest and best juvenile wagon on the market.

ONE IN A CRATE.

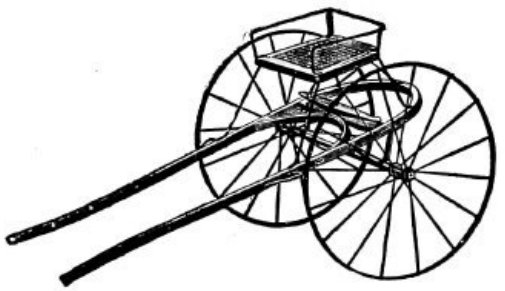
GOAT SULKIES.



No. 20—20 in. tinned steel wheels, 26 in. axle, 8×13 in. cane seat set on tinned wrought braces, tinned steel guard, 48 in. shafts, woodwork varnished, w't per doz. 132 lbs...per dozen $72.00

ONE IN A CRATE.

BOYS' GARDEN BARROWS.

No. 157—Steel sides, wood bottom, painted red, yellow stripes, 14 in. tinned wheel, 40 in. handles, steel legs, w't per doz. 120 lbs.....per dozen $15.00

ONE-SIXTH DOZEN IN A CRATE; WE DO NOT BREAK CRATES.

BABY WALKERS.

No. 59—Combined baby walker and tender, highly polished cherry finish, hardwood base and rail, diameter of base 27 in., height 18 in., three old copper finished spring supports, 9 in. tray, adapted for children measuring up to 20 in. from under the arms to the floor, w't per doz. 120 lbs.....per dozen $50.00

Many persons do not realize how soft baby bones and muscles are, and the child is often permanently injured by a natural desire to be on his feet all the time; this is where the danger lies. The baby walker affords the child the best possible exercise with just the support necessary to develop straight legs and a strong flat back.

ONE IN A CRATE.

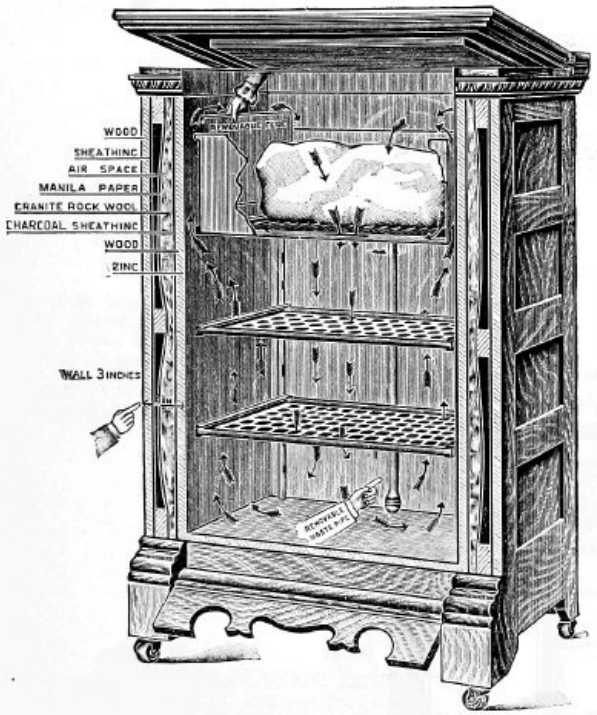
CHICAGO

GREENLAND AND WALDORF REFRIGERATORS.



The above diagram shows the insulation in our GREENLAND refrigerators and theory of circulation in the GREENLAND and NANSEN refrigerators. The arrows indicate the currents of air which are kept in constant motion by the opposing forces of cold and heat. These currents are created by the cold air from the ice chamber which makes its way to the bottom of the refrigerator and forces the warm air up through the flues, taking with it all vapors or odors into the ice chamber settling down around the ice. Here it is condensed and cooled, thus leaving all impurities to pass through the drip pipe with the melted ice. All vapors or odors are then removed and pure dry cold air is returned to the provision chamber. If the chamber is kept supplied with ice and the instructions given for caring for a refrigerator are carried out, pure cold dry air will be had at all times.

The insulation is far superior to all others, containing eight walls of the best known non-conductors of heat or cold, and is 3 in. thick, composed as follows:

1st—Outside case made of No. 1 kiln-dried ash.

2d—Heavy fibrous paper carefully attached to the inner wall of the outside case.

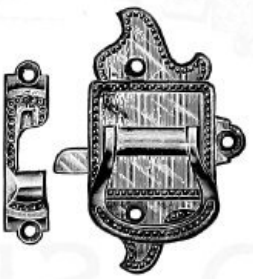
3d—Dead air space has been thoroughly demonstrated to be a valuable non-conductor.

4th—Manila fibre sheathing, a great addition as a non-conductor.

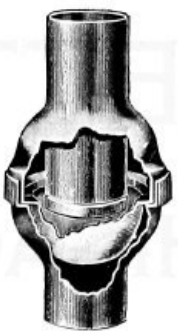
5th—Granite rock wool, the most perfect non-conductor known to science.

6th—Charcoal sheathing, carefully prepared and a good non-conductor.

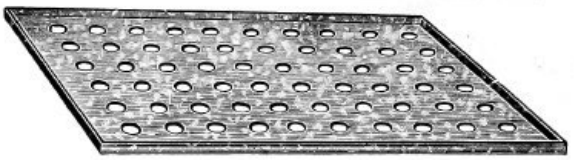
7th—Inside case made of thoroughly seasoned lumber.



Showing Trimmings.

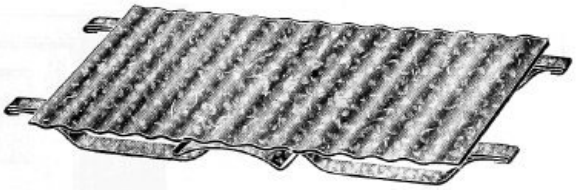


Trap.



Shelves.

The shelves are made from a solid piece of galvanized iron and so constructed that small dishes placed upon them cannot tip over. They are easily adjusted to any space desired and slide instead of lift out.



Ice Rack.

The ice rack is constructed entirely of galvanized iron; no wood to gather dampness and become moldy and foul.

8th—Zinc or white enamel lining.

Granite rock wool is the most perfect non-conductor in existence, and to-day stands ahead of all other filling. It will not sag as does charcoal, neither does it contain any sulphur, as does mineral wool, and its fibres are much longer.

The hinges and lock are very strong, having two cases, the inside being steel and the outside lacquered brass. The spring of the lock is $\frac{3}{8}$ in. wide, tempered in oil, and is made so that the door is perfectly air-tight.

Trap.

The patent trap is air-tight and perfect. It is attached to the waste pipe in the bottom of the provision chamber, where it is most accessible. Both the trap and waste pipe can be easily removed, taken apart, cleansed and replaced in a moment of time. No reaching under the refrigerator or poking with a stick. Care should be taken to see that the parts are properly adjusted before using.

White Enamel Lining.

We are now supplying some of our Greenland and Waldorf refrigerators with white enamel lining (to the provision chambers). It is not put on with a brush, and is not paint, but pure enamel. This enamel is baked on galvanized iron, is flexible, will not peel off, is durable and does not contain one particle of white lead or any other poisonous substance, but is perfectly pure and sanitary. Experts say that it is the best finish that has ever been introduced for cleanliness. Any housekeeper, by using a sponge dampened with soap and water, can have the refrigerator as pure as the day it came from the factory.

OUR VERY BEST GREENLAND REFRIGERATORS.

Solid Ash, Golden Oak Finish, Single Lower Door, One Lower Compartment, Zinc Lined.

The lumber used in OUR VERY BEST Greenland Refrigerators is thoroughly seasoned; the parts are fitted with exactness and firmly secured; several coats of high grade varnish are used and the more expensive refrigerators are hand rubbed.

OUR VERY BEST Greenland Refrigerators have seven walls to exclude the exterior heat, the most important filling being granite wool, by far the best non-conductor to be had.

OVB Greenland Refrigerators can be had with either zinc, enameled or porcelain lining On account of the attractiveness and ease in cleaning, the enameled lining is much superior to zinc and the cost of such refrigerators is only about 10% more. The enamel is baked on and can be easily cleaned with a damp cloth.

All of the trimmings are made of brass, with plain polished surfaces, heavily nickel plated. The lock has been improved and is superior to anything so far offered.

These refrigerators are very attractive and simple in design. The edges are rounded, which adds much to the neat appearance of the entire line.

★ *FOR FACTORY SHIPMENT ONLY.*

OUR VERY BEST GREENLAND REFRIGERATORS.

PORCELAIN-STEEL LINED.

This line of refrigerators is first-class in every particular, no time or expense being spared to make them perfect. The provision chambers are lined with genuine porcelain on 18 gauge steel, the porcelain being put on the steel with compressed air and baked at a very high degree of heat, making the surface smooth and even and of a pure white color. The joints are tightly fitted and cemented, thus the accumulation of decaying matter is an impossibility. The provision shelves are made of heavy tinned wire strongly bound. The outside case is oak, furniture finished, the cabinet work being of a very superior order. They are mounted with lever locks, heavy bronze metal hinges nickel plated The insulation is the equal, if not the superior, of any in use, having eight distinct walls to preserve the ice, the principal being our celebrated granite rock wool.

REFRIGERATORS AND ICE CHESTS.

NANSEN REFRIGERATORS.

The Nansen is made of hardwood and insulated with charcoal sheathing. The trimmings are bronzed metal and the workmanship all first class. Zinc lined. The ice rack and shelves are galvanized iron. The flues, trap and waste pipe are removable and the whole interior so constructed that all parts are easily accessible and can be cleaned in a short space of time. The base board is made to swing, and it does not require a back-breaking process to remove the water pan.

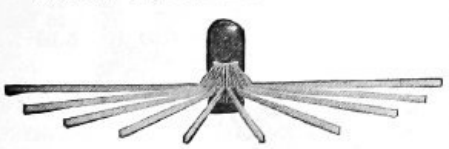
TOWEL BARS.

No. 6—MONARCH, wrought steel back, 6 hardwood bars 18×¾×⅜ in., w't per doz. 12 lbs.....per dozen $2.50

Folds up against the wall when not in use, each arm working independently.

ONE DOZEN IN A PACKAGE.

WALL CLOTHES DRYERS.

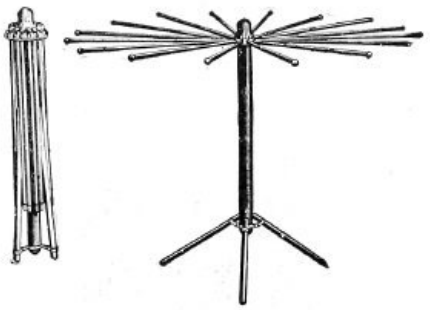


No. 111—Hard maple back, varnished and moulded, height 15 in., width 5 in., ten 30×⅞ in. arms, w't per doz. 70 lbs.....per dozen $15.00

Built scientifically. All the arms work individually, with perfect action and fold up when not in use. Very strong and compact. All steel parts are galvanized.

ONE DOZEN IN A CRATE.

CLOTHES BARS.

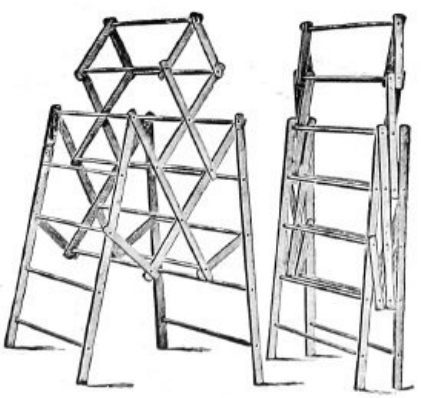


No. 5—Umbrella, hardwood, sixteen 24×½ in. round arms, height closed 34 in., open 44 in., 32 ft. drying space, revolving head, metal parts japanned, supported on tripod, w't per doz. 100 lbs.....per dozen $24.00

This simple and useful article is arranged so that it can be opened and closed like an umbrella, and is very easily adjusted. The bars operate independently of each other and revolve around the standard so that any part can be reached without taking a step.

HALF AND ONE DOZEN IN A CRATE.

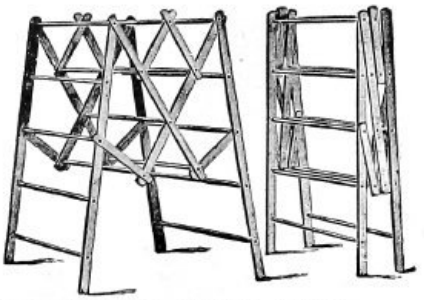
No. 10—NORTHWESTERN, hardwood, adjusted to two heights, to 5 and 6½ ft., 14 rods 3 ft. long, 31 ft. of hanging surface, w't per doz. 140 lbs., per dozen $12.00



No. 1—ROME CITY, basswood, smooth, 5 ft. 3 in. high, 19 rods 2 ft. 10 in. long, 54 ft. of hanging surface, w't per doz. 132 lbs.....per dozen $15.00

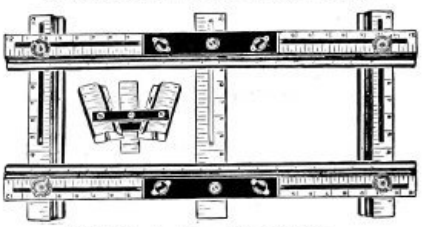
SIX AND ONE QUARTER DOZEN IN A BUNDLE.

CLOTHES BARS.



No. 2—ROME CITY, basswood, smooth, 4 ft. 6 in. high, 16 rods 2 ft. 10 in. long, 44 ft. of hanging surface, w't per doz. 115 lbs.....per dozen $12.50

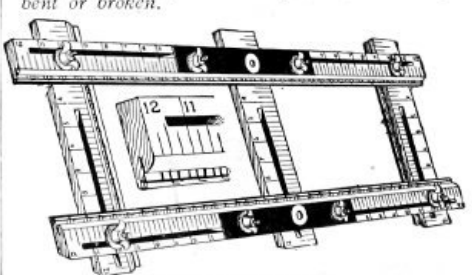
CURTAIN STRETCHERS.



With Center Bar, Will Not Sag.

No. 1—6×12 ft., ¾×2 in., basswood strips, brass pins, 2 in. apart marked in inches and quarters, adjustable for curtains from 36×72 in. to 62×134 in., folds compactly, w't per doz. 110 lbs.....per dozen $15.00

This frame is constructed so that it adjusts at all corners, making it easy to handle and work with. The strips have a slot at each adjusting point, through which slides a bolt, with thumb screw for fastening. The side strips are made in two pieces held together by two flat steel plates, so made that they will act as a hinge in folding, and secure great rigidity to the frame in use. The points for holding the curtain do not project above the upper surface of the wood, so that the frame protects the points from being bent or broken.



With Adjustable Pins.

No. 13—6×12 ft., 1×2 in. stock, made with measuring rule, stamped steel plate hinges, triple nickel plated brass pins, has adjustable center bar and positively can not sag, w't per doz. 110 lbs.....per dozen $32.00

No. 13 possesses all the desirable features of No. 1 and in addition is equipped with adjustable pins of nickel plated brass, which slide in grooves and can be adjusted to any desired position.

ONE-QUARTER DOZEN IN A CRATE.

Extra Bolts for Curtain Stretchers.

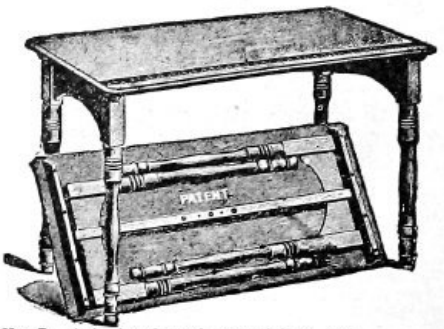
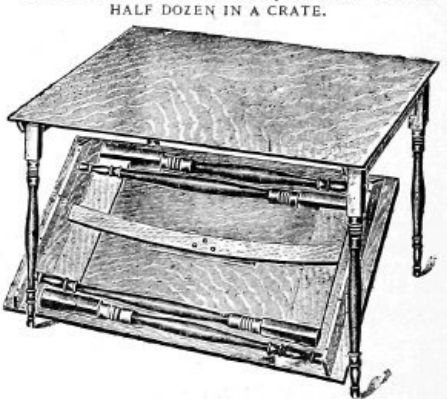
FOLDING TABLES.



No. 5—Ash, hardwood turned legs, varnished top, with yard measure, 18×36 in., height 25 in., w't per doz. 175 lbs.....per dozen $15.00

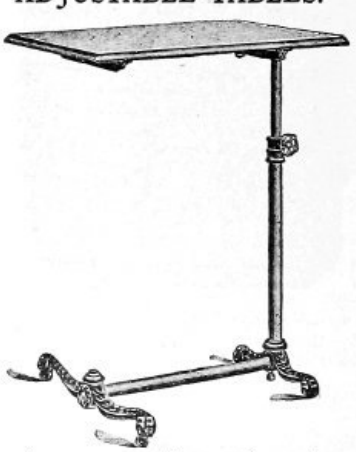
HALF DOZEN IN A CRATE.



No. 14—Card, ash, turned legs, varnished top, hardwood spring, 24×32 in., height 28 in., w't per doz. 235 lbs., per dozen..... $24.00

HALF DOZEN IN A CRATE.

ADJUSTABLE TABLES.



No. 1—Brown enameled metal parts, golden oak top, 18×24 in., adjustable to any angle and from 25 in. to 43 in. in height, detachable book rest, with casters, w't per doz. 372 lbs., per dozen $96.00

This table, while designed primarily for the sick room, is also convenient for sewing, writing, reading, drawing, games, or for a music stand or easel, and a desirable adjunct to the office desk and lecture platform. Can be easily adjusted to any desired height or angle. When used at the bedside, table projects over the bed without touching it, leaving the patient free to move the body without danger of upsetting contents of the table, and relieving patient of weight of tray, etc. Easily taken apart and put together.

ONE IN A CASE.

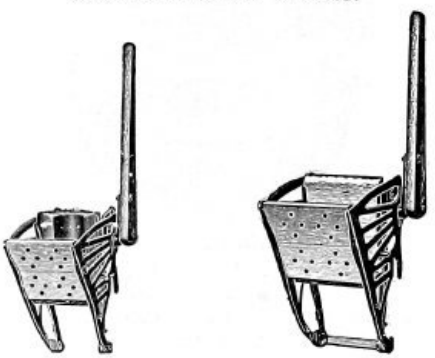
MOP WRINGERS.

No. 30—Cedar pail, electrically welded hoops, maple rollers with steel axles, tempered steel springs, steel treadle, malleable iron guide plates and foot holder, with bail, w't per doz. 156 lbs.....per dozen $30.00

This is an exceedingly useful device, and greatly reduces the drudgery of mopping, as with its use the hands are not wet, consequently strong lye water may be used. It is made to overcome faults of other makes; will not entangle mop cords. The pressure on the treadle wrings the mop quickly and satisfactorily.

ONE-THIRD DOZEN IN A CRATE.



No. 5. No. 0.

Cast Iron Japanned Frame, Wood Handle and Pressure Boards.

No. 3—Family size, opening 7×3½ in., wrings 8 to 16 oz. mops, w't per doz. 120 lbs.....per dozen $21.00

No. 5—Hotel size, opening, 7½×5 in., wrings Nos. 1 and 4 round mops, w't per doz. 150 lbs.....per dozen 24.00

No. 1—Hotel size, opening 7½×4½ in., wrings 16 to 24 oz.mops, w't per doz. 135 lbs.....per dozen 24.00

No. 0—Extra large, opening 8½×5½ in., wrings 24 to 34 oz.mops, w't per doz. 173 lbs.....per dozen 30.00

These wringers slip over the edge of a pail and drain into it. The handle has a spring which holds it upright, leaving the jaws always open. A 25 lb. pressure on the handle makes a 400 lb. squeeze on the mop.

WATER BAGS.

No. 8—2½ gal., w't per doz. 9 lbs., per dozen..... $18.00

No. 9— 5 gal., w't per doz. 15 lbs., per dozen..... 28.00

These bags are made of a material having the peculiar property of holding water and yet exuding enough moisture to prevent the sun from having any effect on the water inside.

Just the thing for travelers, timbermen, miners, prospectors, stockmen, surveyors, railroad men, threshing crews, teamsters, millmen and farmers. It can be taken on horseback, carried on the arm, or suspended from buggy, wagon, plow or any machine in use, so that a cool, refreshing drink will always be at hand.

Hang the bag in the air.

The material allows the water to evaporate slightly. Notice a drop of water on the outside of the bag continually. The constant exudation and evaporation keeps the water inside the bag cool and palatable.

First and second time filling, water will evaporate quite rapidly, after which bag is in condition to hold water indefinitely. Some evaporation is necessary to keep water fresh.

Guaranteed to keep water cool for forty-eight hours. When empty or its use is not desired, it can be folded up as a towel and carried in the pocket.

WATER KEGS.

HALF DOZEN IN A BUNDLE.

REV-O-NOC WASHING MACHINES

Downward Lever Motion.

Using Upper Handle Socket.

Easy access to tub.

No. 10 REV-O-NOC—Height 30 in., width 23 in., 19 in. fly wheel, red Louisiana cypress tub, grained, corrugated inside, double top, hinged cover, strong wringer attachment, double handle socket, cross braced legs, absolutely rigid, w't 90 lbs. ..... per dozen $144.00

The REV-O-NOC *is a distinct advance over the ordinary washing machine, in that it is easily run by a child and the motion is not tiresome when continued. It is as easy to operate as a bicycle, the power being applied very much in the same way.*

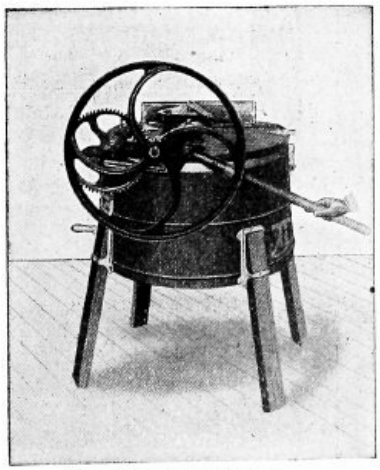
The new lever motion is a great improvement over previous washing machines. It enables the machine to be operated more rapidly. The flywheel travels at great speed, making seven revolutions with every downward thrust of the lever. This is much more rapid than any other washer on the market. It is not necessary to follow the lever down to its lowest point, but it can be released and no further effort need be exerted until it starts downward again. The power is applied in the easiest manner possible and a single downward stroke will operate the lever up and down three times without any further exertion.

The construction of the working parts is scientific and marvelously simple. The compound gearing insures great speed and the rapid motion of the fly wheel produces an evenness and smoothness of running which is both pleasant and thorough. All the parts are accurately made, fit perfectly, and run with very little noise. The top is made double to prevent warping. The few metal parts are simple, strong and not liable to get out of order. All parts are interchangeable and should they be broken by accident or misuse can be replaced at slight expense. The cover is hinged, and when it is lifted all of the machinery is shifted to one side, making it easy to get at the contents of the tub. A strong support is provided for attaching the wringer. The inside of the tub is corrugated and the dasher is made in the strongest manner possible and adjusts itself to the number of clothes which are being washed.

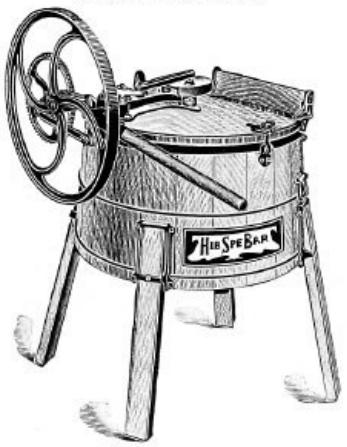
The dasher does not produce a jerk in its movements right and left, it starts slowly, gradually increases in speed and then comes to an easy stop before beginning again, exactly the same as a piston of an engine. There is therefore no unusual wear on the machine, and the clothes will not tear or wear in the washing. The movement of the dasher causes a great agitation in the water and the clothes are cleaned in a surprisingly short space of time, the dirtiest and greasiest clothes being rendered perfectly clean in three or four minutes.

The improved REV-O-NOC *has two sockets in which to place the handle, which permits the operator to work at the side or top.*

"HIB-SPE-BAR."



The Easy Lever Motion.



Cover Lifted.

No. 9—HIB-SPE-BAR, height 32 in., width 23 in., 20 in. wheel, lever, cedar tub, corrugated inside, four detachable legs, held in place by galvanized malleable sockets, absolutely rigid, double top, hinged cover, strong wringer attachment, w't 91 lbs. ..... per dozen $144.00

The power to operate the "Hib-Spe-Bar" Washer is supplied by the use of a lever which works up and down. This communicates power to a fly wheel which relieves the operator of the necessity of constant exertion, as a single downward movement of the lever is sufficient to turn the dasher back and forth at least three times. Moreover, the lever motion is a vast improvement over the continual exertion of turning the crank and is much more natural.

The simplicity of the mechanism by which the power is transmitted to the dasher, together with careful construction is responsible for the small amount of power needed. All parts are strongly made, carefully fitted and work smoothly and almost noiselessly.

The Tub is very strongly made of seasoned cedar, the staves being tongued and grooved and held together by two round electrically welded galvanized iron hoops and by a flat galvanized iron hoop at the top. The inside of the tub is corrugated on the sides and bottom in the best manner and is thoroughly water-proof. The legs are fitted into galvanized malleable iron sockets which are bolted to the tub. The cover, which is hinged, is made double and when lifted the entire mechanism is out of the way, so that access to the tub is extremely easy.

A wringer support is provided and is secured to the tub by galvanized iron plates. All of the working parts are japanned and the tub is finished in natural wood and varnished.

The Dasher is made with extreme care and is operated by a shaft fitted with a galvanized iron support which can be readily removed if necessary.

While the "Hib-Spe-Bar"-washer operates with considerably increased speed compared with ordinary rotary washers, there is no tendency to wear the clothes. The motion of the dasher to and fro is not accompanied by jerks, as the speed at starting and stopping is very slow, the speed being gently accelerating to a midway point and coming gradually to a stop at the end of the later half of the stroke. This produces a very agitated condition of the water which thoroughly permeates all of the clothes and cleanses them very rapidly.

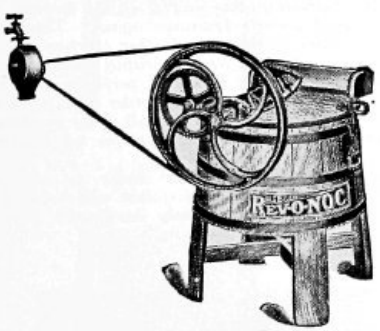
Attached to Faucet.



As Applied to Washer.

No. 1992—6 in., 2 in. plain pulley, made of brass, iron and steel.....per dozen $144.00

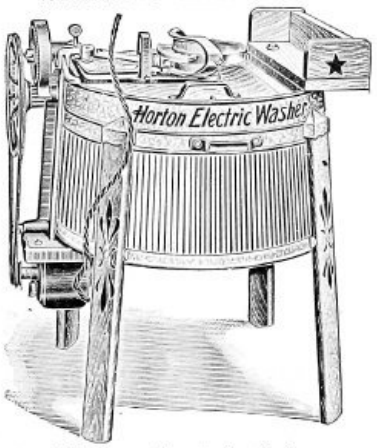
The motor is very simple, screws directly on to faucet instantly, and by simply slipping the belt on motor and machine to be driven is ready for work. Will operate rotary washers on 30 lbs. pressure or more. All parts are made of brass, iron and steel, and there being nothing to wear out, the motor should last indefinitely.

WATER MOTOR BELTS

9 ft. endless belt for No. 1992 water motors, 1 in. wide, made of rubber and cloth webbing.....each $0.80

One of these endless belts should be purchased with each water motor, as the regular rubber and leather belts are too heavy and use too much power.

WASHING MACHINES.



No. 17—★ HORTON, electric, family size, height 28 in., width 36 in., heavy galvanized steel tub, corrugated sides and bottom, wood top, legs and wringer attachment, complete with 10 ft. lamp cord and plug, w't 70 lbs.....per dozen $780.00

The lid can be opened and closed without turning off current or stopping machine.

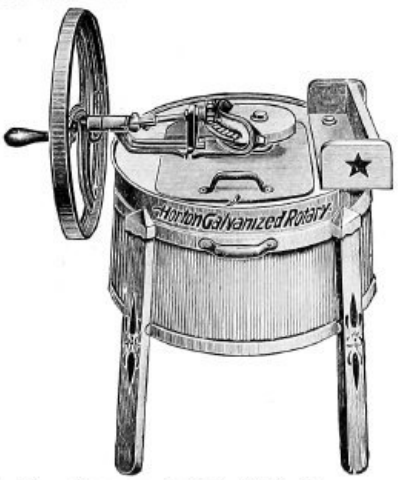
Is a popular and successful Washing Machine operated by the greatest power on earth, ELECTRICITY. Every one will recognize it at a glance as the complete destroyer of Wash-Day troubles.

For simplicity, longevity and ease of operation it cannot be excelled. No danger; nothing to get out of order; works perfectly.

Motor with all side attachments can be removed by turning one thumb nut. Motor can be removed by taking out four bolts and can be used for other purposes.

Equipped with a ten-foot lamp cord and plug to be attached to any lamp socket Either direct or alternating current motors furnished.

In ordering state voltage, also if current is direct or alternate.

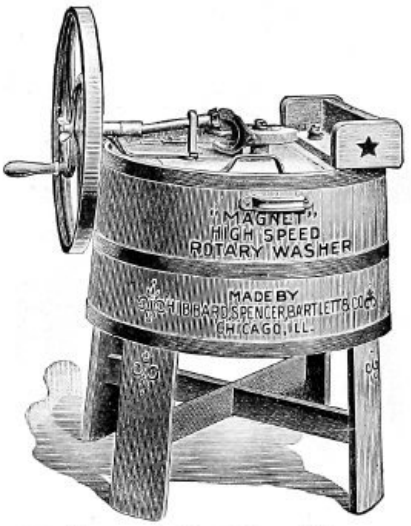


No. 11—HORTON, height 28¼ in., width 22½ in., 18 in. fly wheel, heavy galvanized steel tub, corrugated sides and bottom, wood top and legs, family size, wringer attachment, w't 70 lbs.....per dozen $120.00

This machine is similar to the No. 12, with the exception of the tub, which is galvanized steel instead of wood. It will not rust, shrink nor warp and is not affected by climatic changes. The lid is the only part of the body made of wood, which is essential to a perfectly noiseless operation. The legs which are made of oak, are firmly held to place by a galvanized bolt and socket.

★ *FACTORY SHIPMENT ONLY.*

WASHING MACHINES.



No. 12—MAGNET, height 28 in., width 22½ in., 18 in. wheel, high speed rotary, best grade Louisiana red cypress wood tub, finished in natural color, stave leg, w't 75 lbs., per dozen $108.00

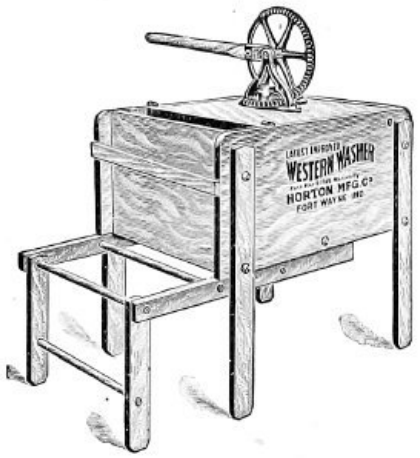
The gear is so constructed that all parts of the mechanism are in actual use when the pin wheel is driven in either direction, and no parts run idle, nor is any of the power of the drive shaft absorbed in shifting from one set of gears to another. Thus, in this machine the least possible friction occurs and the high power action is obtained with consequent greater speed. Two revolutions of the fly wheel turn the pin wheel or dasher ⅞ way around and back, making the highest speed rotary mechanism.

No. 7—O. K. ROTARY, height 28 in., width 27 in., 20 in. fly wheel, corrugated inside, cross braced legs, hinged cover, strong wringer attachment, best grade Louisiana red cypress, mahogany finish, weight 85 lbs.....per dozen $120.00

This is one of the best known rotary washers on the market. The inner surface of the tub is corrugated affording the largest rubbing surface possible.

The most important feature is the gearing which operates the dasher in the tub. The driving shaft is solid and to one end is attached an extra heavy driving pinion which meshes with a double gear head. This pinion and double gear working in conjunction with guides cast solid with the frame, make a combination for reverse motion unequalled for simplicity and strength.

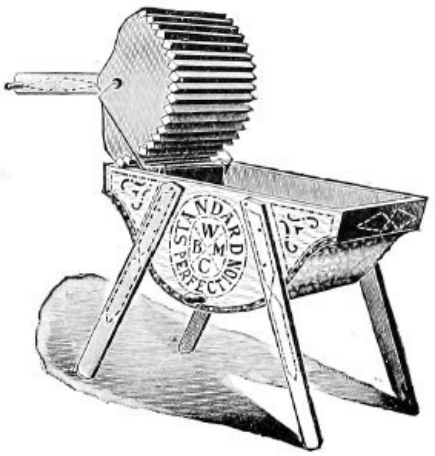
WASHING MACHINES.



No. 2—WESTERN, family size, hardwood body, 27 in. high, 25 in. long, and 20 in. wide, grained, inside corrugated, hinged cover, galvanized iron standard and cog wheels, hardwood handle and dashe sliding tub rack, wringer attachment, w't 60 lbs.....per dozen $70.00

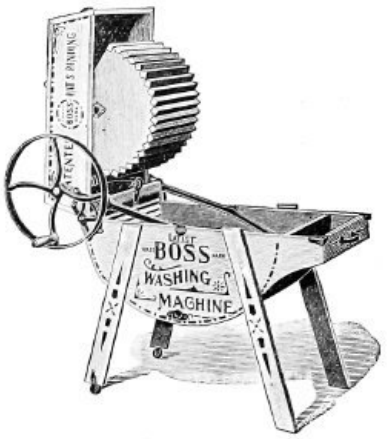
No. 3—WESTERN, large size, w't 65 lbs., otherwise same as No. 2....per dozen 74.00

This is one of the oldest and most successful washers on the market.



No. 120—★STANDARD PERFECTION, hardwood body, height 30 in., length 34 in., width 12½ in., wood grip, hardwood frame cylinder, malleable iron castings, hinged cover, w't 50 lbs., per dozen..... $50.00

This machine operates on the same principle as the No. 15 Superior.



Hardwood Body, and Frame Cylinder, Malleable Iron Castings, Hinged Cover.

No. 1—Boss, medium, height 31 in., length 35 in., width 19 in., 16 in. fly wheel, wood handle, w't 90 lbs., per dozen..... $125.00

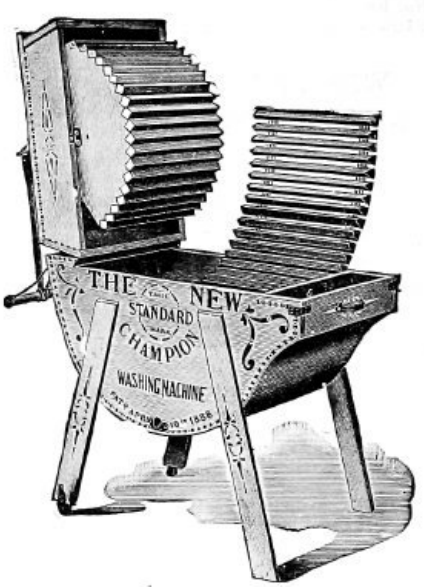
No. 2—Boss, large, height 31 in., length 35 in., width 21 in., 16 in. fly wheel, wood handle, w't 95 lbs....per dozen 137.00

No. 5—Boss, extra large, height 32 in., length 35 in., width 23 in., 20 in. fly wheel, w't 105 lbs.....per dozen 150.00

No. 4—AMERICAN, family size, hardwood, height 28 in., width 24 in., inside corrugated, hinged cover, galvanized iron, standard and cog wheels, hardwood handle and dasher, w't 50 lbs.....per dozen $70.00

No. 15—SUPERIOR, kiln dried Arkansas Cottonwood, height 24 in., length 33 in., width 21 in., galvanized iron body, with removable hardwood corrugated slats, hardwood cylinder and handle, galvanized iron socket guides, four hardwood bolted legs, w't 40 lbs., per dozen..... $48.00

In this washer the clothes are rubbed in the same manner as on the washboard. The cylinder is provided with three-cornered slats that rub and at the same time force the water through the clothes. The sockets allow the cylinder to adapt itself to the amount of clothes.



Hardwood Body, and Frame Cylinder, Hinged Cover, Malleable Iron Castings.

No. 1—STANDARD CHAMPION, medium size, height 31, length 34¾, width 18¼ in., wood handle, w't 80 lbs..per dozen $105.00

No. 2—STANDARD CHAMPION, large size, height 31 in., length 34¾ in., width 20½ in., fly wheel, wood handle, w't 90 lbs.....per dozen 117.00

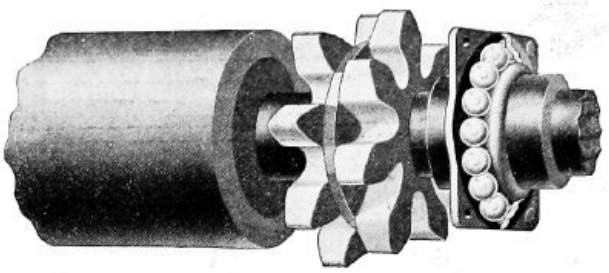
Particularly for use in hotels and small laundries.

ONE-QUARTER DOZEN IN A CASE.

GUARANTEED BALL BEARING WRINGERS.

On this and the following page we illustrate several patterns of Wringers, under the brands "Our Very Best" and "Rev-o-noc." The rolls in "Our Very Best" wringers are guaranteed for five years; those in the "Rev-o-noc" are guaranteed for three years, otherwise they are identical.

These wringers embody two very important improvements, namely, the "Enclosed Cog Wheels" and "Ball Bearings" but in connection with these are a number of other points which contribute to their superiority.



Frame—This is made of seasoned hard wood, in the simplest manner, carefully joined and bolted; all of the working parts encased leaving nothing to be desired in the appearance and convenience of the wringer. It is carefully varnished, painted, and well finished in every detail.

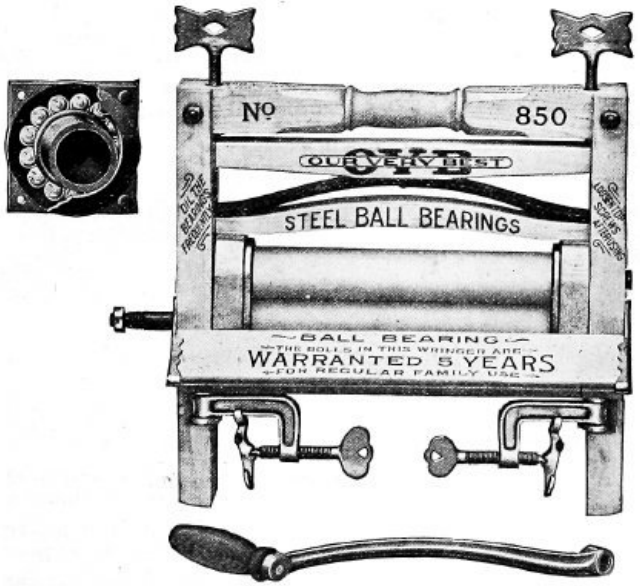
Rolls—These are of exceptional quality and *will last the term of years for which they are guaranteed*, if used for family washing. The "Our Very Best" are made from the best solid white rubber, the same quality from outside of cover to shaft, are soft and have the proper elasticity to do good wringing. The rolls of the "Rev-o-noc" are second only to the "Our Very Best."

COVERED GEARING—This is a very important improvement,—there is no danger of clothing catching in the cogs. The appearance is vastly improved. The spring is longer, removing the strain on the rollers when rolls are separated, and the danger of children getting their fingers crushed is entirely removed.

BALL BEARINGS—These are located on the outside of the Cog Wheels, and therefore removed a considerable distance from the rolls, so that no water can reach them from wringing of clothes. The ball race is so constructed that should any water reach the bearings, it will drain out immediately, avoiding rust. The bearings can be oiled without any danger of the oil reaching the rolls. The balls are solid steel of uniform size. The bearings are of large size and reduce friction to a minimum; and "Our Very Best" or "Rev-o-noc" wringer can be operated with one half the effort of an ordinary wringer.

OTHER POINTS—Everything about these wringers is high grade and made for use. The thumb screws are large and easy to handle. The spring is made of the best quality of steel, adapted for the purpose. The clamps are extra strong, easy to apply, and are made to be attached to wood or galvanized tubs, either round or square.

"OUR VERY BEST."



No. 850—"Our Very Best," 10×1¾ in. finest quality rolls, *warranted for five years*, encased cog wheels, *with ball bearings*, large frame, folding apron, adjustable clamps, for either wood or galvanized tubs, w't per doz. 196 lbs.....per dozen $75.00

No. 851—"Our Very Best," 11×1¾ in. finest quality rolls, *warranted for five years*, otherwise same as No. 850, w't per doz. 220 lbs.....per dozen 83.00

ONE-QUARTER DOZEN IN A CASE.

"REV-O-NOC."

"REV-O-NOC."

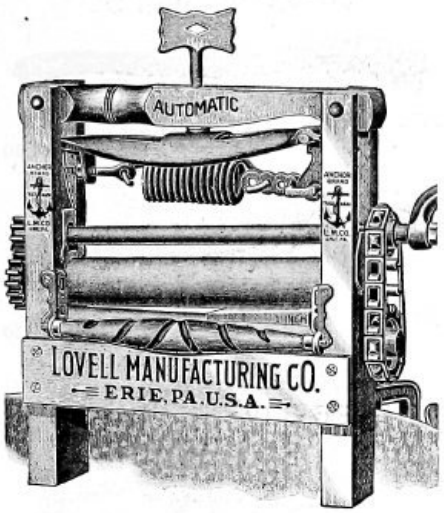
No. 830—"REV-O-NOC," 10×1¾ in. rolls, *warranted for three years, ball bearings*, encased cog wheels, large frame, steel spring, improved guide board, extra wide oscillating drip board, conducts water into either tub, folding bench, w't per dozen, 576 lbs.....per dozen $90.00

No. 831—"REV-O-NOC," 11×1¾ in. rolls, *warranted for three years*, otherwise same as No. 830, w't per dozen, 612 lbs....per dozen 97.00

ONE IN A CASE.

WRINGERS AND MANGLES.

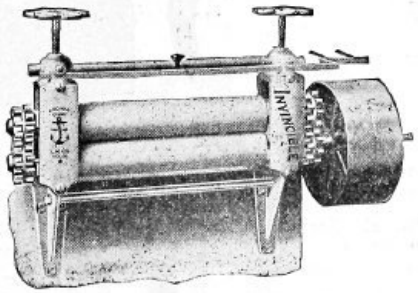
WRINGERS.



No. A110—AUTOMATIC, 10x1¾ in., extra high grade rolls, warranted five years, hardwood frame, sprocket chain with gear arrangement, automatic adjustment, w't per doz. 260 lbs.. .....per dozen $

The adjustment equalizes the roll pressure as shown in illustration, thus wringing equally dry the thick and thin portions of the garment. The sprocket chain with gear attachment gives more purchase power than in ordinary wringers, and thus makes the wringer turn with very little labor.

ONE-QUARTER DOZEN IN A CASE.



For Power.

No. 33—INVINCIBLE, 17x3¼ in. rubber rolls, heavy galvanized iron frame, steel spiral springs, equipped with 12x2½ in. pulley and belt shifter, w't 85 lbs.★.....each $

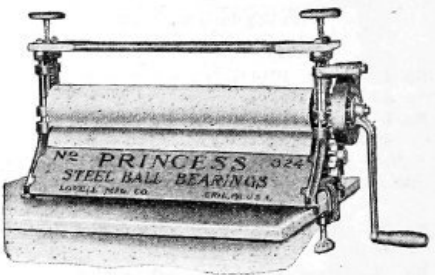
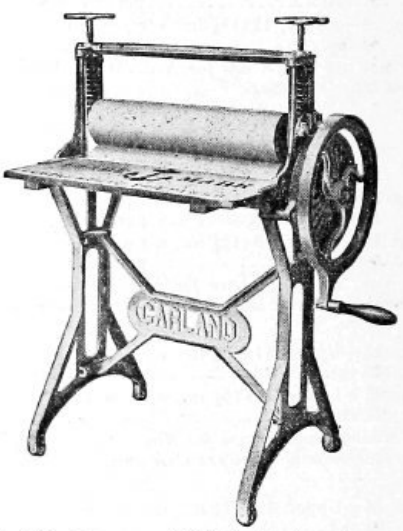
ONE IN A CASE.



No. 324—PRINCESS, 24x3½ in., selected hardwood rolls, thoroughly seasoned, *purchase gear*, iron frame, can be clamped on ordinary table, w't 72 lbs.....per dozen $136.00

ONE IN A CASE.



No. G3—GARLAND, 24x5¼ in. hardwood rolls, malleable iron frame, easy turning gear purchase arrangement, mounted on casters, w't 240 lbs., per dozen..... $504.00

Especially adapted for hotels, restaurants and laundry uses.

A mangle can be used for ironing everything that does not have buttons and that is not starched. It not only saves about one-third the time and labor but preserves the clothes, especially linens, as there is no possible chance of the fibre being destroyed with the hot iron. The clothes can be taken from the line, run through the mangle and put away. Bed linen, towels, etc., run through the mangle retain all the freshness that they get by hanging in the open air.

ONE IN A CRATE.

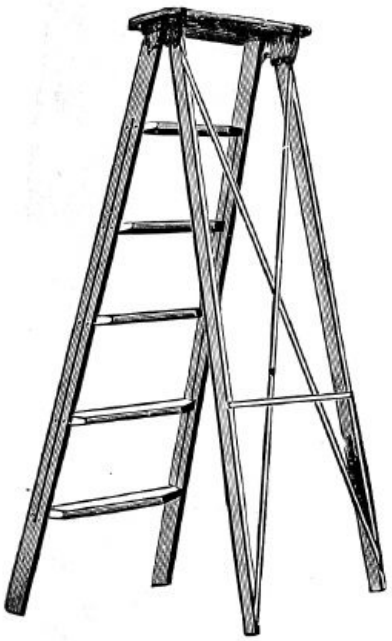
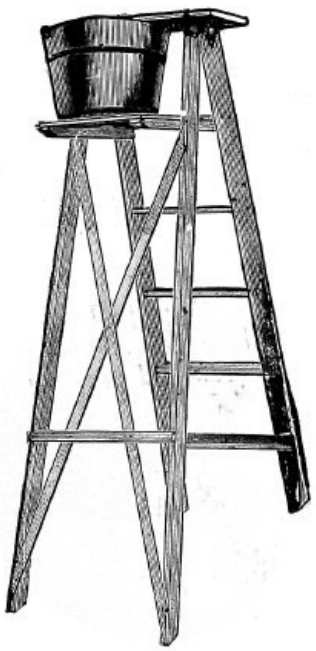
LADDERS.

STEP.



STANDARD.

Length	3	4	5	6	7	8 ft.
Weight	10	12	15	18	21	24 lbs.
Each	$0.60	.80	1.00	1.20	1.40	1.60



STANDARD, with Shelf.

Length	4	5	6	7	8 ft.
Weight	13	16	19	22	25 lbs.
Each	$1.00	1.20	1.40	1.60	1.80

STEP.

I X L IMPROVED, Extra Well Braced.

Length	5	6	7 ft.
Weight	16½	19½	22 lbs.
Each	$2.25	2.75	3.00
Length	**8**	**10**	**12 ft.**
Weight	24½	35	43 lbs.
Each	$3.50	4.50	5.00

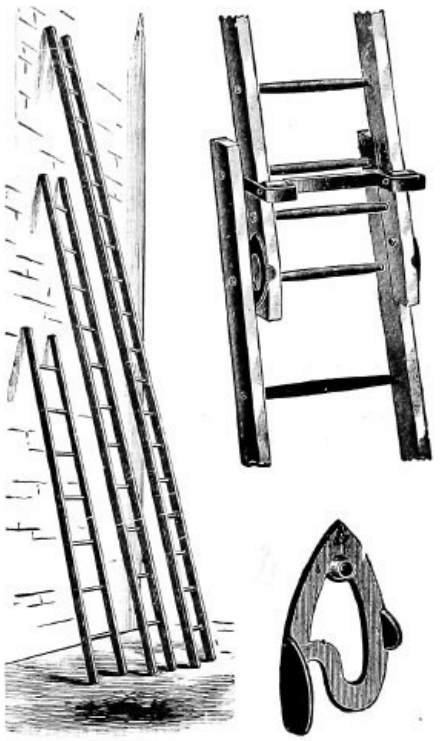
Made from selected and extra heavy stock, extra strong and very durable, malleable iron brackets and leg hinges, anchor irons under each step to prevent spreading, patent truss braces on back of steps, corner irons over end of each leg brace, new spreading brace to hold the legs.

STERLING, with Shelf, Extra Well Braced, Iron Truss Rod Under Each Step Running from Side to Side and Over a Truss Block.

Length	5	6	7	8	10	12 ft.
Weight	16	18	24	28	36	43 lbs.
Each	$2.75	3.30	3.85	4.40	5.50	6.60

This is an excellent ladder in every respect. Has wide steps, heavy sides and legs, and is well finished throughout. Has an absolute support for step, which positively holds sides as in a vise.

COMMON AND EXTENSION.



Common. Extension.

COMMON.

Length	10	12	14	16	18	20 ft.
Weight	25	30	35	40	45	50 lbs.
Each	$2.00	2.40	2.80	3.20	3.60	4.00

These ladders are well made of good material, the term common being used to designate the style of ladder and does not refer to the quality.

2 Section EXTENSION.

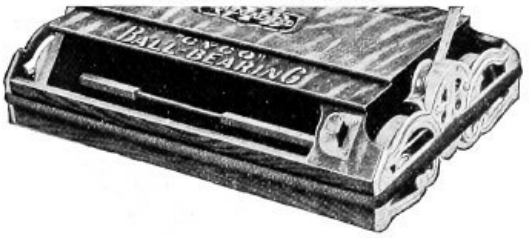
OUR VERY BEST CARPET SWEEPERS.

BALL BEARING.

Ball Bearings.



Dust Proof Axle Tube.

Brush Release and Anti-Raveler.

Showing Ball Retainer.

Important as are ball bearings to the ease and comfort of sweeping, this is not the most important feature of these sweepers. They represent the experience of almost a generation in the manufacture of this important line, and embody every important improvement which has stood the test of time. They are absolutely noiseless; they sweep thoroughly, and are extremely attractive in appearance.

The Wood Work is the very best, thoroughly seasoned and beautifully finished in oak or mahogany.

Metal Ends—Each end is protected by a single piece of metal, nickel plated and highly polished, which not only serves as a protection, but secures for the working parts a perfect alignment and freedom from damage.

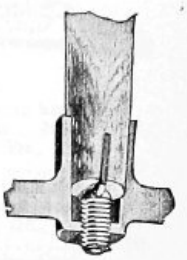
The Brush—The brush can be removed instantly by lifting the spring at either end, and can be as readily replaced. The sweeper has the patent broom action by which additional pressure on the handle will force the brush in closer contact with the floor. It is self-adjusting to all grades of carpet, and no pressure whatever need be put on the handle of the sweeper. A patent device on each end of the brush makes it impossible for ravelings to collect on the axle.

The Dust Pans—The sweeper may be opened on either side instantly by slight pressure on the push knobs.

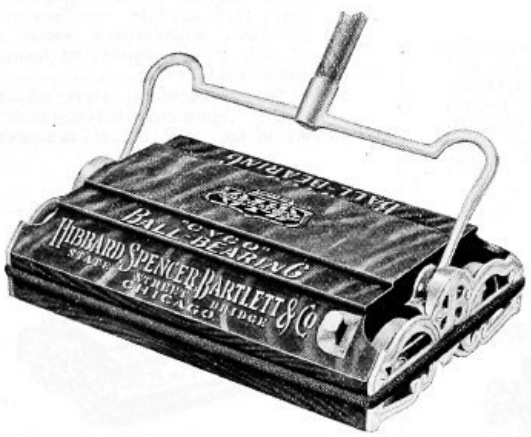
The Handle—The sweeper will work in either direction, and in sweeping the handle can be held in any position and will remain in an upright position. An improved locking device secures the handle to the bail.

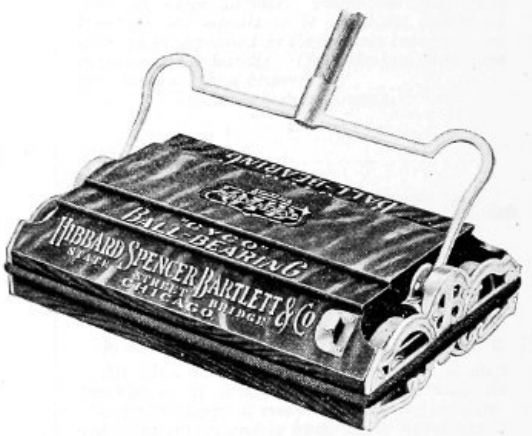
Ball Bearings—The four rubber-tired wheels are equipped with ball bearings of the most approved construction, reducing friction to a minimum. Each bearing consists of ten balls separated by a ball retainer and are absolutely uniform in size.

The Wheels—Made of pressed steel, as true as if turned in a lathe. The hubs are milled to an accurate fit. Fitted with soft rubber tires.



Patent Handle Fastener.





No. 24 OVB—9×14½ in., beautifully finished in oak or mahogany; ball bearing; adjustable broom action; patent opening; braided guard; metal ends; full nickel plated trimmings; dust proof axle tubes; anti-raveler; reversible bail spring; patent brush release; w't per doz. 118 lbs., per dozen.. ..... $52.00

HALF DOZEN IN A CASE

No. 26 OVB—Special, 9×14½ in. crotch mahogany box, of improved construction and artistic shape; piano finish, ball bearing, adjustable broom action, patent opening, braided guard, metal ends, full nickel plated trimmings, dust proof axle tubes, anti-raveler, reversible bail spring, patent brush release, w't per doz. 136 lbs.....per dozen $76.00

HALF DOZEN IN A CASE.

In this sweeper we have produced the finest machine in points of mechanism and finish, that has ever been offered on the market.

The case of the "OVB Special" is distinctive and highly artistic. It differs from all other sweepers, in that the case is made in one continuous piece of veneer, with no joints or nail holes appearing. With a new and highly improved brush propelling power, it runs so easily a mere touch propels it.

CARPET SWEEPERS AND BEATERS.

CARPET SWEEPERS.

No. 8—BISSELL'S STANDARD, 9×14 in., adjustable broom action, patent opening, rubber guard, patent spring for holding handle upright when not in use, japanned trimmings, w't per doz. 72 lbs.....per dozen $28.00

CARPET BEATERS.

No. 4—Three strands No. 12 galvanized wire, braided, hardwood handle, 1½ in. heavy steel ferrule, length 30 in., w't per doz. 8 lbs.,.....per dozen $2.50

ONE DOZEN IN A BUNDLE.

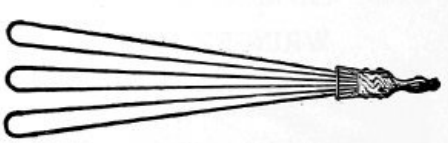
No. 12—12 gauge tinned steel wire, hardwood handle, length 28 in., head 9½×12 in., w't per doz. 6 lbs., per dozen..... $2.00

No. 11—11 gauge tinned steel wire, hardwood handle, length 32 in., head 10×14 in., w't per doz. 7½ lbs., per dozen..... 2.50

No. 10—10 gauge tinned steel wire, hardwood handle, length 35 in., head 10×14 in., w't per doz. 11 lbs., per dozen..... 3.50

This "Cleaner" rug beater has six wires in the beater head and the blow is evenly divided over the large surface. There are only four wires in the handle so it is elastic, while its strength is increased by these wires being twisted directly at the handle. Only the best furniture wire used in these beaters.

ONE DOZEN IN A BUNDLE.



No. 45—3 separate pieces of No. 12 coppered spring steel wire, securely held by strong iron braces, wood handle, length 36 in., w't per doz. 9 lbs..... per dozen $4.00

An ideal carpet whip. It removes the dust quickly, as it strikes a large surface with its strong wire loops at every stroke, doing no damage to the carpet and so hung in the handle as to be perfectly balanced in the hand. Does not strain the wrist of the beater. Impossible to get loose in the handle.

HALF DOZEN IN A BUNDLE.

No. 42—Rattan, three strand, 12×8½ in. blade, twisted rattan handle, wire wrapped in three places, extreme length 33 in., w't per doz. 5½ lbs., per dozen $4.00

ONE DOZEN IN A BUNDLE.

MOP STICKS.

No. 15 — CRESCENT, black enameled, wrought steel head, spring and bale of the finest tempered steel wire, w't per doz. 15 lbs.....per dozen $4.00
This is a new device for holding a scrub brush or mop, which does away with the old back breaking method of scrubbing the floor. When the lever is operated, the brush is held as in a vice. Greater pressure can be used on the brush and consequently better work can be done with this holder than with the old hand method.
The illustration clearly shows the method of using the mop rag.
Brush and cloth not furnished with stick.
ONE DOZEN IN A BUNDLE.

FLOOR SCRAPERS.

3-16 Inch Rubber, Nailed.
No. 12—12 in., w't per doz. 6 lbs., per dozen..... $3.50

UNIVERSAL PERCOLATORS.

DIRECTIONS.

Universal coffee percolators make perfect coffee, free from the bitter taste caused by boiling and retaining all the delicious, aromatic fragrance of the coffee bean, a healthful, appetizing beverage.

To taste coffee made in the Universal is to know for the first time what perfect coffee is like.

Anyone can make perfect coffee in the Universal. It can be used upon any kind of stove, whether burning wood, coal, gas or oil.

Fill with cold water—the only thing to use if perfect coffee is wanted—the construction of the pot is such that all the heat is concentrated around the little chamber below the automatic valve and in a minute or two after it is put on the stove the water, lukewarm at first, and gradually increasing in temperature, is pumped up through the tube and filters down through the coffee. In about fifteen minutes, or by the time the water has reached the boiling point, the coffee is ready to serve.

No eggs are needed to clarify the coffee. The escaping steam and aroma noticeable in every other kind of percolator is entirely absent in the Universal. The result is uniformly delicious coffee, retaining all its aroma, free from tannic acid caused by boiling, a result which cannot be reached with any other machine.

These coffee pots operate successfully on any range, stove, gas range or alcohol stove. Cast plate for gas or gasoline stoves sent with each pot.

ALUMINUM.

ONE IN A BOX; HALF DOZEN IN A CASE.

ALCOHOL STOVES.

No. 5D—Universal, nickel plated, height 5¾ in., diam. of top 6½ in., with wind shield to protect flame, w't 3¼ lbs., each $2.50

This stove produces the most intense heat with least expenditure of alcohol.

While it is especially designed for use in connection with Universal percolators, it is also particularly desirable for household use.

A quart of water of 50° Fahrenheit will boil in six minutes. For all other cooking purposes this stove will be found equally efficient and superior.

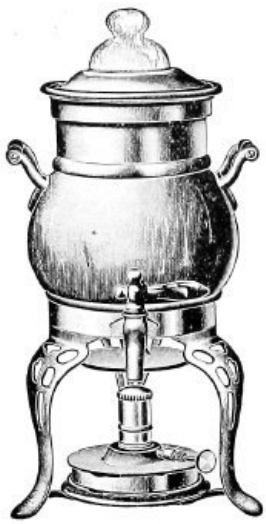
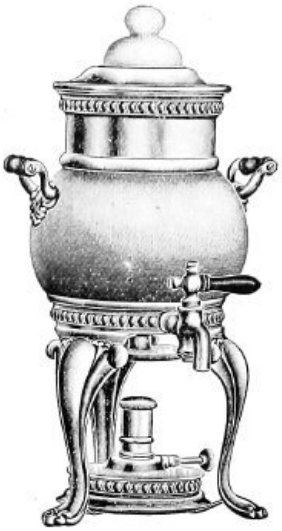
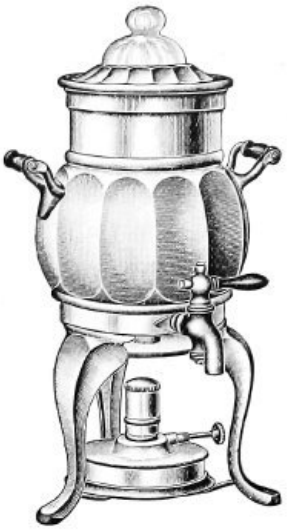
UNIVERSAL PERCOLATING MACHINES.



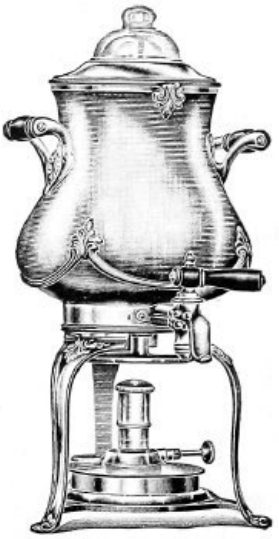
Plain Pattern.



Beaded Pattern.



Fluted Pattern.



French Pattern.

Universal Percolating Coffee Machine makes perfect coffee free from the bitter taste caused by boiling, and retaining all the delicious aromatic fragrance of the coffee bean. To taste coffee made in the Universal and know for the first time what perfect coffee is like, is worth living for.

In all other percolators the water must be boiling before it comes up through the tube. This boiling dissipates the aroma, impairs the flavor and brings out the bitter taste and whatever there is unwholesome in coffee.

The Universal should be filled with cold water—the only thing to use if perfect coffee is wanted, but if in a hurry, warm or even hot water may be used to begin with, but results are not so good. In about a minute after the lamp is lighted, the heat being concentrated around the little chamber beneath the automatic valve causes the automatic pump to begin to force the water up through the tube while it is only lukewarm. As the water is gradually heated, the percolating process goes on all the time. The wholesome qualities of the coffee are extracted, and by the time the water has reached the boiling point (which seems necessary to bring out the flavor and aroma) the coffee is ready to serve. There is no escaping of steam by this process, as in all others, therefore the aroma is not lost. The water reaches the boiling point only at the last stage of the process, while in other machines the water is boiling all the time the process is going on.

Coffee made in the Universal is a healthful, aromatic and invigorating beverage.

Directions for Using Universal Coffee Machine.

Take out the cup with its tube, fill the percolator with as much water as may be desired, replace the cup and tube, and put into the cup one rounded dessert spoonful of ground coffee, not pulverized, to every cup of water that is in the percolator. Put on the spreader plate and the cover, light the lamp, and the machine is ready for operation.

The color of the coffee as seen through the glass indicates when coffee is strong enough to serve. When the water reaches boiling point instead of there being a full jet of coffee at the top of the tube, a small quantity only will come through with a peculiar sputtering noise. The lamp should then be turned down to its smallest flame, as the coffee is then ready to serve.

The Alcohol Lamp on this machine is a very fine one. It produces an intensely hot steady flame, assuring a maximum amount of heat at a minimum cost. Any other kind of spirits that are used in an alcohol lamp can be used in the Universal; 95 per cent. alcohol, however, gives the best results.

Care should be taken to see that the lamp always contains plenty of alcohol, for if the alcohol runs out while the lamp is burning, the wick is likely to be charred, thus interfering with the free burning of the lamp. The wick, however, may be easily replaced.

The flame may be regulated as desired by turning the knob. When not in use the knob should be turned to the right as far as it will go and top cap put on, covering the tube to prevent evaporation.

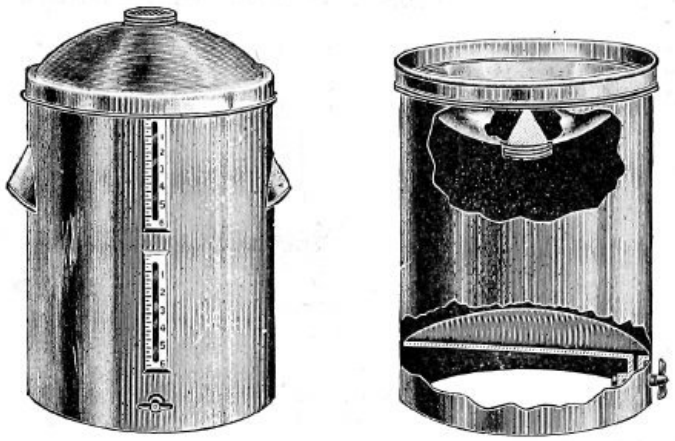
CREAM SEPARATORS AND STANDS.

SIMPLEX SEPARATORS.



Single Can, Dilution Type, XXXX Bright Tin, Concave Bottom Slanting to Outlet to Drain Completely, Concealed Straightway Faucet Readily Cleaned and Cannot be Knocked off, Two Gauges, Reversible Combination Ventilating Cover and Strainer, Strainer Removable.

Nos	206	208	210	212
Milk capacity	5½	7½	9½	11 gal.
Sizes	15×20	15×23	15×27	15×30 in.
W't crt'd	16	16½	18½	24 lbs.
Each	$4.00	4.50	5.00	5.50

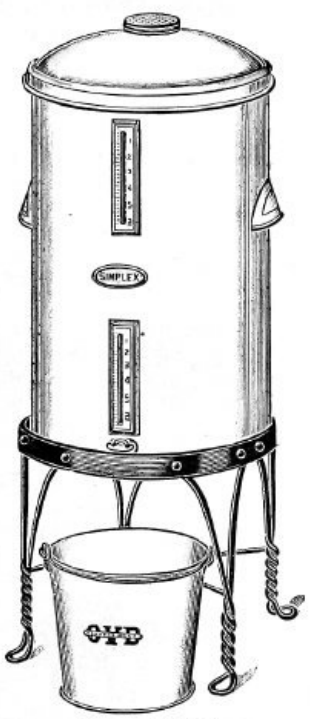
DIRECTIONS: Set in cool place on bench or shelf high enough for pail to go under and extended over edge of bench so faucet will clear; pour fresh milk through reversed cover, add like amount cold water or ice, in cold weather less water answers. When separation is complete (after two or three hours) first draw skim milk, then the cream, after which scald and sun-sweeten for next milking.

Nature's way, with only pure water added.

(Actual capacity is double milk capacity shown.)

ONE IN A CRATE.

SIMPLEX SEPARATOR STANDS.

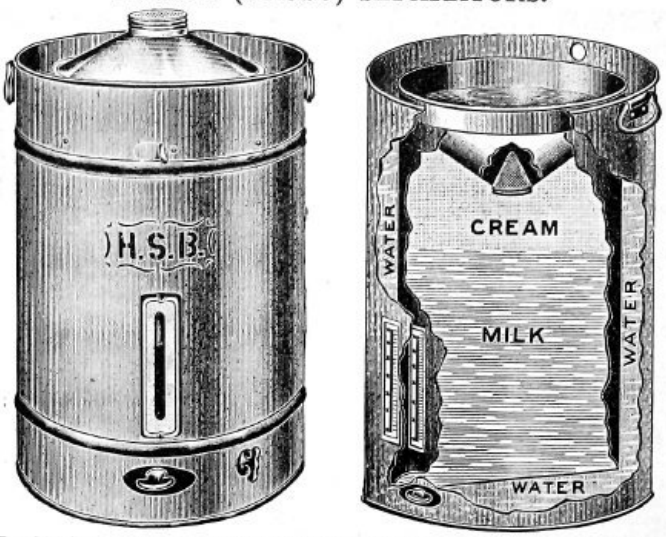


Japanned Steel.

No. 201—18 in. high, for mounting Simplex separators, legs of ⅜ in. twisted steel rod and bolted to top rim, w't 8 lbs each, stand only $2.00

ONE IN A BUNDLE, KNOCKED DOWN.

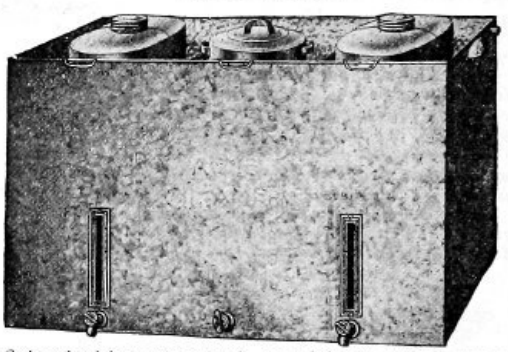
H. S. B. (CRUSO) SEPARATORS.



Double Can, Inner Milk Can Removable, Heavy Bright Tin Painted Water Side, Slanting Bottom, Draining Completely, Reversible Combination Cover and Strainer, the Cone Strainer Removable.

Nos	6	8	11	13
Milk capacity	6	8	11	13 gal.
W't crt'd	28	31	35	39 lbs.
Each	$5.00	5.50	6.50	7.50

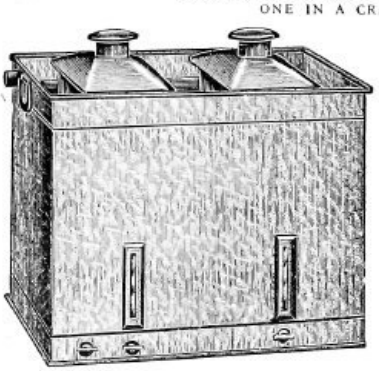
ONE IN A CRATE.



No. 53—Galvanized iron water tank, containing 2 4½ gal. removable oval tin milk cans, and 1 3-gal. round cream storage can, w't crt'd 52 lbs. ..... each **$13.00**

Like No. 305 with extra storage can.

ONE IN A CRATE.



Double Can Accommodates Two Milkings, Galvanized Iron Outer Can, Two Oval Inner Cans of Heavy Bright Tin, Painted on Water Side, Concave Perfectly Draining Bottom, Milk Cans Removable by Unscrewing Faucet, Concealed Faucet not Easily Knocked Off, Reversible Strainer and Ventilating Covers.

Nos	305	308	310
Milk capacity	9	15	19 gal.
W't crt'd	33½	40	45½ lbs.
Each	$9.00	9.50	10.00

ONE IN A CRATE.

DIRECTIONS FOR ALL ABOVE: Set separator where it will not be disturbed, on bench or shelf high enough for pail to go under, and projecting so faucet outlet clears; pour milk into inner can through reversed cover, then cold water into outer can, colder the better, water may run continually. When cream has all raised, draw off skimmed milk, then the cream into another vessel, scalding and sunning inner can for next milking.

MILK CANS.

Unless Otherwise Specified Cans Will be Fitted with Regular Covers Illustrated on Page 863. Nos. 205, 208, 210, 408, 410, 608, 610, 808 and 810 Will be Fitted with No. 3 Stamped or No. 30 Malleable Handles to Order.

GAS OVEN ROASTERS OR PANS.

No. 0—IDEAL, blued steel, 10×10 in., each pan 2½ in. deep, w't per doz. 22 lbs. ..... per dozen $6.50

Consists of two nestable pans, one forms cover for other and so used makes a most effective roaster. Pans may be used separately as drip or bread pans.

ONE DOZEN IN A BOX.

ROASTERS.

"Rev-o-noc," One Piece Seamless, Oval, Concave Bottom, Only Two Parts, no Seams, no Corners.

No. 30—Rustless blue glazed finish, 15×9½×6½ in., w't per doz. 50 lbs., per dozen $15.00
No. 300—Rustless blue glazed finish, 18×11×7½ in., w't per doz. 70 lbs., per dozen 16.00
No. 50—Rich glossy black enamel, flecked with white, 15×9½×6½ in., w't per doz. 50 lbs ..... per dozen 25.00
No. 500—Rich glossy black enamel, flecked with white, 18×11×7½ in., w't per doz. 70 lbs ..... per dozen 30.00

The one piece bottom is made by pulling the stamping inside out with ingenious machinery and is an exclusive "Rev-o-noc" feature.

The outer rim of the bottom acts as a heat retaining jacket imparting it evenly to all parts of the roast. It is impossible for anything to burn as the bottom cannot touch the oven. The juices and flavors which are lost in many roasters are all retained. The steam and juices from the roast collect in the concave bottom and as the roaster is air tight, basting is unnecessary.

Besides being the best roaster made, the "Rev-o-noc" is unsurpassed for baking bread, beans and many other things.

ONE-QUARTER DOZEN IN A CRATE.

Brownie.

L. & H.

Sheet Steel with Ventilator, Indented Top and Bottom.

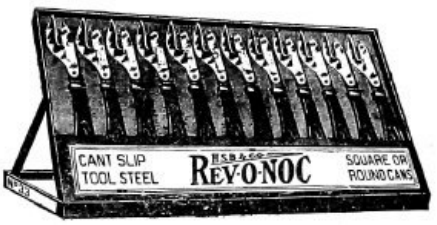
No. 75—IMPROVED NEVER-SLIP, blade and fulcrum of one piece oiled tempered steel, nickel plated, polished hardwood handle, w't per doz. 1¾ lbs., per dozen $2.00

ONE DOZEN IN A BOX.

No. 9—DELMONICO, best quality, nickel plated steel blade, japanned iron handle, adapted to round or square cans, w't per doz. 2¼ lbs.....per dozen $3.00

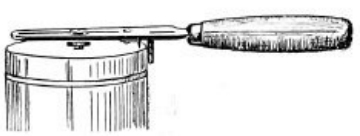
ONE DOZEN IN A BOX.

CAN OPENERS.



No. 33—REV-O-NOC, nickel plated tempered steel blade, japanned handle, adapted to round or square cans, w't per doz. 2¼ lbs.....per dozen $2.00

ONE DOZEN IN A DISPLAY BOX.



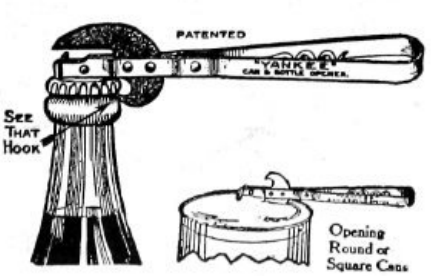
No. 30—"HIB-SPE-BAR," circular, nickel plated, wrought shank, self-adjusting pin, tempered crucible steel blade, cuts circular hole in top of can, w't per doz. 2 lbs.....per dozen $2.00

Knife cuts close to side of can and turns edge under, leaving a smooth opening, which permits contents to be taken out whole. Always cuts a true circle as the self-adjusting pin allows knife to follow extreme edge of can.

ONE DOZEN IN A DISPLAY BOX.

No. 6—PERFECT, new model, nickel plated; tempered steel shank and gear, three tempered steel blades, to cut off entire top of round cans, a circular hole in top or around edges of square cans, enameled wood handle, w't per doz. 3½ lbs..... per dozen $4.00

ONE DOZEN IN A DISPLAY BOX.



No. 14—YANKEE, nickel plated, hardened steel blade, w't per doz., 1¼ lbs., per dozen..... $2.00

Removes tin caps from bottles, opens round or square tin cans, removes corks from bottles.

ONE DOZEN IN A BOX.

HOT PAN LIFTERS.

No. 22—Cast, nickel plated, length 5½ in., w't per doz. 4 lbs.....per dozen $2.00

Operates like scissors, and remains attached to pan as shown in illustration. It is the simplest and best pan lifter made. Fits tin as well as enameled ware and does not chip the enamel. Requires no pressure of the hand and is as solid as if part of the pan.

ONE DOZEN IN A PASTEBOARD BOX.

BOTTLE STOPPERS.

No. 1D—PERFECTION, large quart size, for claret neck bottles or heavily carbonated beverages, w't per doz. 1½ lbs..... per dozen $4.00

No. 2D—PERFECTION, pint or small quart size for any ordinary bottle, w't per doz. 2 lbs.....per dozen 4.00

The Perfection Stopper is made of pure rubber with nickel plated trimmings, and by simply pressing down the pin, the rubber is elongated and can be easily inserted or removed from the bottle while in this position. Self-adjusting, absolutely air-tight, retains the gas in carbonated beverages after once opened.

ONE DOZEN IN A BOX.

HALF DOZEN IN A BOX.

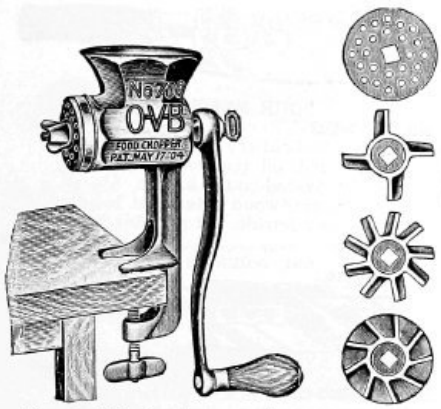
"OUR VERY BEST" FOOD AND MEAT CHOPPERS.

O.V.B. FOOD CHOPPERS.



The O. V. B. chopper does not mash or squeeze, but chops into clean cut, uniform pieces, all kinds of meat, raw or cooked, also vegetables and fruits, fine or coarse as wanted.

There are five spiral channels inside the cylinder, each channel leads up to a separate outlet. The five outlets in the end of the cylinder are large, permitting food to pass without crushing. These large outlets require long knife blades, which mean great cutting surface, and explain the double capacity, as compared with other food choppers of the same sizes.

Every part is heavily tinned, this prevents discoloring food or fruit. All parts are interchangeable and guaranteed against defect. We carry all repairs in stock.

"OUR VERY BEST"

Heavily Tinned, All Parts Interchangeable.

Nos	7	70	
Hopper	$2\frac{1}{2}\times3\frac{1}{8}$	$3\frac{1}{8}\times4$	in.

W't per doz.	75	110	lbs.
Per dozen	$21.00	27.00	

Four cutters are furnished with each chopper, coarse, medium, fine and nut butter grinder.

The coarse (four tooth) cutter for chopping apples, fresh and dried fruits, vegetables, clams, salt pork, suet and cooked meats.

The medium (nine tooth) cutter for chopping all of the above, bread, crackers and other foods.

The fine (perforated plate) cutter is particularly desirable for chopping raw meat, also vegetables and other foods desired fine.

The nut butter cutter for grinding nuts, etc., for nut butter, or any thing required extremely fine.

ONE IN A BOX; HALF DOZEN IN A CASE.

By means of these attachments a meat chopper may be converted into an excellent stuffer. When so used, the plate and knife are taken out and the attachment secured by screwing the ring over it. The diameter of the end is $\frac{3}{4}$ in.

ONE IN A PASTEBOARD BOX.

The "O. V. B." embodies all the best meat cutting principles with several new features, it is thoroughly well constructed of the best materials and is all that its name implies, viz.: THE BEST MEAT CHOPPER ON THE MARKET. The knife and plate are made of the BEST TOOL STEEL and they fit together perfectly so that when the knife revolves against the plate, the meat is CUT in a rotary scissors-like manner. SINEWS and GRISTLE pass through the machine without extra effort and are smoothly and evenly cut. ONE PLATE $\frac{3}{16}$ in. hole is regularly furnished with each chopper.

The "O. V. B." is furnished with an EXTRA LONG CRANK which gives it good leverage and thus enables it to OPERATE EASILY. The body of the chopper is well UP OFF the TABLE and it has no "hind legs" to interfere with the placing of a dish UNDERNEATH THE END of the machine.

One of the principal features of the "O. V. B." Meat Chopper is that, all of them are readily DETACHABLE from the block or bench to which the bottom plate is attached and thus they MAY BE WASHED and SET ASIDE when not in use, or may be put in the ice box in hot weather to prevent the small particles of meat from becoming tainted.

You will note we do not give the "capacity per minute" on any of our machines. This cannot be estimated with any degree of accuracy on ANY meat chopper, unless the speed at which it is operated is considered.

The "O. V. B." is guaranteed to cut as fast as, or faster than any competitive chopper of comparative size.

SHEET STEEL ROOFING.

Roll and Cap.

Painted—28 gauge, approximate w't per roll 77 lbs. per roll $

Galvanized—28 gauge, approximate w't per roll 93 lbs. per roll

Heavier gauges furnished if desired.

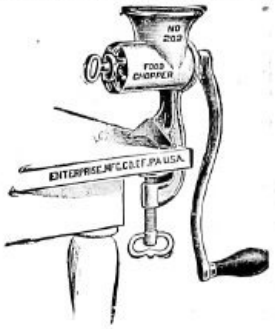
The distinctive feature of this roofing is the locking of the cleats into the cap, which holds it firmly to the standing seam. The construction is simple, and is easily and rapidly laid. The metal caps are made in 2 to 6 ft. lengths, which we furnish with each square, cleats included. Each roll is 50 ft. long; the covering width is 24 in., and will lay 100 sq. ft. on building.

Caps and cleats shipped unless otherwise instructed.

Tools necessary to lay are: 1 edging tong, 1 cap seamer, 1 pair snips. These are charged for when sent and if returned in good order, free of expense to us, we will refund the full amount.

MEAT AND FOOD CHOPPERS, STUFFER ATTACHMENTS, ETC.

ENTERPRISE FOOD CHOPPERS.



Tinned Iron, with Clamp, Phosphor Bronze Bearing.

No. 101—Cylinder 1¾×3 in., height 5 in., furnished with 3 cutters, coarse, medium and fine, w't per doz. 54 lbs., per dozen $15.00

No. 202—Cylinder 1¾×3½ in., height 5 in., furnished with 3 cutters, coarse, medium and fine, chops 2 lbs. per minute, w't per doz. 66 lbs. ..... per dozen 18.00

No. 303—Cylinder 2×4 in., height 7 in., furnished with 3 cutters, coarse, medium and fine, chops 4¾ lbs. per minute, w't per doz. 90 lbs. ..... per dozen 27.00

These choppers are intended for general use and will chop almost anything. They are exceptionally well made, easily cleaned, do quick and perfect work, and can be taken apart and cleaned almost instantly. The phosphor bronze bearing prolongs the life of the machine very materially, also adds to the ease in operating.

NOS. 101 AND 202, ONE DOZEN; NO. 303, HALF DOZEN IN A CASE.

ENTERPRISE MEAT CHOPPERS.

Tinned Iron, with Screw Clamp.

No. 5—Cylinder 1⅞×4 in., height 6 in., chops 1½ lbs. per minute, w't 4⅝ lbs. ..... each $1.75

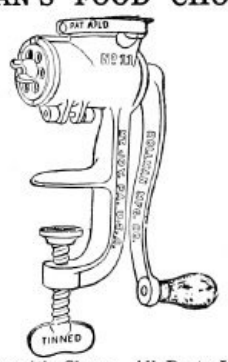
ONE DOZEN IN A BOX.

ROLLMAN'S FOOD CHOPPERS.



Tinned Iron, with Clamp, All Parts Interchangeable.

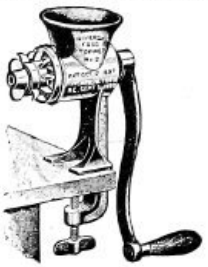
No. 11—Cylinder 1⅛×2¼ in., height from table 3¼ in., 4 steel cutters, coarse, medium and fine, chops ½ lb. of raw meat per minute, w't per doz. 16 lbs. ..... per dozen $6.00

No. 12—Cylinder 1¾×2½ in., height from table 3¾ in., 4 steel cutters, coarse, medium and fine, chops 1 lb. raw meat per minute, w't per doz. 30 lbs. ..... per dozen 8.65

Four cutters accompany each machine, one coarse enough for hash, one fine enough for Hamburg steak, one for very fine meat chopping, pulverizing spices, etc., and one for nut butter. It is simple in construction and easy to clean.

HALF DOZEN IN A PASTEBOARD BOX.

UNIVERSAL FOOD CHOPPERS.



Chops all kinds of meat, fruit and vegetables, coarse or fine as desired, into clean cut, uniform pieces. Cutting parts are so constructed that any wear tends to keep them always sharp. Whatever is being chopped lubricates all bearings where friction occurs.

All Parts Tinned and Interchangeable.

No. 0—Cylinder 1½×2½ in., height 5 in., for small family, furnished with 3 cutters, coarse, medium and fine, chops 1½ lbs. per minute, w't per doz. 46 lbs. ..... per dozen $21.60

No. 1—Cylinder 2×3 in., height 5½ in., for medium family, furnished with 3 cutters, coarse, medium and fine, chops 2 lbs. per minute, w't per doz. 60 lbs. ..... per dozen 24.00

No. 2—Cylinder 2×3 in., height 6 in., for large family, furnished with 3 cutters, coarse, medium and fine, chops 2½ lbs. per minute, w't per doz. 68 lbs. ..... per dozen 27.00

No. 3—Cylinder 2⅜×4 in., height 7¼ in., for hotel, restaurant and market, furnished with 4 cutters, very coarse to very fine, is so made that a stuffing attachment may be used when desired, w't per doz. 116 lbs. ..... per dozen 36.00

HALF DOZEN IN A CASE.

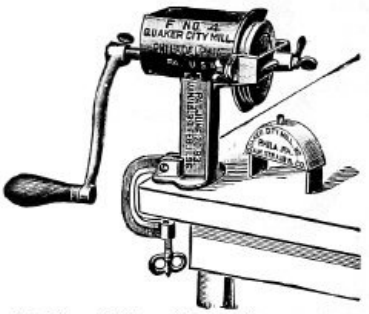
UNIVERSAL STUFFER ATTACHMENTS.

No. 2—For No. 2 food choppers, w't per doz. 1½ lbs. ..... per dozen $4.00

No. 3—For No. 3 food choppers, w't per doz. 1¾ lbs. ..... per dozen 5.00

ONE IN A PASTEBOARD BOX.

PEANUT MILLS.



For Grinding Coffee, Grain, Drugs, etc., and Making Peanut Butter.

No. 4—Tinned iron, with clamps 5 in. cylinder, height 8 in., 4 in. grinding discs, capacity 5 lbs. peanut butter per hour, weight 10 lbs. ..... each $4.00

No. 40—With hopper, otherwise same as No. 4, weight 10½ lbs. ..... each 5.50

These mills will grind peanuts and all kinds of nuts, corn; soaked, soft and ground wet; all wet and oily substances; coffee, corn meal, cracker dust, bread crumbs, cracked wheat and oats, raw and cooked meats, carbonate of ammonia, all kinds of drugs, spices, herbs and roots; raisins for marmalade, etc.

RAILROAD SAUSAGE STUFFERS.

Japanned Iron Base, Tin Cylinder.

No. 5—3½×8 in. cylinder, family size, w't per doz. 130 lbs. ..... per dozen $15.00

HALF DOZEN IN A CASE.

PERRY'S SAUSAGE STUFFERS.

Cast Iron Japanned, Tin Spout.

No. 1—Diam. of cylinder 3½ in., handle 22 in., w't per doz. 122 lbs. . per dozen $15.00

No. 0—Diam. of cylinder 4½ in., handle 25 in., w't per doz. 190 lbs. . per dozen 21.00

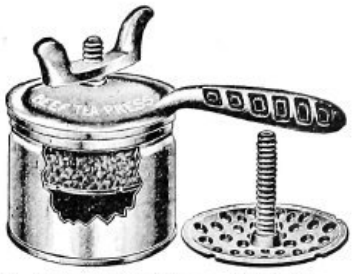
HALF DOZEN IN A CASE.

SMOKED BEEF SHAVERS.

No. 23—ENTERPRISE. 16 in. channel, 12 in. blade, improved, adjustable, japanned, with self sharpening device, w't 29½ lbs. ..... each $8.00

The knife works like a pendulum allowing clean, fast work; automatic feed can be regulated for slices from 1 1/8 in. to a tissue thickness.

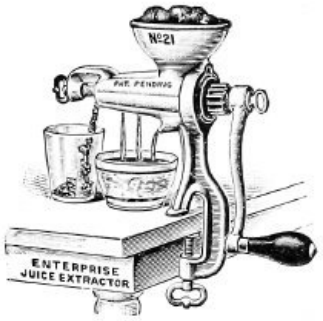
BEEF TEA PRESSES.



No. 43—Nickel plated frame, 3×2½ in., tin cylinder, open bottom, for extracting juice from meat, w't per doz. 12 lbs. ..... per dozen $6.00

THREE DOZEN IN A CASE.

MEAT JUICERS.

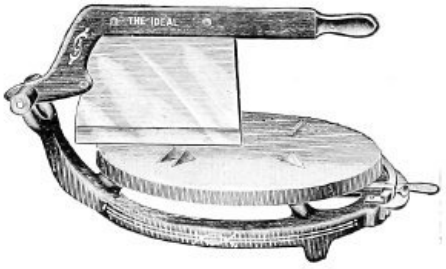


Enterprise.

No. 21—Tinned, length 9 in., height 12 in., w't 7 lbs. ..... per dozen $24.00

This machine is adapted for the extraction of juice from meat. The machine being tinned, no metallic or inky flavor will be imparted to the material used. The dryness of refuse can be regulated by a thumb screw at the outlet.

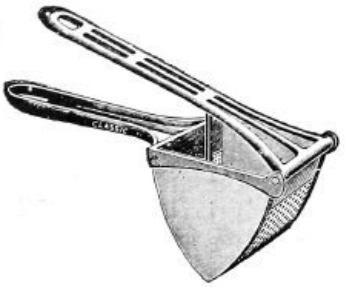
IDEAL CHEESE CUTTERS.



No. 10—Cast iron enamel frame, nickel trimmings, heavy steel blade well tinned to prevent rusting, blade 9¼ in., wood table 16 in., w't 57 lbs. ..... each $15.00

No intricate scale to figure out. The dealer knows the total cost of his cheese; he adds to this the amount of profit he expects to make and sets the computing lever on the total selling price and tightens the thumb screw, at the left of the scale. After this has been done each full stroke of the operating lever moves the cheese so that a five cent piece may be cut off, two full strokes ten cents' worth, etc. The Ideal has none of the complicating features of many other cheese cutters, but is simple, reliable, accurate and very strong.

VEGETABLE AND FRUIT PRESSES.



No. 55—Japan'd *steel* frame, w't per doz. 9 lbs. ..... per dozen $5.00

No. 57—Tinned *malleable* iron frame, w't 10½ lbs. ..... per dozen 7.00

No. 65—Japanned malleable iron frame 12 in., perforated tin cylinder 3½×3¼ in., w't per doz. 17 lbs., per dozen $6.00

THREE DOZEN IN A CASE.

FRUIT PRESSES.

No. 34—ENTERPRISE, tinned, length 12½ in., height 13½ in., w't 12½ lbs. ..... per dozen $36.00

This machine is superior to all others for making wine, jellies and fruit butters from berries of all kinds, grapes, currants, tomatoes, quinces, pineapple, etc. It extracts juice and ejects the skins and seeds in one operation. The dryness of the pulp or refuse can be regulated by the thumb screw at the outlet.

SIX IN A CASE.

RAISIN SEEDERS.

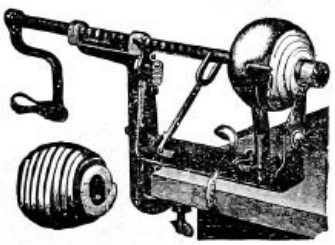
No. 4—CROWN, family, tinned, 7 in., w't per doz. 35 lbs. ..... per dozen $12.00

THREE DOZEN IN A CASE.

Will seed a pound of raisins in 5 minutes. The raisins should be sprinkled into the hopper as fast as the roller will grasp them. Simple in construction, easily adjusted and will do rapid work.

PARERS, SLICERS, STONERS, ETC.

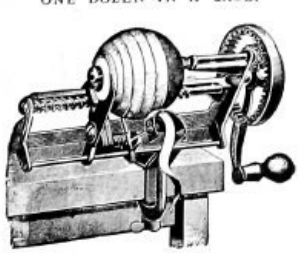
APPLE PARERS.



No. 80—WHITE MOUNTAIN, apple parer, corer and slicer, with push-off, lacquered, height 4 in., w't per doz. 25 lbs., per dozen $7.00
This machine pares and slices at the same time or can be used to pare only.
ONE DOZEN IN A CASE.

No. 98—GOODELL'S, turn table, apple parer with automatic push-off, lacquered, height 8 in., w't per doz. 45 lbs. ..... per dozen $9.00
The above parer is superior to all others for household use where paring only is desired.
ONE DOZEN IN A CASE.

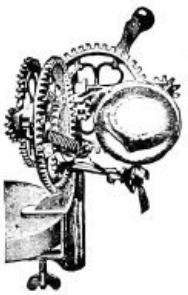
No. 78—READING, apple parer, upright, with covered works, lacquered, height 8½ in., w't per doz. 70 lbs., per dozen $10.00
The oldest and best known apple parer made. The mechanism is arranged so that the juice and peelings fall below the parer, not on it.
ONE DOZEN IN A CASE.



No. 90—GOODELL'S BAY STATE, FAMILY, apple parer, corer and slicer, with automatic core push-off, lacquered, height 5¾ in., w't per doz. 60 lbs., per dozen $19.00
HALF DOZEN IN A CASE.

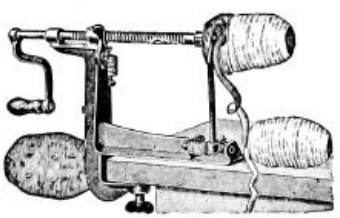
PEACH AND APPLE PARERS.

No. 65—SCOTT'S, peach and apple parer, detachable from stand, with rotary knife, lacquered, height 5½ in., w't per doz. 52 lbs., per dozen $18.00
The only successful peach parer made.
ONE DOZEN IN A CASE.



POTATO PARERS.

No. 1—GOODELL'S SARATOGA, potato parer and slicer, lacquered, height 10½ in., removes eye and slices at one operation, w't per doz. 30 lbs., per dozen $9.00
ONE DOZEN IN A CASE.



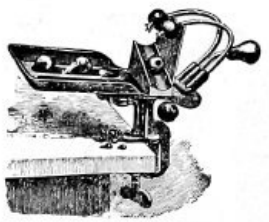
No. 2—GOODELL'S SARATOGA, potato parer, lacquered, 5½ in., removes the eye perfectly, w't per doz. 25 lbs., per dozen $9.00
ONE DOZEN IN A CASE.

FRUIT AND VEGETABLE SLICERS.

Will Slice All Kinds of Fruits and Vegetables.

No. 5—STERLING, walnut bronzed frame with screw clamp, height 12 in., heavy tempered steel double blades, nickel plated adjustable disc, diam. 8 in., safety feed, w't per doz. 96 lbs., per dozen $24.00
Slices all kinds of vegetables and fruits—any thickness—all slices even. Makes the best cold slaw and Saratoga chips, recuts for French fried potatoes, squares for soups, etc. Prepares vegetables in squares or strips for cooking. Slices sausages and cooked meats. Cuts up anything for salads, meat for meat pies, material for pickles. Well protected and is easily taken apart for cleaning or brushing.
HALF DOZEN IN A CASE.

CHERRY STONERS.



No. 3—GOODELL'S, family, lacquered, height 5 in., w't per doz. 18 lbs., per dozen $6.50
This machine removes stones from cherries two at a time, without grinding or mashing the fruit.
ONE DOZEN IN A CASE.

This cherry stoner will seed from 20 to 30 qts. per hour. It picks the cherry up, drives the seed out, leaves the fruit whole and throws it into a dish, there being no grinding, mashing or loss of juice.

No. 5—ROLLMAN, tinned, with screw clamp, height 10½ in., w't per doz. 21 lbs. ..... per dozen $9.00
HALF AND ONE DOZEN IN A CASE.

Nos. 1 to 17.

No. 20.

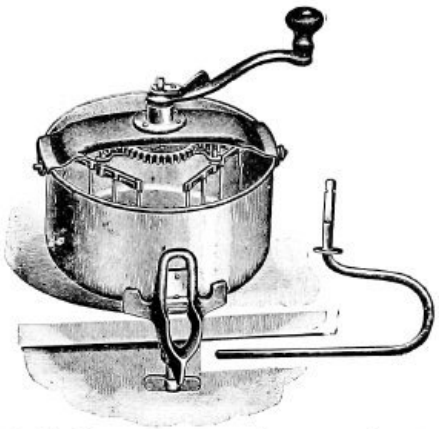
No. 1—ENTERPRISE, japanned, height 8 in., w't per doz. 50 lbs. ..... per dozen $8.00
No. 2—ENTERPRISE, tinned, height 9 in., w't per doz. 60 lbs. ..... per dozen 9.00
No. 17—ENTERPRISE, japanned, height 9 in., w't per doz. 60 lbs., per dozen 9.50
No. 20—10 in. high, bronze japan, adjustable to any size cherry, w't per doz. 40 lbs., ... per dozen 7.25
No. 17 is constructed with a regulating device, which is used to adjust machine for different sizes of cherries.
TWO DOZEN IN A CASE.

Will stone cherries with least possible cutting or disfiguring. The crank is easily turned and the plunger removes seeds without loss of juice. Seeds 30 to 40 quarts of cherries per hour. Also seeds grapes nicely.

No. 50—NEW STANDARD, TINNED iron, height 8 in., w't per doz. 40 lbs., per dozen $9.00
ONE IN A BOX.

UNIVERSAL CAKE AND BREAD MAKERS.

CAKE MAKERS.



No. 5—Wrought steel, one piece stamped bowl with extra kneading rod, all parts heavily tinned, capacity 4 qts. or less, w't per doz. 96 lbs.....per dozen $21.00

For every revolution of the crank the beaters revolve five times, insuring rapid, uniform and thorough mixing of the materials. Being entirely open, the mixing process is easily watched, and flavoring, sugars, etc., can be added as required. It can easily be attached to the table and removed when through.

ONE IN A PASTEBOARD BOX; HALF DOZEN IN A CASE.

BREAD MAKERS.

No. 44—Heavy tin cover, sheet steel body with side clamp, height 10 in., diam. 11 in., w't per doz. 106 lbs., per dozen $24.00

The top of this bread maker is on a level with the table and it can be used by a person sitting down.

ONE QUARTER AND HALF DOZEN IN A CASE.

BREAD MAKERS.

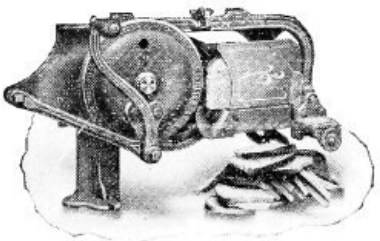
Heavy Tin Cover, Sheet Steel Body, With Bottom Clamps.

Nos	2	4	8
Capacity	2	4	8 loaves
Height	9	10	11⅞ in.
W't per doz.	57	104	168 lbs.
Per dozen	$16.25	24.00	27.00

ONE QUARTER AND HALF DOZEN IN A CASE.

These machines will mix and knead bread thoroughly in three minutes; without putting hands to the dough, so simple in construction that a child can operate them; very easily cleaned and can be easily attached to a table and removed when through. The dough may be left in the pail to raise, thereby doing away with the bread raiser.

BREAD SLICERS.



No. 50B—STERLING, size of cut 5½×5½ in., w't 56 lbs. ..... each $20.00

No. 70 —STERLING, size of cut 8½×7½ in., w't 90 lbs. ..... " 28.00

These slicers are a necessity where slicing of bread, meat, fruit, etc., is done in quantity. The cutting is done by a round tool steel knife of the highest grade, finely ground and tempered, which revolves as the carriage moves across the face of the material to be cut, both of which movements are produced by the rotary motion of the handle. The speed at which the knife travels makes it enter the work easily and cut through quickly any material, hard or soft, without squeezing, like a circular saw.

LEMON SQUEEZERS AND JUICERS.

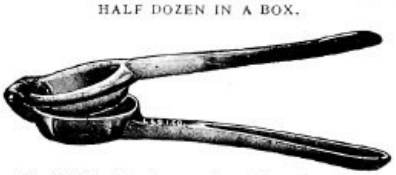
LEMON SQUEEZERS.

No. 6—White maple, hardwood ball, 2 in. cup, length 10 in., w't per doz. 7 lbs.....per dozen $1.75
THREE DOZEN IN A CRATE.

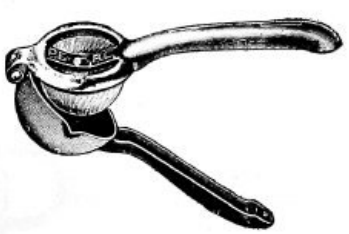
No. 9—White maple wood, porcelain ball and bowl, strap iron hinges, length 9½ in., w't per doz. 10 lbs., per dozen..... $3.00
THREE DOZEN IN A CRATE.

No. 5—Boss, malleable iron, tinned, length 8 in., w't per doz. 10 lbs., per dozen..... $1.75
HALF DOZEN IN A BOX.

No. 15—IMPROVED BOSS, malleable iron, heavily tinned, ribbed bowl and cone, length 9 in., w't per doz. 12 lbs., per dozen..... $2.25
HALF DOZEN IN A BOX.



No. 4—Malleable iron, heavily tinned frame and strainer bowl, length 10½ in., w't per doz. 20 lbs.....per dozen $3.25
HALF DOZEN IN A BOX.



No. 50—Malleable iron, nickel plated, hardwood ball plunger, length 8 in., w't per doz. 12½ lbs.....per dozen $3.00
HALF DOZEN IN A BOX.

LEMON SQUEEZERS.

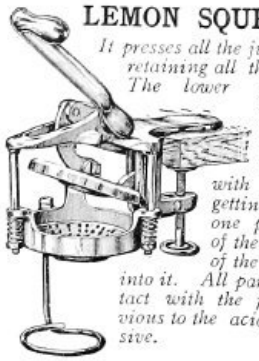
No. 100—Japanned iron frame, porcelain bowl resting on rubber ring, hardwood ball plunger, length 8½ in., w't per doz. 18 lbs.....per dozen $4.00
HALF DOZEN IN A BOX.

No. 14—Japanned iron frame, large glass cup with ribbed cone, length 10 in., w't per doz. 20 lbs.....per dozen $5.00
No. 140—Tinned malleable iron cup, otherwise same as No. 14, w't per doz. 19 lbs.....per dozen 5.00
Glass cup is easily removed and can be used separately as a juice extractor.
HALF DOZEN IN A BOX.

No. 22—LITTLE GIANT, malleable iron, tinned, with plate to retain lemon, length 9¼ in., w't per doz. 16 lbs., per dozen..... $8.00
HALF DOZEN IN A BOX.

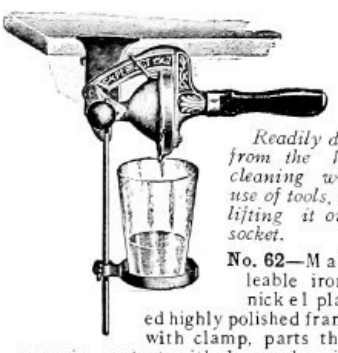
No. 10—Drum, japanned malleable iron frame, extra deep porcelain bowl, hardwood combination plunger and strainer, length 9½ in., w't per doz. 25 lbs.....per dozen $ 8.50
No. 12—Drum, nickel plated malleable iron frame, otherwise same as No. 10, per dozen..... 11.50
ONE IN A BOX.

LEMON SQUEEZERS.



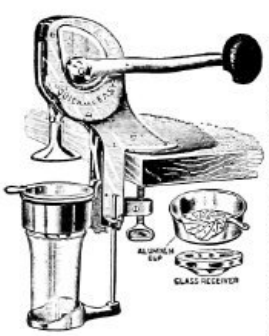
It presses all the juice from the fruit, retaining all the pulp and seeds. The lower presser block and strainer rest upon springs so as to work both large and small fruit with equal efficiency, getting all the juice with one positive movement of the lever without any of the bitter part getting into it. All parts coming in contact with the fruit are impervious to the acid and non-corrosive.

No. 52—UNIQUE, height over all 7 in., finished in duplex copper, nickel plated surface, w't per doz. 80 lbs., per dozen..... $48.00



Readily detached from the holder for cleaning without the use of tools, by simply lifting it out of the socket.

No. 62—Malleable iron, nickel plated highly polished frame with clamp, parts that come in contact with lemon heavily coated within and will not corrode, adjustable tumbler stand, w't per dozen 48 lbs,..... per dozen $35.00



The aluminum cup and glass juice receiver set in loosely and can instantly be removed, juice does not come in contact with metals, insuring absolute purity. The squeezer has a rotating movement adjusted so that it extracts every particle of juice.

No. 42—Nickel plated and highly polished, cast aluminum crusher head and cup, with clamp adjustable glass support, 21×16×13 in., w't per doz. 88 lbs.....per dozen $75.00
ONE IN A BOX.

LEMON JUICERS.

No. 1.

No. 2.

No. 1—Clear glass, ribbed cone, strainer base, for use on tumbler, w't per doz. 4 lbs.....per dozen $1.00
No. 2—Clear glass, ribbed cone, deep saucer, w't per doz. 10 lbs., per dozen 2.00
NO. 1, ONE-THIRD DOZEN; NO. 2, HALF DOZEN IN A BOX.

ICE PICKS, CHISELS, SHREDDERS, ETC.

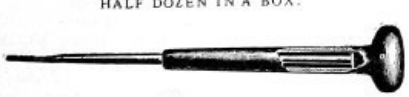
ICE PICKS.

No. 5—Tempered steel needle point, large maple head, length 9¼ in., w't per doz. 2 lbs.....per dozen $1.50
ONE DOZEN IN A BOX.

No. 3—Tempered steel needle point, hardwood handle, nickel plated iron head, length 9 in., w't per doz. 4 lbs., per dozen..... $1.50
ONE DOZEN IN A BOX.

No. 6—Tempered tool steel, 1½ in. tapered point, flat screw driver handle of hardwood, length 9½ in., w't per doz. 3 lbs.....per dozen $2.00
Flat handle for iceman's use, fits in the pocket.
HALF DOZEN IN A BOX.

No. 2—Tempered tool steel, nickel plated, 3½ in. evenly tapered needle point, imitation cocobolo handle, length 8¼ in., w't per doz. 1¾ lbs.....per dozen $2.00
HALF DOZEN IN A BOX.



No. 18—Tempered steel needle point, japanned iron sliding handle, length closed 8¾ in., w't per doz. 7 lbs., per dozen..... $3.00
HALF DOZEN IN A BOX.

No. 80—Tempered tool steel, nickel plated, 1½ in. taper needle point, hardwood handle with heavy tinned cap, length 9½ in., w't per doz. 9 lbs., per dozen..... $3.50
ONE DOZEN IN A BOX.

No. 700.

No. 7—Hurwood, polished tempered steel needle point running through handle, riveted and headed, 3 in. drawn point, ebonized handle, diam. 1¼ in., polished steel ferrule, length 9¾ in., w't per doz. 1½ lbs., per dozen $4.00

No. 70—Hurwood, 4½ in. drawn point, ebonized handle, diam. 1½ in., otherwise same as No. 7, except that it is a heavier and stronger pick, w't per doz. 2½ lbs.....per dozen 4.50

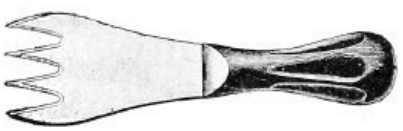
No. 700—Hurwood, 4½ in. drawn point, ebonized handle, diam. 1½ in., ⅝ in. nickel plated octagon steel ring, forced and riveted on handle, otherwise same as No. 7, w't per doz. 3½ lbs., per dozen 5.50

The ring serves as an ice breaker and also prevents pick from rolling.
ONE DOZEN IN A BOX.

ICE PICKS.

No. 1—, fine tool steel, entire length forged and gradually tapering to needle point with proper temper to spring without bending, heavy blued steel ferrule, large hardwood ebonized handle, pick 6 in., entire length 10½ in., w't per doz. 6 lbs.....per dozen $5.50
The smooth gradual taper of this pick gives it a penetrating power unequaled by any other pick on the market.
ONE DOZEN IN A BOX.

ICE CHISELS.



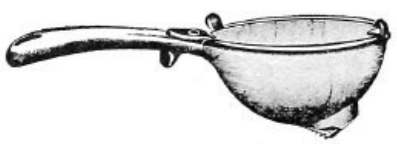
No. 25—Cast steel polished blade, cast iron handle, black japanned, length 7½ in., w't per doz. 8½ lbs., per dozen $1.75
ONE DOZEN IN A BOX.

No. 100—Polished steel blade, natural finish hardwood handle, nickel plated cast iron cap, length 8½ in., w't per doz. 7 lbs.....per dozen $1.75
ONE DOZEN IN A BOX.

No. 50—Nickel plated steel blade, fancy hardwood handle, nickel plated, malleable iron cap, length 10 in., w't per doz. 6½ lbs.....per dozen $2.75
ONE DOZEN IN A BOX.

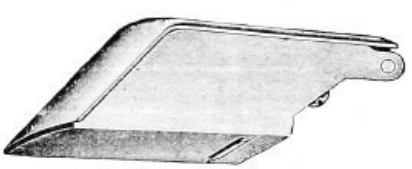
ICE SHREDDERS.

No. 9—Tinned bowl, 2¾ in. diameter, cast teeth chilled and ground, w't per doz. 7 lbs.....per dozen $2.50
ONE DOZEN IN A BOX.



No. 10—Tinned bowl, 3¾ in. diam., patent self emptying cover, tempered steel knife tooth edge, length 7¼ in., w't per doz. 13 lbs.....per dozen $6.00
HALF DOZEN IN A BOX.

ICE SHAVES.



No. 3—Tinned iron, adjustable tool steel knife, which is removable for sharpening, length 6½ in., w't per doz. 23 lbs., per dozen..... $6.50
HALF DOZEN IN A BOX.

ICE CHIPPERS.

No. 6—Tinned cast head, four tool steel teeth, sharpened and tempered, hardwood handle, held to head by large bolt, which runs through handle, length 10 in., w't per doz. 14 lbs....per dozen $7.50

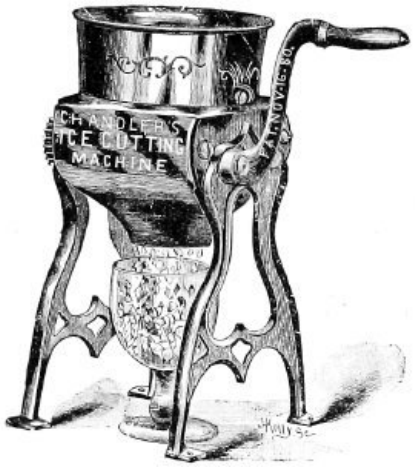
ICE CHISELS.

No. 14— 6 in. blade, 9 in. handle, w't per doz. 12 lbs.....per dozen $ 9.50
No. 19— 9 in. blade, 10 in. handle, w't per doz. 16 lbs..... " 12.50
No. 22—16 in. blade, 20 in. handle, w't per doz. 20 lbs..... " 15.50
The blade is made of tool steel fully tempered and polished; the teeth are properly shaped and ground to a knife-like edge, elegantly finished hardwood handle.
ONE-QUARTER DOZEN IN A BOX.

No. 600—Heavy forged steel blade, 8×4¼ in., half polished, teeth properly shaped and ground to a knife edge, hardwood handle with malleable D, length 42 in., w't per doz. 42 lbs.....per dozen $20.00

ICE CUTTING AND BREAKING MACHINES.

ICE CUTTING MACHINES.



Chandler's Improved.

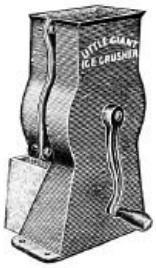
No. 1 —Counter size, height 10 in., w't 7½ lbs.....each $ 6.00
No. 2 —Family size, height 15 in., w't 14 lbs.....each 8.50
No. 2½—Hotel size, height 18 in., w't 25 lbs.....each 13.50
No. 3 —Confectioners' size, height 24 in., w't 85 lbs.★.....each 34.00

No. 1 is a small, compact, simple, strong and cheap machine, which cuts the ice into small diamond-shaped pieces with the utmost ease and rapidity. Can be attached by screws to any table, counter or shelf, and occupies a space only 8 in. square.

No. 2½ stands 18 in. high, occupying a space 8×11 in., and will take in a piece of ice weighing 12 lbs.

No. 3 stands 2 ft. high, occupying a space 15 in. square, and will take in a cake of ice weighing 25 lbs.

Special attention is called to the two largest sizes, No. 2½ and No. 3, designed for hotels and confectioners, hospitals and other institutions where crushed ice is used in quantities for table, ice cream and other purposes.



Showing Drum used on all Little Giant Machines.

Little Giant.

No. 0—Hopper 4×6 in., height 18 in., with pan to receive crushed ice, w't 30 lbs.....each $7.50

The blades of drum are fastened to the cylinder wheels on the spiral plan. These blades are made of best tool steel and are shaped and set that just so much ice feeds through as the cylinder revolves. The steady cutting makes the machine easy to operate.

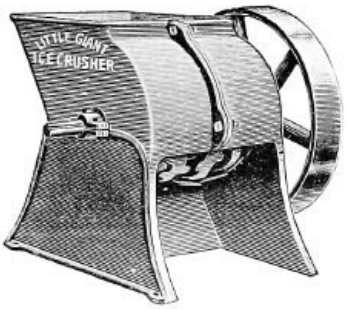
In operation the ice is placed directly on the cylinder and feeds through very rapidly of its own weight. The ice, as it leaves the machine, is in uniform pieces that are longer and wider than they are thick, these flat pieces pack very evenly, making the ice effective in the highest degree.

ICE BREAKING MACHINES.

No. 5.

No. 5 —Hopper 8½×12 in., height 46 in., floor space 24×24 in., capacity 150 to 300 lbs. per minute, hand power, w't 270 lbs.★.....each $35.00
No. 5P—For power, with tight and loose pulleys, diameter 2½ in., face 2½ in., tight pulley has handle so that it can also be operated by hand, otherwise same as No. 5★.....each 40.00

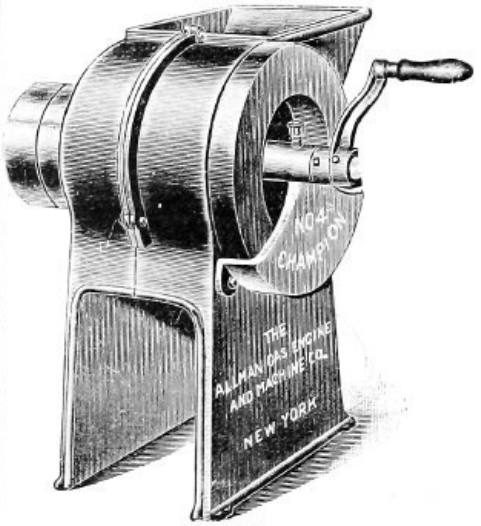
When ordering state whether fine or coarse cut is desired.



No. 7—For power, hopper 11×12 in., height 29 in., floor space 24×24 in., pulley 24 in., face 4 in., requires about one horse power and can also be operated by hand, capacity 7 ton per hour, w't 500 lbs.★.....each $60.00

These machines are regularly furnished with but one tight pulley. If requested loose pulley will be furnished without extra charge. The shaft extends long enough on each side so that either one or two pulleys can be used on either side.

ICE BREAKING MACHINES.



No. 4P.

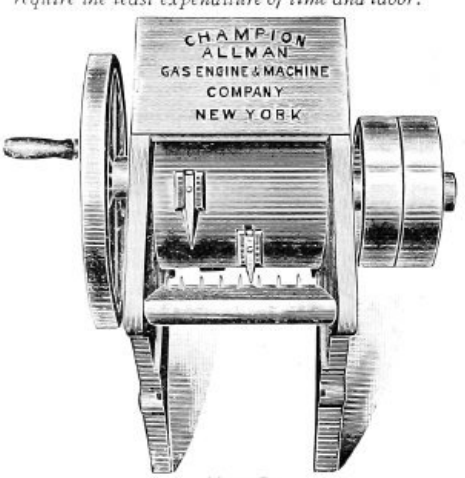
No. 4 —Hand power only, fly wheel with crank, will break ice 11×14 in., of any length, height 30 in., width between frames 11 in., floor space 2×2 ft., w't 350 lbs.★.....each $37.50
No. 4P—Hand and power, with 9×3 in., tight and loose pulleys, otherwise same as No. 4★.....each 42.00

As the ice enters the machine it is cut into smaller pieces by teeth which are mounted on a very heavy drum. This drum revolving very rapidly forces these smaller pieces against the comb, where they are further reduced to the size desired by the action of the teeth passing through the comb.

The teeth are made of the very best tempered steel and are drop forged to make them interchangeable. These teeth are fastened into dove-tailed lugs on the drum so that they become tighter from use, and yet may be easily removed for sharpening.

The comb is a reversible triangular with a row of teeth on each side spaced differently so as to regulate the size of the broken ice.

Champion Ice Breakers are very heavily constructed, the strain equally distributed, and require the least expenditure of time and labor.

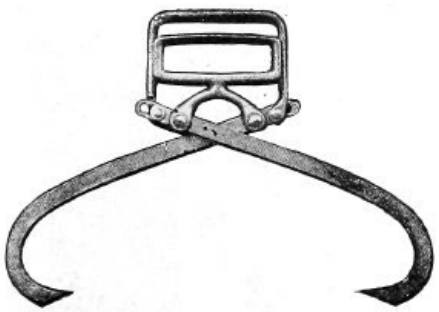


No. 2P.

No. 2 —Hand power only, rear outlet, fly wheel and crank, will break ice 14½×14½ in., of any length, height 33 in., width between frames 14½ in., floor space 3×2 ft., w't 750 lbs.★each $65.00
No. 2P—Hand and power, tight and loose pulleys, 14×3 in., otherwise same as No. 2★.....each 72.00

★*FACTORY SHIPMENT ONLY.*

ICE TONGS.



No. 7.

No. 5.

No. 6.

Nos. 1, 2 and 3.

No. 7—Family, made of $1\frac{3}{8} \times \frac{5}{8}$ in steel, cast handles, japanned, span 11 in., w't per doz. 21 lbs., - - - - per dozen $ 5.00

These tongs are to be used with one hand; especially adapted for picking up and throwing a cake of ice.

No. 5—Wrought steel, japanned, wood grips, self adjusting tongs, length 17 in., span 14 in., w't per doz. 17 lbs., - " 5.00
No. 6—Solid steel, malleable grips, self adjusting, length $15\frac{1}{2}$ in., span 16 in., w't per doz. 24 lbs., - - " 7.50
No. 1—Solid steel, forged, painted red, swelled grips, length 15 in., span 15 in., w't per doz. 45 lbs., - - - " 13.00
No. 2—Solid steel, forged, painted red, swelled grips, length 17 in., span 17 in., w't per doz. 54 lbs., - - - " 15.00
No. 3—Solid steel, forged, painted red, swelled grips, length 22 in., span 24 in., w't per doz. 72 lbs., - - - " 17.00

CINCINNATI CHAIN.

No. 12—File steel, concave grips, span 12 in., w't per doz. 21 lbs., - - - - - - - - - per dozen $11.50
No. 13—File steel, concave grips, span 13 in., w't per doz. 22 lbs., - - - - - - - - - " 12.50
No. 14—File steel, concave grips, span 14 in., w't per doz. 24 lbs., - - - - - - - - - " 13.50
No. 15—File steel, concave grips, span 15 in., w't per doz. 30 lbs., - - - - - - - - - " 15.50

Having the correct curve these tongs will hold securely at any span. The rivet is extra large and made of steel. Very easy working, will stand hard usage and especially adapted for handling large quantities of ice.

ICE CREAM FREEZERS.

H. S. B. & CO.'S "FRIGID."

Will Freeze in Three Minutes or Less.

Quarts	1	2	3	4	
W't	7	11	13	15	lbs.
Each	$2.40	2.80	3.30	4.00	
Fly Wheels, each				1.50	
Cranks, per doz.	5.00	5.00	6.00	6.00	
Quarts	**6**	**8**	**10**	**12**	
W't	18	27	31	32	lbs.
Each	$5.10	6.50	8.40	10.00	
Fly Wheels, each	1.50	3.00	3.00	3.00	
Cranks, per doz.	6.00	9.60	9.60	9.60	

The simple and perfect mechanism of the Frigid Freezer eliminates any possibility of its getting out of order and enables it to freeze smooth delicious cream in the shortest possible time. The power is conveyed from the crank to the can by means of a novel and effective gearing which moves almost without friction or noise. The gear frame can be instantly removed and replaced without the usual trouble, there being no gears on can top.

Salt Proof. Gearing is incased, and frame fits snugly over square projection on top of can, allowing no salt or other foreign substance to get into the cream, or anything to become entangled in the gearing.

Can. The body of the can is made of heavy charcoal tin plate, top and bottom are of iron heavily plated with pure block tin.

Dasher. On opposite sides of the stem, set in screw-like formation, are two rows of leaves. At right angles to the stem are four arms supporting two hardwood scrapers, which are constantly in contact with the sides of the can, scraping away the cream and throwing it to the center against the leaves, which in turn force it out to the sides. In this manner the cream is thoroughly mixed and kept entirely free from "soft spots" in the center or lumps on the outside. It is entirely free from angles or crevices in which cream could lodge and become sour and not be removed. A simple scalding is all that is necessary to clean it. The stem and leaves are heavily tinned so that there is no danger of the cream being tainted.

Tub. The tub is of selected material, waterproof and bound by heavy galvanized hoops.

IMPROVED ARCTIC.

Cranks, per doz.	17.30	17.30	17.30	19.20	

A strong waterproof tub, bound with heavy galvanized iron hoops; the gearing is completely covered; cans made of the very best quality of tin plate; beaters of malleable iron and tinned; all castings attached to tub, nicely galvanized to prevent rusting. Can moves in one direction, outside beater in opposite direction and the inside beater moving in a direction opposite that of the outside beater.

WHITE MOUNTAIN FLY WHEEL.

Hotel or Confectioners', Triple Motion.

Quarts	12	15	20	25	
W't	70	80	95	124	lbs.
Each	$16.50	18.80	24.00	30.50	

This machine is designed especially for hotels, cafes and ice cream parlors. It is the regular hand freezer, with fly wheel substituted in place of crank. Other power should never be used. It has the celebrated duplex dasher, with single self-adjusting wood scraping bar.

WHITE MOUNTAIN PLATFORM.

Quarts	20	25
W't	149	209 lbs.
Each	$39.00	46.00

The platform and stand are cast iron, nicely galvanized to prevent rust. When in use, the gear frame is fastened by latch bolt and thumb screw; when released it can be swung to either side, so tub and can may be removed. At a slight advance in price, a pulley can be substituted for fly wheel, shown in illustration, and a good power machine is produced. The pulley is 15¾x4¼, and the freezer should be operated at a speed of seventy-five revolutions per minute.

WHITE MOUNTAIN POWER.

Samson, Power.

Quarts	25	40
W't	292	432 lbs.
Each	$90.00	121.50

The platform and stand are of cast iron. The gear frame extends across the top of the tub, and is fastened by a latch bolt and thumb screw. When the frame is released it can be raised to an upright position, and is there held firmly. The can and tub may be removed and replaced at pleasure, while the frame is in this position.

The beaters are malleable iron and tinned, with single self-adjusting wood scraping bar. The tubs are exceedingly heavy and durable. The cans are of the heaviest tin plate. The pulleys on the 25 qt. are 10x4, and on the 40 qt. 16x5. The freezer should be operated at a speed of about seventy-five revolutions per minute.

Fly Wheels, each	3.00	5.00	5.00	7.00	
Cranks, per doz.	9.60				

The Peerless Iceland has the fewest parts of any freezer made, but all that are necessary for the effective freezing of smooth, delicious ice cream in three minutes.

Turn the crank and the can revolves around the stationary dasher. That is all there is to it. It is the simplest freezer made.

The reason this simple process turns out such smooth, delicious ice cream in three minutes is accounted for by the way it handles the cream, which is set in motion by the constantly revolving can.

FREZO.

Four Minute Frezo.

Quarts.....	**1**	**2**	**3**	**4**	
W't.....	7	10	13	14	lbs.
Each.....$2.20	2.60	3.00	3.60		
Cranks, per doz..	5.00	5.00	6.00	6.00	

Quarts.....	**6**	**8**	**10**	**12**	
W't.....	17	27	29	30	lbs.
Each.....$4.60	5.90	7.60	9.00		
Cranks, per doz..	6.00	9.60	9.60	9.60	

The Frezo freezer makes ice cream in four minutes. The dasher is of an improved type. It has double scrapers, around which the can revolves and sets the cream in motion. The Frezo is turned by gears fastened on the can top, and is the best constructed freezer of this type. The gears are covered, so that no salt or ice can get between the cogs or in the can.

The can may be revolved to harden the cream after the dasher has been removed.

PEERLESS FLY WHEEL.

Peerless Confectioners'.

Quarts.....	**16**	**20**	**25**	
W't.....	82	87	115	lbs.
Each.....$20.00	24.00	30.50		

This style is especially adapted for use in small hotels, cafes and ice cream parlors.

As in the smaller sizes, ice cream of the best quality can be made in one-half the time required by other freezers.

Tubs are 1¼ in. thick with heavy galvanized iron hoops.

Cans are made from extra heavy steel plate coated with pure tin, with strong steel ring around the top and heavy cast iron bottom well tinned.

Tub top is extra heavy and well galvanized.

PEERLESS POWER.

Quarts.....	**25**	**40**	
W't.....	280	420	lbs.
Each.....$96.00	150.00		

Iron column and base cast in one piece. Double geared, requires very little power. Driving shaft is fitted with tight and loose pulley. Tub and can are released by lifting one end of the tub top to vertical position, which does away with any machinery over tub and can and leaves it entirely free for examination and removal. Bearings and gears (covered) amply large and perfectly fitted. Has the Peerless patent dasher (no complicated machinery) and freezes in ten minutes. Cans extra heavy tin.

WATER COOLERS.

Japanned, Assorted Colors, Nickel Plated Lever Faucet, Galvanized Reservoir.

Nos.	202	203	204	
Gallons	2	3	4	
Weight	18	22	31	lbs.
Each	$2.50	3.00	3.75	

Nos.	206	208	210	
Gallons	6	8	10	
Weight	35	51	58	lbs.
Each	$4.50	5.75	6.25	

ONE IN A CASE.

Fancy Japanned, Assorted Colors, Nickel Plated Self-Closing Telegraph Faucet, Galvanized Reservoir, Heavy Cast Side Handles.

Nos.	102	103	104	106	
Gallons	2	3	4	6	
Weight	14	24	35	40	lbs.
Each	$3.00	3.75	4.50	5.00

Fancy Decorated.

Nos.	304	305	308	
Gallons	3	4	6	
Weight	9	11	15	lbs.
Each	$2.50	3.00	3.75	

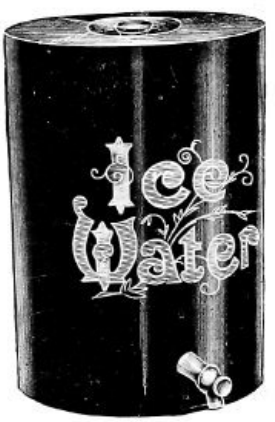
Nos.	310	315	320	
Gallons	7	11	15	
Weight	18	23	31	lbs.
Each	$4.50	6.50	10.25	

Very handsomely decorated in red, rose leaf green or silver, and are equipped with solid German silver push faucets.

Nos. 315 and 320 have two faucets

ONE IN A CASE.

These coolers are made of indurated fibre, moulded in one piece without hoops or bands. Indurated fibre is a non-conductor of heat and cold and therefore these coolers are very economical in ice consumption. It is tasteless and odorless, and very easily cleaned, as there are no joints or cracks to collect impurities.



Plain Mahogany Finish.

Nos.	604	605	608	
Gallons	3	4	6	
Weight	9	11	15	lbs.
Each	$2.00	2.50	3.00	

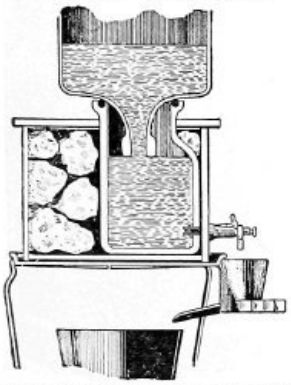
Nos.	610	615	620	
Gallons	7	11	15	
Weight	18	23	31	lbs.
Each	$3.75	5.00	8.50	

Nos. 615 and 620 have two faucets.

ONE IN A CASE.

WATER COOLERS, STILLS AND STANDS.

WATER COOLERS.



Container or Body of cooler made of indurated fibre molded in one piece. Indurated fibre is a non-conductor and therefore exceedingly economical in ice consumption. It is moisture proof and does not warp, crack or swell, finished in rich dark mahogany color and striped in aluminum.

Jar is made of glazed white porcelain of best quality. The bulge at the front increases the capacity of the jar and also affords a larger cooling surface. The bottom is ridged so that cold water can circulate beneath it, adding materially to the effectiveness of the ice.

Water Faucet is of improved "PUSH" pattern made of German silver, handsomely burnished. The stem, nuts and all parts that come in contact with the liquid are heavily silver plated. These faucets have half inch flow and will fill an 8 ounce glass in three seconds.

Waste Faucet is of German silver with screw plug, very simple and cannot get out of order.

Stands made of heavy channel iron finished in aluminum, can be folded up when not in use, top tray and drip bucket are of indurated fibre mahogany finished with silver striping.

Sanitary. With the exception of the faucet which is silver plated, liquids come only in contact with glass or porcelain. These coolers can be used equally well for lemonade, orangeade, cider and all still liquids.

No. 570—Cooler with stand and drip bucket, for 5 gal. bottle, packed complete in a case *without bottle*, w't 60 lbs.....each $12.00

No. 100—Cooler with stand and drip bucket, for 1 or 2 gal. bottle, having an outside diameter of not less than 4¼ in., packed complete in a case *without bottle*, w't 45 lbs.....each 10.00

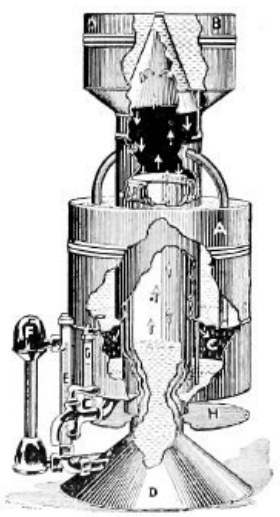
WATER COOLERS.

No. 57—Cooler with indurated fibre tray, to set on a table or counter, for 5 gal. bottle, packed complete in a case *without bottle*, w't 25 lbs.....each $7.50

No. 10—Cooler with indurated fibre tray, to set on a table or counter, for 1 or 2 gal. bottle, having an outside diameter of not less than 4½ in., packed complete in a case *without bottle*, w't 18 lbs.....each 5.00

See details of description in first column.

WATER STILLS.



No. 11—ROSE AUTOMATIC, heavy copper, nickel plated outside, all parts exposed to water are block tin lined, capacity ½ gal. per hour.....each $20.00

ONE IN A BOX. W'T 25 LBS.

In operation vessels A and B are filled with cold water and set still on fire, just like an ordinary tea kettle, and in a very short time pure, aerated distilled water will collect in reservoir C. The water feeds automatically from supply reservoir A to boiling chamber D, and when water has reached proper height, it is shut off by automatic valve at F. Gauge E indicates height of water in boiling chamber and gauge G shows distilled water in reservoir C.

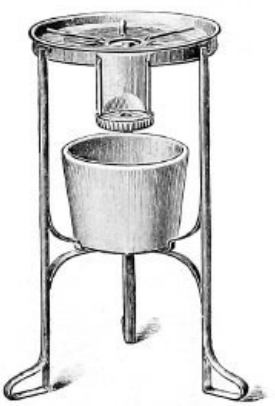
The system of aerating is such that the distilled water becomes charged with all the oxygen it can possibly carry at normal temperature, therefore making it palatable to the taste, and beneficial to the health.

NOTE—Deflector H prevents heat from stove or boiling chamber striking distilled water reservoir to drive off oxygen.

COOLER STANDS.

No. 115—Wrought iron legs, two cast iron shelves, removable tin tray, detachable drip leading to tin slop bucket, nicely japanned in colors and gold striped, inside diameter of top tray 17¼ in., for coolers 10 gal. or smaller, w't 40 lbs.....each $5.50

No. 116—Inside diameter of top tray 20¾ in., for 15 or 20 gal. coolers, otherwise same as No. 115, w't 53 lbs., each..... 6.50



No. 112—Made of heavy channel iron, doubled and riveted to form strong braces and shelf for drip bucket, hinged in center so that it can be folded up when not in use, three legs which set firm on any floor, indurated fibre top tray and drip bucket, inside diameter of top tray 13¼ in., stand is finished in aluminum, w't 26 lbs., each..... $5.00

COOLER BOTTLES.

1 gal., w't boxed 20 lbs.....each $0.75
2 gal., w't boxed 25 lbs..... " 1.25
5 gal., w't boxed 30 lbs..... " 1.75

WATER FILTERS AND FILTER ATTACHMENTS.

WATER FILTERS.

No. 21.

No. 31.

No. 21—ANTI-SPLASHER, brass, nickel plated, double convex and concave strainers, threaded on one end, delivers a smooth round stream of water, complete with assorted rubbers, w't per doz. ¾ lb ..... per dozen $1.50

No. 31—ANTI-SPLASHER, made of cast brass, nickel plated, with heavy woven brass wire strainer, threaded on one end, delivers a round smooth stream of water, w't per doz. 1½ lbs..... per dozen 3.50

ONE DOZEN IN A BOX.

No. 22.

No. 23.

No. 22—Brass, nickel plated, reversible, both ends threaded, filled with charcoal and quartz, complete with assorted rubbers, w't per doz. 1½ lbs.. per dozen $3.00

ONE DOZEN IN A BOX.

No. 23—HYGIENIC, clear glass body, nickel plated brass ends, reversible, both ends threaded, fil'ed with charcoal and quartz, complete with assorted rubbers, w't per doz. 5½ lbs..... per dozen 6.00

ONE IN A BOX.

No. 34. No. 33. No. 32.

No. 34—MODERN, heavy brass, nickel plated, cupped pressure distributer; water filters through cotton disc held between two heavy brass strainers, threaded on one end, 1 gross extra cotton discs with each filter, w't per doz. 3 lbs..... per dozen $20.00

No. 33—GLASS GEM, body made of ¼ in. clear glass, top and bottom of cast brass, nickel plated, patent distributing disc, reversible, both ends threaded, with heavy woven brass wire strainer at each end, filled with selected white quartz, w't per doz. 9 lbs... per dozen 20.00

No. 32—BRASS GEM, heavy brass nickel plated, body threaded and screwed to top and bottom, patent distributing disc (shown in cut), reversible, both ends threaded, with heavy woven brass wire strainer at each end filled with selected white quartz, w't per doz. 7½ lbs..... per dozen 20.00

ONE IN A BOX.

FILTER ATTACHMENTS.

No. 24—Cast brass, standard hose thread, complete with assorted rubbers for all sizes of smooth faucets, w't per doz. 1 lb..... per dozen $6.00

FILTERING MATERIAL.

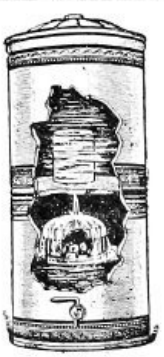
No. 26—Charcoal and quartz in ½ lb. boxes..... per dozen $2.00

ENAMELED STEEL WATER FILTERS.

No. 8—Enameled steel upper and lower vessels, blue enameled outside, white enameled inside, stone filtering disk, nickel plated faucet, capacity 11 qts. each, diameter 11¼ in., height 17½ in., w't 23 lbs..... each $6.00

Will hold 11 qts. of water in each compartment, and will filter 8 gals. of water daily.

STONEWARE WATER FILTERS.



No. 15—SUCCESS, two 4 gallon glazed stoneware jars, upper one fitted with 4 in. natural tripoli stone filtering block, lower one has separate stoneware ice chamber, nickel plated faucet, w't 55 lbs..... each $6.50

No. 5—SUCCESS, without separate ice chamber, w't 50 lbs., otherwise same as No. 15..... each 6.00

Extra Filtering Blocks..... " 1.50

The lower jar of No. 15 filter contains a separate ice chamber so that filtered water does not come in contact with the ice, thus insuring a clean drink.

JEWETT CLIMAX WATER FILTERS.

A filtering vessel containing gravel and charcoal with a spun metal cover and a japanned iron reservoir lined with white porcelain.

Japanned Olive Green, Gold Striped Galvanized Upper Reservoir and Filtering Chamber, Porcelain Lined Lower Reservoir, Nickel Plated Lever Faucet.

Nos.	52	53	54	55	
Cap. reservoir...	2	3	5	7½	gals.
Height.....	23	27	30	35	in.
Diam. of base...	9½	12	12½	14½	in.
W't.....	61	77	93	135	lbs.
Each.....	$5.00	6.50	8.00	10.50	

ONE IN A CASE.

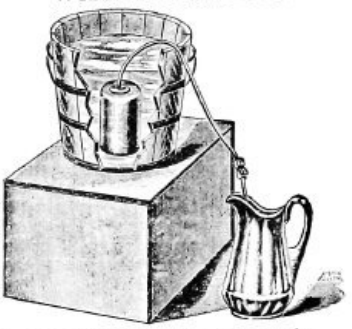
FAUCET FILTERS.

No. 35—Casing one piece of spun aluminum, threaded to fit ¾ in. hose bibb, and fitted with patent rubber collar for attaching to smooth faucets, natural tripoli filter block with walls 1 in. thick, held in position by best quality rubber seat ring, w't per doz. 20 lbs., per dozen..... $36.00

Natural tripoli stone is regarded by science as the very best filtering material known. Immediately after turning on the pressure the water passes through the walls of the stone, and comes out at the bottom a solid stream, clear and sparkling. The filter stone can be cleaned by unseating it at the bottom, allowing the water to rush by its sides, or by removing it from the casing and brushing it with a small brush.

ONE IN A CARTON.

TRIPOLI STONE SYPHON WATER FILTERS.



No. 6—3¾×5½ in., with rubber tube, w't per doz. 21 lbs..... per dozen $18.00

This filter is designed for a family supply of drinking water, and when the stone is kept fairly clean, will filter from 15 to 20 gals. per day. The filter can be used by placing mouthpiece in mouth and drawing water through the stone by suction, or started on the syphon plan, and it will go right along doing its work.

MOUSE AND RAT TRAPS.

WOOD CHOKER MOUSE TRAPS.

Made of One Piece of Wood, Stained Red, Strong Coppered Steel Springs, Easily Set.

No. 2—Two holes, size $2\frac{1}{4}\times4\frac{3}{8}$ in., w't per doz. $1\frac{1}{2}$ lbs.....per dozen $0.40
No. 3—Three holes, size $2\frac{1}{4}\times6\frac{1}{4}$ in., w't per doz. 2 lbs.....per dozen .60
No. 4—Four holes, diam. $4\frac{3}{4}$ in., w't per doz. 5 lbs.....per dozen .80
No. 5—Five holes, diam. $5\frac{1}{4}$ in., w't per doz. 5 lbs.....per dozen 1.00

ONE DOZEN IN A BUNDLE.

TIN CHOKER MOUSE TRAPS.

No. 54—Five holes, diam. $4\frac{3}{4}$ in., easily set, seamless stamped tin, strong coppered steel springs, w't per doz. $1\frac{3}{4}$ lbs., per dozen..... $1.25

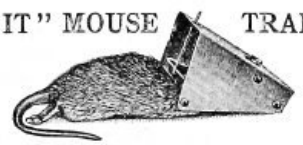
ONE DOZEN IN A BUNDLE.

CHASSE MOUSE TRAPS.

No. 33—Three holes, one piece wood block, size $2\frac{7}{8}\times2\frac{7}{8}\times1\frac{3}{8}$ in., coppered springs, tin slide, natural wood color, w't per doz. $1\frac{1}{2}$ lbs.....per dozen $1.20
This trap is remarkably simple and easy to set, sure to catch and easy to clean.

ONE DOZEN IN A BOX.

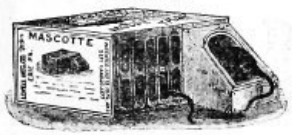
"IT" MOUSE TRAPS.



No. 20—Size $2\times1\frac{1}{4}$ in., sheet steel body, flat steel striking bar, very strong spring, w't per doz. $\frac{1}{2}$ lb....per dozen $0.60
This is the smallest and best choker trap made—catches and kills mice of any size. Open in front and bottom, the mouse is not afraid to take the bait. As it is all metal it does not become foul from use.

ONE DOZEN IN A BOX.

CATCH-EM-ALIVE MOUSE TRAPS.



No. 18—Size $5\times3\frac{1}{2}\times2\frac{1}{2}$ in., lacquered tin front, wood box stained red, sets automatically, w't per doz. $5\frac{1}{2}$ lbs., per dozen..... $2.00

ONE GROSS IN A CASE.

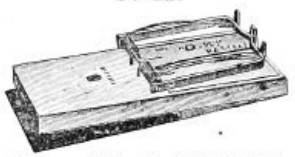
NEW CLIPPER.

Hardwood Base, Metal Trigger, Flat Galvanized Striking Bar, Two Black Cold Rolled Steel Springs.

No. 75—Mouse, $3\frac{3}{4}\times1\frac{3}{4}$ in., w't per doz. $\frac{3}{4}$ lb.....per dozen $0.60
No. 76—Rat, $6\frac{3}{4}\times3\frac{1}{4}$ in., w't per doz. $4\frac{1}{2}$ lbs.....per dozen 1.20

ONE DOZEN IN A BOX.

O. K.



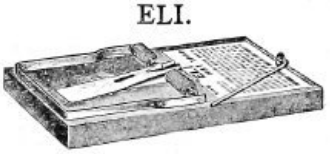
Hardwood Base, Galvanized Metal Trigger, Flat Galvanized Striking Bar, Two Black Cold Rolled Steel Springs.

No. 45—Mouse, $3\frac{3}{4}\times1\frac{3}{4}$ in., w't per doz. $\frac{3}{4}$ lb.....per dozen $1.20
No. 46—Rat, $6\frac{3}{4}\times3\frac{1}{4}$ in., w't per doz. $4\frac{1}{4}$ lbs.....per dozen 1.80

The trigger of these traps is under the block instead of on top. When the trap is set the front end of block is slightly elevated, providing a temporary platform and a perfectly smooth surface on which the animal treads in passing or when attempting to get the bait, at which time the trap is instantly thrown and a capture effected.

ONE DOZEN IN A BOX.

ELI.

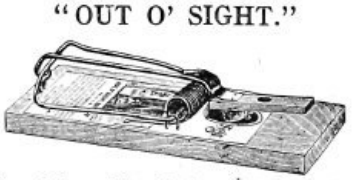


Hardwood Base, Galvanized Metal Trigger, Flat Galvanized Steel Striking Bar, Two Black Cold Rolled Steel Springs.

No. 30—Mouse, $3\frac{3}{4}\times1\frac{3}{4}$ in., w't per doz. $\frac{3}{4}$ lb.....per dozen $1.20
No. 300—Rat, $3\frac{1}{4}\times6\frac{1}{2}$ in., w't per doz. $4\frac{1}{4}$ lbs.....per dozen 1.80

ONE DOZEN IN A BOX.

"OUT O' SIGHT."

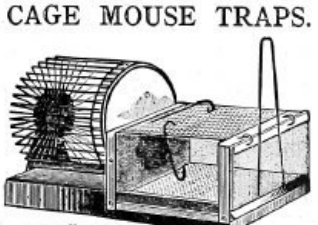


Hardwood Base, Wood Trigger, Coppered Round Striking Bar, Strong Coppered Steel Spring.

No. 35—Mouse, $3\frac{3}{4}\times1\frac{3}{4}$ in., w't per doz. $1\frac{1}{2}$ lbs.....per dozen $1.25
No. 36—Rat, $7\times3\frac{1}{2}$ in., w't per doz. $4\frac{1}{2}$ lbs.....per dozen 2.50

ONE DOZEN IN A BOX.

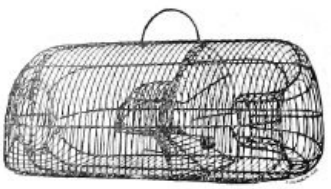
CAGE MOUSE TRAPS.



No. 50—$6\frac{1}{2}\times3\frac{1}{4}$ in., wood base, with revolving wheel, w't per doz. 5 lbs., per dozen..... $3.25

ONE DOZEN IN A BOX.

FRENCH WIRE.



Coppered Iron Wire, Tightly Back-Laced, Lacquered to Prevent Rust, Self-Closing Trap-Door.

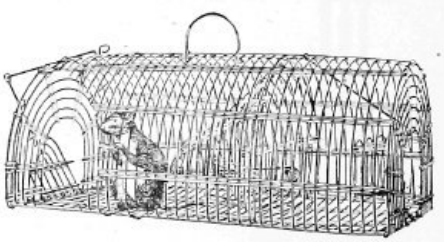
No. 303—Mouse, $9\times5\times5$ in., w't per doz. 7 lbs.....per dozen $ 4.00
No. 315—Rat, $15\times9\times6\frac{1}{2}$ in., w't per doz. 18 lbs.....per dozen 6.00
No. 317—Rat, $17\times9\frac{1}{2}\times7$ in., w't per doz. 27 lbs.....per dozen 9.00
No. 322—Rat, $23\times13\frac{1}{2}\times7$ in., w't per doz. 30 lbs.....per dozen 18.00

Wire traps of this kind are very effective; as the rat on the inside of trap can be seen by others it acts as a decoy.

After the trap has been put together it is heavily lacquered, so that all crevices where moisture might collect are filled, preventing rust and prolonging the life of the trap.

NO. 303, HALF DOZEN IN A BUNDLE; NOS. 315 AND 317, HALF DOZEN IN A CRATE; NO. 322, TWO IN A BUNDLE.

WIRE RAT TRAPS.

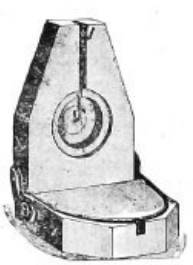


Coppered Iron Wire, Sheet Steel Ribs, Self-Closing Tin Trap Door with Flanged Edge.

No. 417—$17\times9\frac{1}{2}\times7$ in., No. 17 wire, 9 flanged steel ribs, w't per doz. 25 lbs., per dozen $10.80
No. 419—$19\times10\frac{1}{2}\times8$ in., No. 16 wire, 11 flanged steel ribs, w't per doz. 30 lbs.....per dozen 13.20

Particular attention is called to the construction of these traps. The lace wires are rigidly held in place by the heavy flanged sheet steel ribs and the trap is almost indestructible. There is a patent flange around the opening of the trap door, which prevents a rat from pulling it down after getting inside. Each trap is thoroughly lacquered to prevent rust.

HALF DOZEN IN A CRATE.



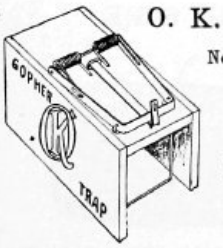
SURPRISE RAT TRAPS.

No. 80—Size $5\times4\times6$ in., heavy wood base, very strong coppered steel spring, can be set with hands or foot, w't per doz. $8\frac{3}{4}$ lbs., per dozen..... $2.00

ONE DOZEN IN A CRATE.

TRAPS.

O. K. GOPHER.

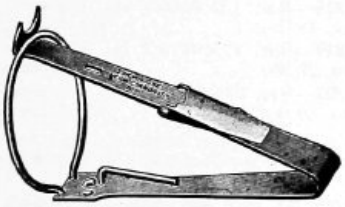


No. 61—6¾×4×3 in., hardwood box, stained red, flat galvanized trigger, round coppered iron striking bar, two strong springs, w't per doz. 8½ lbs., per dozen.....$3.60

The most perfect and practical gopher trap on the market. Very easy to manipulate and very sensitive.

ONE GROSS IN A CRATE.

NEWHOUSE GOPHER.



No. 84—All steel, length 5 in., 2¾ in. opening, w't per doz. 2¾ lbs., per dozen $2.50

This trap is well and carefully made and sustains the enviable reputation of the manufacturer. It is simple, practical, and easy to set.

ONE DOZEN IN A BOX.

REDDICK'S MOLE.

No. 16—Steel frame, six sharp steel tines, very strong, heavily tinned to prevent rust, japanned steel spring, w't per doz. 38 lbs., per dozen..... $12.00

This is a sure, sensitive and effective trap.

HALF DOZEN IN A CRATE.

JUMP.

Single Spring.

Double Spring.

All Steel, with Chain.

No. 0 —Rat or gopher, single spring, w't per doz 5 lbs .....per dozen $ 4.25
No. 1 —Musksrat, single spring, w't per doz. 7 lbs.....per dozen 5.00
No. 1½—Mink, single spring, w't per doz. 7 lbs.....per dozen 7.50
No. 2 —Coon, mink or skunk, double spring, w't per doz. 8½ lbs..per dozen 10.50
No. 3 —Fox or otter, double spring, w't per doz. 17 lbs.....per dozen 14.00
No. 4 —Otter or wildcat, double sprirg, w't per doz. 20 lbs.....per dozen 16.50

These traps are becoming very popular. They are lighter in weight and therefore easier to carry than other styles. They lie flat and are easily secreted in narrow runways. When sprung they jump high up on the animal's leg, thereby insuring a firm grip. These traps are thoroughly tested under water and warranted in every respect.

STEEL.

Nos. 0, 1 and 1½.

Nos. 2, 3 and 4.

No. 2½.

Nos. 5 and 6.

STEEL GAME, WITH CHAIN.

No. 0 —3½ in., rat, single spring, w't per doz. 5½ lbs.....per dozen $ 4.25
No. 1 —4 in., muskrat, single spring, w't per doz. 7¾ lbs.....per dozen 5.00
No. 1½—4⅞ in., mink, single spring, w't per doz. 11¼ lbs.....per dozen 7.50
No. 2 —4⅞ in., fox, double spring, w't per doz. 14½ lbs.....per dozen 10.50
No. 3 —5½ in., otter, double spring, w't per doz. 22 lbs.....per dozen 14.00
No. 4 —6½ in., beaver, double spring, w't per doz. 25 lbs.....per dozen 16.50

In this grade we carry both Victor and Hector brands. These are staples in every hardware store and are the most saleable traps on the market. Farmers and trappers of small game, who find that a cheap trap answers their purpose, are pleased with these traps in their present perfected form.

HAWLEY & NORTON, WITH CHAIN.

No. 0 —3½ in., rat, single spring, w't per doz. 6 lbs.....per dozen $ 4.25
No. 1 —4 in., muskrat, single spring, w't per doz. 8½ lbs.....per dozen 5.00
No. 1½—4⅞ in., mink, single spring, w't per doz. 13½ lbs.....per dozen 7.50
No. 2 —4⅞ in., fox, double spring, w't per doz. 16½ lbs.....per dozen 10.50
No. 3 —5½ in., otter, double spring, w't per doz. 26 lbs.....per dozen 14.00
No. 4 —6½ in., beaver, double spring, w't per doz. 29 lbs.....per dozen 16.50

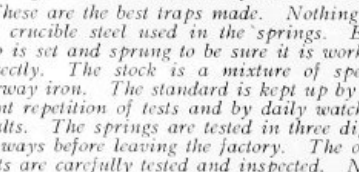
The Hawley & Norton traps are almost identical in form with the Newhouse, but are somewhat lighter throughout and therefore cheaper. They are, however, good, reliable traps with quite a reputation of their own.

NEWHOUSE, WITH CHAIN.

No. 0 —3½ in., rat, single spring, w't per doz. 7½ lbs.....per dozen $ 4.25
No. 1 —4 in., muskrat, single spring, w't per doz. 10 lbs.....per dozen 5.00
No. 1½—4⅞ in., mink, single spring, w't per doz. 14 lbs.....per dozen 7.50
No. 2 —4⅞ in., fox, double spring, w't per doz. 17½ lbs.....per dozen 10.50
No. 2½—4⅞ in., otter, single spring, with teeth, w't per doz. 23 lbs., per dozen..... 16.50
No. 3 —5½ in., otter, double spring, w't per doz. 28 lbs.....per dozen 14.00
No. 4 —6½ in., beaver, double spring, w't per doz. 33 lbs.....per dozen 16.50
No. 5 —11¾ in., bear, double spring, w't per doz. 234 lbs., w't each spring 2 lbs. 10 oz.....per dozen 120.00
No. 6 —16 in., grizzly bear, double spring, w't per doz. 504 lbs., w't each spring 6 lbs. 10 oz.....per dozen 280.00

These are the best traps made. Nothing but best crucible steel used in the springs. Each trap is set and sprung to be sure it is working correctly. The stock is a mixture of special Norway iron. The standard is kept up by frequent repetition of tests and by daily watching results. The springs are tested in three different ways before leaving the factory. The other parts are carefully tested and inspected. Newhouse traps are absolutely guaranteed.

NEWHOUSE BEAR TRAP CLAMPS.



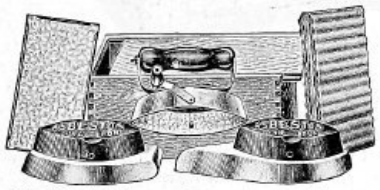
No. 5—For setting No. 5, w't per doz. 10½ lbs.....per dozen $ 6.00
No. 6—For setting No. 6, w't per doz. 14 lbs.....per dozen 10.00

ASBESTOS SAD IRONS.

No. 70—Laundry set, consists of one asbestos lined hood with handle and lock complete, one 6 lb., two 7 lb. double pointed cores and one stand, w't per doz. sets 210 lbs., per dozen sets.. ..... $24.00

No. 100—Laundry set, consists of one asbestos lined hood with handle and lock complete, two 7 lb. double pointed cores, one 7 lb. square heeled polishing core and one stand, w't per doz. sets 216 lbs., per dozen sets. $24.00

No. 130—Laundry set, consists of one asbestos lined hood with handle and lock complete, one each 6 lb. and 7 lb. double pointed cores, one 9 lb. square heeled pressing core and one stand, w't per doz. sets 252 lbs. .....per dozen sets 25.00



No. 56—Ideal shirt waist set, consists of one asbestos lined hood with handle and lock complete, one 6¾ in. pointed flounce core, one 5 in. square heeled polishing core and one stand, w't per doz. sets 96 lbs., per dozen sets: $16.00

No. 66—French set, consists of asbestos lined hood with handle and lock complete, one 6¾ in. pointed flounce core, one 4¾ in. double pointed core, one 5 in. square heeled polishing core and one stand, w't per doz. sets 108 lbs...per dozen sets $20.00

No. 196—Household set, consists of one asbestos lined hood with cover and lock complete, two double pointed cores, one square heeled polishing core, one asbestos lined sleeve hood with cover and lock complete, one double pointed sleeve iron, one pointed flounce core, one small square heeled polishing core and one stand, w't per doz. sets 360 lbs., per dozen sets. $44.00

ONE SET IN A LOCK CORNERED, SLIDING COVERED, WHITE PINE BOX.

FAMILY OUTFITS.

No. 660—Asbestos, oil finished hardwood box 17½x12½x4½ in., with brass trimmings, containing 7 cores, 3 hoods with handles complete, and 3 stands, w't per outfit 42 lbs., each $6.50

Set consists of 2 seven lb. and 1 six lb. laundry cores, 1 nine lb. pressing core, 1 four lb. flounce core, 1 three lb. sleeve core, 1 one and one-half lb. tourist iron complete, 1 hood with handle for laundry and pressing, 1 hood with handle for flounce and sleeve, 2 asbestos covered stands and 1 tourist stand.

EXTRA PARTS FOR ASBESTOS IRONS.

No. 71—Asbestos lined hood with handle and lock complete for laundry and pressing irons. ...per dozen $10.00

No. 72—Double pointed laundry cores, per dozen. 5.00

No. 102—Square heeled cores, per dozen 6.00

No. 41—Asbestos lined hood with handle and lock complete for sleeve and flounce irons. ..... per dozen 4.00

No. 73—Stands. .... " 1.50

No. 10—Tourist, consists of one asbestos lined hood with handle and lock complete, one double pointed core and one stand, w't 1½ lbs., per dozen $4.00

The same pattern as the larger iron, but much smaller. In addition to being a delightful toy, this iron is just the thing for tourists and college girls and can be heated on a lamp. Is especially adapted for ironing small sleeves, fancy work, etc.

ONE IN A PASTEBOARD CARTON.

No. 40—Sleeve, consists of one asbestos lined hood with handle and lock complete, one double pointed 2½ lb. core and one stand .....per dozen $8.00

Very handy for children's clothes, sleeves, neckbands, etc. Hood fits flounce and shirt waist iron.

ONE IN A PASTEBOARD CARTON.

No. 50—Flounce, consists of one asbestos lined hood with handle and lock complete, one 4 lb. pointed core and one stand .....per dozen $10.00

This long nosed iron is designed for ironing tucks, flounces, etc.

ONE IN A PASTEBOARD CARTON.

No. 80—Pressing, consists of one asbestos lined hood with handle and lock complete, one 9 lb. square heeled pressing core and one stand, w't 10½ lbs. .....per dozen $20.00

This iron is indispensable for pressing tailor-made garments, suits, trousers or for any purpose where an iron of more than ordinary weight is required. Heavy enough to iron smooth without pressure.

ONE IN A BOX; HALF DOZEN IN A CRATE.

SAD RONS AND EXTRAS.

O.V.B. SAD IRONS.

Solid Base, O.V.B. Handles.

O.V.B.—Nickel plated face, sides and top, set consists of three double pointed irons, one O.V.B. handle, one asbestos stand, w't per set 14¼ lbs....per case $12.00

In the O.V.B. Iron every care has been used to produce something superior in quality and finish for those who want the best. Between the heavy solid base and the flush top is a layer of asbestos which greatly increases the heat retention. The top as well as the base is ground, polished and heavily nickel plated.

ONE SET IN A BOX. SIX SETS IN A CASE.

MRS. POTTS' SAD IRONS.

No. 650—Nickel plated face and sides, aluminum bronze top, aluminum bronze cast stretcher and copper plated stand, in sets of three with detachable wooden handle, w't per set 14¼ lbs...per case $7.50

Genuine Enterprise.

No. J50—Nickel plated face and sides, *japanned top*, set consists of three irons, one stand, one detachable handle with *japanned stretcher*, w't per set 15½ lbs., per case..... $7.75

No. T50—Nickel plated face and sides, *tinned top*, set consists of three irons, one stand, one detachable handle with *tinned stretcher*, w't per set 15½ lbs..... per case 8.25

SIX SETS IN A CASE.

GIRLS' SAD IRONS.

No. 90—Nickel plated, walnut detachable handle, length 5 in., with stand, w't each 1⅝ lbs.....per dozen $5.00

ONE DOZEN IN A CASE.

OBER SAD IRONS.

Solid Base, Patent Handles.

No. 95—Nickel plated face and sides, aluminum tops, set consists of one double pointed, one square heel and one sleeve iron, nickeled handle and one stand, w't per set 14¼ lbs..per case $12.00

These irons are solid and hold the heat much longer than hollow irons.

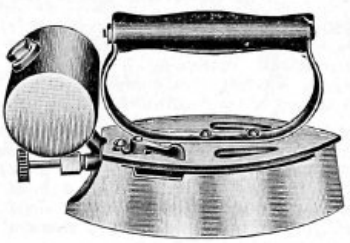
SIX SETS IN A CASE.

OBER SLEEVE IRONS.

Solid Base, Patent Handles.

No. 81—Nickel plated bottom and sides, aluminum top, length 7⅞ in., width at heel 2¾ in., nickeled handle, w't each 4 lbs.....per dozen $7.50

GASOLINE AND ALCOHOL SAD IRONS.



Nickel Plated, Ebonized Wood Handles.

No. 35—MODERN, adapted for *gasoline*, w't each 6 lbs.....per dozen $48.00

No. 37—MODERN, adapted for *alcohol*, w't each 6 lbs.....per dozen 48.00

No odor. No soot or grease streaks. Does away with walking from ironing board to stove. Always evenly heated. Does not stick from cooling of base. Saves time and fuel, for the cost to operate is about one cent per week.

ONE IN A BOX. SIX IN A CASE.

EXTRA SAD IRON STANDS.

No. 250—Coppered, w't per doz. 7 lbs., per dozen..... $0.75

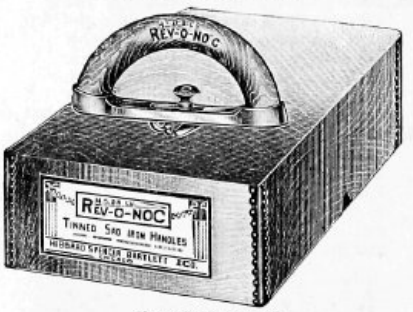
EXTRA HANDLES.

"OUR VERY BEST."

O.V.B.—Extra selected and carefully finished handle, nickel plated malleable indestructible stretcher, w't per doz. 8 lbs.....per dozen $4.50

Only the best wood capable of taking a smooth high finish is used in O.V.B. handles. The stretcher is malleable iron, nickel plated and polished. Note, that instead of fitting flat against the wood, there are four small points of contact forming an insulation and insuring an always cool handle.

ONE DOZEN IN A BOX.



"REV-O-NOC."

No. 810 REV-O-NOC—Extra selected hazelwood handle, with tinned non-breakable stretcher, attached with the longest and heaviest screws practical, w't per doz. 7¾ lbs.....per dozen $2.50

ONE DOZEN IN A BOX.

No. 610—Walnut handle, with *japanned* cast stretcher, w't per doz. 6¼ lbs., per dozen..... $1.20

No. 310—Walnut handle, with *tinned* cast stretcher, w't per doz. 6 lbs., per dozen..... 1.80

HALF DOZEN IN A PACKAGE.

No. 22 No. 12

No. 22—OBER, japanned, for all makes of Potts' sad irons, w't per doz. 6¾ lbs., per dozen..... $1.20

No. 12—OBER, japanned, for Ober patent sad irons, w't per doz. 7½ lbs., per dozen 1.20

From their peculiar shape it will not cramp the hand. There is no wooden knob on the catch to break off. Screws fastening handle will not get hot and become loose.

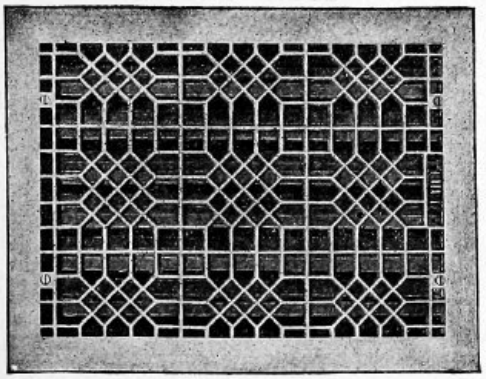
ONE IN A BOX

REGISTERS.



Registers.

All black and white registers, except those marked with an asterisk (*), are of modified or semi-steel construction. The faces are made of a special composition of new iron, are strong and very highly finished. The boxes or bottoms are of wrought steel, very shallow and rigid. The fans are ribbed, lap over each other and fit the boxes snugly. The boxes and fans are coated with black japan, baked on; this protects them from rust and assures easy working.

Semi-steel registers are light in weight, are shallow and can be used equally well in floor, wall, or ceiling. All plated faces and borders are coated by the electro process and when finished look exactly like the solid metal. The boxes and fans on all plated registers, and also those marked (*) in black and white finish, are made of cast iron, protected from rust by rust proof paint.

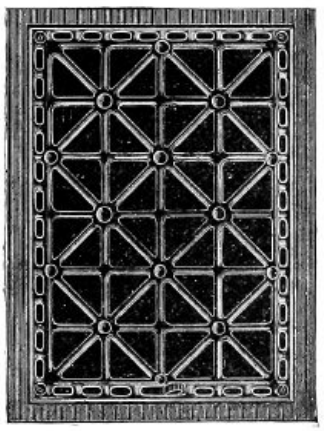
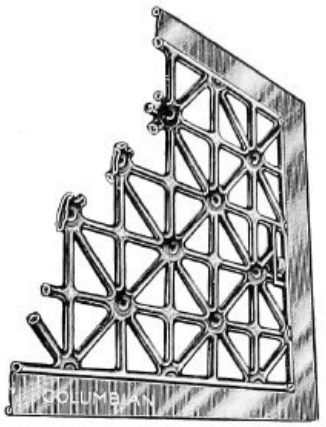
Indicator Handles, one "open," one "closed" and 10 feet of cord, extra.....per set $0.75

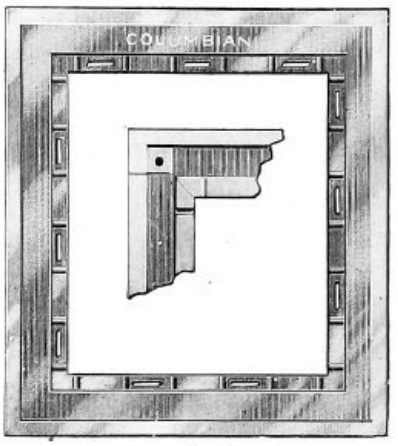
"TUBO" WROUGHT STEEL REGISTERS.



Register.



Face.



Border.

Owing to the shallowness of these registers they can be used equally well in the floor, wall or ceiling.

FACES—The Grecian design of the faces is both simple and artistic. They are made of two heavy plates of sheet steel, so closed over each other as to give a tubular construction. The tubular construction provides a greater carrying capacity and makes the faces so strong that they require no supporting bars or braces to strengthen them. It also enables them to withstand a sudden blow or strain without warping or cracking.

BOXES—The register boxes are made of wrought steel, very shallow and rigid. A set screw in one corner permits of taking them apart with ease. The fans are ribbed, and lap over each other and fit the box so snugly that when closed, there are no gaping spaces through which the air may escape.

BORDERS—The borders are stamped out of heavy steel, with corners reinforced securely. The slots for tin box loops are located as in standard cast iron borders. The borders are beveled, which makes them very strong and rigid.

The weights given are net; for shipping weights add 20%.

When any of above registers are ordered as ventilators, we include a pair of brass pulleys for operating them with chains or cords, for which the register list is advanced 50 cents each.

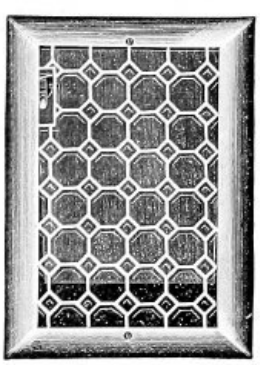
REGISTERS AND VENTILATING PLATES.

ROUND REGISTERS.

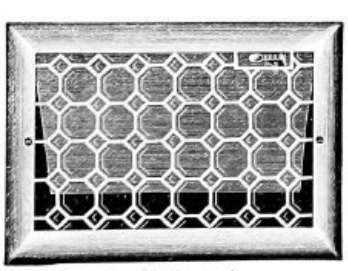
6 inch, black japanned face, cast bottom and valves, slide center movement, extreme measurements of face 7¼ in., each.. ..... $1.50

These registers can be used as ventilators in chimneys and fit in opening for 6-inch pipe.

CONVEX WAFER REGISTERS.



Set Vertical.



Set Horizontal.

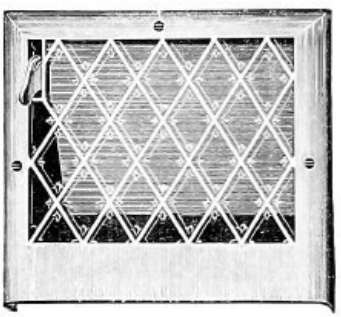
For shallow flues and thin partitions.

Convex cast face, very smoothly finished, stamped steel valve, which turns full capacity of flue into room. Very easily attached and presents a finished appearance.

Reversible—The valve is attached in such manner that by removing two screws from opposite sides it can be instantly changed from vertical to horizontal, or from horizontal to vertical.

FACE OPENING	WEIGHT	BLACK JAPND.	WHITE JAPND.	OLD COPPER
8×10	4½ lbs.	$1.65	2.00	3.15
8×12	4¾ lbs.	1.90	2.30	3.65
9×12	5½ lbs.	2.10	2.55	4.00
10×12	6¼ lbs.	2.40	2.90	4.40

IMPERIAL BASEBOARD REGISTERS.

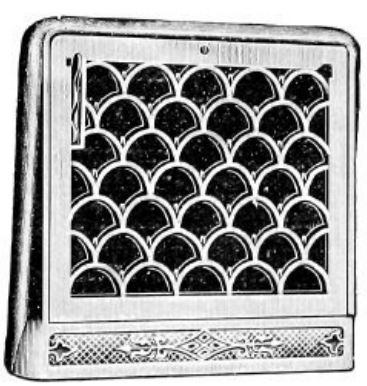


This register projects at the bottom on the floor line and a flue can be used 2 inches deeper than the studding. The narrow cast frame which is furnished with these registers can be quickly and easily attached to pipe opening. The register is held to the frame by only one screw and can be instantly attached or detached.

The face and front are cast in one piece and are polished smooth. The valve is stamped steel and may be set at any angle; when open it deflects the full capacity of the pipe into the room

FACE OPENING	OUTSIDE DIMENSIONS	WEIGHT	BLACK JAPND.	OLD COPPER
8×10	10½×12	6 lbs.	$2.00	3.85
9×12	11½×14	7½ lbs.	2.50	4.40
10×12	13 ×14½	9½ lbs.	3.75	6.00
12×14	15 ×16½	13 lbs.	5.25	9.00

SPECIAL SIDE WALL REGISTERS.



New Scale Design.

This register projects 2 inches from the baseboards and a flue can be used 3 inches deeper than the studding. The wall frame which is furnished with these registers may be set in place when heater pipes are installed and the register attached after all plastering is finished.

The face and front are polished cast iron which takes a very smooth finish. The valve is stamped steel and may be set at any angle; when open it deflects the full capacity of the flue into the room.

FACE OPENING	OUTSIDE DIMENSIONS	FOR ROUND PIPE	WEIGHT	BLACK JAPND.	OLD COPPER
7×10	11×13	7 in.	10½ lbs.	$2.55	4.50
7×12	11×15	8 in.	12 lbs.	3.40	5.50

ONE-QUARTER DOZEN SETS IN A CASE.

CHIMNEY TOP FIXTURES, CAPS, ETC.

CHIMNEY TOP FIXTURES.

Dayton Fixtures.

Dayton, with Hood.

Dayton Automatic, Fixtures Only.

Nos.	76	77	78	710
For Pipe	6	7	8	10 in.
W't per doz. sets.	40	45	55	90 lbs.
Per doz. sets.	$11.50	13.50	15.00	18.00

This fixture is bolted to the outside of the pipe, giving full capacity to the stack, and allowing no soot to collect. The bearing is all on the extreme point making it simple and very easy turning. A set consists of all the iron parts but does not include the sheet metal hood. Full directions and complete patterns are packed in each case.

HALF DOZEN IN A CASE.

Iwan's Fixtures.

Iwan's with Hood.

Iwan's Volcano, Fixtures Only.

Nos.	6	7	8	10	12
Diameter.	6	7	8	10	12 in.
W't per doz.	34	38	48	70	100 lbs.
Per doz.	$13.00	13.50	15.00	18.00	22.00

The iron fixtures are composed only of two parts; are self-lubricating and require no pins or wire to hold down hood. Full directions with pattern for patented hood are packed in each case.

ONE DOZEN IN A CASE.

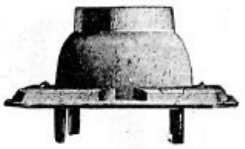
Iwan's Volcanic Tops with Hood.

Nos.	86	87	88	810	812
Diameter.	6	7	8	10	12 in.
W't per doz.	61	67	85	145	180 lbs.
Per doz.	$24.00	26.00	28.00	34.00	40.00

The Volcanic Chimney Top is an effective cure for a poor drawing chimney. The upward sloping opening in the back of the hood causes the wind to blow the smoke away and creates an upward draft in the chimney. Packed knocked down, complete with vane, guide rods and bolt.

HALF DOZEN IN A CASE.

CHIMNEY CAPS.



Cast Iron, Japanned.

No. 110—7 in. collar, size of flange 12×15 in. for chimneys 12×16 in. to 16×16 in. outside measurement, w't per doz. 180 lbs. ..... per dozen $18.00

No. 111—8 in. collar, size of flange 12×16 in. for chimneys 12×16, 16×16, 12×20, 16×20 in., outside measurement, w't per doz. 180 lbs. ..... per dozen 21.00

No. 112—10 in. collar, size of flange 16×20 in. for chimneys 16×24, 20×20, 20×24 in. outside measurement, w't per doz. 250 lbs. ..... per dozen 29.00

The legs are adjustable so that each size will fit any chimney up to the largest size for which it is designed. The legs project inside the chimney and prevent it from being blown off. It is not necessary to use mortar or cement to fasten this cap.

ONE QUARTER DOZEN IN A CRATE.

Cast Iron, Japanned.

No. 07—12½×15 in. flange, takes 7 in. pipe, for either 12×16, 12×20 or 16×16 in. chimneys, outside measurement, w't per doz 170 lbs. ..per dozen $18.00

No. 70—12×20, in. flange, takes 7 in. pipe, for either 12×16, 12×20, 12×24, 12×28, 16×16, 16×20 or 16×24 in. chimneys, outside measurement, w't per doz. 250 lbs. ..... per dozen 23.00

No. 8—11½×20 in. flange, takes 8 in. pipe, for either 12×16, 12×20, 12×24, 16×16 or 16×20 in. chimneys, outside measurement, w't per doz. 210 lbs. ..... per dozen 20.00

No. 80—15×20 in. flange, takes 8 in. pipe, for either 16×16, 16×20, 16×24, 16×28, 20×20, 20×24 or 20×28 in. chimneys, outside measurement, w't per doz. 290 lbs. ..... per dozen 28.00

No. 10—19×24 in. flange, takes 10 in. pipe for either 20×20, 20×24, 20×32, 24×24, 24×28 or 24×32 in. chimneys, outside measurement, w't per doz. 470 lbs. ..... per dozen 42.00

ONE DOZEN IN A CRATE.

No. 18—12½×16 in. flange, takes 8 in. pipe, for either 12×16, 12×20, 16×16 or 16×20 in. chimneys, outside measurement, with adjustable legs, w't per doz. 170 lbs ..... per dozen $20.00

The legs are easily adjusted and hold the cap securely. Legs have holes for driving nails into mortar below top row of brick. Cap also has slots for cement fastening.

FOUNDATION GRATES.

STOVE BOARDS.

New Perfection.

The New Perfection boards are made of enameled steel and are heavy and strong. They have an especially durable coating and are very pleasing in appearance. The colors used are green, drab, maroon and grey in combination.

The Mosaic boards are made of heavy steel and have a hard black enameled surface which can be scrubbed without destroying the lustre. The irregular mosaic effect is produced with the use of gold and grey.

MISCELLANEOUS STOVE PREPARATIONS.

PLUMBAGO AND BLACK LEAD.

No. 9—DIXON'S black lead, in 25 lb. boxes.....per pound $0.08
No. 10—DIXON'S plumbago, in 25 lb. boxes.....per pound .11

Used for making stove polish or by mixing with linseed oil for graphite paint.

LUBRICATING GRAPHITE.

Dixon's Flake.

	GRADE 1	GRADE 2
No. 632— 1 lb. cans.....each	$0.40	$0.40
No. 633— 5 lb. cans..... "	1.80	1.80
No. 644—25 lb. boxes, per pound	.30	.30

Flake Graphite forms a coating on the metallic surfaces, which brings about a reduction of the solid friction between those surfaces. The minute flakes fill up all depressions and bring the surfaces of the bearings much nearer a state of perfect smoothness.

Grade 1 is standard flake and is intended for the great majority of uses; grade 2 is fine flake for valves and very delicate parts.

NO. 632, THIRTY-SIX; NO. 633, TEN AND NO. 644, ONE IN A CASE.

Mexican Powder.

No. 1— 1 lb. cans.....each	$0.35
No. 5— 5 lb. cans..... "	1.60
No. 10—10 lb. cans..... "	2.75
No. 25—25 lb. cans.....per pound	.20
Barrels, of about 350 lbs..... "	.18

Air floated graphite powder, impalpably fine and absolutely free from grit. It will remain perfectly suspended in oil for an indefinite period, thus feeding through any lubricator without clogging. Graphite if regularly mixed with lubricants will very much reduce the oil consumption. If mixed with linseed oil, air floated graphite makes a splendid graphite paint for painting boiler fronts, etc.

NO. 1, THIRTY; NO. 5, TWELVE; NO. 10, SIX AND NO. 25, TWO IN A CASE.

STOVE PIPE ENAMEL.

"Our Very Best," Jet Black, Permanent and Elastic.

½ pt. cans, with brush, w't per doz. 7 lbs.....per dozen $1.80

ONE DOZEN IN A HANDSOME BOX, WITH HINGED COVER.

1 pt. cans, with brush, w't per doz. 12 lbs.....per dozen $3.00

ONE DOZEN IN A CASE.

1 qt. cans, w't per gal. 8 lbs., per gallon	$2.00
2 qt. cans, w't per gal. 8 lbs., "	1.90
1 gal. cans, w't 8 lbs..... "	1.80

Dries with a brilliant luster. Prepared especially for gas stoves, boilers, smoke-stacks, registers, furnaces, ventilators, radiators, sewing machines, machinery, and all iron work where a bright gloss black is required. Will not turn dull, crack, scale or rub off, and will resist heat.

IRON ENAMEL.

Bonnell's Nubian, ½ pt. cans, with brush, w't per do.. 7¼ lbs.....per dozen $3.00

ONE AND TWO DOZEN IN A CASE.

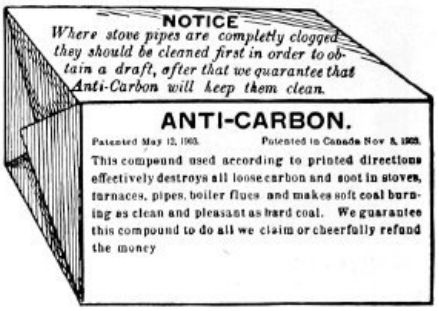
ALUMINUM STOVE ENAMEL.

No. 43—Liquid, in 4 oz. friction top cans, w't per gro. 65 lbs.....per gross $24.00
No. 44—Liquid, in 8 oz. friction top cans, w't per gro. 90 lbs.....per gross 48.00

For stoves, stove pipes, radiators, gas ranges, lawn mowers, plumbing, etc.

ONE-QUARTER GROSS IN A CASE.

SOOT DESTROYER.



No. 3—Anti-Carbon, in 3 lb. packages, 24 packages in a case, w't per case 78 lbs., per case..... $8.00

Anti-Carbon Soot Destroyer is a composition which when sprinkled on the red hot coals, creates and expels hot chemical fumes which destroy all soot in the stove, pipes and chimney.

No. 4—Burn Soot, in circular tin cans 3×5½ in., 24 cans in a case, w't per case 52 lbs.....per case $ 8.00
No. 5—Burn Soot, in circular tin cans 4¼×7½ in., 24 cans in a case, w't per case 90 lbs.....per case 16.00

Burn Soot is a chemical preparation, a small amount of which when placed upon burning coals or in a hot fire, liberates certain fumes or gases which consume the soot without injury to stove, flues, pipes or chimney. Can be used with equal effect in cook stoves, ranges, heaters, baseburners, furnaces, chimneys and anywhere and everywhere where soot gathers.

When used twice a week will make it easy to burn soft coal and yet keep the stoves as well as the home free from soot.

Warranted to do all that is claimed for it.

No. 9—6×20 in., w't per doz. 96 lbs., - " 11.50
No. 10—7×20 in., w't per doz. 126 lbs., - " 15.15

These backs are fitted by breaking off the edges, reducing 2 in. on each end and 1½ in. on the bottom.

DIAMOND FIRE BACKS.

CLOSED

EXTENDED.

No. 6—Adjustable, from 4½×15 in., to 7×20 in., w't per doz. 102 lbs., - - - - - per dozen $15.00

All the extending parts are held in a secure position without the use of bolts, wedges or keys.

HALF DOZEN IN A CRATE.

DIAMOND COOK STOVE DAMPERS.

No. 173—Adjustable blade 9×13½ in., reduces to 5½×2 in., w't per doz. 22 lbs., - - - - per dozen $4.00

This damper will fit all stoves having a turnover damper. It can be put in without taking stove apart and by any one easily. The handle can be put in from either end, thus adapting it to any damper that may turn forward or backward. Damper can be set at any point on handle. One damper fits all lengths and sizes.

ADJUSTABLE STOVE POSTS.

No. 1.

No. 2.

No. 3.

For Supporting Long Centers.

No. 1—W't per doz. 6 lbs., - - - per dozen $0.75
No. 2—W't per doz. 6 lbs., - - - - " .75
No. 3—Brick holding post, w't per doz. 12 lbs., " 1.50

These center posts are used in bracing up long centers that are warped or sunken down. To mend an old center, break it in two in the middle, drill holes to match the post and bolt on the under side, letting the foot rest on the oven plate.

SHEET STEEL ROOFING.

Roll and Cap.

Painted—28 gauge, approximate w't per roll 77 lbs. per roll $

Galvanized—28 gauge, approximate w't per roll 93 lbs. per roll

Heavier gauges furnished if desired.

The distinctive feature of this roofing is the locking of the cleats into the cap, which holds it firmly to the standing seam. The construction is simple, and is easily and rapidly laid. The metal caps are made in 2 to 6 ft. lengths, which we furnish with each square, cleats included. Each roll is 50 ft. long; the covering width is 24 in., and will lay 100 sq. ft. on building.

Caps and cleats shipped unless otherwise instructed.

Tools necessary to lay are: 1 edging tong, 1 cap seamer, 1 pair snips. These are charged for when sent and if returned in good order, free of expense to us, we will refund the full amount.

ROOFING, SIDING, CAPPING AND SHINGLES.

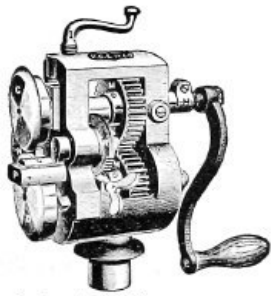
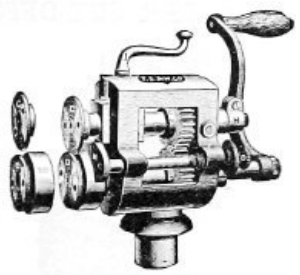
TINNERS' MACHINES.

COLUMBIAN WIRING.

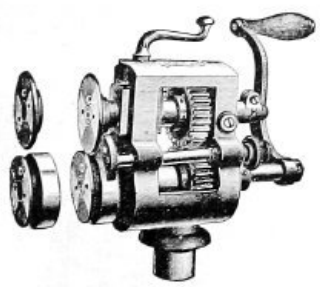


With Standard, w't 33 lbs. .....each $12.00

COLUMBIAN TURNING.

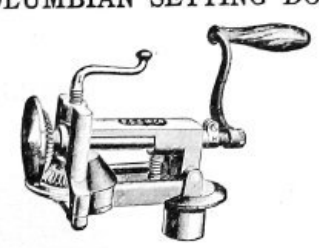


Small, with standard, with extra upper and lower face, w't 26 lbs.....each $10.00



Large, with standard, with extra upper and lower face, w't 32 lbs.....each $10.25

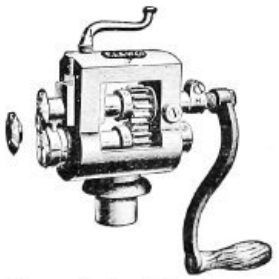
COLUMBIAN SETTING DOWN.



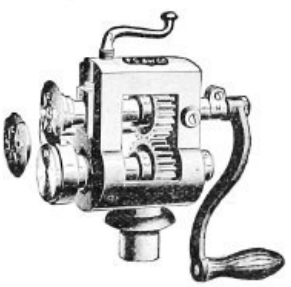
With standard, w't 21 lbs.....each $9.75

Columbian machines have a solid frame, are strong and durable, and are made with duplicate parts — that is, the corresponding parts of the same machine are interchangeable. By a patented arrangement the upper journal boxes are so constructed that the faces readily pass over seams without straining the machine or injuring the work. These machines can be used on metal as thick as No. 24 gauge.

COLUMBIAN BURRING.

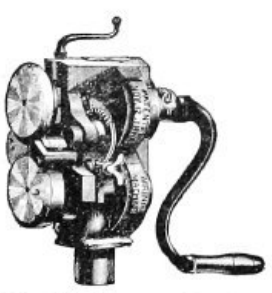


Small, with standard, with extra upper face, w't 22 lbs.....each $8.50



Large, with standard, with extra upper face, w't 26 lbs.....each $9.00

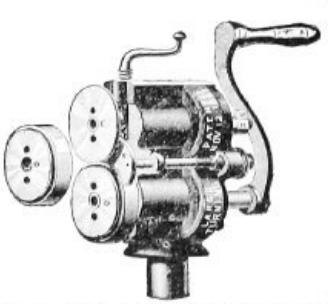
STOW'S ENCASED WIRING.



With Adjustable Boxes and Duplicate Parts.

With Standard, w't 30 lbs.....each $14.00
Without Standard, w't 18 lbs..... " 13.25

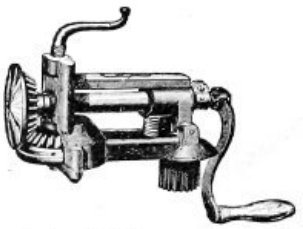
STOW'S ENCASED TURNING.



With Extra Faces, Adjustable Boxes and Duplicate Parts.

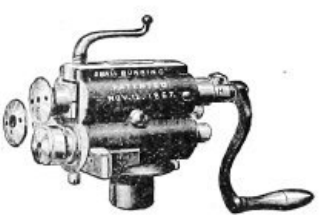
Small, with standard, w't 24 lbs....each $11.25
Small, without standard, w't 13½ lbs. " 10.50
Large, with standard, w't 29 lbs..... " 11.50
Large, without standard, w't 18 lbs. " 10.75

STOW'S ENCASED SETTING DOWN.



With Standard, w't 21 lbs.....each $9.75
Without Standard, w't 10½ lbs..... " 9.00

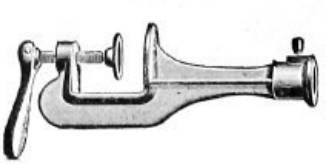
STOW'S ENCASED BURRING.



With Extra Upper Face.

Small, with standard, w't 21 lbs....each $10.00
Small, without standard, w't 10½ lbs. " 9.25
Large, with standard, w't 24 lbs.... " 10.50
Large, without standard, w't 13 lbs. " 9.75

STOW'S IMPROVED MACHINE STANDARDS.

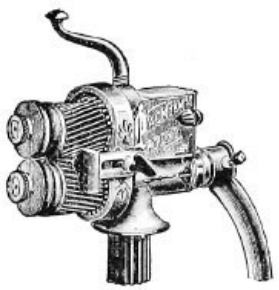


Improved Machine Standards, w't 11 lbs. each..... $1.00

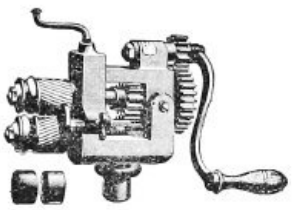
These standards are so made as to be used on any bench, varying in thickness from one to three and one-half inches. The necessity of cutting holes in the bench is obviated, and the tinner is enabled to use a machine in any part of his shop most convenient to his work. The wrench is always attached to the standard. These standards are also adapted to Raymond's machines.

TINNERS' MACHINES.

CRIMPING.



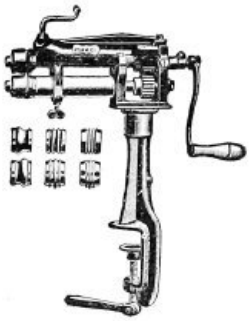
Packham's, for stove and conductor pipe, with standard, w't 24 lbs.....each $10.00



No. 7—Stove pipe crimper and beader, complete with standard, w't 45 lbs., each.....$12.00

These Machines are designed to facilitate the making and putting together of metal pipe of different diameters. They crimp and contract the edges of stove and conductor pipe, so that the lengths are put together easily. They have steel rolls and are adapted to material as thick as No. 22 gauge.

BEADING.



No. 4, With Standard.

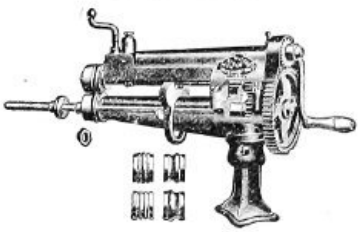
Stow's Patent, with Adjustable Boxes and Duplicating Parts.

No. 4—6 in., with 4 pairs of rollers and rotary standard, w't 35 lbs....each $19.75
No. 5—4 in., for tin, with 5 pairs of rollers and rotary standard, w't 20 lbs..each 16.75

The 4 pairs of rollers accompanying the No. 4 beader are the single bead, ogee bead, small triple bead and triple coffee pot bead.

These Machines are adapted to material not thicker than No. 26 gauge. All parts are made to standard gauges so that any piece can be replaced by designating number of machine and the part wanted.

BEADING.



No. 1, With Standard.

Improved, with 3 Pairs Rollers and Rotary Standard.

No. 1—13 in., w't 117 lbs. .....each $32.25
No. 2—10 in., w't 110 lbs. ..... " 31.25
No. 3—7½ in., w't 81 lbs. ..... " 26.25

The impressions given are 1⅛ in., 1 in., ⅞ in., ½ round, ogee coffee pot, cullender, elbow, astragal, and any form required.

The rod in front is designed as a "guide rest," on which the cylinder or vessel may rest while forming the bead, and revolves without guidance by the hand.

The machine is made with interchangeable parts, and is heavy enough to bead No. 20 iron.

STOW'S DOUBLE SEAMING.

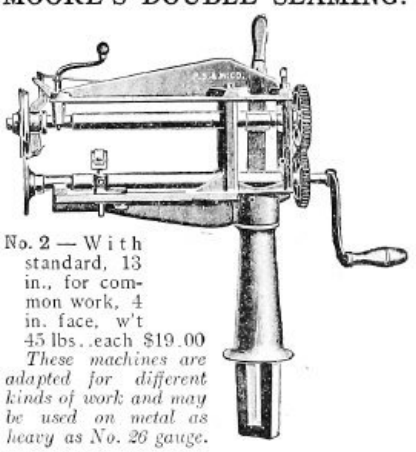
No. 5.

With Eleven Discs.

No. 5—With setting down attachment, w't 115 lbs.....each $28.00
No. 10—Without setting down attachment, w't 108 lbs..... each 24.00
Extra Discs..... " 1.25
Extra Heads..... " 2.50

The Setting Down attached to No. 1 willset down any work that can be double seamed on the machine. It works rapidly and accurately, and an inexperienced workman can use it without difficulty. It is also intended to be used on work that does not require to be double seamed, and to a large extent will take the place of the Setting Down in the set of machines. Adapted to material as thick as No. 26 gauge.

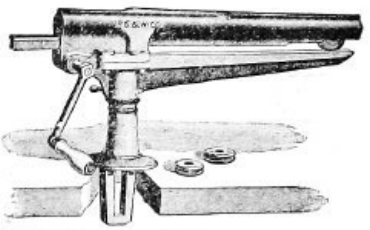
MOORE'S DOUBLE SEAMING.



No. 2 — With standard, 13 in., for common work, 4 in. face, w't 45 lbs..each $19.00

These machines are adapted for different kinds of work and may be used on metal as heavy as No. 26 gauge.

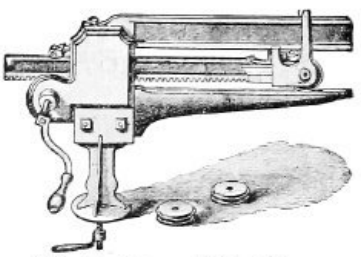
ENCASED GROOVING.



No. 1—For heavy work, 20 in., with rotary standard, w't 76 lbs. .....each $13.50
Extra Standards..... " .75

May be used on metal as thick as No. 26 gauge.

BRASS MOUNTED GROOVING

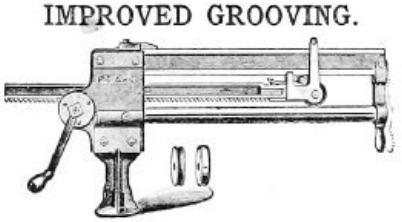


With Steel Bar and Milled Horn.

No. 01—For heavy work, 20 in., with standard, w't 78 lbs. .....each $13.50
Extra Standards..... " .75

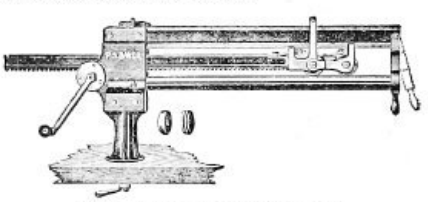
May be used on material as thick as No. 24 gauge.

IMPROVED GROOVING.



No. 120—30 in., rolls 5/32, ¼ and 3/8 in., with square supporting bar, with stand, w't 110 lbs.....each $18.00

Operator can observe his work during the whole process of grooving. Seams can be formed on the inside or outside of the cylinder and it may be used on all vessels not less than two inches in diameter. Four rolls are put up with each machine, one each with groove, and one flattening roll. When the rack is thrown back to the standard the grooving roll is lifted from the lower bar and can be easily released for the purpose of changing the rolls. These groovers are adapted to metal not heavier than No 22 gauge.



With Square Supporting Bar.

No. 220—40 in., with Kennedy Attachment, grooves work 30 in. in length, with stand, w't 130 lbs.....each $25.00

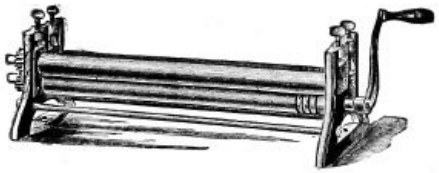
Kennedy's Patent Attachment or following roll is intended for flattening the seams.

This Attachment enables the workman to groove and flatten the seams in one operation.

These groovers have the same size rolls as above and also flattening roll.

TINNERS' MACHINES AND RULES.

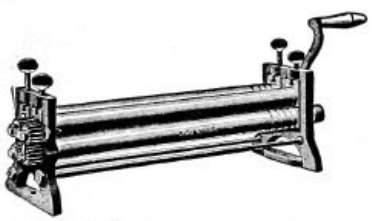
FORMING MACHINES.



Stove Pipe Former, 30 in. Long.

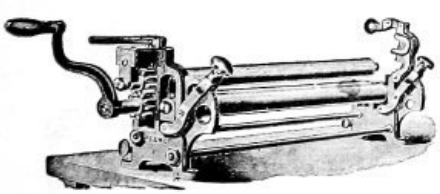
No. 2—1¾ in. rolls, w't 105 lbs....each $18.00
No. 1—2 in. rolls, w't 130 lbs..... " 19.00

These Formers are made with steel rolls. They are turned, finely finished, and are free from indentation and imperfections.



Patent Stove Pipe Former, with Compensating Gear, 30 in. Long.

No. 11—1¾ in. rolls, w't 100 lbs....each $19.00
No. 12—2 in. rolls, w't 123 lbs... " 20.00



No. 100—GRANNIS', patent slip roll stove pipe former, with compensating gear, 2 in. rolls, 30 in. long, w't 125 lbs, each $22.00

These Machines are much more easily adjusted, and can be set for forming any desired size of cylinder in much less time than is required to set others. They are made with Slip Rolls, so that small work can be readily taken from the end after it has been formed.

EAVE TROUGH END FORMERS.

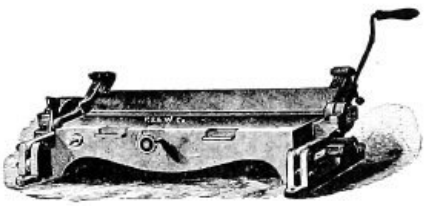
The Tool.

The Work.

No. 6—BISHOP'S, cast iron, five sizes, 3½, 4, 4½, 5 and 6 in. trough, w't 4 lbs..each $1.50

For closing end of eave trough in corrugations as shown in illustration. An end can be closed much quicker, neater and cheaper than in any other way. A cut trough can have an end put in both parts, preventing waste. Old work can be closed from a ladder. The frost will not burst the end out. The forms are light enough to use anywhere the work is to be done, and are made in two sizes, on which all sizes from 3 to 5 in. trough can be closed.

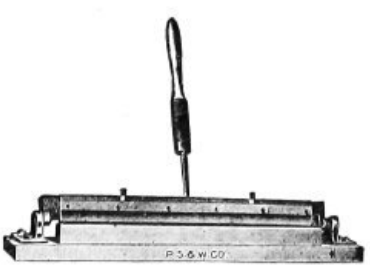
TIN FOLDING MACHINES.



No. 152—STOW'S patent, adjustable, 20¾ in., will turn locks from $\frac{3}{32}$ to 1 in., w't 80 lbs.....each $30.00
No. 154—STOW'S, patent, adjustable, 31 in., will turn locks from $\frac{3}{32}$ to 1 in., w't 155 lbs.....each 40.00
May be used on material as thick as No. 22 gauge.

SHEET IRON FOLDING MACHINES.

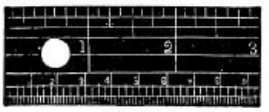
No. 1—WRIGHT'S, 30 in., improved, will turn locks $\frac{3}{16}$ and $\frac{5}{16}$ in., w't 75 lbs, each $12.00
No. 12—WRIGHT'S, 30 in., improved, will turn locks $\frac{3}{16}$, $\frac{5}{16}$, ½ and $\frac{5}{8}$ in., w't 75 lbs.....each 15.00
As now made, this machine will turn locks of different widths an any length of sheet. May be used on material as thick as No. 24 gauge.



No. 30—30 in., wood bottom, w't 56 lbs., each.....$10.00

This folder is constructed with a mill bar and fits the gauge accurately. Adapted to material as thick as No. 22 gauge.

TINNERS' RULES AND STRAIGHT EDGES.



Front.

Back.

No. 5—Plain polished, 36 in. long, w't 1¾ lb.....each $3.50
No. 6—Nickel plated, 36 in. long, w't 1¾ lb.....each 4.00

Laid off on one side with two rows of figures, the first like an ordinary steel square, by eighths and inches up to three feet. The second is a line of circumferences divided into 113 equal parts; each of these divisions is again sub-divided into 8 equal parts, the large divisions representing an inch to a scale and sub-divisions an eighth of an inch. Therefore, against any diameter the circumference in this line to a scale in inches and eighths of inches can be found.

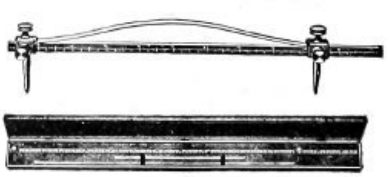
The reverse side of rule gives dimensions of measures and cans. The first two tables are for flaring measures. 1st. Liquid measures, 1 to 5 gal. 2d. Dry measures, 1 to 2 bu., giving diameter of top and bottom, and height of each size and kind.

Third table is for cans with pitch or cone tops, 1 to 10 gal., giving diameter of top and body, and compass mark for striking breast.

Fourth table is for flat top cans from 100 to 200 gal. (thirty-one different sizes), giving height and diameter.

Fifth table is for dry measure, from 1 qt. to 3 bu., giving height and diameter.

MAGIC PATTERN RULES.



No. 7—LUFKIN'S, nickel plated steel bar, length 4 ft. $\frac{7}{16}$ in., square, with two slides, trammel points and flexible steel ribbon, with pattern chart mounted on linen, 19×23 in., in hinged wooden case, w't 7 lbs.....each $5.00

The Magic pattern rule is marked in circumference inches on the front, and in inches and eighths on the back. The two slides have set screws into which trammel points are fastened. For laying out elbow patterns, the left hand slide is fastened to the end of the bar by the set screw, and the right hand slide is set according to what diameter elbow is wanted. A flextible steel ribbon on the top of bar is then raised to the required height, according to angle of elbow wanted; one glance at the chart giving such height necessary according to the elbow required.

TINNERS' TOOLS.

STOW'S IMPROVED SQUARING SHEARS.

For Cutting Sheet Metal.

No. 120—With frame, for No. 20 iron, cuts 22 in., w't 350 lbs.....each $37.00
No. 130—With frame, for No. 18 iron, cuts 31 in., w't 450 lbs.....each 52.00
No. 136—With frame, for No. 18 iron, cuts 37 in., w't 650 lbs.....each 82.00

These Squaring Shears are made with top and side extension tables and Patent Quick-Acting Back Gauge. They are also provided with front gauges and front extension arms as shown above The springs are arranged with a set screw for regulating the tension and compensating for wear. Every squaring shear when it leaves the factory, will cut wet tissue paper the whole length of the blade.

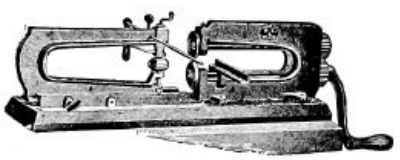
HULL'S ACME SQUARING SHEARS.

For Cutting Sheet Metal.

No. 2—ACME, with frame, for No. 18 iron, cuts 31 in., w't 450 lbs.....each $50.00

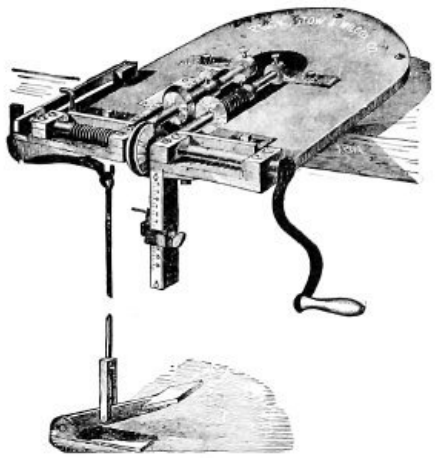
They are arranged with table, back and front gauges, for squaring, stripping and cutting at any desired angle without necessity of marking the sheets.

WAUGH'S CIRCULAR SHEARS.



No. 1—For tin, with 1 pair discs and cutters, will cut circle 2¼ to 15 in. in diameter, w't 60 lbs.....each $33.00
No. 2—For tin, with 1 pair discs and cutters, will cut circle 2¼ to 20 in. in diameter, w't 70 lbs.....each 38.00

NEWTON'S CIRCULAR SHEARS.

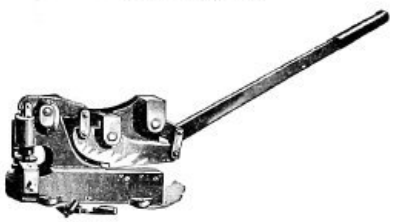


With Two Pairs of Discs, One Pair Each 2⅜ and 5⅞ Inches in Diameter.

Newton's, w't 125 lbs.....each $22.00

Will cut circles from 3 to 14 in. in diameter, from material not thicker than No. 26 gauge.

COMBINATION SHEARS AND PUNCHES.



No. 1—4½ in. cut, will punch ⅛ in. iron, w't 100 lbs.....each $16.00
No. 2—5½ in. cut, will punch $\frac{3}{16}$ in. iron, w't 120 lbs.....each 20.00

These Machines are suitable for both cutting and punching metal. They may be used for cutting ⅛ inch iron, and $\frac{3}{16}$ and ¼ inch narrow bars. The No. 1 will punch the centre of a circle 5¼ inches in diameter and the No. 2, 5½ inches. Four Punches are put up with No. 1, viz., ⅛, $\frac{3}{16}$, ¼ and $\frac{5}{16}$ inch. Five Punches are put up with No. 2, viz., ⅛, $\frac{3}{16}$, ¼, $\frac{5}{16}$ and ⅜ inch.

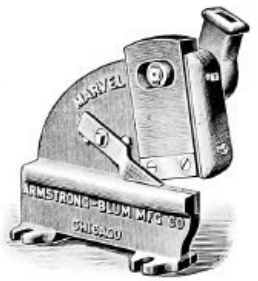
MARVEL PORTABLE PUNCHES.

Made Entirely of Steel.

No. 20—Cuts ¼ in. hole in ¼ in. stock, w't 16 lbs.....each $29.00

A powerful, well made tool. Needed in every industry wherever metal is used. Easily carried in one hand. It punches sheets, bars, angles circles, etc. A splendid tool for punching a number of holes around the edges of sheets. Will punch a hole ⅜-inch from inside corner of angle iron to center of punch. If desired to use stationary on a bench, it can be clamped in any common bench vise, the vise jaws clamping the frame between the two lower nuts, the two nuts acting as a perfect brace.

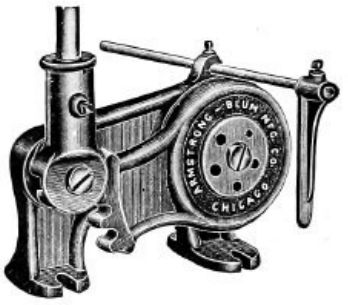
MARVEL SPLITTING SHEARS.



No. 1—4 in. blades, cuts sheets ⅛ in. thick or less, any length or width, w't 55 lbs.....each $28.00

This machine is well made and very strong The upper shear bearing is on an angle, and thus lessens the strain on the machine. The stripper, or hold down, is so placed that a line on material can be easily followed. It shears swinging lever either way.

MARVEL ROD CUTTERS.



No. 5—Cuts rods ⅜, $\frac{5}{16}$, ¼, $\frac{3}{16}$, ⅛ in. and intermediate sizes, complete with lever, gauge and gauge rod; w't 12 lbs., each.....$12.00

Cutting Dies have round openings of correct size to cut off rods and wire within the capacity of the machine, which insures good work with ends round and true.

The Marvel Rod Cutter is so arranged as to bring the lever at a convenient height from the bench, and the gearing is so placed as to remove all danger of crushing the operator's hand. The round Steel Lever can be instantly removed when desired.

The center of leverage is down low which lessens the pull on the bench. The neat Gauge is very handy when cuitng a number of pieces of the same length.

TINNERS' TOOLS.

'REV-O-NOC" STRAIGHT TINNERS' SNIPS.

Drop Forged, Steel-Laid.

Nos.	36	37	38	39	
Full length.	15½	14¼	13	12¼	in.
Cut.	4½	4	3½	3	in.
Weight	3¼	2½	1½	1	lbs.
Per pair	$3.00	2.50	2.00	1.50	

Nos.	40	41	42	
Full length	11¼	10	8½	in.
Cut.	2½	2¼	2	in.
Weight	1	¾	⅝	lb.
Per Pair	$1.40	1.25	1.00	

"Rev-o-noc" Snips are forged from one solid piece of steel and a shear steel plate of special quality is laid over the entire surface of the blade and under the bolt making a steel bearing. Each pair is hardened in water and tempered by patent method, producing a snip that is unsurpassed.

"REV-O-NOC" CURVED TINNERS' SNIPS.

Drop Forged, Steel-Laid.

Nos.	218	219	
Full length	12¼	13½	in.
Cut.	3½	3	in.
Weight	1½	1	lbs.
Per pair	$3.00	2.50	

"REV-O-NOC" ROUNDED BACK TINNERS' SNIPS.

Drop Forged, Steel-Laid.

Nos.	260	270	280	
Full length	15½	14¼	13	in.
Cut.	4½	4	3½	in.
Weight	3¼	2½	1½	lbs.
Per pair	$3.50	3.00	2.50	

Nos.	290	300	
Full length	12¼	11¼	in.
Cut	3	2½	in.
Weight	1	¾	lb.
Per pair	$2.00	1.90	

These snips will cut curves, scrolls and irregular shapes, besides being adapted to the same class of work as the ordinary straight snips. The jaws are not bent, like those of circular snips. They are shaped in a peculiar manner to allow the material to pass freely when cutting curves, or changing the direction of the cut.

STRAIGHT HAND SHEARS OR SNIPS.

P. S. & W. Co's, Wrought Handle.

Nos.	6½	7	8	9	10	11	
Cut (catalogue)	4¼	4	3½	3	2½	2	in.
Cut (actual)	4¼	3½	3¼	3	2½	1½	in.
Weight	3¼	2½	2	1½	1	⅝	lbs.
Per pair	$3.00	2.50	2.00	1.50	1.40	1.25	

No. 30—Chilled iron, cut 2¾ in., w't 1¾ lbs. ..... per pair $0.60

No. 3—Forged tool steel, cut 3 in., length 12 in., w't 1¼ lbs. ..... per pair 1.50

CIRCULAR HAND SHEARS OR SNIPS.

P. S. & W. Co's, Wrought Handle.

No. 70—Cut 3½ in., w't 2½ lbs., per pair $3.50
No. 80—Cut 3¼ in., w't 2 lbs., " 3.00
No. 90—Cut 2¾ in., w't 1⅝ lbs., " 2.50

All illustrations show left hand shears which have the lower blade on the left side.

Left hand shears are generally used, and are always sent unless otherwise stated. If wanted for a left handed man the order should so state.

Shears for left handed men are subject to an advance in price.

DENTAL SNIPS.

Japanned Handles, Nickel Plated Blades.

No. 21—1½ in. cut, w't per doz. ½ lbs., per dozen $20.00
No. 22—2 in. cut, w't per doz. ⅝ lbs., per dozen 22.00

For cutting wire cloth, etc., especially adapted for milliners.

COMBINED SHEARS AND PIPE CRIMPERS.

No. 2—Combined double cutting shear and pipe crimper, interchangeable parts, steel crimping jaws, length 13 in., actual cut 1¾ in., w't 2¼ lbs. ..... per pair $3.00

METAL CUTTING SHEARS.

No. 4—"UNIVERSAL," superior quality, highly tempered steel, polished blades, black enameled handles, length 12 in., w't 1½ lbs. ..... per pair $8.50

No. 5—"UNIVERSAL," length 7½ in., otherwise same as No. 4, w't 7 oz., per pair. 5.00

These shears will enable any one to cut with the greatest ease, all kinds of sheet metal, along curved lines as well as straight, leaving a clean cut edge.

HAWK'S BILL SHEARS.

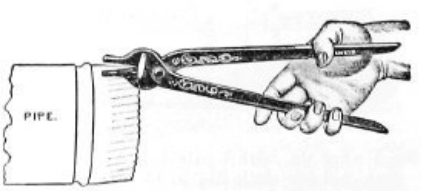
No. 15—Pointed snips (actual cut 2¼ in.), length over all 9¾ in., w't per pair 1 lb., per pair. $3.00

BENCH SHEARS.

Nos.	00	0	1	2	
Cut (catalogue)	12	10½	9	8⅝	in.
Cut (actual)	11	9½	8¼	8	in.
Weight	36	28	23	18	lbs.
Per pair	$13.50	12.00	8.00	7.00	

Nos.	3	4	5	6	
Cut (catalogue)	8⅜	8	7	6	in.
Cut (actual)	7¾	7½	6	5	in.
Weight	13	12	9	8	lbs
Per pair	$6.00	5.00	4.00	3.50	

CRIMPING TONGS.



Packham's, for pipe and metal, w't 2 lbs., per pair. $1.25

Gutter Tongs, w't 10 lbs.....per pair $5.00

ROOFING DOUBLE SEAMERS.

This cut illustrates a pair.

No. 4—Roofing Double Seamers, sizes 1×1¼ in. and 1¼×1½ in. (two pairs to match make one set), w't per set 15 lbs.....per set $1.75

BURRITT'S DOUBLE SEAMERS.

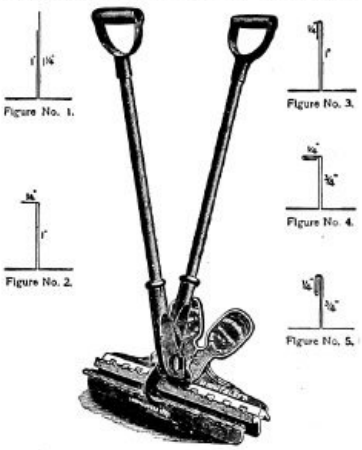

Figure No. 1.

Figure No. 3.

Figure No. 4.

Figure No. 5.

Figure No. 2.

This cut illustrates a pair. Two pairs make a set.

For Standing Lock Tin Roofing.

No. 6—1 and 1¼ in., w't per set 38 lbs., per set..... $30.00

No. 5—1¼ and 1½ in., w't per set 40 lbs., per set..... 30.00

First, the edges of the tin are turned up, one side being 1 in. and the opposite side 1¼ in. in height, as shown in Fig. 1. This operation is accomplished by means of two pairs of roofing tongs, sizes corresponding to the above.

Place the 1¼ in. roofing double seamer which has the widest jaws over the tin, which has been turned up 1¼ in., and throw the handles together. This turns over ¼ in. of tin at right angles, as shown in Fig. 2. Then use the other side of the same instrument, which is operated by the foot. This leaves the tin as shown in Fig. 3. Now use the 1 in. roofing double seamer, make the bend as shown in Fig. 4 by using the handles, and complete the operation by using the other side of the same instrument, which is operated by the foot. This leaves a standing locked seam ¾ in. in height, as shown in Fig. 5.

If a standing locked seam 1 in. high is wanted, it is necessary to use the large set (No. 5), which consists of a pair of 1½ and a pair of 1¼ in. roofing double seamers.

A full set is needed to make the double seam.

SOLDERING COPPERS.

Sharp Point, w't per pair 1, 1½, 2, 2½, 3, 4, 5, 6, 8 and 10 lbs.....per pound $0.35

Wedge Point, w't per pair 4, 5, 6, 8 and 10 lbs.....per pound $0.35

Square Point, with shield and handle, w't per pair 11 and 12 lbs.....per pound $0.35

SOLDERING COPPER HANDLES.

No. 1—Soft wood, wire bound, assorted, w't per doz., 2 lbs.....per dozen $0.30

SOLDERING SETS.

No. 7.

No. 6—One light copper soldering iron, one small round stick of solder, one box of rosin and one piece of tin, complete in paste board box, w't 3 lbs., per dozen sets..... $2.50

No. 7—One heavy copper soldering iron, one scraper, one large triangular stick of solder, one box rosin, one piece of tin, complete in paste board box, w't 7 lbs., per dozen sets..... 5.00

ONE SET IN A PASTEBOARD BOX.

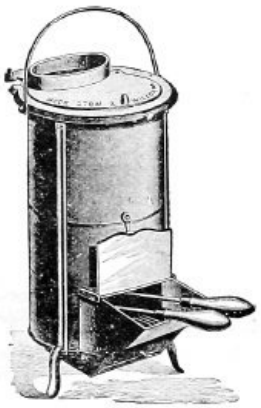
SOLDERING SALTS.

2 oz.	Bottles	per dozen	$2.00
8 oz.	Bottles	"	3.50
1 lb.	Bottles	"	7.00
5 lb.	Jars	each	2.00
10 lb.	Jars	"	3.50
25 lb.	Jars	"	10.00

A complete substitute for the usual mixture used for soldering purposes. It makes a better joint, is safer, cleaner, more convenient, and cheaper than the old-fashioned method. Uniform in strength, and unaffected by climatic changes.

TINNERS' TOOLS.

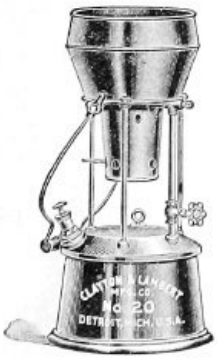
FIRE POTS.



No. 76—BUTTLES PATENT, charcoal, sheet iron, japanned, w't 15 lbs.....each $4.00

This Fire Pot is so constructed that the ashes fall into a pan beneath the coal, and the fire is kept clear and the draft is good. It is light and may easily be carried from place to place at the convenience of the workman.

No. 15—C. & L. COIL, gasoline, galvanized iron tank with galvanized cast iron bottom ring, coil of extra heavy pipe, burner of steel, small castings of malleable iron or brass, w't 13 lbs. each $4.75



No. 20—C. & L. COIL, gasoline, galvanized iron tank with galvanized cast iron bottom ring, coil of extra heavy pipe, steel burner, small castings of malleable iron or brass, fitted with automatic brass air pump, w't 13 lbs.....each $5.00

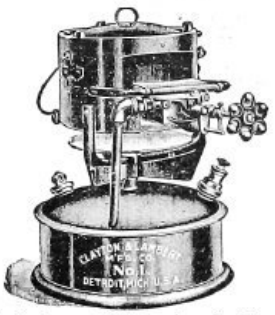
Nos. 10 and 20 are well and favorably known. The generator is powerful, producing a large volume of pure blue flame that is intensely hot, consuming less gasoline than other makes.

The valves are fitted with needle points which give the user better control of the fire and are always tight.

No. 20 is fitted with an automatic brass air pump which is more durable than bulbs and enables the user to use more air, thereby producing a blue blast flame that is intensely hot.

ONE IN A CRATE.

FIRE POTS.

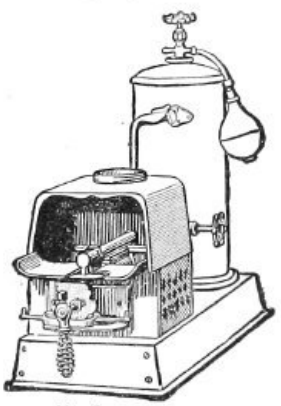


No. 1—C. & L., gasoline, galvanized iron tank, diam. 9 in., *sheet steel hood*, diam. 6¾ in., height 12 in., fixed pump, japanned wood handle, w't 14 lbs..each $7.00

No. 5—C. & L. "SPECIAL," gasoline, galvanized iron tank, diam. 8 in., *sheet steel hood*, diam. 6 in., height 11 in., fixed pump, japanned wood handle, w't 12 lbs.....each 5.50

No. 5 is same as No. 1, except smaller. It has proven very popular with metal workers, plumbers and electricians.

With these Fire Pots a kettle of solder or lead can be kept hot enough to wipe joints, and at the same time, without removing kettle from fire, there is sufficient room and heat to keep soldering irons ready for use. Removing the top section exposes an open fire, which may be used as a torch or brazing fire. Can also be used in taking soil pipe apart, thawing frozen pipes, wiping overhead joints, or removing paint or tar from roofs. Will work satisfactorily in the heaviest wind, where it is impossible to get sufficient heat out of any other make of fire pot.



No. 3.

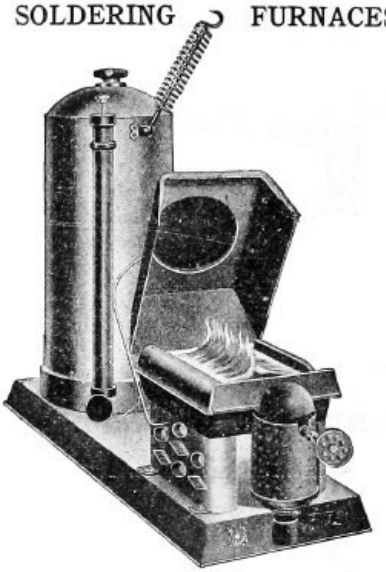
No. 3—GEM, gasoline, 21×7 in., sheet steel base, 10½×4¾ in. sheet steel reservoir, aluminum bronze, cast iron furnace, removable top, feed regulator, all cast brass fittings, japanned wood handle, sliding drip cup, rubber pump bulb, w't 14 lbs. .....each $8.00

No. 10—TORRID, gasoline, 11×6×4 in., sheet steel reservoir, capacity 1 gal., aluminum bronzed, cast iron horseshoe burner, iron top, height 11½ in., w't 25 lbs...each $6.50

ONE IN A CRATE.

No. 5—RUBBER BULBS, for gasoline fire pots, w't ¼ lb.....each 1.00

SOLDERING FURNACES.

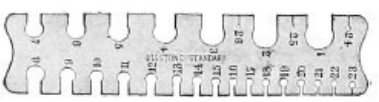


Lundy, gasoline, double blast, galvanized iron tank 5×12 in., brass pump 10×1 in., brass generator, cast iron frame, sheet steel base 19×7½ in., height over all 17 in., w't crated 30 lbs., each $17.00

The Lundy furnace has two blasts and is so constructed that the heat from both blasts is forced from the outside to the center so that while one iron is being used, the other one receives the force from both blasts, and the irons can be heated as fast as any tinner can possibly cool them.

It is well made and with ordinary care will last a lifetime.

STANDARD WIRE GAUGES.



No. 3—Cast steel, oblong, gauges Nos. 1 to 26, accuracy guaranteed, w't per doz. 1 lb .....per dozen $18.00

No. 4—Cast steel, oblong, gauges Nos. 0 to 29, accuracy guaranteed, w't per doz. 3 lbs .....per dozen $25.00

No. 7—Turned cedar, painted, for all styles of post lamps, diameter 6 in., length 10 ft., turned 7 ft., w't 50 lbs., each..... $2.50

HAND LAMPS.

No. 640—Polished brass, height 2 in., takes No. 0 Sun burner, ⅜ in. wick, w't per doz. 2 lbs.....per dozen $2.50

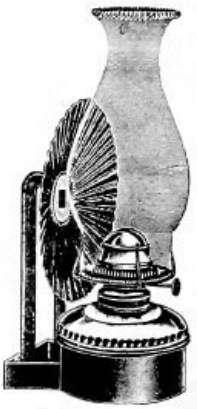
BRACKET LAMPS.

No. 553—Bronzed bracket, with swinging socket, 8 in. silver glass reflector, No. 9120 filler fount, No. 2 Sun burner, and No. 2 Sun crimped chimney, w't per doz. 50 lbs.....per dozen $10.00
ONE DOZEN IN A CASE

No. 556—French bronze finish bracket, No. 9119 handled glass filler fount, 8 in. silvered glass reflector, No. 2 Sun burner and chimney, 1 in. wick, w't per doz. 51 lbs.....per dozen $12.00
ONE DOZEN IN A CASE.

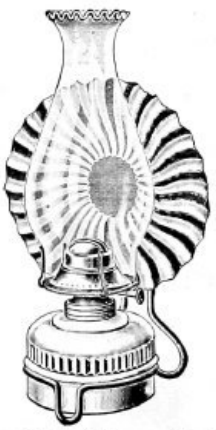
No. 560—Gilt ring bracket, polished brass fount, No. 102 Premier burner, No. 402 chimney, 8 in. silvered glass reflector, w't per doz. 35 lbs., per dozen $24.00
ONE DOZEN IN A CASE.

KITCHEN SIDE LAMPS.



No. 816—Heavy tin blue lacquered frame, 7 in. corrugated tin reflector, No. 9123 glass fount, No. 2 burner and No. 2 chimney, w't per doz. 35 lbs., per dozen..... $4.00

No. 0816—Frame and fount without chimney or burner, otherwise the same as No 816.....per dozen 2.25
No. 816, ONE DOZEN; No. 0816, THREE DOZEN IN A CASE.



No. 618—Tinned steel frame, No. 9123 glass fount, No. 2 Sun burner and chimney, 1 in. wick, 7 in. tin reflector, w't per doz. 35 lbs.....per dozen $5.00
ONE DOZEN IN A CASE.

No. 583—Japanned tin fount, No. 2 Sun burner and chimney, 1 in. wick, tin reflector 9×10¼ in., w't per doz. 35 lbs., per dozen..... $5.50
ONE DOZEN IN A CASE.

LAMPS.

GLASS LAMP ASSORTMENTS.

Footed Hand Lamp.

Flat Hand Lamp.

Stand Lamp

No. 7—Assortment.
Consisting of 36 Glass Lamps, assorted as below.

	PER DOZ.	RETAIL VALUE.
½ doz. No. ½A Stand Lamps, No. 1 collar	$1.80	$0.90
⅓ doz. No. A, Stand Lamps, No. 1 collar	2.40	.80
½ doz. No. B, Stand Lamps, No. 2 collar	3.00	1.50
½ doz. No. C, Stand Lamps, No. 2 collar	3.60	1.80
⅙ doz. No. D, Stand Lamps, No. 2 collar	4.80	.60
⅔ doz. Flat Hand Lamps, No. 1 collar	1.20	.80
⅓ doz. Footed Hand Lamps, No. 1 collar	1.80	.60
Total retail value.....per assortment		$7.00

These lamps are the very latest pattern, made extra heavy of clear flint glass.

The above illustrations show that these lamps combine grace of outline with large oil fount. This assortment comprises all sizes of stand and hand lamps in quantities in which they ordinarily sell.

TABLE LAMPS.

No. D1152.

No. 1140.

No. D1152—Heavy pressed glass, height 10 in., No. 2 collar, without burner or chimney, w't per doz. 42 lbs., per dozen $ 7.50

No. D1153—With No. 2 Sun burner and chimney, otherwise same as No. D1152, w't per doz. 48 lbs.....per dozen 9.75

No. 1140—Brass bowl and bronzed iron base, height 10¾ in., No. 2 collar, no burner or chimney, w't per doz. 27 lbs., per dozen..... 13.00

No. 1143—With No. 2 Sun burner and chimney, otherwise same as No. 1140, w't per doz. 30 lbs.....per dozen 15.25

OIL FOUNTS.

No. 9123.

No. 9120.

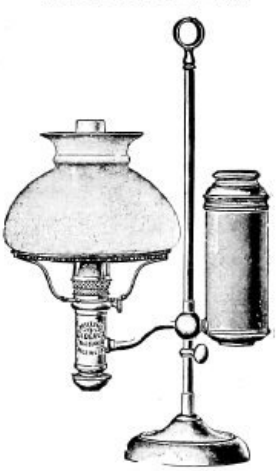
No. 9123—Glass fount, takes No. 2 burner, for kitchen lamp Nos. 618 and 816, w't per doz. 10 lbs.....per dozen $1.50

No. 9120—Glass filler fount, takes No. 2 burner, for iron chandeliers and bracket lamps, w't per doz. 11 lbs....per dozen 2.00

No. 9119.

No. 9119—Glass handled filler fount, takes No. 2 burner, for iron chandeliers and bracket lamps, w't per doz. 12 lbs., per dozen..... $ 2.50

STUDY LAMPS.



Nos. 6883 and 6884.

No. 6883—MILLER'S IDEAL STUDY, brass nickel plated, complete with 7 in. white dome shade, No. 0 Rochester chimney and No. 1 study wick, w't 6 lbs.....per dozen $60.00

No. 6884—MILLER'S IDEAL STUDY, green shade, otherwise same as No. 6883, per dozen..... 72.00

TWO DOZEN IN A CASE.

CENTRAL DRAFT TABLE LAMPS.

No. D9070.

No. D9108.

No. D9070—ASTRAL, nickel plated, complete with tripod, 10 in. white dome shade and No. 2 Rochester chimney and wick, w't 4½ lbs.....per dozen $33.00

Astral lamps are equipped with combined plunge and ratchet with adjustment, patent chimney lift for lighting, aluminum oil indicator to prevent overfilling.

No. D9108—NEW MILLER, brass, nickel plated, embossed, complete with tripod, 10 in. white dome shade and No. 2 Rochester chimney and wick, w't 5 lbs., per dozen.....$42.00

New Miller Lamps are equipped with combined plunge and ratchet wick adjustment, patent chimney lift for lighting, aluminum oil indicator to prevent overfilling.

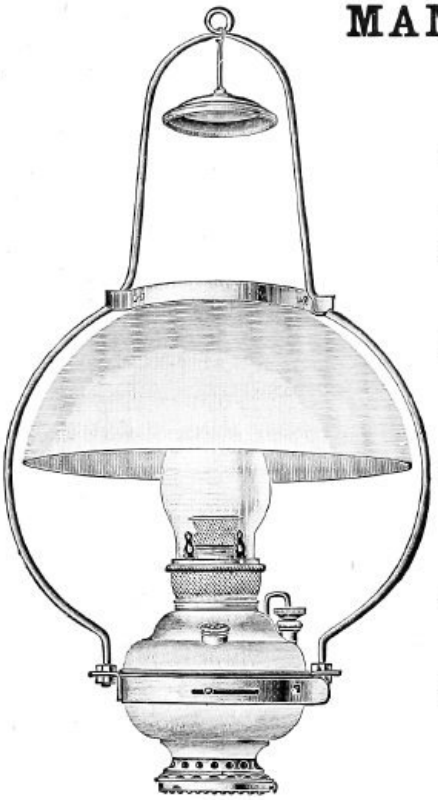
TWO DOZEN IN A CASE.

Combined Ratchet and Screw Wick Adjustment.

No. D98—NEW JUNO ASSORTMENT, consisting of six nickel plated stand lamps, two each of three patterns as illustrated above, all complete with new folding tripods, 10 in. white dome shades, No. 2 Rochester chimneys and wicks, w't per case 40 lbs.....per case $18.00

These Juno lamps are as fine as can be made. They include every desirable feature found in any of the best lamps in the market. They give a very large white, steady light; the burner is simple and easily cleaned; does not clog up. Combined plunge and ratchet wick adjustment, which will be found a great advantage. Patent chimney lift for lighting, aluminum indicator to prevent overfilling. The oil cannot run down the inner tube, but returns to the reservoir if turned too high when not in use. Every lamp has the new patent folding tripod. They are made of heavy brass of full standard size, and the finish is the best.

MAMMOTH STORE LAMPS.



Nos. 9173 and 09173.

No. 02800—Nickel plated brass, No. 00 Belgian chimney and wick, *without shade*, w't 6¼ lbs., - - - - - - - - - - " 5.50

The Dresden burner, with a much smaller wick, gives a light equal to No. 3 Mammoth lamp. An exceedingly steady pure white light The fittings of harp and fount are similar to Miller lamps.

HALF DOZEN IN A CASE.

GASOLINE LIGHTING SYSTEMS.

DESCRIPTION OF SYSTEMS.

These systems are most efficient for lighting stores, halls, churches, etc. They are simple in construction and easy to operate. They are not what is known as central generator systems, but the gasoline is conveyed to the lamp by means of very flexible hollow drawn brass wire ($\frac{1}{8}$ inch in diameter) and is converted into gas at the generator.

This hollow wire is so small that it is scarcely noticeable on the ceiling and so flexible that it can be easily bent and carried around obstructions, thus making possible a very neat and tasty appearing job.

The light is started by means of an alcohol torch lighted and applied to the generator (directly over the globe). This vaporizes the gasoline in the generator. After once being lighted the lamp is self-generating.

The gasoline supply tank is constructed of heavy galvanized iron and is very durable. The best quality automobile pump is provided. A few strokes of this large pump is all that is necessary to give sufficient pressure. We also supply best quality pressure gauge. We give a table showing the comparative costs of lighting with different devices.

Cost of Producing 1,200 C. P. Light per Hour.

Electricity, 5 cents; gas (with mantle), 6 cents; kerosene, 18 cents; gasoline, 1 cent.

We guarantee that two of these single arc lamps, on a consumption of $\frac{1}{10}$ gal. of gasoline per hour, will produce 1,200 candle power of light, thus at a cost of 1 cent per hour.

The above figures on electricity and gas are based on what is ordinarily charged by most plants.

These systems are permitted by the National Board of Fire Underwriters which is a guarantee of their safe construction and also insures user of best insurance without extra premium.

The working of the system is not affected by temperature and tank can be placed outside if desired.

Every system is guaranteed for two years, but they are practically indestructible. Glassware and mantles are of course not included in guarantee.

Each of these systems is assembled complete with all connections brazed ready to be put together.

Prices include tank, gauge, mantles, glassware, pump, wrench, torch etc. In systems carried in stock each lamp is provided with 25 ft. hollow wire tubing. Systems may be made up with any length tubing on shipments direct from factory.

OVERHEAD GENERATOR.

Lamps

These lamps generate a brilliant light (800 candle power), and they throw the light directly downward and there are no shadows. They are simple, safe and very satisfactory.

No. 12—Inverted lamp, complete with No. 120 mantle, enameled steel shade, without glass globe, w't 14 lbs.....each $10.50
This lamp has unbreakable enameled steel shade, and is particularly desirable because there is no glassware to break.

No. 13—Inverted lamp, complete with No. 120 mantle, enameled steel shade, with clear, opal or frosted glass globe, clear sent unless otherwise ordered, w't 16 lbs.....each $13.50
This lamp gives more light and much steadier light than electric arc.

No. 14—Outdoor inverted lamp, complete with No. 120 mantle, enameled steel shade, with clear, opal or frosted glass globe, clear sent unless otherwise ordered, w't 18 lbs.....each $16.50
This is the only successful hollow wire outdoor gasoline lamp made. Will withstand rain, wind and cold weather perfectly.

Hollow Wire.

HOLLOW WIRE, with connections.....per foot $0.10

No. 1—Arc, oxidized copper finish on brass; 700 C. P., capacity 2 qts., burns 15 hours with one filling and pumping, equipped with 14 in. nickel reflector, complete with foot pump, mantle, globe andspring extension, w't 23 lbs., each 18.00
No. 01—Arc, without spring extension, otherwise same as No. 1, w't 21 lbs., - - - - - - - " 16.00

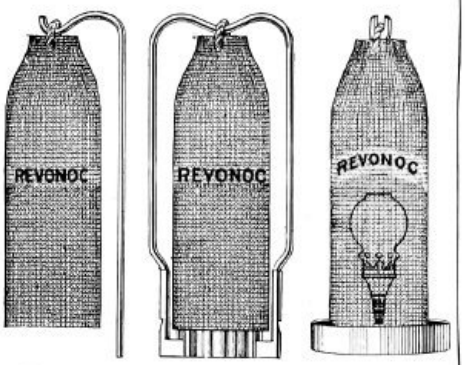
The lamps on this page are simple in construction. Each burner has only one valve and is therefore very easy to operate. Each lamp is guaranteed for a period of one year from date of purchase, mantles and glassware excepted. All insurance companies will issue permits for the use of these lamps without extra premium, because they are approved by the National Board of Fire Underwriters.

We have given shipping weights on the above.

ONE IN A BOX.

INCANDESCENT MANTLES.

"REV-O-NOC"



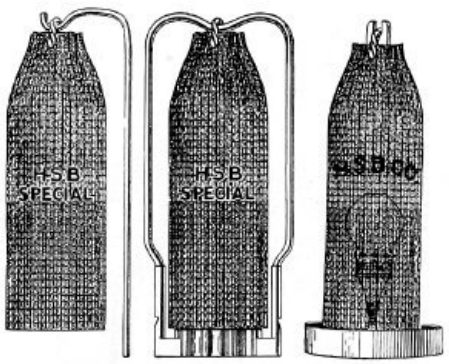
No. 40. No. 41. No. 41½.

No. 40 —"Rev-o-noc" loop mantle with wire hook support.....per dozen $3.00
No. 41 —"Rev-o-noc" cap mantle, mounted on heavy double wire, corrugated cap.....per dozen 3.50
No. 41½—"Rev-o-noc" center rod cap mantle, mounted on extra heavy corrugated cap with collar.....per dozen 4.00

"Rev-o-noc" mantles are highest grade, single stitched mantle it is possible to make. Nos. 41 and 41½ will fit any standard style of incandescent gas burner. On No. 41½ the collar protects the skirt of the mantle and also facilitates the handling of mantle while the center rod prevents shadows and lessens breakage.

IN BOXES OF 12 AND 50 EACH.

H. S. B. & CO.



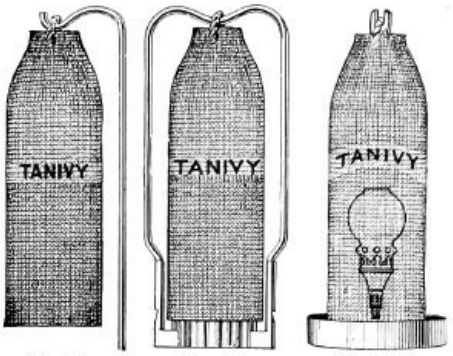
No. 38. No. 39. No. 39½.

No. 38 —H. S. B. & Co. loop mantle with wire hook support.....per dozen $2.65
No. 39 —H. S. B. & Co., cap mantle, mounted on heavy double wire, corrugated cap.....per dozen 3.25
No. 39½—H. S. B. & Co. center rod cap mantle, mounted on extra heavy corrugated cap with collar.....per dozen 3.75

H. S. B. & Co. mantles are double stitched and are preferred by many of the trade. The best thread and chemicals are used in their construction and they are high grade in every particular. Nos. 39 and 39½ will fit any standard style of incandescent gas burner. On No. 39½ the collar protects the skirt of the mantle and also facilitates the handling of the mantle while center rod prevents shadows and lessens breakage.

IN BOXES OF 12 AND 50 EACH.

TANIVY



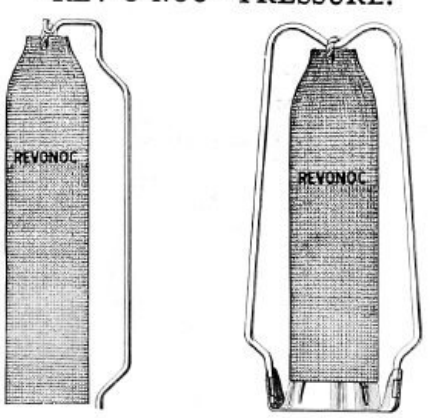
No. 20. No. 21. No. 21½.

No. 20 —Tanivy loop mantle with wire hook support.....per dozen $2.45
No. 21 —Tanivy cap mantle, mounted on heavy double wire, corrugated cap, per dozen..... 3.00
No. 21½—Tanivy center rod cap mantle, mounted on extra heavy corrugated cap with collar.....per dozen 3.30

Tanivy mantles are high grade, medium priced, single stitched mantles. They give good satisfaction. Nos. 21 and 21½ will fit any standard burner. On No. 21½ the collar protects the skirt of the mantle and also facilitates the handling of mantle while the center rod prevents shadows and lessens breakage.

IN BOXES OF 12 AND 50 EACH.

"REV-O-NOC" PRESSURE.



No. 10. No. 11.

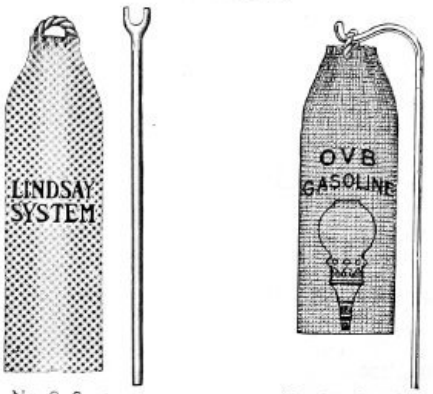
For Overhead Gasoline Pressure Lamps.

No. 10—"Rev-o-noc" pressure loop mantle, 5 in. long, rolled skirt and new form supporting wire of great heat resisting power.....per dozen $3.40
No. 11—"Rev-o-noc" pressure cap mantle, 5 in. long, mounted on adjustable cap, will fit any style gasoline pressure lamp.....per dozen 4.00

These mantles are made of extra heavy thread in heavy solution, especially to withstand strain of use on an overhead generator gasoline pressure lamp. They are highest quality throughout and of great durability.

ONE IN A BOX.

GASOLINE.

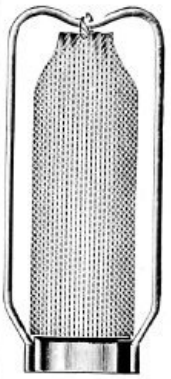


No. 8. System. No. 26. Gravity.

No. 8—Lindsay, 4½ in. long, equipped with wire hook support and magnesia center rod.....per dozen $3.00
No. 26—"Our Very Best" gravity gasoline loop mantle, heavy weave asbestos loop, with wire hook support.per dozen 3.00

This mantle is intended for use on gravity gasoline lamps; the best mantle made for the purpose.

IN BOXES OF 12 AND 50 EACH.

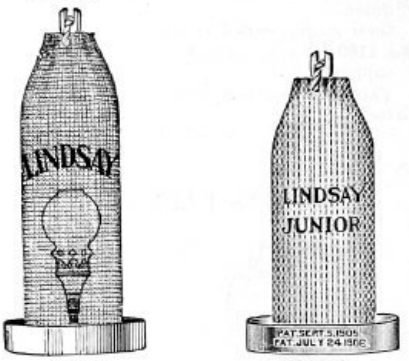


No. 31.

No. 31—"Flyer" cap mantle, mounted on double wire.per doz. $1.80

There is some demand for cheap incandescent mantles and we are prepared to meet it with the "Flyer" which is as reliable a mantle as can be made for the money. It does not bear our name on goods or label. Will fit standard burners except No. 5 Lindsay corrugated burner.

IN BOXES OF 12 AND 50 EACH.



No. 5. No. 50.

No. 5—Lindsay center rod cap mantle, single stitch, mounted on extra heavy corrugated cap and collar...per dozen $3.60

These are high grade mantles and are manufactured especially for No. 5 Lindsay light, but will fit other types of incandescent gas burners.

No. 50—Lindsay Junior, center rod cap mantle, mounted on extra heavy corrugated cap.....per dozen $3.00

This mantle is the same grade as No. 5 Lindsay center rod cap mantle, but is 2½ in. long instead of 3½ in. This mantle fills the demand for a shorter mantle which will use less gas and give a little less candle power.

IN BOXES OF 12 AND 50 EACH.

LAMPS AND MANTLES.

SOFT INVERTED MANTLES.

No. 120.

No. 130.

No. 120—Soft "Tie-on," for inverted gasoline system lamps.....per dozen $1.20

These mantles are soft and pliable. They are tied to a lamp, shaped and then burned. They are made by a different process from regular mantles and are very durable and satisfactory.

ONE DOZEN IN AN ENVELOPE.

No. 130—LINDSAY, soft inverted mantle with magnesia ring, for gas or gasoline systems.....per dozen $1.80

These mantles are similar to No. 120, except they are equipped with magnesia supporting ring and may be used on regular inverted gas burners. Being soft they are easily installed without fear of breakages.

IN BOXES OF 12 AND 50 EACH.

INVERTED MANTLES.

No. 1140.

No. No. 1150.

No. 1140—"REV-O-NOC" inverted mantle, mounted on magnesia support, per dozen..... $3.00

The web of this mantle is of the celebrated cross weave and it assures great strength and high candle power. It is made of highest quality material and fits standard inverted lights.

No. 1150—"TANIVY" inverted mantle, mounted on magnesia support, per dozen..... $2.40

Good grade inverted mantle—triple weave.

No. 1160—MAGIC, mounted on magnesia supports.....per dozen $1.20

This is a good competitive mantle, good value at the price.

IN BOXES OF 12 AND 50 EACH.

GAS LAMPS.

No. 65.

No. 60.

No. 65—"FLYER," complete with needle valve adjustable burner, No. 31 Flyer cap mantle and "Q" opal globe, w't per doz. 16 lbs.....per dozen $6.60

No. 60—CARLTON, complete with adjustable burner, center rod cap mantle and "Q" opal globe, w't per doz. 15 lbs., per dozen..... 10.80

GAS LAMPS.

Lindsay lights are justly celebrated and their continually increasing sale demonstrates the superiority claimed for them by the manufacturers over alleged similar devices. They are easily installed and regulated, they are economical in the burning of gas and give a good white light.

For Natural or Artificial Gas.

No. 5—Lindsay light, height 9¼ in., complete with No. 5 Lindsay adjustable burner, all parts of which are brass and separable, No. 5 Lindsay center rod cap mantle, and No. 14 opal "Q" globe, w't per doz. 18 lbs...per dozen $13.20

ONE IN A BOX, ONE DOZEN IN A CASE.

INVERTED GAS LAMPS.

Lindsay, for Natural or Artificial Gas.

No. 1000—Complete with Lindsay adjustable inverted burner, No. 1140 mantle and closed bottom air hole globe double etched with wreath design, w't per doz. 12½ lbs..per dozen $21.00

No. 1050—With half frosted globe, otherwise same as No. 1000.....per dozen 19.20

Inverted Globes for Above.

No. 1005—Air hole globe, double etched with wreath design, closed bottom, diam. top 3½ in., w't per doz. 2¼ lbs., per dozen..... $ 6.00

No. 1055—Air hole globe, half frosted, closed bottom, diam. top 3½ in., w't per doz. 2¼ lbs.....per dozen 3.85

This style of light is rapidly becoming the standard because it throws the light in a downward or useful direction. Lindsay lights are widely advertised and therefore most readily salable. They are easily adjusted (while lighted) without burning the hands and do not flash back as do many similar lights of other makes.

ONE IN A BOX.

Tanivy, for Artificial or Natural Gas.

No. 550—Complete with Tanivy inverted burner which has adjustable air shutter and adjustable gas regulator, No. 1150 Tanivy inverted mantle and open bottom globe, half frosted, w't per doz. 12½ lbs.....per dozen $14.40

The Tanivy lamp gives a good light, is easily regulated and is economical in the burning of gas and gives in every respect, as good a light as many similar higher priced lamps.

Inverted Globes for Above.

No. 555—Open bottom, half frosted, diam. of top 3½ in., w't per doz. 2¼ lbs.....per dozen 2.50

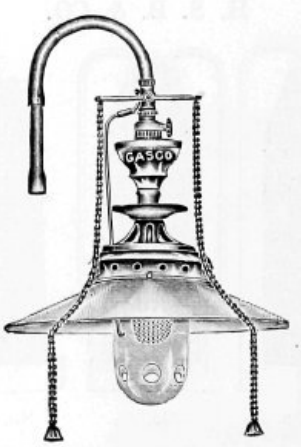
SIX DOZEN IN A CASE.

INVERTED GAS LAMPS.

No. 1—Lindsay Gasco, complete with No. 1140 mantle, burnished brass inverted burner, double etched wreath globe, with goose neck, w't per doz. 30 lbs.....per dozen $25.20

This lamp may be used on either natural or artificial gas and is furnished with attachable extensions for goose neck porcelain mantle holder. This is a high class light in every respect and gives splendid satisfaction.

ONE IN A BOX.



No. 3—Lindsay Gasco, complete with 9 in. opal shade and inverted air-hole cylinder with holder, with bypass, otherwise same as No. 1, w't per doz. 37 lbs.....per dozen $33.00

LAMP BURNERS.

No. 2—SUN HINGE, fits No. 2 collar, takes 1 in. wick, per dozen.....$2.50

No. 3—SUN HINGE, fits No. 3 collar, takes 1½ in. wick.....per dozen 6.00

ONE DOZEN IN A BOX. 50 DOZEN IN A CASE.

LAMP BURNERS.

No. 151—Combination, fits No. 1 collar, takes ⅝ in. wick.....per dozen $0.70
No. 152—Combination, fits No. 2 collar, takes 1 in. wick.....per dozen 1.00

This burner is intended to supply the demand for a cheaper burner than those shown below. It is similar in appearance to the Premier but made of cold rolled steel, brass plated with the exception of the cone, which is brass.

No. 101—PREMIER, fits No. 1 collar, takes ⅝ in. wick.....per dozen $0.80
No. 102—PREMIER, fits No. 2 collar, takes 1 in. wick.....per dozen 1.10

This burner is made of brass with the exception of the chimney guides and ratchet shaft, which are cold rolled steel, brass plated. This burner has been on the market many years and has given satisfaction. More of them are now sold than of any other make.

ONE DOZEN IN A BOX. 50 DOZEN IN A CASE.

No. 0—BANNER, fits No. 0 collar, takes ⅜ in. wick.....per dozen $0.95
No. 1—BANNER, fits No. 1 collar, takes ⅝ in. wick.....per dozen 1.00
No. 2—BANNER, fits No. 2 collar, takes 1 in. wick.....per dozen 1.30

These are well made, all brass burners. They are strong, carefully assembled, symmetrical in appearance and give a large white light. These burners are big sellers.

ONE DOZEN IN A BOX. 50 DOZEN IN A CASE.

No. 41—VENUS, fits No. 1 collar, takes ⅝ in. wick.....per dozen $1.60
No. 42—VENUS, fits No. 2 collar, takes 1 in. wick.....per dozen 2.00

These burners are extra heavy gauge, all brass and thoroughly well made. The body braces and heavy chimney guides are securely riveted to the deck of the burner, thereby making them strong and durable.

ONE DOZEN IN A BOX. 50 DOZEN IN A CASE.

LAMP BURNERS

No. 123—REGAL, fits No. 2 or 3 collar, takes 1½ in. wick.....per dozen $1.75

Regal burners are intended for use on lamps with No. 3 collars, but they also may be used on No. 2, as each burner is made with two seperate threads.

No. 23—PILOT, fits Nos. 2 or 3 collar, takes 1½ in. wick.....per dozen $2.50

The Pilot is heavier than the Regal, but otherwise is similar.

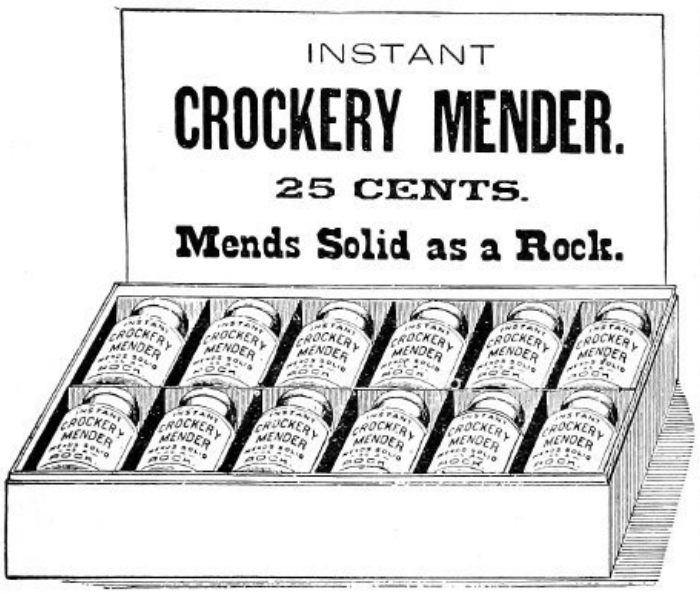
CROCKERY CEMENT.



No. 1 Assortment—INSTANT crockery mender, contains one dozen bottles, w't per doz. boxes 7½ lbs., per assortment $3.00

No. 2 Assortment—INSTANT crockery mender, contains three dozen bottles, and display stand holding one dozen bottles and a Swiss clock, w't 15 lbs., - - per assortment 10.00

Mends everything. We warrant it to be the best article made for the purpose.

TINWARE MENDERS.

Will Mend Tin, Copper and Enameled Ware.

No. 10—UNIVERSAL, consisting of 3 strips of self-fluxing solder, sand paper and directions in paper package, w't per doz. 1 lb., - - - - - - - per dozen $1.60

A self-fluxing solder, containing a flux so that no acid or resin is necessary to make the solder flow. The flux is non-corrosive and does not contain any poisonous matter. The solder is made in wire form, easy to handle and apply. Most every form of household utensil in tin, copper or granite ware can be easily soldered or mended without the use of any soldering iron. All that is necessary is to heat the article over a kerosene lamp, gas jet, or tallow candle, and touch the solder to the part to be soldered, when it will flow and close the hole or crack.

To mend enameled ware, scrape off the enamel around the part to be mended, before applying the solder.

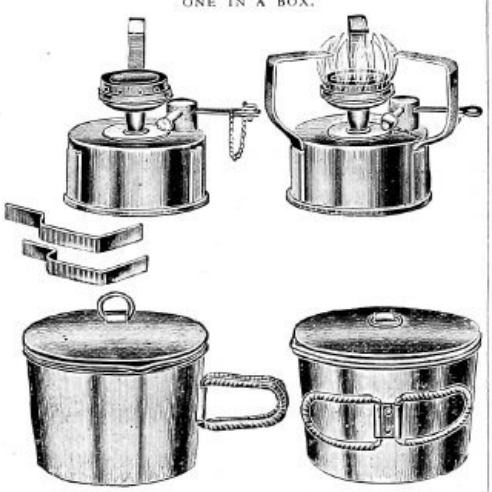
ALCOHOL AND GAS STOVES, TUBING AND HOSE COCKS.

GLOGAU'S ALCOHOL STOVES.

No. 75—Nickel plated brass body and bottom, nickel plated steel frame, w't per doz. 7 lbs.....per dozen $12.00

For travelers, sick room, camp, chafing dish; manufactures its own gas by first vaporizing the alcohol, produces more heat than any other style of alcohol stove, and consumes only one-eighth the usual amount of fuel; absolutely safe—explosions cannot occur; wick is invisible and never requires renewal. It is smokeless, odorless, and forms no soot; burns as steadily as a regular gas stove; can support a vessel weighing 100 lbs.; capacity of reservoir 7 oz., making it unnecessary to refill every time the stove is lighted; does not get out of order and is easily operated. Either wood or grain alcohol can be used, although to obtain the best results from any alcohol stove the best spirits procurable should be used.

ONE IN A BOX.

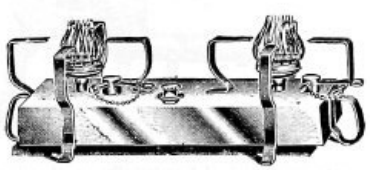


Showing handles open. Showing handles closed against the boiler.

No. 175—Knock down style, the legs being removable as shown in cut, so as to pack inside of a tin boiler, otherwise same as No. 75, w't complete with boiler 14 lbs. per doz.....per dozen $14.00

No. 175A—With aluminum boiler, otherwise same as No. 175.....per dozen 25.50

ONE IN A BOX.



No. 275—2 burner, length 14 in., width 7 in., capacity 1 qt., nickel plated brass body and bottom, nickel plated steel frame, w't per doz. 30 lbs., per dozen..... $36.00

This stove, with both burners in use, will burn about two to five hours. With one burner will boil a quart of water in nine minutes.

ONE IN A BOX.

GLOGAU'S ALCOHOL STOVES.

No. 375J—1 burner, japanned finish, 1 pint brass fount, brass burner and tubes, height 10½ in., diam. of top 7 in., w't 4½ lbs.....each $3.50

No. 375N—Nickel plated finish, otherwise same as No. 375J, w't 4½ lbs., each.....5.00

Burns about 1⅔ hours with one filling. Will boil a quart of water at 60° Fahrenheit in about six or seven minutes.

ONE IN A BOX.

No. 475J—2 burners, japanned finish, 2½ pint brass fount, brass burners and tubes, height 11½ in., width of top 14 in., w't 9 lbs.....each $6.50

No. 475N—Nickel plated finish, otherwise same as No. 475J, w't 9 lbs.....each 8.50

Burns about 1⅝ hours with one filling, with both burners open. Each burner has the same power as the single burner on No. 375J.

These alcohol-gas stoves are superior to other similar stoves in point of efficiency. They are easy to regulate, the flame is blue, and one of its features is that the entire stove can be quickly taken apart and cleaned.

Either wood or grain alcohol can be used.

ONE IN A BOX.

GAS STOVES.

No. 600—VESUVIUS, to attach to gas burner, w't per doz. 4 lbs., per dozen..... $2.50

ONE IN A BOX.

ALCOHOL STOVES.

No. 1020—MAYFLOWER, alcohol, brass, diameter 3 in., folding, w't per doz. 2 lbs., per dozen.....$3.50

This stove is brass and should not be confounded with the cheap lacquered tin imitations on the market.

ONE IN A BOX.

ALCOHOL STOVES.

No. 890—HOUCHIN'S, alcohol, tin cup or case, diameter 4 in., with frame and plate, folding, w't per doz. 10 lbs., per dozen..... $7.50

GAS STOVE TUBING.

No. 38—⅜ in., rubber, fancy braided cover, assorted colors, nickel plated ferrules, soft rubber ends, outside diameter ⅝ in., lengths 2, 3, 4, 5, 6, 7, 8, 10 and 12 ft.....per foot $0.06

No. 39—⅜ in., double dipped rubber, cotton web cover, mixed and assorted colors, red rubber tips, tin ferrules, outside diam. ½ in., lengths 3, 4, 5, 6, 7, 8, 9 ft.....per foot .10

APPROXIMATE WEIGHT 8 LBS. PER 100 FT.

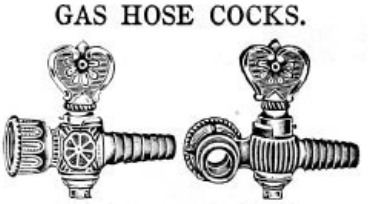
"O. V. B." RED C. I. GAS TUBING.

No. 40—⅜ in., 3 ply, red cloth insertion with black inner tube, w't per 100 ft. 16 lbs.....per foot $0.10

Manufactured of special material adapted for gas.

50 FT. IN A BOX.

GAS HOSE COCKS.



No. 1. No. 2.

No. 1—⅜ in., straight, cast brass, w't per doz. 3 lbs.....per dozen $4.90

No. 11—½ in., otherwise same as No. 1, per dozen..... 6.25

No. 21—¾ in., otherwise same as No. 1, per dozen..... 9.00

No. 2—⅜ in., independent, cast brass, w't per doz. 4 lbs.....per dozen 6.50

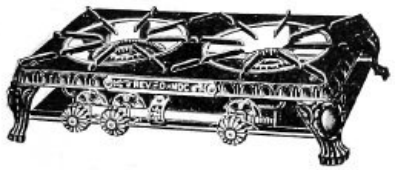
No. 12—½ in., otherwise same as No. 2, per dozen..... 7.75

The size given is the inside diameter of gas pipe for which these cocks are intended. The straight cock is for use where only a connection to the stove is desired. The independent cock permits the use of a gas lighting fixture to the same pipe. Ordinary gas hose will fasten securely.

GAS HOT PLATES.

FOR EITHER ARTIFICIAL OR NATURAL GAS.

"REV-O-NOC."



Description—Made of the best grey iron, free from flaws, and smoothly cast.

Burners are large machine sawed, and conceded to be the most economical burner made. Each plate has *one large burner* of double capacity, having an outside burner ring controlled by separate valve.

Valves—Has wheel valves, adjustable air mixer and needle points, giving perfect flow of gas and proper air mixture.

Tray—Has a full sized japanned, removable tray under burners, to catch greese and dirt.

Finish—Furnished either plain or nickel.

Plain Iron (Sawed Burners.)

WHEN SHIPPED IN SINGLE LOTS ADD 30 CENTS PER CRATE.

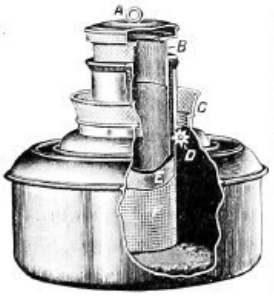
REV-O-NOC OIL HEATING STOVES.

Blue Steel Drums, Full Nickel Trimmed.

No. 37A —Height (floor top of bail) 31 in., size drum 8 in., main top, hinge ring, base and legs full nickel, shipping w't 18 lbs. ..... each $6.00

No. 37AB—Same as 37A, except has full brass fount.. ..... each 6.80

B.—Flame spreader.
C.—Burner ring.
D.—Wick raiser.
F.—Wick cylinder.



The Rev-o-noc oil heater has been built with an eye to quality, efficiency and durability.

Description—The two drums are made of a high grade of polished blue steel. The body of tank is drawn from sheet steel finished with a heavy coating of composition lead and tin, making a rust proof finish. The false bottom is fitted to allow free circulation of air between it and main bottom. The inner tube and all burner parts are of spun brass.

Flame Spreader—Is smokeless and automatically prevents turning wick too high.

Automatic Indicator—Shows amount of oil in tank at all times and cannot get out of order.

Tank—Is fitted with bail and holds sufficient oil for burning 10 hours.

Test—Every Rev-o-noc stove is carefully tested at the factory by an experienced specialist. The tank is filled with oil, the wick is lighted and stove burns for a considerable time. An examination of the burners will show that the stove has been tested. Other oil heaters are put out with bright flame spreaders, showing that stove has not been tested

Heat—Oil heaters give the heating capacity of a hot air register within a few minutes after lighting and can easily be moved.

Blue Steel Drums, Japanned Trimmed.

No. 37B—Height (floor top of bail) 31 in., size drum 8 in., shipping w't 18 lbs. each $5.20

ALUMINO OIL HEATING STOVES.

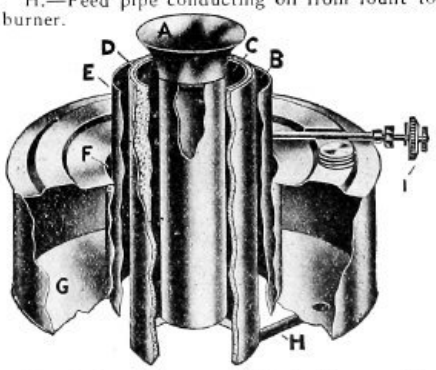
No. 1J and 2J.

With Safety Founts and Burner.

No. 1J—8 in. circular wick, height (bail down) 27 in., size of drum 7 in., capacity of fount 2 qt., shipping w't 17 lbs. . each $5.00

No. 2J—10 in. circular wick, height (bail down) 28 in., size of drum 8 in., capacity of fount 3 qts., shipping w't 20 lbs., each..... 7.00

A.—Flame spreader.
B.—Air space outside of wick—cool.
C.—Air space inside of wick—cool.
D—Wick, circulation of air on both sides, cannot become hot.
E.—Outside casing of burner.
F.—Air space between fount and outer casing.
H.—Feed pipe conducting oil from fount to burner.



Description—The material is the finest quality cold rolled polished steel plate, and sheet brass.

Safety in Operation—The wick does not turn down directly into the fount (like all others), but is retained in a separate receptacle, supplied with just enough oil through small tube in bottom, making explosions impossible.

Smokeless—See simple attachment at end of wick raiser. All burners are tested and smokeless device set at right height before leaving factory.

Re-wicking—Loosen the knob at end of wick raiser, turn wick up as far as it will go, pull out wick tube, take off old wick, slip on new one and replace in burner. Clean and convenient.

Indicator—Cork float, simplest.

Finish—Highly nickeled to a mirror finish.

Top—Removable.

With Safety Founts and Burners.

No. 3J—15 in. circular wick, height(bail down) 33 in., size of drum 10 in., capacity of fount 5 qts., shipping w't 30 lbs., each..... $10.00

OIL HEATING STOVES.

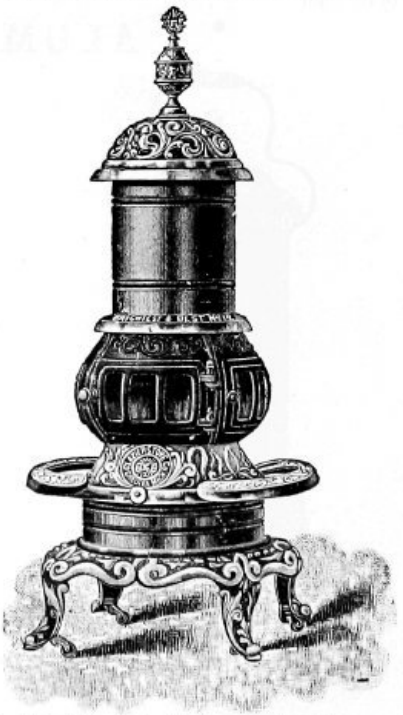
No. 24—Blue polished steel body, fount of heavy pressed steel coated with a composition to prevent rust, extremely simple smokeless device, japanned top, center, bottom ring and legs, with aluminum name plate, height with bail 28 in., w't crated 12½ lbs.....each $4.00

No. 60—Full aluminum trimmed, perforated planished iron hinged drum, polished brass oil fount with patent automatic indicator, 10 in. double thick circular wick, with bail and catch, height without bail 28 in., diameter of base 11 in., w't crated 18 lbs.....each $6.80

No. 10—Full nickel trimmed, removable patent spun brass oil tank with automatic indicator, 10 in. double thick circular wick, water reservoir in oil tank, height 32 in., diameter of base 15 in., w't crated 38½ lbs.....each $10.00

No. 40—Full aluminum trimmed, planished iron hinged drum, polished brass oil fount with patent automatic indicator, 10 in. double thick circular wick, with bail and catch, height without bail 28 in., diameter of base 11 in., w't crated 18 lbs.....each $6.20

No. 80—Full nickel trimmed, planished iron perforated hinged drum, polished brass oil fount, with patent automatic indicator, 10 in. double thick circular wick, outside filler, with bail and catch, height without bail 30 in., diameter of base 11 in., w't crated 20 lbs....each $7.40



No. 12—Nickel plated base and feet, mounted on rollers, nickel plated rails, main top and urn, removable spun brass oil tank with patent automatic indicator, 15 in. double thick circular wick, oil tank can easily be removed for filling or putting in new wick, patent water reservoir in center of burner, polished brass drum between base and rails, height 42 in., diameter of base 16 in., w't crated 65 lbs.....each $15.00

The body of "Rev-o-noc" Gas Heaters is made of blue steel, lacquered to prevent rust in handling.

All cast parts, except mica frame and grate frame, are handsomely nickeled, "White, Beautiful and Bright," and so arranged it will not tarnish.

All asbestos lined stoves on this page have a complete system of circulation of air, taking cold air from floor, passing it through flues, throwing it out hot. This adds very greatly to heating efficiency.

These stoves also have the Bunsen type burner which takes in as much air as the chemical quality of the gas will permit and burns a blue flame, which passes upward in front of the asbestos, creating a warm, cheerful glow.

The No. 100 has a pure copper surface, corrugated. The burner is a steel tube with brass tips screwed into it. This tip is easy to clean and will not break. Burns an illuminating flame, is smokeless and odorless, and produces a very pleasing effect.

"REV-O-NOC" WICK OIL STOVES.

Material.—Heavy steel body and legs, black japanned, hard baked, handsomely decorated.

Burner.—Different from any other and positively the simplest. Kerosene oil is automatically generated into gas by securing a proper mixture of air, taken from outside as well as inside of burner, securing the proper mixture with a low or high flame. Many hundred cubic feet of air are used to generate heat, causing a wonderful saving of fuel. The flame is blue, odorless, smokeless and of intense heat, burning right up to the grate and preventing any loss of heat.

Wick fits on a perforated cylinder making it very easy to put in. The spiral wick-raising device brings the wick up evenly and is fitted with a ratchet easily adjusted by the operator to prevent wick being turned too high. The wicks are burned smooth before shipping and all stoves carefully tested before leaving factory.

Cones are of steel, enameled blue, to prevent rust, and fitted with cold nickel plated handle.

Tank is of leaded plate and is removable. This allows it to be taken into another room for filling, at the same time tank being disconnected, the oil cannot become over-heated. The stove has a perfect oil level and all modern improvements.

Operation.—Fill tank with kerosene oil, turn up wick, raise drum a trifle and light the wick, dropping drum back into place.

Tests show the REVONOC Oil Cook will do 46% more cooking and use 50% less fuel than any other Kerosene Oil Wick Stove.

Utility.—Just as easy to operate as a common lamp. Perfectly safe, burns like gas, flame instantly controlled by operator. It does away with kindling fires, handling ashes, keeps the kitchen cool and clean and saves labor.

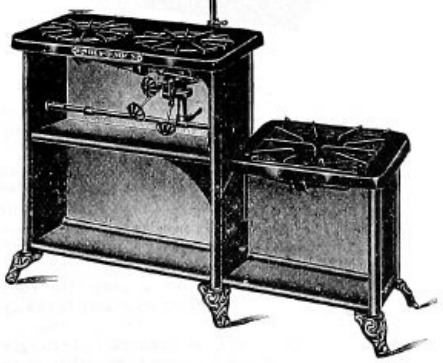
No. 402	2	24 in.	38 lbs.	9.60
No. 403	3	24 in.	47 lbs.	12.00

Description—Substantially made, in full cabinet style, baked with japan and handsomely decorated.

Single Generator Burner—Is so constructed that by generating gasoline at one burner, gas is formed and makes balance of burner self-generating. By means of the pilot-light all burners can be kept ready for immediate use. This is the most practical and convenient method and is becoming very popular.

Tank—Is of the lay down kind and cannot be filled until flames are extinguished. Safe and convenient.



Brass Burners.

No. 1	1	12×11×8 in.	25 lbs.	$2.00

Packages will not be broken.

H.S.B & CO. REV-O-NOC

STOVES AND RANGES.

INTRODUCTION.

In buying stoves, a merchant is governed by at least three prime factors:—Quality, Design, Price.

The quality of REV-O-NOC stoves is the very highest, the castings are continually made smoother, the nickel brighter, mounting and fitting better, crating first-class; at prices just as low as is consistent with such unquestioned quality.

All REV-O-NOC stoves are inspected by two competent men, and any failure to perform that duty we request be reported promptly to us by merchants and salesmen.

Changes in design will occur at repeated necessary intervals, always with the object of keeping the line in the lead.

WHY OUR PRICES ARE LOW.

Our prices are lower than those of the regular manufacturers on equal goods for the reason that our selling expenses, etc., are divided among so many different lines of goods. The expense of sending our salesman to your town is not charged to our stove department alone. The entire expense born by so many different departments makes the expense added to one line of goods very small, which benefit our customers share in.

SPECIALTIES.

We aim to give our trade specialties (money makers for the merchant), Stoves different from any one else, containing talking points and features placing them in a class by themselves. We refer to our REV-O-NOC Malleable Range, The "Mansion" plain cast range, The "Premier" Base-Burner, "Xmor" Oak, H.S.B. Hibbard" Hot Blast, REV-O-NOC Gasoline Oven, etc.

REV-O-NOC NUMBERING.

In ordering stoves, always use the full name and full number of the stove desired.

A letter before a number indicates the first letter of the name of the stove. The letter "C" after a number means High Closet. The letter "R" means reservoir. "C. R." means High Closet and Reservoir. "S" indicates High Shelf. Thus, A 18 CR Active is the Active range, with 8 inch lids, 18 inch oven, high closet and reservoir.

ABOUT SHIPPING.

Cooking stoves will always be shipped without reservoirs, unless otherwise specified.

Steel ranges will always be shipped with high closets unless ordered otherwise.

All stoves, unless otherwise specified, are carried in stock in our warehouse or in the warehouse of factory in Chicago, and prompt shipments can always be made.

REPAIRS.

In ordering repairs, always furnish the full name and number of stove. Do not use number on invoice. If not able to describe the repair, make a drawing of it. Give a full and detailed description, and delays and mistakes will be avoided.

We aim to furnish all repairs promptly and correctly. We are not mind readers and when "we take chances" and go wrong, we want the merchants to appreciate that in order to save delays occasioned by asking a number of questions, we "took the chance" and shipped the goods.

HANDLING CAR LOADS.

Combination or Pool cars are very successful as they enable merchants at distant points to order goods in less than carload quantity and still receive the carload rate of freight to a central distributing point in their near vicinity. These cars are loaded out very carefully by ourselves, and we have yet to receive any complaints thereon.

Salesmen and merchants will be greatly surprised at the ease with which a car can be made up, especially so when they take into consideration that stove pipe, stove furniture, etc., can usually be loaded in car with stoves. The advantage, therefore, of buying from a jobber is apparent. A merchant can purchase, for instance, half a car or more of stoves and make up the balance with stove furniture. It will save him a considerable amount of freight and his goods will usually arrive in much better shape than local. This applies not only to the merchant who buys in straight carload, but also to those who buy in combination or pool cars. We have stove cars for all central points west, northwest and southwest and south.

LOCAL ADVERTISING.

Good advertising is absolutely essential to business success nowadays, and those who are handling REV-O-NOC stoves can promote their business very greatly by the judicious use of the local newspapers, and we will assist customers in preparation of advertisements, that announcements may be as effective as possible. For that purpose we keep on hand electrotypes of our various stoves and ranges, and also of our trademark, suitable for use in newspaper ads and in circulars or price lists. These we shall be pleased to furnish without charge to those who will use them.

In addition to supplying these cuts, we are prepared to offer suggestions as to the text-matter to be employed and as to the methods of advertising which we would consider most desirable in each particular locality. In that way, we hope to save our customers a great deal of time and trouble, besides helping materially to increase their sales and their profits.

SETTING UP AND OPERATING REV-O-NOC STOVES.

First—See that the flue stopper leading into flues under oven of cooking stove, or under base of base-burner is tightly in place.

Second—That the chimney is clear and has a good draft at pipe hole. Many chimneys are made too low and draw better when a "smoke stack" is put on. Chimney must be higher than any point of house.

Third—That the pipe fits closely on the stove and in the chimney.

Fourth—That the pipe does not go too far into the chimney.

Fifth—That there are no pipe holes open on the opposite side of the chimney, either above or below, and that there is no unused stove with draft slide open, leading into the same chimney.

Sixth—Avoid having the pipe telescope at the elbows. If you have all these parts properly adjusted and well arranged, open the direct draft damper (see "Dampers") and see if you can get a good fire in the stove, together with a strong draft. If the stove will not burn well, then the trouble is not in the stove, but above it.

If the fire burns well on the above direct draft, close the oven damper, then if it will not heat the oven and bake well, please examine the flues and damper, and see:

First—That all the flues are open and clear, so that smoke can pass freely through them. (In cleaning out flues be sure to scrape all sides of flues, and especially scrape off all soot that hangs to oven-bottom. Pull all soot towards you, and be careful not to push any of it back into the back flues, but scrape from the extreme back forward. When using soft coal clean flue often.)

Second—Examine all the dampers in the flues and see that they open and close tightly, and do not get out of place.

Third—Be sure that you know how they operate, so they may not be open when you think they are closed.

If you have a stove with reservoir, be sure that the damper (if one is in stove) to force the heat under the reservoir is closed, so that all the heat must go around the oven. Lift out reservoir and ascertain by examination the operation of reservoir damper.

DAMPERS.

Almost all cook stoves or ranges having reservoirs have two dampers, the direct draft damper opening directly into the chimney and reservoir damper. The direct draft damper when open throws all heat directly up chimney and should be used only in starting fire to hurry it. When closed it forces heat around oven. The Reservoir damper must be closed when baking.

Hard coal base burners have the direct draft damper on the right or left side just below pipe collar. When open, it permits the heat to go straight up the chimney, and when closed, heat passes down to the base, around it and then up into the chimney. The check damper is just below the direct draft damper.

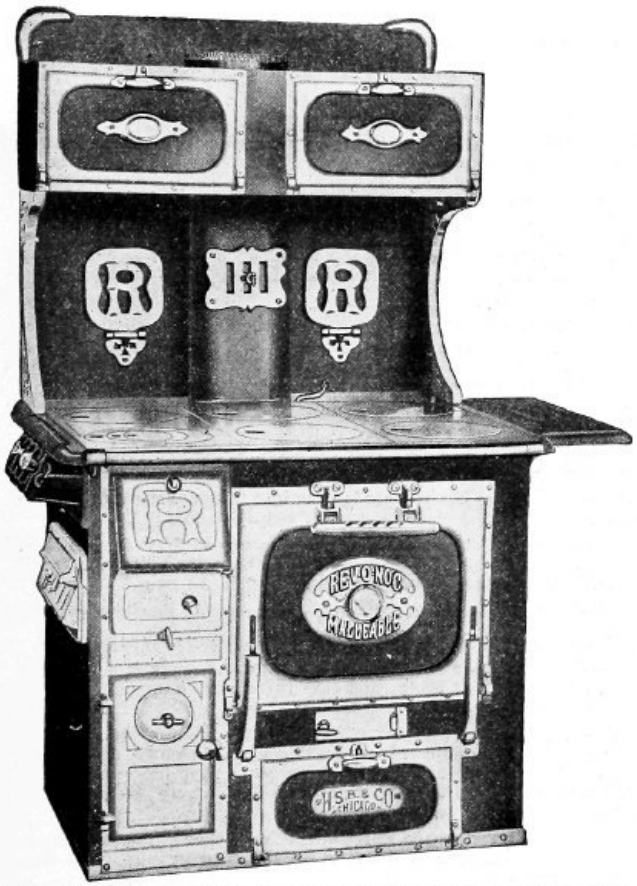
GUARANTY.

WE GUARANTEE ALL REV-O-NOC STOVES AND RANGES TO WORK PERFECTLY OUT OF DOORS—AWAY FROM ALL BUILDINGS—WITH FOUR JOINTS OF PIPE. ANY STOVE THAT WILL OPERATE UNDER SUCH CONDITIONS WILL WORK PERFECTLY WHEN PROPERLY CONNECTED TO A GOOD CHIMNEY.

If a stove is complained of, never take it back without trying to correct the difficulty. If you cannot do so, write us and we will be glad to offer suggestions.

REV-O-NOC MALLEABLE STEEL RANGES.

FOR ANY COAL OR WOOD.



Without Reservoir, with High and Low Closet, and Oven Thermometer.

With Copper Reservoir, High and Low Closet, and Oven Thermometer.

Description—The REV-O-NOC Malleable is in every way **The Best** in steel range construction possible for unlimited capital and skilled workmen and high grade material to produce.

Malleable Iron Features—All outside castings, liable to breakage, such as door frames, tops, etc., are malleable iron. This is not a "semi-malleable," but a FULL MALLEABLE range, strictly built on honor.

Walls—are made of 18 gauge genuine blue polished steel, thoroughly protected by heavy sheets of asbestos, and an inner wall of steel firmly riveted together, making it rigid.

Oven—is 16 gauge steel, rigidly braced, making it absolutely impossible to warp. The oven is riveted to a malleable iron (non-breakable) angle frame; this frame is riveted to the main body, making an absolutely perfect non-breakable joint. The oven is aluminized, making it clean, and sweet.

Top—is of a high grade malleable (non-breakable) iron, beautifully POLISHED, fitted with 3 interchangeable plates, into which lids and short centers fit, making practically an indestructible top.

Pouch Feed—Extra large, on left end of range, enables feeding fuel evenly entire length of box, without disturbing utensils on top, and will also take a large broiler.

End Draft—Entire length left end of range, gives equal distribution of draft entire length of fire box, making an even fire.

Grate—Duplex, reversible for wood or coal, extra heavy and durable.

Fire Box—is perfectly proportioned to give the greatest maximum heat with smallest minimum of fuel consumption.

Low Closet—of large capacity, fitted with perfectly tight door, hung on malleable iron frame.

Reservoir—is of pure copper, tinned inside, of 11 gallon capacity and heated by contact.

Ash Pit—is near floor, such a long distance from grate that ashes cannot possibly bank up under and burn it out.

Thermometer—In oven door, indicates degrees of heat in oven, saves opening door to ascertain by various ancient methods, "whether oven is hot enough to bake." Saves steps, time, and prevents "guess work."

Nickel—"White, beautiful and bright." Lasts a long time. Being free from superfluous carving, prevents accumulation of grease and dirt and makes an easy range to keep clean. Nickel is as follows: Reservoir cheek edge and panel, oven door frame, panel and handle, feed door, clean-out door, ash pit door, low closet door frame and panel, rails and full nickel high closet.

Without Reservoir, with High and Low Closet, and Thermometer.

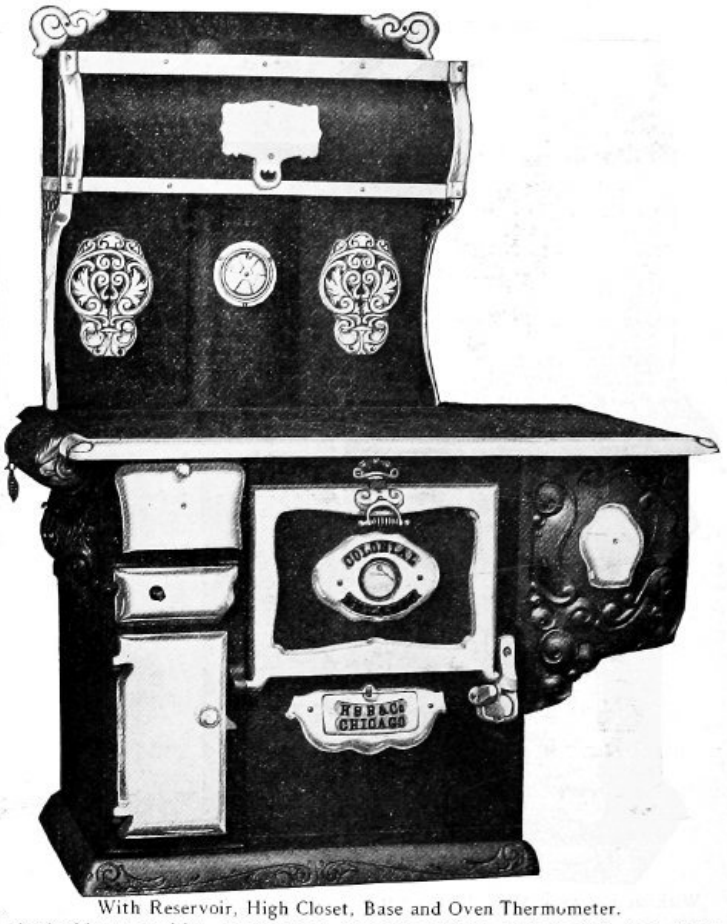
FURNISHED ONLY AS SHOWN—ORDER BY NAME AND NUMBER.

COLONIAL "REV-O-NOC" STEEL RANGE.

FOR ANY COAL OR WOOD.

Without Reservoir, with High Closet, Base and Oven Thermometer.



With Reservoir, High Closet, Base and Oven Thermometer.

Description—The Colonial Rev-o-noc embodies the best material obtainable, erected by expert stove workmen, whose pride is first class work, material and design. To any one desiring the highest perfection in steel range building we recommend the Colonial Rev-o-noc. Quality first and always.

Walls—are of genuine Wellsville Blue Polished Secret Process Steel of extra heavy gauge, lined throughout with asbestos, protected with an inner wall of cold rolled steel plate, all closely riveted together with heavy rivets driven cold. All plates are cut and formed by machinery insuring perfect fit and will not draw out of shape by contraction and expansion.

Oven—Is of 18 gauge steel, full size and 21½ inches deep. The top and bottom are protected, preventing warping. Oven has a steel oven rack (never break), and is all aluminized, making a pure, sweet, sanitary oven. The oven door is perfectly balanced with a fine tempered spring.

Top—Is made of three interchangeable panels (keyplates); by interchanging it will last Three Times as long as the ordinary top. Covers are Boston rim, centers heavy, and each range is fitted with a reducing cover.

Pouch Feed—Entire length of fire box, permitting feeding of fuel the entire length, making an even fire and prevents necessity of removing anything cooking over fire to feed through top lids, at same time makes a perfect broiling or toasting arrangement. It is also fitted with a check draft.

End Draft—The entire length of fire box giving as much draft in back of firebox as the front; making an even heat the entire length of box.

Grate—Is duplex pattern, turned down, makes perfect coal grate; turned up, wood grate, the change being instantly effected by reversing the grate.

Fire Box—Is so proportioned as to provide the required amount of heat without waste of fuel. It is free from awkward slides or frames, which frequently warp and crack. The fire back is hot blast, burning gases and smoke arising from soft coal.

Reservoir—Is enamel lined, unusually large. The casing is of cast iron, preventing rusting by condensations, and so arranged that drippings will pass into cups and be evaporated, instead of leaking onto floor.

Ash Pit—Placed at such a distance from grate that it is impossible for the ashes to bank up and burn it out.

Thermometer—Fitted in oven door indicating degrees of heat in oven, prevents necessity of opening oven to test heat by unsanitary methods. It can easily be seen from across the kitchen, saving time and labor.

Base—Of cast iron adds to finished appearance, free from carving, preventing accumulation of dust and dirt, and keeps body dry.

Nickel—"White, beautiful and bright"—Lasts a long time. Is entirely free from carving, preventing accumulation of dust, dirt and grease; easy to keep clean, always looks bright. Nickel ornamentation, is as follows: nickel reservoir and oven door panels, oven door frame, handle and hinge, ash pit door, main front feed door, clean out door, front band and full nickel high closet.

Without Reservoir, with High Closet, Base and Thermometer.

ACTIVE "REV-O-NOC" STEEL RANGES.

FOR ANY COAL OR WOOD.

Without Reservoir with High Closet, Base and Oven Thermometer.

With Encased Enameled Reservoir, High Closet, Base and Thermometer.

Description—THE ACTIVE REV-O-NOC is built of Wellsville Blue Polished Steel, all exposed points protected by pure asbestos, lined with cold rolled steel, making walls three thicknesses. Retaining heat inside of range, concentrating it around oven and under main top, using every unit of heat. Great economy.

Oven—Is made of heavy gauge cold rolled steel, amply protected top and bottom, to prevent warping or buckling. Is fitted with a never-break steel oven rack. Inside of oven aluminized, making clean appearance. Oven door perfectly balanced.

Top—Is extra heavy, short and long centers and lids of approved pattern. A reducing cover is also furnished.

Pouch Feed—Of ample capacity permitting easy feeding of fuel without disturbing any cooking over the fire.

Grate—Is of the approved duplex pattern, reversible, can be used for wood or coal, and can be easily removed.

Firebox—The fire back, front lining and grates are of one piece and is the same kind of back as we have used in over 10,000 Ranges of one style, sold during past 3 or 4 years, and has proven conclusively to be a back that will **"Stand up."** The extremely limited call for repairs prove this. This fire box is made with three prime objects—durability, economy in fuel, and quick heat.

Reservoir—Is enamel lined, with a cast casing, fitted with cups to catch all evaporations, preventing leaking onto floor.

Thermometer—Fitted in oven indicates temperature in oven, and can be seen and read across the room. Prevents oven being used when too hot or too cold.

Drafts—Left end draft extends across entire front, giving equal draft entire length of fire box. Screw draft in ash pit door enables perfect regulation of draft.

Ash Pit—Near floor, prevents ashes piling up under grates and burning out.

Base—Of cast iron prevents water being splashed up on steel body when cleaning floor and gives range an added finish.

Nickel—"White, beautiful and bright," lasts a long time, and is as follows: clean out door and frame, ash guard, ash pit door, oven door, panel, rail, corners, oven door handle, feed door and high closet.

Without Reservoir, with High Closet, Base and Thermometer.

CROWN STEEL RANGES.

FOR ANY COAL OR WOOD.

Without Reservoir, with High Closet.

With Encased Enameled Reservoir and High Closet.

Description—The New Crown has been greatly improved, not only in appearance, but workmanship, so that it easily classes with any other range on the market at even higher prices. It is built of **Blue Polished steel,** 24 gauge, protected with asbestos.

Oven—Is made of 18 and 20 gauge steel, properly protected with asbestos, producing even heat in the oven.

Pouch Feed—Extra large, extending length of fire box, permitting feeding of fuel in equal proportions in all parts of the fire box, making an even, steady heat at a lower expenditure of fuel.

Grate—Is duplex, reversible for coal or wood.

Fire Box—A test of over 4 years in thousands of our ranges has proven this fire box will stand the strain, and our experience with it has been so satisfactory that we are adopting it in our other ranges.

Reservoir—Enamel lined, cast outside casing, fitted to prevent leakage from sweat.

Drafts—Left end extends entire length of fire box, making an equal draft. Direct damper at side of pipe collar, and reservoir damper perfectly hung, and operate easily at all times.

Ash Pit—Fitted with large bailed ash pan.

Nickel—"White, beautiful and bright," and is as follows: nickel oven door frame, panel, handle; ash pit door; feed door; name plate, nickel band, and full nickel high closet.

Without Reservoir, with High Closet, Blue Steel.

NEW GEM STEEL RANGES.

FOR ANY COAL OR WOOD.

With Steel Encased Enameled Reservoir and High Closet.
Black Japanned or Blue Steel.

With Cast Encased Enameled Reservoir and High Closet.
Black Japanned or Blue Steel.

Description—The body is made of a 24 gauge steel, thoroughly lined with asbestos.

Oven—Of 18 and 20 gauge steel, amply protected to prevent warping. Has proven satisfactory in many thousands of ranges sold by us during the past four years.

Top—Extra heavy covers and centers.

Pouch Feed—Entire length of fire box.

Grate—Duplex, reversible for coal or wood.

Fire Box—Same as used in the "Active" and "Crown" Ranges. It has stood the test of years and proven conclusively it is one of the BEST fire boxes ever put in a range. Out of the thousands of these ranges sold over four years past, we rarely have a call for a lining. This record is really remarkable.

Draft—On left end extends entire length of fire box, making even draft and fire.

Ash Pit—Fitted with heavy bailed ash pan.

Nickel—"White, beautiful and bright" and as follows: nickel oven door frame, panel, and handle; ash pit door; feed door; flue stop; reservoir cheek and panel; nickel band, and full nickel high closet.

Without Reservoir, with High Closet, Japanned.

STEEL COOK STOVES.

HOME "REV-O-NOC."

For Coal or Wood

Material—is made of the best Wellsville polished steel, protected from fire by inside steel linings, between which is a thickness of pure asbestos, which also retains the heat around the oven, and under the lids, not allowing it to escape into the room as it does through the plain cast iron sides of the ordinary cook stove.

Oven—is square made of the best steel obtainable to withstand greatest amount of heat. This oven is protected by cast plates to prevent warping.

Fire Box—Of heavy cast linings, built along lines of durability and economy.

Grate—is of the celebrated Duplex pattern when reversed makes splendid wood grate, when down coal grate.

Pouch Feed—entire length of fire box, prevents removal of pots cooking when fuel is to be fed.

End Draft—entire length of fire box, giving equal draft in front and back of fire box.

Ash Pan—Extra large, well baled.

Nickel—"White, beautiful and bright," lasts a long time and is as follows: nickel oven frame, panel and handle, ash pit door, ash guard, feed door, rail, tea pot stand and towel rod.

RUSSELL

No. R27.

For Coal or Wood.

Material—is made of smooth steel plate, well riveted and protected at the weakest points by asbestos.

Oven—is made of extra heavy steel riveted firmly together and amply protected to prevent warping.

Flues—are of ample capacity and provided with clean-out in rear of ash pit, reached from front of stove.

Linings—are of cast iron, built on scientific principles, held firmly in place. The grate is shaking and dumping.

Reservoir—made of galvanized iron, can be used on end, top or back; heats by direct contact. (Not for No. R27.)

Steel Legs—No. R27 and R7 has steel legs turned so they may be bolted to the bottom of wagon.

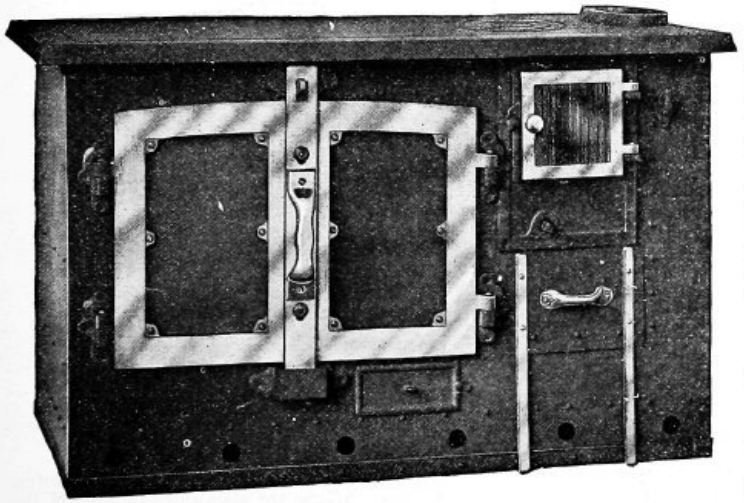
HOTEL COOKS AND RANGES.

RANCH HOTEL STEEL COOK.



For any Coal or Wood.

Steel Plate Cook—Illustrated is built of extra heavy steel, all exposed walls lined with asbestos and protected by inner steel walls, hand riveted together, all rivets driven cold, preventing unequal expansion and contraction.

Oven—Is made of heavy steel plates firmly braced, preventing warping.

Oven Doors—Swing open in the center with less exertion than if all in one door. Has a bar extending from top to bottom, when door is closed clasps doors tight in two places.

Flue—Of sheet flue construction, heat passing over entire oven top in a broad sheet, giving heat to all points, down left end, under oven and up into smoke pipe in right end of cook, making entire circuit of stove, distributing *every unit* of heat where it can be used to best advantage. This flue system is more economical in use of fuel than any other.

Fire Box—Extra heavy, fitted with duplex grate.

Top—Stove is shipped when not otherwise specified, with 6–8 inch holes, heavy short centers and key plates.

Ash Pan—Large and roomy.

Finish—Body of polished steel, all trimmings such as feed door, oven door frames and handles are polished.

Recommendation—Especially suitable for camps, boarding houses, small hotels, etc.

★*SHIPPED FROM FACTORY, QUINCY, ILL., ONLY.*

HOTEL RANGES.

For any Coal or Wood.

Hotel Range—Shown here is built of an extra heavy steel plate, hand riveted (all driven cold), double lined with heavy steel plates, between which is a layer of pure asbestos protecting the body wherever it comes in direct contact with the fire.

Ovens—Are made of a heavy gauge cold rolled steel, firmly braced to prevent warping. Top is protected by an air ventilated oven guard.

Oven Doors—Balanced by means of a heavy coil spring, located in bottom of ash pit, away from intense heat, makes doors easy to operate at all times.

Fire Box—Is very heavy, made to burn any kind of fuel, the grate is duplex and extra well made to stand intense heat and can be drawn out through door in front.

Flues—Are of ample capacity to give best results and of sheet flue construction.

Dampers—Has a direct draft damper on top allowing direct draft up smoke pipe if desired, when closed heat can be sent around one oven at a time or both ovens at once by means of dampers in right and left top corners.

Ash Pan—Is large and of ample capacity, near the floor at such a distance away from grate, ashes cannot bank up under it and burn it out.

Top—Has 6–8 inch covers, or can be fitted with solid key plate or "French Top" with one large hole.

Finish—Body of polished steel, with following nickel plated parts, oven doors, oven door panels, handles and hinges, feed door, name plates, front bar and high closet.

Recommendation—A range suitable for small hotels, boarding houses, camps and domestic use.

Y	3 solid plates.

UNLESS OTHERWISE SPECIFIED, RANGES WILL BE SHIPPED AS PER ILLUSTRATIONS.

ALWAYS SPECIFY NUMBER OF RANGE, KIND OF FIRE BOX, KIND OF TOP (BY LETTER), WITH WATER BACK AND IF HIGH CLOSET IS WANTED IN PLACE OF SHELF.

THE HOTEL RANGES shown on this page are built of an extra heavy enameled steel, with extra heavy base and corner strips. The entire range is bolted together instead of riveted, so that any part can be replaced without difficulty.

THE OVENS are constructed of heavy gauge steel with a heavy iron frame around the back and front edges to prevent warping. The top of the oven is protected by a heavy iron cement filled plate.

THE OVEN DOOR is counter-balanced by a weight instead of a spring and closes against an iron frame instead of the raw edges of the steel. It is impossible for this oven door, at any time, to get out of order. It is also fitted with a ventilator, so that the temperature of the oven can be regulated to a nicety.

THE END FLUES where the intense heat strikes first on its downward course, are lined with **brick tiling.** The back flues are of **iron.**

FIRE POT. Where coal is used for fuel, we furnish a round pot, or we can furnish a wood fire pot, built especially to burn wood, if so desired.

WEIGHTS. Carefully note the weights of all these ranges. Remember when buying a hotel range, it is not a question of how cheap a range can be bought, but it is a question of **how heavy** the range is made and its **lasting qualities.**

MAKERS. These ranges are made by one of the largest hotel range people in the United States, whose ranges are today used in many of our warships (also those of foreign countries), steamboats, lake steamers, large hotels, and public institutions all over the United States.

RECOMMENDATION. To those desiring **A FIRST CLASS HOTEL RANGE,** buy either of these ranges. They may cost a little more to buy, but your future expense is reduced to a minimum.

CAST IRON RANGES.

REGAL XMOR, FOR COAL.

Cast High Shelf for Regal Xmor.

No. CR772.

This brand new model represents the latest and best construction in a high grade cast range and is the best article that we know how to produce, regardless of expense. The public is going back to the use of the cast range, and particularly to the use of the high grade cast range. We have brought out this design in order to be able to supply the demand for such an article

The materials used are of the best, and especial care is taken in the mounting of every one of this model and the finish is unexcelled. The design speaks for itself; plain and massive.

We can furnish this range, either plain or with a low back guard and tea shelves, or with a cast high shelf, or with a steel high closet We recommend that it be taken with a steel high closet.

The large hearth draws to the front to allow the ash pan to be removed. The reservoir on the reservoir styles is extra large and is made of cast iron, enameled inside.

The oven sizes given are the actual measurements of the oven bottom and do not include the swell of the oven door.

One sectional cover is furnished with each range. These ranges are all fitted with duplex grate, and have an oven thermometer.

The nickel parts are the top ornaments on high closet, the high closet bands and corners, high closet door lift, high closet brackets, tea shelves, check draft front band and corners of the main top of the stove, name plate panel, hearth front, oven shelf, oven door panel and towel rod.

The high closet on those styles, where it is furnished, is made of polished steel, and the ornaments well nickeled and buffed.

No. CR353.

THE MATCHLESS XMOR, FOR COAL.

Another new model, somewhat cheaper than the Regal Xmor, but still a thoroughly good, large sized, well made range. The ornamentation is very plain, following the modern tendency, and this makes the range a very handsome one.

The materials and mounting are exactly the same as in the Regal Xmor. The range is well made in every particular. This range is made only in one size, that is with an 18 in. oven, either with 8 or 9 in. top.

We can furnish it either plain or with a low back guard, or with a cast high shelf, or with a steel high closet, as shown in cut, the latter is the popular seller.

The reservoir of this range is of cast iron, enameled inside. One sectional cover is furnished on each range. This range has a duplex grate.

The nickel parts are the high closet bands and corners, high closet door lift, high closet brackets, tea shelves, check draft, front band and corners of the main top of the stove, name plate panel, oven door panel, oven shelf and towel rod.

The high closet on those styles, where it is furnished, is made of polished steel, and the ornaments are well nickeled and buffed.

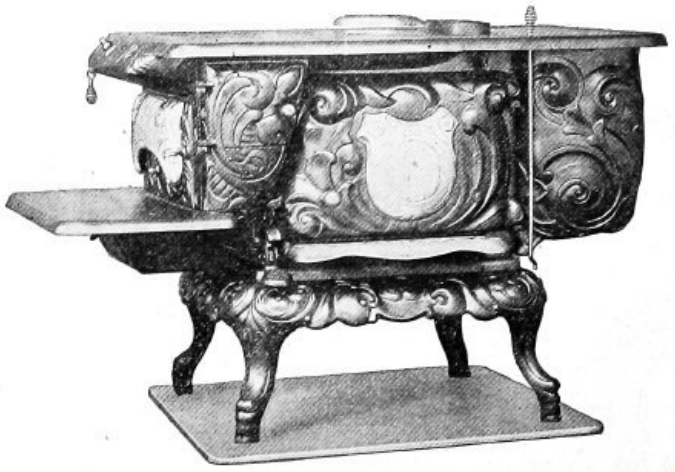
The Xmor Perfect and the Xmor Pride are constructed with a draw-out hearth slide. On the Xmor Perfect the only nickeled part is the name-plate. The Xmor Pride has nickel plated oven shelf, kicker, besides the oven shelf and name-plate, tea-pot stand and towel rod, and sets on a base. The sizes given on ovens are accurate and include the swell of the oven doors. Take notice that our ovens in the 18 in. size are 18×20 in. It is customary with many manufacturers to list their ovens according to the larger dimension instead of the smaller. The goods shown on this page are not carried in Chicago stock, but are shipped from foundry in southern Illinois, and freight will be equalized with either St. Louis or Chicago. We ship all cook stoves crated. USE BOTH NAME AND NUMBER IN ORDERING.

CAST IRON COOK STOVES.

SUPERIOR XMOR, FOR COAL.



These Stoves are Mounted on Base, with Nickeled Nameplate, Oven Door Panel, Oven Shelf, Tea Pot Shelf and Towel Rod.

The line of cast cook stoves for coal, shown on this page, both the Superior Xmor and Famous Xmor, are first class high grade stoves, heavier and larger than the Xmor Reliable and Xmor Model shown on page 1036M. The Superior Xmor is the same stove in every way as the Famous Xmor, but is a full nickeled stove on a base instead of legs, this being the only difference between the two stoves. The quality of the Famous Xmor and Superior Xmor is exactly the same, the same careful workmanship, and high grade material entering into both. We want to call attention particularly to the sizes. These are exact. In other words the stove is an honestly made one in every particular. The prices are especially favorable when quality is taken into consideration. These stoves have a full draw hearth and are so arranged that a reservoir can be mounted on by anyone. If you buy a square stove and afterward wish to change it into a reservoir stove, all that is necessary is to secure a reservoir and the reservoir castings, unbolt the back plate and bolt on the reservoir. This is a feature not possessed by any but high class goods. This is a great convenience for the dealer who does not wish to double up too much on his stock. Prices for extra reservoirs are shown above. On the reservoir styles, the reservoir is fully enclosed and is flush with the top. It is removable for cleaning. The tank is of cast iron, enameled inside. By taking out the end linings, this stove is a perfect wood burner and has a full length wood fire box. All these stoves are strictly F. O. B. Chicago. Use both name and number when ordering.

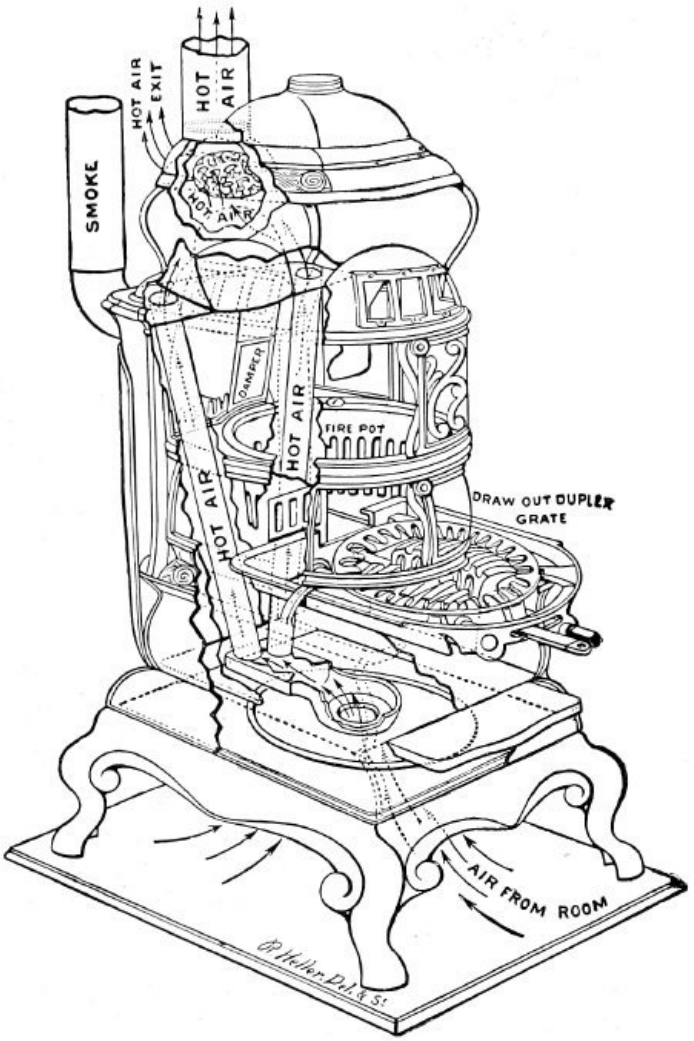
The tank is of cast iron, enameled inside. All these stoves are strictly F. O. B. Chicago. Use both name and number when ordering.

HARD COAL BASE BURNERS.

PREMIER "REV-O-NOC."



The Premier Base Burner—Is of massive proportions, beautifully nickeled, and has special talking points not found in any other base burner, placing it in a class by itself. A selling specialty is sought by every progressive merchant. It places him beyond competition.

Material—Is constructed of the finest grade of gray cast iron, moulded in a foundry where every workman is an artist. By a special process all blow holes and flaws are eliminated.

Fitting—Each piece is fitted with special care, all joints ground absolutely perfect preventing any escape of gases into the room.

Ventiduct System—The principle of creating additional radiating surface by means of hot air pipes inside of stove has been attempted but not successfully until in this stove, because in using hot air pipes, the outside radiating surface has always been reduced and all that was gained inside was lost on outside surface. Here we have added instead of taken from, by the introduction of hot air tubes *inside the flues,* increasing the outside radiating surface fully 1,000 square inches over the ordinary two flues with hot air pipe between. The cold air is taken from the floor of the room through a large opening at the center of the bottom plate, carried along the base to the perpendicular steel heating tubes at the back thence through these tubes to the top of the stove, becoming thoroughly heated, where it finds its exit into the room.

Circulation—By taking cold air from floor and passing through these hot tubes a constant, complete and vigorous circulation is established, equalizing the temperature in different parts of the room, making it comfortable in the remotest corners of the room.

Double Heater—The special ventiduct system above makes this the most powerful double heater. A hot air pipe attached will carry as much heat to room upstairs as from a hot air furnace.

Bottom Flues—Have no sharp corners, are of horse-shoe type, giving greater floor warming capacity than the ordinary kind.

Fire Pot—Is extremely heavy, full size with long teeth on bottom, admitting air under fuel, creating an absolute perfect combustion.

Bottom Grate—Is duplex, very heavy and durable, fitted with an annular shaking ring (anti-clinker), and is "removable." All ashes are easily and quickly removed without opening doors, preventing escape of ashes and gases into room.

Magazine—Of ample capacity, so fitted it is impossible for fuel to burn up into the magazine under proper conditions.

Magazine Cover—Carefully ground, fits perfectly tight and works automatically with swinging of top.

Mica Surface—Is very extensive, radiating a bright, cheerful glow into the room.

Nickel—"White, beautiful and bright," lasts a long time, of mirror finish and is as follows: Base and legs, foot rails, ash guard, ash door, name plate, wings, dome, swing top and a beautiful 4-wing urn.

Design—Of the Premier is pleasing in its plain, highly polished ornamentation, making a rich, handsome appearance, fit to grace any parlor. To those who desire the best we cheerfully recommend this elegant, high-class base burner.

HARD COAL BASE BURNERS.

STANDARD "REV-O-NOC."

Nos. 412S to 416S.

A High Grade, modern, hard coal base burner at a low price, making it an exceedingly popular seller.

Material—This base burner is made of the best iron obtainable, by expert workmen, insuring perfect mounting and fitting.

Doors and Joints—Are absolutely tight.

Bottom Flues—Are large, of the sheet flue construction, making a perfect floor warmer.

Ventiduct Flues—Extend up from the base on each back corner, being large and next to the hot air flues furnish an extreme amount of hot air.

Double Heater Attachment—A pipe can be connected to the top of the ventiduct flues and to a register in the floor of room above and a satisfactory heat can be secured in this room.

Circulation—The ventiduct takes up the pure air from the floor, heats it and discharges it above, giving a pure warm air at all times in all parts of the room.

Fire Pot—Extra heavy, of the removable pattern.

Grate—This stove is fitted with the popular duplex grate and annular shaking ring, by which the fire pot can be cleaned easily without poking through mica door, avoiding dust and gases in the room.

Mica—Surface is large, throwing a warm glow into the room, making a cheerful, homelike appearance.

Nickel—"White, beautiful and bright," lasts a long time and is as follows:—Dome top, swing top, side wings, name plate, foot rails, ash pit door, base and legs and a beautiful spun urn.

Design—Of this base burner is a unit from base to urn, no superficial ornamentation, every piece of nickel is a necessary part of a most pleasing pattern, showing excellent taste.

No. 416S	16 in.	53 in.	370 lbs	59.00

BRILLIANT "REV-O-NOC."

A Splendid low priced hard coal base burner embodying all essential features of higher priced base burners.

Material—Of the best cast iron, every stove mounted and fitted with special care.

Ventiduct Flues—Are of extra capacity, making a wonderful heat radiator, taking air from the floor and discharging it above perfectly hot.

Bottom Flues—Of the sheet flue construction insuring a large volume of heat at the base, result, warm floor.

Double Heater Arrangement—A pipe can be fitted to the double heater collar and connected to room above, giving as much heat as can be secured from an ordinary 7-in. warm air furnace pipe.

Fitting—Every stove is perfectly fitted, doors and dampers absolutely tight, making this stove an excellent fire keeper and fuel saver.

Fire Pot—Can be removed through lower mica door, without removing a single bolt.

Grate—Is the regular duplex pattern with annular shaking ring.

Magazine Cover—Works automatically and fits perfectly tight, preventing coal burning up into magazine.

Mica—Surface is large, throwing a warm glow into the room, making a cheerful, homelike appearance.

Nickel—Is "white, beautiful and bright," and is as follows:—Top dome, swing top, name plate, foot rails, base and legs, topped with a handsome urn.

Design—Very pleasing, carving being bold, nickel with much bright surface, making a base burner very pleasing to the eye, as well as being a big heater.

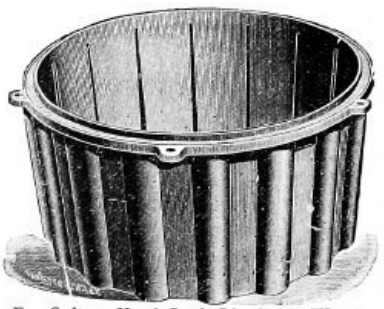
OAK STOVES.

PREMIER "REV-O-NOC."

Nos. P612 to P620.



For Soft or Hard Coal, Lignite or Wood.

Description—The PREMIER REV-O-NOC is made of the finest mixture of pig iron that can be had, and analysis has proven that the mixture used will stand use longer than the ordinary kind. The polished drum is made of Wood's double refined charcoal, sheet iron, cold rolled, will not flake off and will hold its color.

Fire Pot—In the walls are cast a number of self cleaning slots extending from top to bottom through which air is heated and thrown onto the fire forming a perfect combustion by consuming all gases. The air after entering in ash pit passes into these slots and not up under the grate. In this patented firepot the fire burns on outside edge not in the center. Practically indestructible on account of air circulating through walls. Cannot clog with ashes because slots are larger at bottom than at top, a very desirable feature.

Ash Pit—And bottom are cast in one piece without joints, making it always air tight. Enabling fire to be held indefinitely.

Doors—Are all tightly fitted, as are also the registers by ground joints, making it impossible for air to be drawn in. The locks are of malleable iron on a double iron incline. A great improvement on the screw registers.

Joints—The steel body is mounted in air tight pocket joints that cannot open. It is not bolted, so cannot buckle.

Finish—Castings are richly carved, the large square base and skirting, making stove large and massive. The elaborate nickel foot rail and brackets effectually conceal the fire pot. The urn base, name plate and registers are handsomely nickeled.

A Word—This stove has been before the American public many years and its greatly increasing popularity places it in a class by itself. It is a "Specialty." Dealers secure their own profits on it.

Nos. 618½ and 620½ have extra ½ section, otherwise same as Nos. 618 and 620.

SILVER "REV-O-NOC."

Nos. S151 to S191.

Description—Built of the best material, with extra heavy polished cold rolled steel drum, will retain color and not flake.

Fire Pot—Extra heavy fitted with cups, into which castings and drum fit, making a perfectly tight connection.

Ash Pit—Fitted with special care, grate shakes from rightside, ground door joints, with screw registers, making air tight base. Shaking grate, through small door on side overcomes necessity of opening entire ash pit door, preventing much dust and dirt escaping.

Grate—Extra heavy, of approved draw center style, shakes easily and cleanly.

Ornamentation—Nickel "White, bright and beautiful," and as follows: Nickel base and legs, screw registers, name plate wings, urn top and beautiful spun urn.

Style—The "snap and go" to this oak will please the progressive, modern merchant. At last he can buy a high grade, full nickel oak at a marvelously low price. Samples on the floor will prove its extraordinary salability. Universal use will prove its wonderful durability.

	SIZE FIRE POT.	HEIGHT TO BASE URN.	SHIPPING WEIGHT.	EACH.

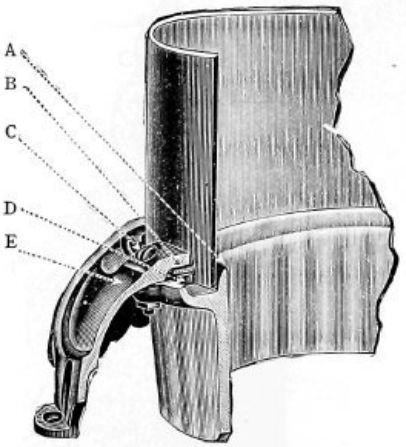
No. 191½ has extra ½ section, otherwise same as No. 191.

OAK STOVES.

GRAND.

Nos. 13 to 21.

For Hard Coal, Soft Coal or Wood.



Description—Made of the highest grade of pig iron. No. 18 cold rolled steel body, fitted and mounted with extra care.

Fire Pot—Corrugated, extra heavy, large and deep, built to stand enormous heat.

Air Tight Feature—No putty is necessary to make joint between body and fire bowl tight. We call your attention to sectional cut above; the inner lip of fire bowl "A" is beveled and the heavy body (18 gauge) is driven down on this bevel until absolutely tight. At several points the lower edge of body is cut and turned over, as shown at the point "B," on the lug "D" cast on the edge of the bowl. The cast rim "E" that holds the nickel rail is then bolted down on the edge of the body and held in place by bolt "C," both head and nut of which are entirely outside of stove, where they can never burn off, at same time easy to get at. The bevel on fire pot just inside of body will fill with fine ashes making in addition to perfect joining, an absolutely *air tight* stove. The doors are all ground perfectly, fitted with screw registers, and lever handle locks, all air tight features.

Grate—Of draw center pattern, extra heavy.

Finish—Nickel foot and top rail (steel never break), panels, registers, urn, etc.

G19½ and G21½ has extra ½ section, otherwise same as G19 and G21.

XMOR OAK.

Nos. 9 to 18.

Description—The pig iron used in the construction of this Oak is of the best grade, the steel drum of heavy gauge and will not peel off. The stove is mounted with great care and all fittings are perfect. Out of the thousands of this stove sold by us in past three years we have never had a complaint.

Fire Pot—Is extra heavy, corrugated, and the best fire pot ever put in a low priced oak.

The Grate—is draw center pattern, heavy and durable.

Air Tight Features—The steel drum is swedged into a cup in top of fire pot, the outer cast ring on which foot rail hangs is brought over this connection and drawn tight by bolts on the outside. A cast protection rim circles entire pot, protecting steel where it joins fire pot, a feature not found on similar low priced Oaks. All doors have lever locks, enabling doors to be brought perfectly tight, a decided improvement on ordinary latches. Ash pit is made in two pieces, the bottom being of cast iron not steel, as is so often used. Grate is shaken through small door on side of ash pit, doing away with opening large ash pit door allowing dust to escape.

Finish—Nickel foot and top rail (steel never break), panels, registers, urn, etc.

A Fact—We have never lost a customer on the Xmor Oak, it has given universal satisfaction and is positively THE BEST OAK at the price on the market. There may be cheaper Oaks, but price does not always indicate that it will give satisfaction.

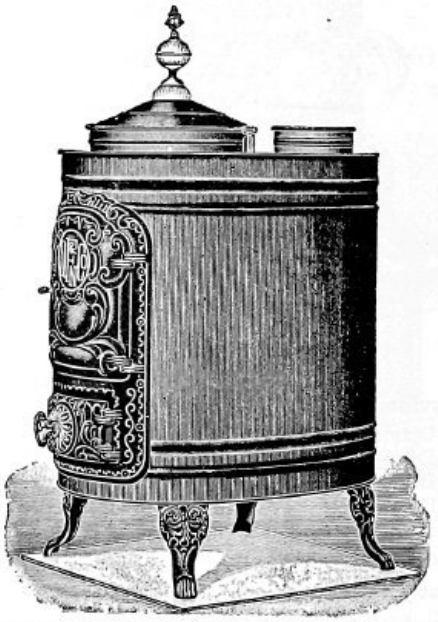
COMFORT AIR TIGHT.



This air tight is made to fill the popular demand for a medium price air-tight with a big front door and a clean-out door. The body is made of 27 gauge steel. The feet are bolted. The top is reinforced and the stove is a thoroughly satisfactory article. It is lined with 27 gauge steel about two-thirds of the way up.

Smooth Steel Body.

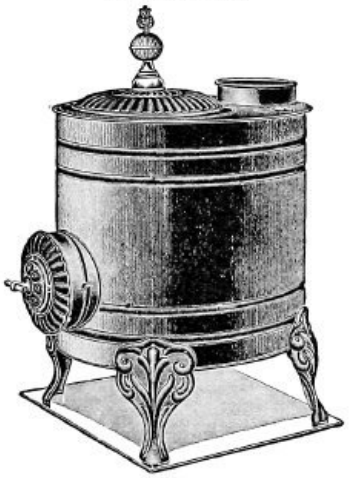
The body of this stove is made in one piece, double seamed; no rivets are used in its construction. The cast fire pot is very heavy and is considerably larger than in most other hot blast stoves of the same size body. A cone grate is used with a slanting surface clear to the edge. A cast lining 6½ in. high is set above the fire pot. From the top of this cast lining to the top of the stove, there is a 16-gauge sheet steel lining absolutely protecting the outside body against fire contact. The bottom is of heavy sheet steel, lined inside with a cast plate, making a combination of sheet bottom, with perfect air and gas tight features and a cast lined bottom, insuring durability and forming a perfect bearing for the lower legs supporting the fire pot. The grate can be removed through the feed door. A check draft is placed in the collar of the stove. The feet are bolted to cleats underneath the stove to prevent slipping. The down draft principle forces the heated air upon the surface of the fuel, consuming the gases and fully one-third of the smoke, utilizing the properties of combustion which have been allowed heretofore to escape through the chimney. The feed opening is very large, measuring 13 in. across in the 18 inch stove. This stove, properly regulated, will hold fire thirty hours with half a pail of soft coal.

A STOVE POKER AND SHAKER ARE FURNISHED WITH EACH STOVE.

ONE IN A CRATE.

WOOD AIR TIGHT HEATERS.

POPULAR.



Unlined, without Rails.

Shipping weight.	143	160 lbs.
Each.	$18.40	20.50

Top, bottom and front made of good cast iron, body of cold rolled steel, lined inside; body swedged onto castings, making air tight joints. Feed door fitted with smoke curtain. Fitted with beautifully nickeled foot rails, swing top and urn. A strictly first class wood heater.

Nickel Foot Rails, for Nos. 200, 2222, 201, 1201, 204, 1204, 240, 2224, 241, 1241, 244, 1244, 300, 2230, 301, 1301, 304 and 1304.....per set $1.50

ALL 18 IN. AIR TIGHTS TAKE 5 IN. PIPE, BALANCE 6 IN. PACKED ONE IN A STRONG CRATE.

LAUNDRY STOVES, OVENS, RADIATORS, ETC.

LAUNDRY STOVES.

For Coal or Wood.

No. 84—21×22 in. top, 23 in. high, four 8 in. lids, w't 95 lbs.....each $10.00

Made of good cast iron, free from flaws, swing ash pit door fitted with draft slide, flat dumping grate with rack for holding 8 flat irons around fire pot, giving use of top and sides at one time.

For Coal or Wood.

No. 89—18×23 in. top, 23 in. high, two 8 in. lids, w't 100 lbs.....each $10.00

Made of good grey iron, fitted with special care, made extra heavy and durable for extra hard use. Large top surface..

For Hard or Soft Coal.

No. 82—12×19½ in. top, 23 in. high, two 8 in. lids, w't 61 lbs.....each $6.50

Fitted with device to hold 8 irons so they will stand close to the fire pot, securing the largest amount of heat.

LAUNDRY STOVES

For Coal or Wood.

No. 81—12×19½ in. top, 21 in. high, two 8 in. lids, w't 55 lbs.....each $5.50

Well made, substantial fire pot, panel feet, heavy lids well fitted and low in price.

For Coal or Wood.

No. 2—11×20½ in. top, 21 in. high, two 8 in. lids, w't 48 lbs.....each $4.50

Oval top—drop pouch feed door, fitted with shaking and dumping grate. Popular low price laundry.

SALAMANDERS.

Nos	1	2	
Gauge steel	20	18	
Diam. body	15	15	in.
Hgt. body less handles	30	30	in.
Size legs	1⅛×⅛	1⅛×⅛	in.
Weight	26	30	lbs.
Each	$3.70	4.20	

Grates for same.....extra, each $0.90

STOVE PIPE RADIATORS.

Nos.	245	246	286	287	
Size over all	10×24	10×24	14×28	14×28	in.
Size pipe collar	5	6	6	7	in.
Weight	17	17	21	21	lbs.
Each	$3.20	3.20	4.00	4.00	

These radiators are made of finest grade polished steel, and contain six large tubes, which run from bottom to top. These tubes cross each other in the center, giving the smoke and heat a spiral motion, causing it to come in direct contact with the full length of the tubes and outer surface of radiator.

These radiators take the place of a joint of pipe, and can be used at any convenient place, either above the stove or on the floor above.

DRUM OVENS.

Cast Collars, Frame and Door.

No. 18—18×14 in., 6 in. pipe, w't 33 lbs., each.....$3.80

Cast ends, into which steel body is carefully fitted, the bottom of oven being protected by cast plates.

All Steel.

No. 17—17×18½ in., 6 in. pipe, w't 12 lbs.....each $2.60

Made of good sheet steel, double seamed joints, perfectly tight.

HIBBARD HOT BLAST STOVES.

Introduction—In offering the NEW HIBBARD HOT BLAST we have combined the study of many years in the Hot Blast business and an accurate knowledge of competition with economical manufacture. The HIBBARD is built along scientific lines, calculated to make it **throw out the greatest amount of heat with the least possible expenditure for fuel.**

Material—The body is of 20 gauge blue polished, cold rolled steel; the castings of the finest mixture of pig iron, each heat being chemically tested to insure perfect castings.

Hot Blast Features—Average soft coal contains about 40% gas and 40% fixed carbon (ask any gas engineer), and when the fire burns from underneath, as in ordinary stoves, the gases mix with the smoke and pass up the chimney WASTED.

Fig. 1
"The Hibbardway."

On the HIBBARD the air is taken in through the blast tube at top right hand side (Fig. 1). This tube passes through the HOTTEST part of the combustion dome, and the air is consequently superheated before it enters the down blast tube, from which it is thrown onto the fire. This thoroughly heated air furnishes oxygen which ignites the gases and creates an absolutely perfect combustion. Where the ordinary blast tube (Fig. 2) is used, the space the air travels is too short to heat it properly, consequently perfect combustion is not often obtained.

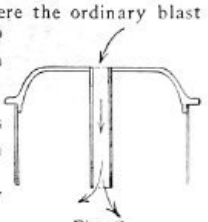

Fig. 2
"The Otherway"

On the HIBBARD the fire burns **from the top downward,** this forces the gases to pass through the hot bed of coals, when of course it is ignited, creating a saving of 25 to 50% in fuel.

Air Tight—A stove to hold fire must be air tight. We have built an ABSOLUTELY AIR TIGHT stove, without the aid of cement (which drops out after use). The BOTTOM is DOUBLE SEAMED to the sides like a wash boiler (Fig. 4), the steel body is double seamed, the ash pit door frame (Fig. 3), has an inner frame of cast iron, corresponding to outer one. The two cast frames, between which the steel walls rest, are BOLTED together and drawn tight, making an ABSOLUTELY AIR-TIGHT JOINT.

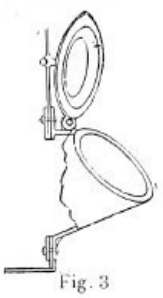

Fig. 3

Fig. 4

The ash-pit door is of the gravity style, acknowledged to be the simplest absolutely air tight door made (Fig. 3). Where the ordinary turn buckle or tightening latch is used, it pinches the door tight at closing point, but springs the door away from the frame at the hinges, allowing air to enter. The ash-pit door and frame on the HIBBARD has a large smooth ground glass-like surface, when door drops of its own weight, it makes an absolutely tight joint. The cast main top is fitted with a lip fitting over steel body, making air-tight connection (Fig. 3) **The HIBBARD will hold fire from 24 to 36 hours without attention.**

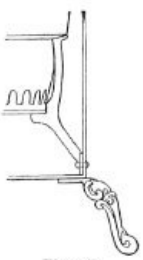

Fig. 5.

Durability—The upper bowl stands on legs (Fig. 5), which rest at the seam or joint, directly over the leg on which stove stands (Fig. 5), making a **continuous cast support** from the floor, relieving the steel body of any strains. The lower bowl fits into the upper one, and the cone grate hangs on the legs. We use no bolts between steel body and cast pots, the difference in contraction and expansion being unequal would cause steel body to pull. The lower pot has teeth at the bottom, that crush the clinkers when cone grate is shaken. The center of cone grate is heaviest and most durable, the weakest point on a draw center grate.

Circulation—The top of the upper bowl is perforated, which allows for free circulation of air around both bowls (Fig. 6), throwing hot air on top of fire, which together with hot air from blast tube consumes all gases, as dead air space is the cause of fire pots burning out.

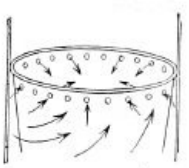

Fig. 6.

Finish.—All nickel "white, beautiful and bright," lasts a long time. The steel (neverbreak) foot and top rail, the ash pit door, screw registers and spun handles are all nickel-plated. Castings are free from excessive carving, which catch dust and dirt. The HIBBARD is "Colonial" in design, making a rich, effective appearance.

Fuel.—The HIBBARD HOT BLAST **will burn hard coal, soft coal, cobs, hay, lignite, wood,** and is **particularly successful with slack** (the cheapest of coals), making a ton give greater amount of heat and last longer than a larger amount of high grade coal in the ordinary stove.

Operation.—Put coal on top of grate, kindlings on top of that, and then some paper or combustible material, shut bottom drafts tight, **start combustibles from top door,** open top blast tube damper, close check damper in pipe collar. Remember fire in the HIBBARD burns from TOP DOWNWARD just like the wonderful smokeless automatic stokers under a moden steam boiler (smoke consumers).

	SIZE OF BODY.	HEIGHT TO BASE URN.	SHIPPING WEIGHT.	EACH.
No. 102	12 inch	38 inch	98 lbs.	$12.00
No. 105	15 inch	40 inch	129 lbs.	15.00
No. 108	18 inch	42 inch	154 lbs.	19.00

HIBBARD AIR TIGHT STOVES.

Material—The Body is made of a high grade of polished steel, protected by heavy steel linings, giving an immense radiating surface.

Air Tight Features—The Steel Body is double seamed to the sides "like a wash boiler," (Fig. 4), making an air tight joint without the aid of putty or cement, which falls out when hard and dry and leaves openings.

Fig. 3

The Ash Pit Door—Is of the gravity style, (Fig. 3), the surfaces being ground a glass-like finish, making air tight joint. No turn buckles are used, as when a turn buckle is tightened, it springs the door away from the door frame at the hinge, allowing air to enter, preventing regulating of fire properly.

Dome—Is of cast iron, of pleasing design and has a large lift feed door, which will take a large stick of wood.

Fig. 4

Finish—Nickel "White, Beautiful and Bright," and as follows—Rails, top ring (steel neverbreak), swing top, ash pit door, spun handle and urn.

Remarks—We suggest when there is wood in a locality and dealer is pushing our "Hibbard" hot blast, he handle this desirable wood air tight in connection therewith, the air tight features of both being identical. This is the **best** air tight on the market, and will be a trade winner.

ONE IN A CRATE.

Railroad.

No. 20—Height 75 in., fire pot diameter inside 19½ in., weight 350 lbs.,	each	$42.00
No. 22—Height 78 in., fire pot diameter inside 22 in., weight 450 lbs.,	"	55.00

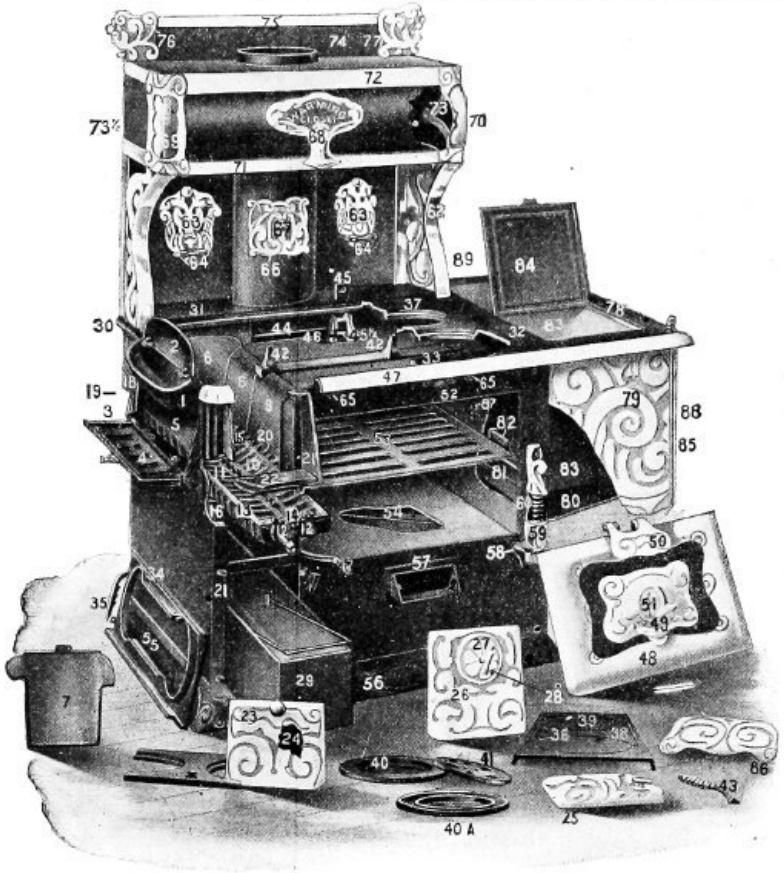
An extra heavy cannon stove, mounted with sheet iron drum, the heaviest and most powerful heater of its class. The fire pot is from 5/8 to 1 in thick. It is particularly adapted to halls, churches, stores, school houses, etc.

These railroad cannons are shipped in sections, not crated.

When ordering these goods use the name and number. For instance, No. 3 Echo. No. 12 Xmor Vulcan, or No. 20 Railroad Cannon.

SECTIONAL VIEWS OF STOVES.

In ordering stove repairs, always stand facing the pipe collar. Give number and name on stove. (Do not use invoice.) Do not give numbers on castings; they indicate only moulder's private numbers. Order repairs by numbers on this cut, and also full name of casting, as per this list. If casting wanted cannot be found on cut, give full description of it, and if necessary, a drawing. Liberal descriptions will avoid errors.

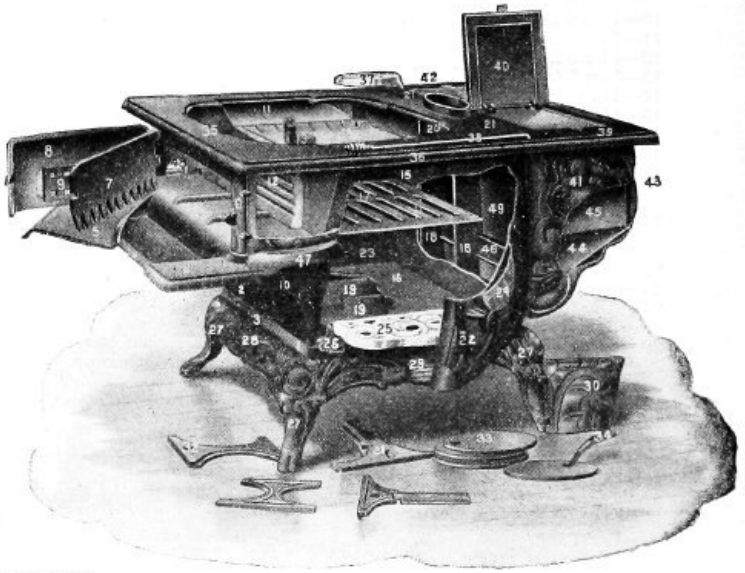


STEEL RANGE.

1 —Pouch or left cast end.
2 —Pouch feed door.
3 —Left end draft door.
4 —Left end draft door damper.
5 —Front grate or lining.
6 —Back end lining.
7 —Front end lining.
8 —Fire back, if in two or three
9 — pieces specify section wanted.
10 —Short half duplex grate.
11 —Long half of duplex grate. (If flat grate ,so specify.)
12 —Grate cogs (2).
13 —Grate frame.
14 —Grate cog covers.
15 —Grate rest. (Right side.)
16 —Grate rest. (Left side.)
17 —Grate shaker.
18 —Wood extension pocket.
19 — Cap for water front openings.*
20 —Fire back rest.
21 —Feed door and ash pit door frame. (Sometimes this frame is in 2 or 3 sections. Specify which one is desired.)
22 —Upper cog guard.
23 —Feed door nickel panel.
24 —Feed door. (If feed door swings, so specify.)
25 —Grate door.
26 —Ash pit door. (Ash pan often is attached to this door; door only will be sent unless otherwise specified.
27 —Ash pit door damper.
28 —Ash pit door damper handle.
29 —Ash pan. (On some ranges ash pit door is front of ash pan. Door will not be sent unless specified.)
30 —Left end or pouch top.
31 —Back or collar top.
32 —Right end top. (When range has key plate top.)
33 —Front top.
34 —Left end or broiler key plate.
35 —Broiler key plate lift.
36 —Center key plate.
36A—Right key plate.
37 —Right end (with regular stove top.)
38 —Short center.
39 —Cover.
40 —Large ring of reducing cover.
40A—Medium ring of reducing cover.
41 —Small ring or disc of reducing cover.
42 —Center rest.
43 —Cover lifter.
44 —Direct draft damper.
45 —Direct draft damper handle.
45½—Direct draft damper rod.
46 —Back flue. (When in 2 sections specify upper or lower.)
47 —Front nickel band.
48 —Oven door frame. (Unless specified "with steel lining" frame only sent.)
49 —Oven door panel.
50 —Oven door handle complete.
51 —Oven door thermometer.
52 —Oven door catch.
53 —Oven slide.
54 —Flue strip (under oven).
55 —Short base strip.
56 —Long base strip.
57 —Flue door frame.
58 —Under half spring box. (When spiral spring is used.)
59 —Spring cover. (Specify right or left, flat or spiral spring.)
60 —Oven door spring. (Either flat or spiral.)
61 —Left high closet bracket.
62 —Right high closet bracket.
63 —Teapot stand.
64 —Teapot stand hinge.
65 —Lugs connecting steel body to cast top. (Specify location.)
66 —Pipe damper frame.
67 —Pipe damper slide or round register.
68 —High closet panel. (If handle is separate, specify if handle only wanted.)
69 —Left closet corner.
70 —Right closet corner.
71 —Lower closet strip.
72 —Upper closet strip. (Specify front, right or left strip wanted on both above.
73 —Right closet door hinge.
73½—Left closet door hinge.
74 —Closet top guard, only.
75 —Closet top guard strip.
76 —Closet top guard, left corner.
77 —Closet top guard, right corner.
78 —Reservoir top.
79 —Front reservoir casing.
80 —Bottom reservoir casing.
81 —Reservoir damper.
82 —Oven brace. (Right end.)
83 —Reservoir tank.
84 —Reservoir cover. (Specify front, back, or both.
85 —Towel rod.
86 —Flue door.
88 —Right end reservoir casing.
89 —Back end reservoir casing. (If range has steel reservoir casing, order "Steel Reservoir Casing only.")

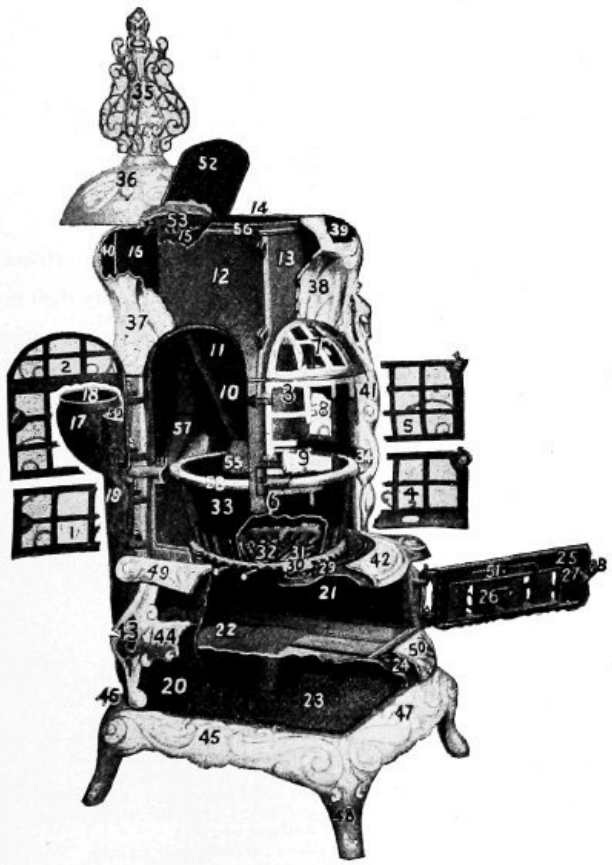
COOK STOVE.

1 —Main bottom.
2 —Lower front.
3 —Flue stop.
4 —Main hearth.
5 —Hearth slide.
6 —Upper main front.
7 —Front grate.
8 —Front door.
8½—Front door name plate.*
9 —Front door damper.
10 —Main right side.
11 —Main left side.
12 —Fire back.
13 —Center rest.
14 —Oven top.
15 —Oven back.
16 —Oven bottom.
17 —Oven rack.
18 —Back flue-strip.
19 —Bottom flue strip.
20 —Direct draft damper (complete).
21 —Flue cover (2).
22 —Right oven door.
23 —Left oven door.
24 —Oven door nickel panel. (Specify right or left.)
25 —Oven door shelf. (Specify right or left.)
26—Oven door kicker.
27—Leg.
28—Short base strip.
29—Long base strip.
30—End feed door. (Specify right or left.)
31—Cut long center. (Specify top or bottom.)
32—Short center.
33—Cover.
34—Cover lifter.
35—Front top.
36—Back or collar top.
37—Teapot stand.
38—Towel rod.
39—Reservoir top.
40—Reservoir cover. (Specify front or back.)
41—Right reservoir casing.
42—Left reservoir casing.
43—Back reservoir casing.*
44—Bottom reservoir casing.
45—Reservoir tank.
46—Reservoir damper.
47—Right ash guard.
48—Left ash guard.
49—Main back, reservoir stove.
50—Main back, square stove.*



*NOT SHOWN IN CUT.

SECTIONAL VIEWS OF STOVES.



1 —Left lower mica door.
2 —Left upper mica door.
3 —Left upper front mica door.
4 —Right lower front mica door.
5 —Right upper front mica door.
6 —Left lower front mica door.
7 —Upper front mica section.
8 —Right upper mica door.
9 —Right lower mica door. (Door with inner cast frame and turn-buckles sent, unless otherwise specified.)
10 —Lower section magazine.
11 —Upper section magazine.
12 —Left upper main side.
13 —Front upper main side.
14 —Right upper main side.
15 —Gas flue plates.
16 —Upper main back.
17 —Cast elbow left section.
18 —Cast elbow right section.
19 —Lower main back (if in 2 pieces, entire back will be sent.)
20 —Left lower main side.
21 —Right lower main side.
22 —Ash pit bottom.
23 —Main bottom.
24 —Lower main front.
25 —Ash pit door.
26 —Ash pit door slide.
27 —Ash pit door catch.
28 —Ash pit door handle.
29 —Top ring of ash pit.
30 —Annular shaking ring.
31 —½ of duplex grate.
32 —½ of duplex grate. (Specify if piece wanted has long shank.)
33 —Fire pot.
34 —Center front bar.
35 —Urn (complete).
36 —Swing top.
37 —Left side dome.
38 —Front side dome.
39 —Right side dome.
40 —Back side dome.
41 —Wings. (State right or left.)
42 —Front outer center ring.
43 —Rail bracket. (Specify front or back on left or right side.)
44 —Foot rail. (Sometimes rail bracket is part of this.)
45 —Left base strip.
46 —Back base strip.
47 —Front base strip.
47½—Right base strip. (Not shown.)
48 —Leg.
49 —Right or left outer center ring. (Specify which.)
50 —Ash pit door guard.
51 —Ash pit door slide.
52 —Magazine gas cover.
53 —Double heater damper.
54 —Shaker (not visible).
55 —Direct draft damper.
56 —Main swing top.
57 —Cold air flues (2).
58 —Fire pot bar. (Specify right or left.)
59 —Teakettle top. (Specify main top or lid only.)

In ordering stove repairs, always stand facing the pipe collar.

Give number and name on stove. (Do not use invoice.) Do not give numbers on castings; they indicate only moulder's private numbers.

Order repairs by numbers on this cut, and also full name of casting, as per this list.

If casting wanted cannot be found on cut, give full description of it, and if necessary a drawing. Liberal descriptions will avoid errors.

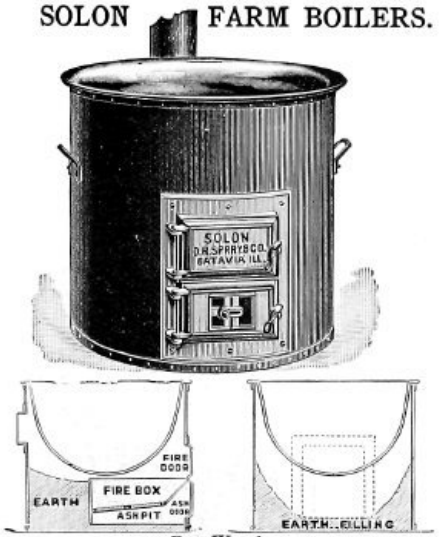
FARM BOILERS, SUGAR AND CALDRON KETTLES.

SOLON FARM BOILERS.



For Wood.

Nos.	1	2	3	4	5
Capacity	25	33	41	48	53 gal.
Weight	140	160	200	200	250 lbs.
Each	$12.00★	14.00★	15.00★	16.50★	18.00★

Nos.	6	7	8	9	10
Capacity	58	65	75	90	110 gal.
Weight	250	300	350	430	470 lbs.
Each	$19.50★	22.00★	26.00★	32.00★	36.00★

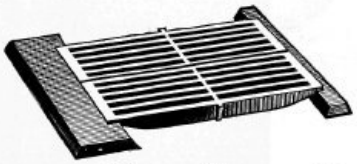
For Coal.

Nos.	11	12	13	14	15
Capacity	25	33	41	48	53 gal.
Weight	140	160	200	200	250 lbs.
Each	$15.50★	17.50★	18.50★	20.50★	22.00★

No.	16	17	18	19	20
Capacity	58	65	75	90	110 gal
Weight	250	300	350	430	470 lbs.
Each	$23.50★	26.00★	30.50★	36.50★	40.50★

The shell is made from heavy sheet steel, with edges banded, and no bottom. Provided with double doors so that it can be conveniently used as a coal burner when supplied with coal fixtures.

GRATES AND RESTS.



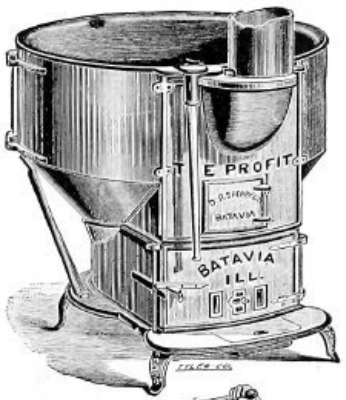
Nos.	1X	2X	3X
Size	14×24	14×30	18×36 in.
Weight	75	90	120 lbs.
Each	$5.00★	6.00★	6.50★

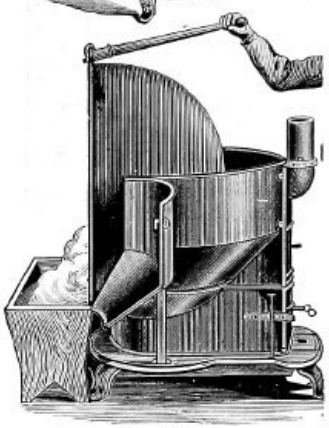
Made of best pig iron. Tested to stand hard work.

CISTERN COVERS.

No. 19—Diam. opening 19 in., diam. frame 27 in., depth flange 3 in., w't 90 lbs.★ each $5.00

PROFIT FARM BOILERS.





For Wood.

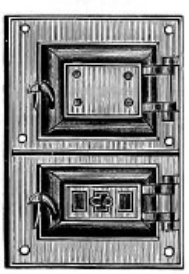
Nos.	250	480	530	750
Capacity	25	48	53	75 gals.
Weight	250	400	450	500 lbs.
Each	$23.00★	34.00★	38.00★	46.00★

For Coal.

Nos.	25	48	53	75
Capacity	25	48	53	75 gals.
Weight	250	400	450	500 lbs.
Each	$27.00★	38.00★	42.00★	50.00★

Frame is of good, smooth grey iron castings. Fitted with a tilting kettle arrangement. The kettle when dumped exposes all flues, making it easy to keep free from soot, a special feature on this boiler only.

DOUBLE DOORS AND FRAMES.



Designed especially for setting caldrons in brick. The fire door is double, with cold air space so that it will not warp or burn out.

No. 10—18½×28 in. frame, 11×13 in. fire door, 9×13 in. ash pit door, w't 65 lbs.★ ..... each $6.50

No. 11—21½×37 in. frame, 16×16 in. fire door, 12×16 in. ash pit door, w't 110 lbs.★ ..... each 9.50

No. 7.

No. 7—IRON KING, diameter 14 in., height 26 in., cast iron top, weight 140 lbs., each $12.00

No. 8—IRON KING, with weight casting which anchors the heater in the bottom of a galvanized or wood tank without the use of stay rods, otherwise similar to No. 7, weight 180 lbs., - - - each 14.00

The Iron King is the latest and best cast heater made. The body is in one piece, the draft chamber being separated from fire pot by a steel partition. The draft opens at the lower end into the drum-shaped portion of the body casting surrounding the basket grate, assuring an abundance of draft at all times. This heater has a cast iron ash pan and a grate shaker.

The above tanks are all too large to be shipped set up ready for use, except on flat car. Unless otherwise specified in order we ship knocked down, taking a very low rate of freight. We can furnish tanks of any gauge of galvanized steel from Nos. 20 to 16. All prices are based on No. 20, but for our larger sizes we recommend heavier metal. For No. 18 gauge, add 20 per cent. to list. For No. 16 gauge, add 40 per cent. to list.

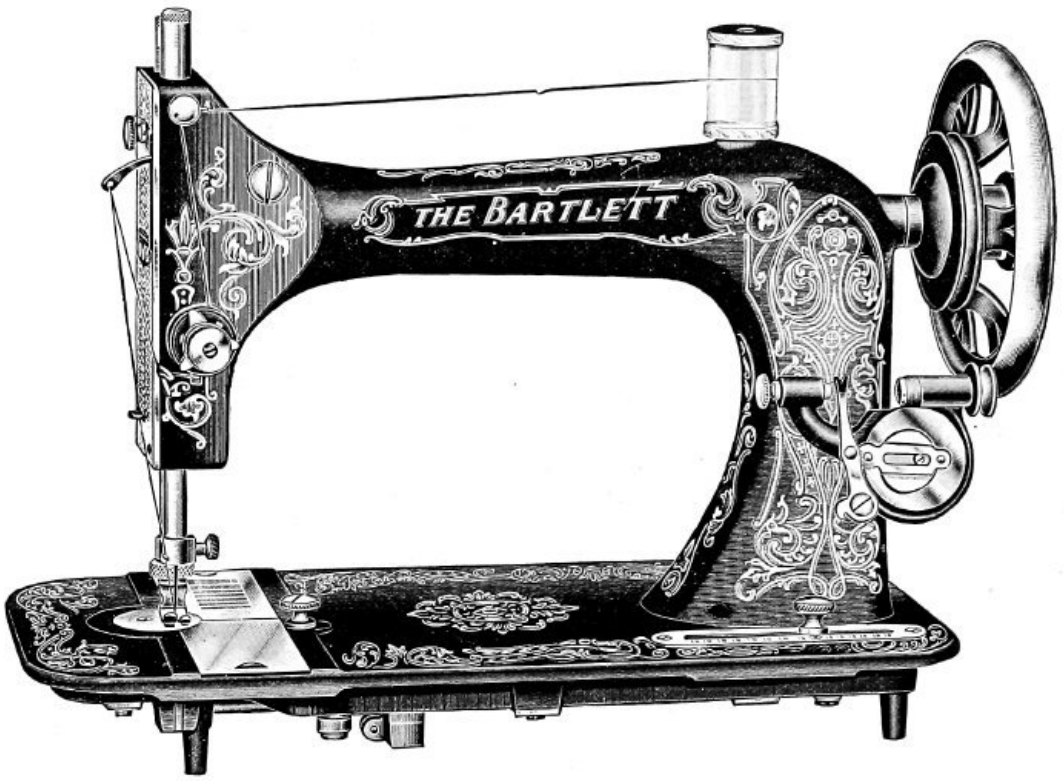
OUR VERY BEST BARTLETT SEWING MACHINES.

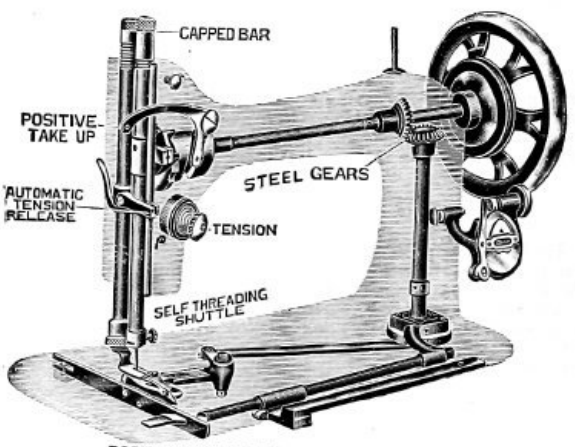
Fully Warranted for Ten Years.



Upper View OVB Bartlett Sewing Head.

The OVB Bartlett is a family sewing machine of the very highest grade embracing the most complete association modern time and labor saving improvements ever combined in one machine and is presented to the trade and the public as an ideal embodiment of the very best in modern sewing machine manufacture.

The basic construction, which is on the gear principle, is clearly defined in the accompanying X-Ray view. These gears are built of best quality hardened tool steel and they are so accurately fitted and adjusted that they operate most quietly and easily. The gears are riveted to the shafts by steel pins and cannot become loose. In this particular, alone, the OVB Bartlett has a great advantage over other sewing machines which make use of eccentric shafts with many screws and parts, any one of which, if loosened, will destroy the perfect action and cause a poor stitch to be made. In a large measure, the gears are responsible for the wonderfully easy running qualities and the almost entire absence of the objectionable noise (accompanying other machines) for which the Bartlett is noted. The clever adaptation of the gear principle gives the OVB Bartlett a simplicity of construction which makes it ideal for family use. Not only is the user assured that the OVB Bartlett will always operate correctly, but the necessity of constant payment of money to sewing machine repairmen is done away with. It is interesting to know that no other high grade up-to-date family sewing machine has this form of construction.



POSITIVE FEED LEVER

The Stitch formed is what is known as the double lock stitch, made by two threads, which are firmly locked in the center of the goods, presenting a smooth and finished appearance on either side. It is recognized to be the best all around, serviceable stitching for family sewing.

The Head is unusually handsome and well proportioned; it is elaborately finished in three durable coats of hand rubbed and polished baking black japan with handsome imported decalcomania decorations in gold and bright colors.

The Arm is of the largest size furnished with any family machine and it is very strong and perfectly proportioned. The clear space underneath is $5\frac{3}{4} \times 8$ inches, thus permitting the easy and convenient handling of the bulkiest material.

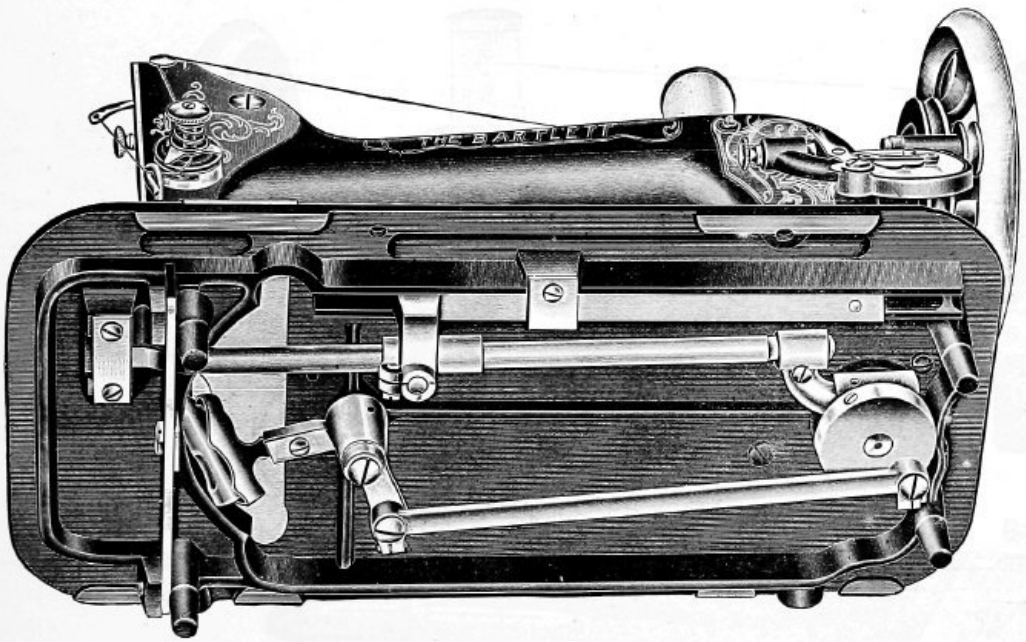
The Needle Bar is round, accurately finished and thoroughly hardened. It is equally rigid in every direction, has no lost motion and consequently operates freely, easily and without noise. The upper end of the Needle Bar is covered and protected by a handsome nickel plated steel cap which insures absolute cleanliness in the bearings, thereby preventing the accumulation of dust and grit and the ensuing hard and noisy running which is common to other machines less fortunately equipped.

The Needle is straight, short and strong and is flattened on one side which makes it impossible to place it in the machine wrong. It is held in place by a patented needle clamp which locks it securely and at the same time permits its ready removal. Genuine OVB Needles are the highest quality possible to manufacture and are made in the same factory as the OVB Bartlett head. They should be used to insure perfect sewing.

(Continued on page 1102)

OVB BARTLETT SEWING MACHINES.

Fully Warranted For Ten Years.



Under View OVB Bartlett Sewing Head

(Continued from page 1101.

The Tension is of the latest improved disc type and is located in a convenient position on the front of the face of the arm. While the action is extremely responsive and sensitive and covers a wide range of adjustment, it is so simple that there is no possibility of its getting out of order or causing trouble. Reference to the X-Ray view on preceding page will prove interesting.

The Automatic Tension Release is the latest and very best and important improvement applied to sewing machine production. It is operated automatically by the presser bar lifter which when raised, causes the removal of all tension on the upper thread so the work may be freely removed without injury to the needle or breaking of thread and without any attention from the operator, where on other machines it is necessary to remove the tension entirely by hand.

The Take-up is positive and automatic in its action. It is operated directly by a cam on the main shaft (see X-Ray illustration) and will control any size or kind of thread in a perfect manner in any class of sewing, thus producing an absolutely correct and perfect stitch.

(Continued from page 1101.)

The Shuttle is self-threading, of large size, and the accompanying bobbin holds a large quantity of thread so it is not necessary to be constantly and frequently changing the bobbin, thereby delaying the work. It is made of the finest tool steel and is glass hardened, so there is no sign of wear even after years of constant use.

The Shuttle Lever has a very short radius, as will be found upon referring to the accompanying cut. This does away with the vibration accompanying other machines, having the common lever with the long swing. It is a wonderfully good feature and is really worthy of more extended notice than space limitations will permit.

The Feed Point is double, extends on both sides of the needle and has four distinct motions, thereby guaranteeing an even movement of the goods being used at all times and under all conditions. This feed is absolutely positive, being free from springs and other uncertain devices which invariably wear and weaken after a machine has been in use for some time and cause serious trouble. It is one of the strongest features of this machine.

The Stitch Regulator controlling the length of the stitch is operated by a thumb screw sliding in the slot on the bed plate in a convenient position for the operator. Attached to the thumb screw is a pointer so that one may instantly set the machine by moving the screw and pointer to the proper place on the scale or index, thus making any size stitch (from six to thirty-two to the inch.)

The Automatic Bobbin Winder is a most important improvement, for with it the bobbins are wound in an accurate and uniform manner. This is done with absolutely no care or attention on the part of the operator further than to keep the treadle moving. This ingenious device is positive and operates without springs.

The Hand Wheel is strongly built and is finished with a beautifully nickel plated polished rim. It is equipped with a releasing device by means of which the mere movement of the milled edge disc at its outer edge releases the wheel so one can wind the bobbin without causing the machine to operate.

The Face Plate is held firmly in place by a single thumb screw so that it is very easily removed. It is beautifully etched showing our OVB trade mark in bold relief.

The Working Parts throughout are built of best quality steel, all those subjected to constant wear being thoroughly hardened in oil and will last for a lifetime. The exposed parts are beautifully and permanently nickel plated over copper and then finely polished.

With this Iron-clad Ten Year Warranty Backing Up Every OVB Bartlett Sewing Machine of Our Line You Incur no Risk, Loss of Money or Time.

CERTIFICATE OF WARRANTY.

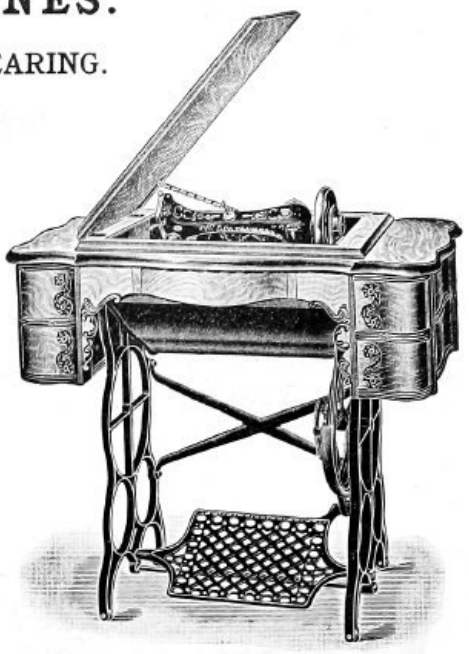
We hereby warrant this Family Sewing Machine number————to endure the wear and tear of family use for *Ten Years* from the date of purchase, and agree to replace *Free of Charge*, during that time, any defective parts, excepting only the wear and breakage of Needles and Shuttles.

HIBBARD, SPENCER, BARTLETT & CO.

SEWING MACHINES.

GOLD HIBBARD, BALL BEARING.

Nos. 56 or 95, Closed.



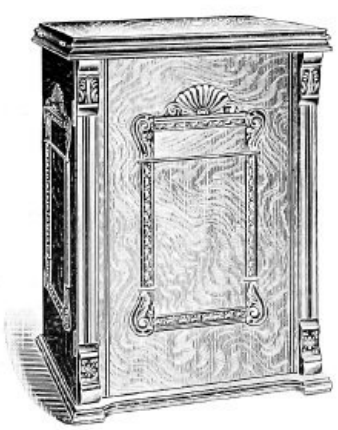
No. 95, Half Open.

No. 56—5 drawers, drop head, *without automatic lift*, golden oak case, swell front, weight 120 lbs., - - - - - each $65.00
No. 76—7 drawers, drop head, *without automatic lift*, golden oak case, swell front, weight 125 lbs., - - - - - " 70.00
No. 95—5 drawers, drop head, *with automatic lift*, golden oak case, swell front, weight 120 lbs., - - - - - " 70.00
No. 97—7 drawers, drop head, *with automatic lift*, golden oak case, swell front, weight 122 lbs., - - - - - " 75.00

Our Gold Hibbards are thoroughly high grade machines, made of good material and by workmen of long experience, and are up-to-date in all their features and fittings. They are as light running and silent shuttle sewing machines as is possible to make. The mechanical construction contains the best results of many years of experience, together with the most approved modern designs and every late improvement calculated to increase the value of a sewing machine for family use. They make what is known as the double lock stitch and use two threads, which are locked together in the center of the goods, forming a stitch which appears the same on both sides. The upper thread is drawn in position directly from the spool without passing through any holes until the eye of the needle is reached. Every bearing in the machine is made from the finest quality of tool steel, thoroughly tempered. They are all adjustable, and any lost motion can be easily taken up after years of hard wear.

We have no hesitation in saying that in all its features this is as fine as any vibrating shuttle machine ever produced. The lift is positive and easy, the head being firmly locked in place by it, and can only be released by turning the leaf back. It is the only dust proof automatic lift machine on the market, being entirely closed up when the head is lowered. The case, which is of quarter-sawed golden oak, has a swell front, as shown in the illustration.

All Gold Hibbard machines have a ½ yd. measure on the front part of the table.



No. 67.

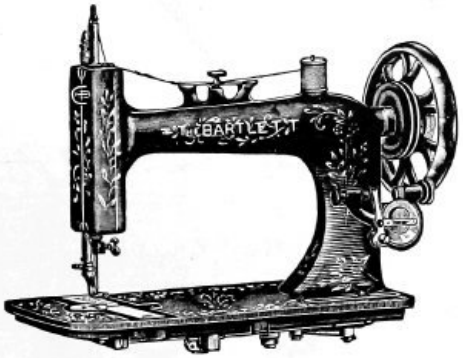
No. 77.

No. 67—Parlor Cabinet, golden oak case 17×22 in., weight 115 lbs., - - - - - - - - - - each $75.00
No. 77—Library Cabinet, golden oak case, 18×26 in., weight 140 lbs., - - - - - - - - - - - " 80.00

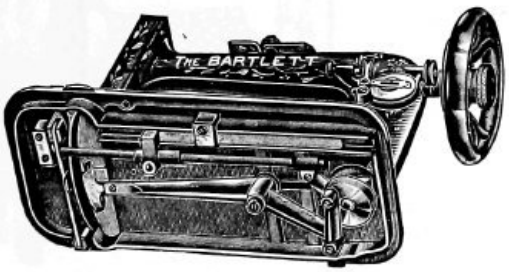
The cabinet work is unequaled for beauty of design, elegance and durability of finish. The illustrations of different kinds show the new and artistic designs and gracefully carved ornamentation. The hand rubbed piano finish produces the highest lustre and extreme durability. The tables are "built up" in transverse sections to prevent warping, and covered with handsome quarter-sawed veneer. The covers are of bent wood, light and strong. The drawer frames are made in skeleton form and the drawers are veneered and perfectly finished on every side. The long center drawer extends the full width of the stand and is divided into convenient compartments.

SEWING MACHINES.

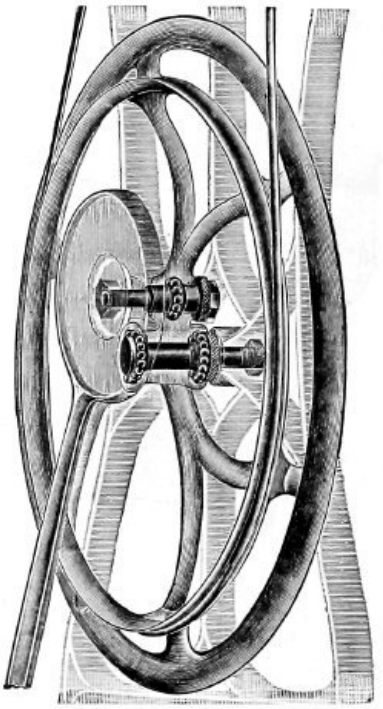
THE BARTLETT, BALL BEARING.



Showing Upper View of Head.



Showing Under View of Head.



Showing Ball Bearings.

The head is handsome and pleasing in appearance, being beautifully decorated. All of the working parts (screws, plates, etc.) are highly polished and nickel plated. The bed plate is let into the wooden table, so that the surfaces of both are flush. The arm is large, very strong and well proportioned, and the clear space underneath it is 5½×9 inches, thus allowing the bulkiest work to be stitched and handled with ease. The needle is straight, has a large shank, and is impossible to set improperly, or for it to become fast in the bar so that it cannot be readily removed, as it is held with the latest patent needle clamp. The needle bar is round, made of hardened steel and finely finished. It runs in hardened steel bushings, packed above and below with felt, which absorbs oil enough to lubricate the part without danger of its running down and soiling the work. The automatic bobbin winder attached to this machine is a great improvement, and with it the bobbin can be wound almost as evenly as a spool of thread, and with no care on the part of the operator except to keep the treadle moving. The feed is double, extending on both sides of the needle, and has four positive motions. It handles heavy and light work with equal facility and is perfect in each. The shuttle is positive, self threading, of large size, cylindrical in shape and made of the finest steel, hardened and polished. The shuttle carrier is of a new design and is fitted with a spring lining, which balances the shuttle and does away with the noisy clicking so noticeable in other machines.

The cabinet work is the finest that has ever been shown on a sewing machine. It is all of oak, quarter-sawed, piano finish, and is beautiful and tasty in design. Following the style of modern furniture, we are making it very dark.

Ball bearings have been successfully applied to all Bartlett machines. There is no lost motion, no noise, but there is ease and pleasure, and provision for wear should there be any.

Attachments.

The attachments supplied without extra charge are of the latest design, interchangeable, and constructed to slip on the presser bar. They are made throughout of the best steel, polished and nickel plated, and there is not a particle of brass or other soft metal, or a single soldered joint about them. They consist of ruffler, tucker, binder, braider foot, shirring slide plate, four hemmers of assorted widths, quilter, thread cutter, hemmer and feller. The accessories include twelve needles, six bobbins, oil can filled with oil, large and small screw driver, sewing guide, certificate of warranty good for five years, and an elaborately illustrated instruction book.

OVB BARTLETT SEWING MACHINES.

Fully Guaranteed for Ten Years.

NUMBERS 90 AND 85.

We believe that this handsome model contains more actual selling value and talking points than any other offered at the same or a similar price by either factory or jobber. It is running over with points of superiority and contains features some of which, singly, are the basis of the vaunted claims of competition machines. It outclasses the better known "Agency" machines sold at exorbitant prices through expensive selling forces, not only in price but, as well, in actual possibilities of time and labor saving.

Every detail of its manufacture has been carefully scrutinized to the end that it may be entirely satisfactory.

THE NO. 90 CASE.

This is a six drawer model with a beautiful, curved drop front piece or apron which conceals the rear ironwork and helps make the machine a real piece of furniture. It has solid paneled sides and full finished panels at the rear of the drawer cases. The lower edges of both the drop front piece and the paneled sides are artistically finished and decorated with delicate carved relief work. The illustration does not do justice to the fine grained quartered oak used nor to the hand rubbed mirror finish. The drawers have the new artistic flush drawer pulls and are as long as the width of the table, being fully enclosed on both sides and at the back. Each is fitted with a secure lock. The drawer space of the six drawers of the No. 90 is extra large amounting to 973 cubic inches.

When the cover is raised, a tested steel cable automatic lifting device brings the head into place for sewing and at the same time, the drop front piece is lifted up affording plenty of room for working the treadle.

This machine has a wholesome, solid, massive appearance which is at once pleasing and satisfying. It is perfect in every detail and, artistically, is beyond criticism.

THE NO. 85 CASE.

This is exactly the same as the No. 90 except that it has two drawers on a side instead of three and the drop front piece is not as deep.

THE OVB BARTLETT HEAD.

The OVB Bartlett is the simplest, high grade, vibrating shuttle sewing machine ever made and less liable to get out of order than any other. Having no complicated devices or "frills" in its make-up, but being a simple, complete, up-to-date sewing machine, it is certain to sew in a satisfactory manner with a minimum of attention from the user.

It has more modern, time and labor saving improvements which have proved good, than any other machine sold to the trade, and is, in fact, the ideal sewing machine for the sewing necessities of the American family.

For a detailed description of the OVB Bartlett Head, we refer you to earlier pages in this catalogue which are illustrated with large upper and under views, as well as an X-Ray view showing all of the working parts.

THE OVB BARTLETT STAND.

The Ball Bearing Stand, which runs easily and quietly, has two sets of accurately ground steel balls encased in ball retainers and operating in micrometer ground steel cones. The nickeled steel pitman has an adjustable head and a non-binding bottom connection.

The Treadle is a perfect casting of the "Our Very Best" trade mark adding a very artistic touch to the stand. Under it is a strong connecting rod fitted with oil cups to prevent soiling of floor or carpet with oil.

The Automatic Belt Replacer rebelts the machine when the head is raised without attention from the operator.

The entire Stand is made of special mixture iron and is finished with three coats of fine black enamel baked on at a high temperature.

THD OVB BARTLETT ATTACHMENTS.

With each Machine there is supplied free of charge a full and complete set of nickeled steel foot attachments packed in substantial individual boxes, which are contained in a neat cloth covered case. The following pieces are included in the set:

Ruffler, Tucker, Binder, Braider, Four Hemmers of different widths, Feller, Shirring Slide, Cloth Guide, Six Bobbins, Twelve Needles, Two Screw Drivers, Filled Oil Can and well illustrated Book of Directions, easily understood.

THE SEWING TEST.

Every OVB Bartlett Sewing Machine is doubly inspected and tested. Once when the head is received by the testing room, complete, ready for mounting on the woodwork and again when it has been mounted on the woodwork and is ready for crating.

A sample of the perfect sewing done on each machine is placed under the presser foot.

This double test guarantees that all OVB Bartlets when uncrated are in perfect condition and ready for immediate use.

No. 90—OVB Bartlett, 6 drawers, drophead, automatic lift, with apron front, quartered oak, crated weight 133 lbs. ..... each $70.00

No. 85—OVB Bartlett, same as No. 90 but with four drawers only, crated weight 125 lbs. ..... " 65.00

FREIGHT CHARGES, BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

OVB BARTLETT SEWING MACHINES.

Fully Guaranteed for Ten Years.

NUMBER 49.

We have sold this style of woodwork for many years and it is still very popular with our trade. Thousands of them are scattered all over the United States.

The No. 49 woodwork harmonizes as a piece of furniture with the fittings of any room, lending an artistic touch to the surroundings as well as fulfilling its duties as a labor saving device for the housewife. It is just as good as many of the so-called "Agency" machines sold at higher prices with expensive selling organizations.

THE NO. 49 CASE.

The artistic design of the No. 49 case, embodying long, graceful curves in the tables and drawers, at once attracts attention. The table and cover lid are of the five-ply built-up construction so that there can be no possibility of warping or cracking if the machine should be exposed to severe weather conditions. The most carefully selected cuts of quarter-sawed oak showing the beautiful grain are used, and closely matched for artistic effect.

The finish is rich and velvety, exactly like that found on the best pianos. In fact, the No. 49 woodwork is perfect in every detail of manufacture and finish.

There are two of the deep, long, rounded drawers on either end of the machine and a swell-front center drawer for bobbins, etc.

The end drawers are fitted with artistic embossed drawer pulls. Upon the table is an eighteen inch tape measure.

THE OVB BARTLETT HEAD.

The OVB Bartlett is the simplest, high grade, vibrating shuttle sewing machine ever made and less liable to get out of order than any other. Having no complicated devices or "frills" in its make-up, but being a simple, complete, up-to-date sewing machine, it is certain to sew in a satisfactory manner with a minimum of attention from the user.

It has more modern, time and labor saving improvements which have proven good, than any other machine sold to the trade, and is, in fact, the ideal sewing machine for the sewing necessities of the American family.

For a detailed description of the OVB Bartlett Head, we refer you to earlier pages in this catalogue which are illustrated with large upper and under views, as well as an X-Ray view showing all of the working parts.

THE OVB BARTLETT STAND.

The Ball-Bearing Stand, which runs easily and quietly, has two sets of accurately ground steel balls encased in ball retainers and operating in micrometer ground steel cones. The nickeled steel pitman has an adjustable head and a non-binding bottom connection.

The Treadle is a perfect casting of the "Our Very Best" trade mark adding a very artistic touch to the stand. Under it is a strong connecting rod fitted with oil cups to prevent soiling of floor or carpet with oil.

The Automatic Belt Replacer rebelts the machine when the head is raised without attention from the operator.

This double test guarantees that all OVB Bartletts when uncrated are in perfect condition and ready for immediate use.

No. 49—OVB Bartlett, 5 drawers, drophead, quarter-sawed oak, automatic lift, weight 128 lbs..... .....each $60.00

FREIGHT CHARGES, BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

LAKE SHORE SEWING MACHINES.

Fully Guaranteed for Ten Years.

This machine is a radical and sharp departure from the usual medium priced sewing machine and is winning the approbation of every dealer who sees it. Medium priced machines have usually been mounted on rather cheap appearing woodwork not much different from that of the lowest priced machines.

The LAKE SHORE was made up especially for us, and combines a good, serviceable sewing machine with woodwork equal in appearance to that which some manufacturers use for their best machines.

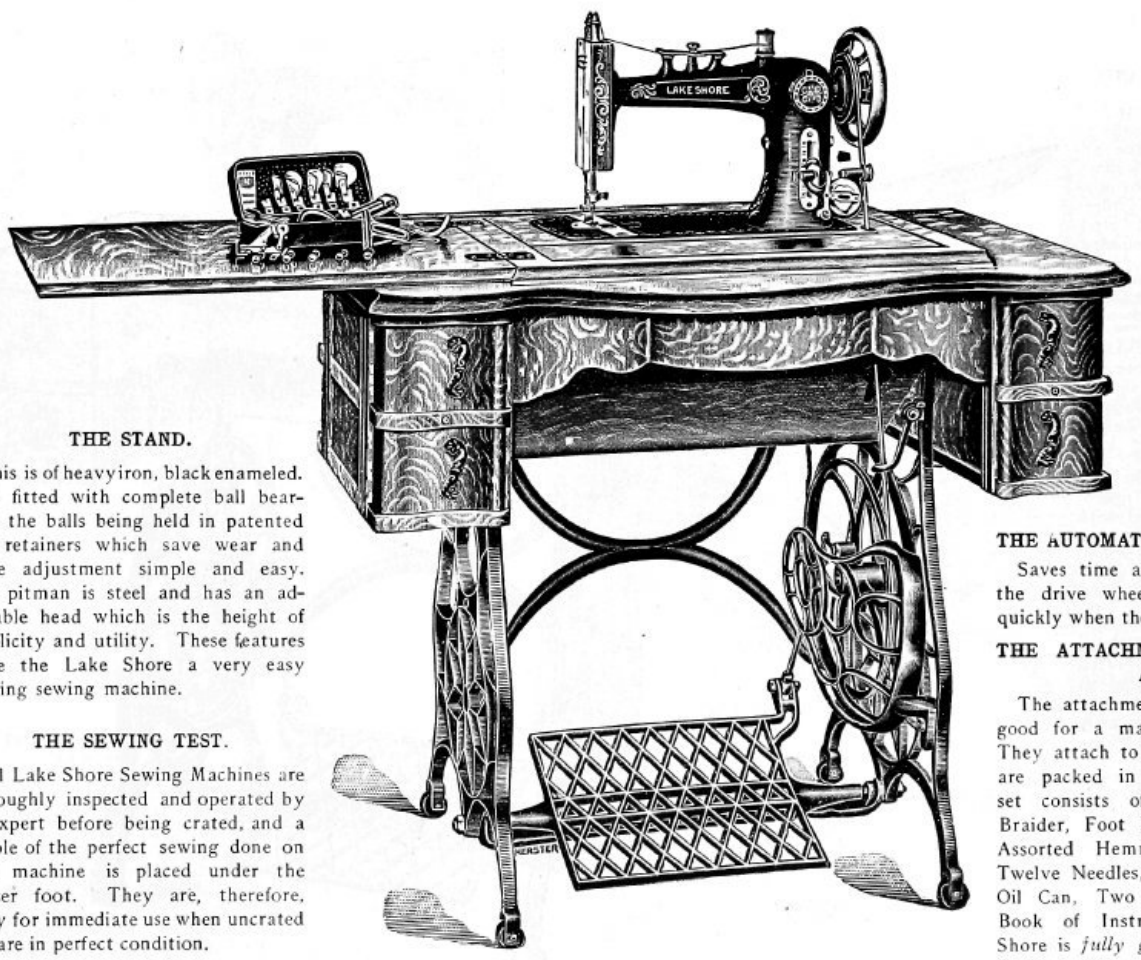
THE LAKE SHORE HEAD.

This has a full size high arm measuring $8\frac{3}{4} \times 5\frac{1}{2}$ inches underneath and makes the double lock-stitch which always holds. The working parts are made from oil hardened steel and will wear for years. It has all the regular features of good sewing machines such as Positive, Four motion Feed, Spring Tension, Stitch Regulator on face of arm, Automatic Bobbin Winder, Gear Releasing Device, Self-Threading Shuttle, Self-setting Needle, Perfect Take up and Nickeled Steel Removable Face Plate. The head is attractively decorated in delicate colored designs and all exposed parts are nickeled.

THE WOODWORK.

This is especially noteworthy as mentioned above. It has a swell front, the drawers being gracefully curved along artistic lines.

The drawer fronts, and the cover lid are of the choicest quarter-sawed oak and as the entire woodwork is given an extra high gloss finish, the effect is very rich and desirable. The woodwork is most substantially made. Besides the four end drawers, each fifteen inches long, there is a center till drawer for bobbins, etc. Upon the table there is an eighteen inch tape measure. The automatic lift raises the head into place ready for sewing when the cover lid is lifted. There is no binding or jerking; simply an easy, gradual but certain lifting of the head into place.



THE STAND.

This is of heavy iron, black enameled. It is fitted with complete ball bearings, the balls being held in patented ball retainers which save wear and make adjustment simple and easy. The pitman is steel and has an adjustable head which is the height of simplicity and utility. These features make the Lake Shore a very easy running sewing machine.

THE SEWING TEST.

All Lake Shore Sewing Machines are thoroughly inspected and operated by an expert before being crated, and a sample of the perfect sewing done on each machine is placed under the presser foot. They are, therefore, ready for immediate use when uncrated and are in perfect condition.

THE AUTOMATIC BELT REPLACER

Saves time and worry as it belts the drive wheel automatically and quickly when the head is raised.

THE ATTACHMENTS AND GUARANTEE.

The attachments are exceptionally good for a machine of this grade. They attach to the presser foot and are packed in a metal box. The set consists of: Ruffler, Tucker, Braider, Foot Braider, Feller, Four Assorted Hemmers, Cloth Guide, Twelve Needles, Six Bobbins, Filled Oil Can, Two Screw Drivers and Book of Instructions. The Lake Shore is *fully guaranteed.*

No. 325—LAKE SHORE, 5 drawers, drophead, ball bearing stand, automatic lift, weight 115 lbs.....each $35.00
No. 327—LAKE SHORE, 7 drawers, otherwise same as No. 325, weight 120 lbs..... " 40.00

FREIGHT CHARGES BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

"METEOR" SEWING MACHINES.

Fully Guaranteed for Ten Years.

We know of sewing machine manufacturers who, because of the fact that their product has been on the market many years and is favorably known, sell, as "high grade," sewing machines which are neither as well constructed nor as well fitted with modern improvements as is the Meteor.

Being free from the costly agency forces maintained by sewing machine factories, we can sell better machines at as low or lower prices than they ask for their less desirable styles.

THE METEOR HEAD.

The Meteor Head is a full High Arm model measuring 8¾×5½ inches underneath so that very bulky work such as comforters and other large pieces can be easily and readily handled.

It runs quietly and smoothly, being very carefully adjusted. Attractive, time saving features include: Perfect Self-Threading Reciprocating Shuttle, Improved Take-up, Presser Foot with two heights of lift, Spring Tension with Side Release, Self Setting-Needle, Positive Four Motion Feed, Gear Releasing Device, Automatic Bobbin Winder, Improved Stitch Regulator on face of arm and Removable Face Plate made of Steel, Nickel Plated.

All Working parts are made of hardened tool steel and the exposed parts both above and below are nickel plated. If properly taken care of the Meteor Head cannot be worn out with ordinary family use.

THE METEOR CASE.

It is becoming more and more difficult every year to produce new styles of sewing machine woodwork which are really attractive. We feel that we have been fortunate in procuring the pattern used on our No. 300 Meteor Sewing Machine and are confident that it will prove very popular.

This Case is very attractive on account of the beautiful markings of oak which are intensified by the finish and set off by the brass capped drawer pulls. This woodwork is very solidly put together so that it will stand all strains of handling and moving. The front of the table is artistically curved and the fronts of the drawers follow the contour of the table. The cover lid is fitted with a strong, easy working automatic lifting device which pulls the head into place for sewing. Upon the table, just in front of the head is a handy tape measure 18 inches long.

The four side drawers, two on each side, are fitted with locks and the swinging drawer in the front is placed there for the containing of extra bobbins, needles, etc.

THE METEOR STAND.

The Ironwork or Stand of the Meteor corresponds in size and style with the excellent woodwork. It is made from a special formula mixture of iron and every piece is carefully smoothed after it comes from the foundry.

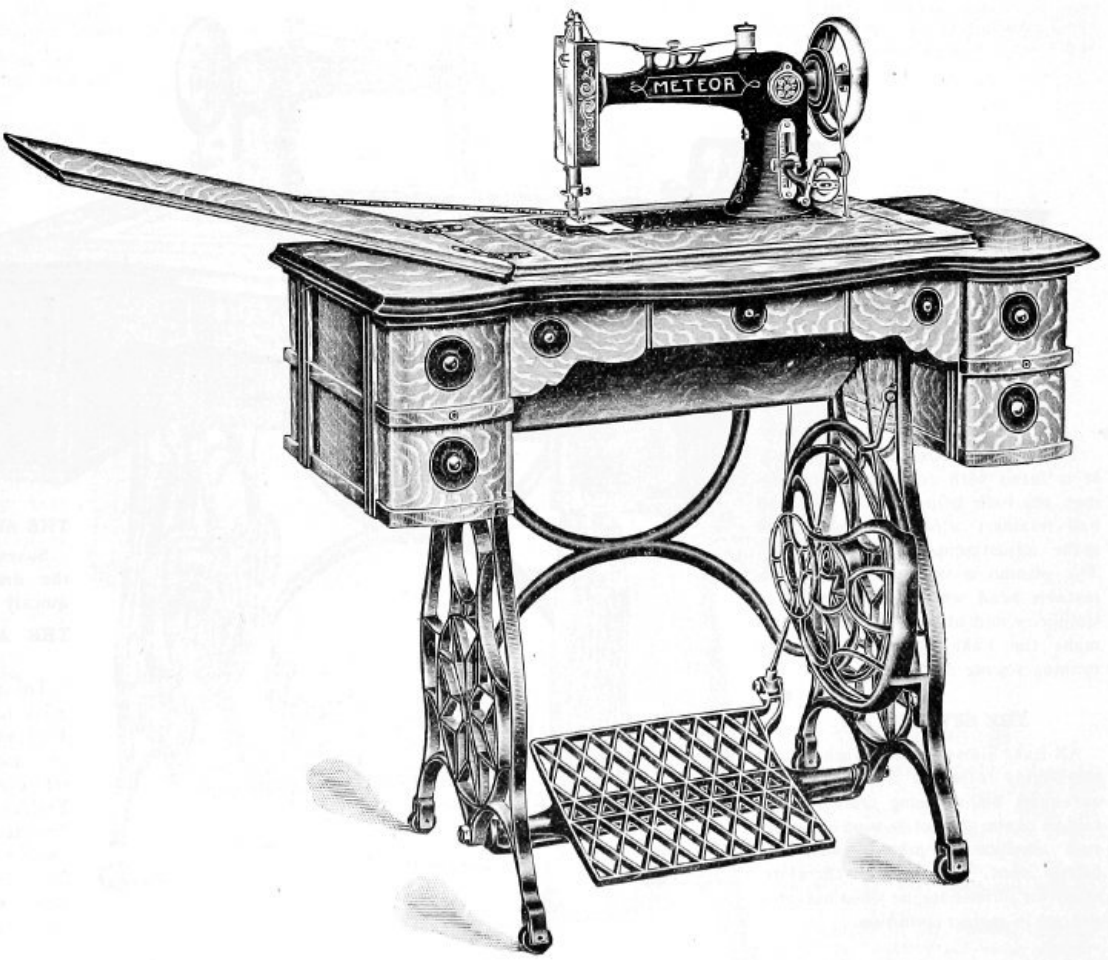
The finish consists of three coats of glossy black enamel, each carefully baked at a high temperature.

The Treadle has beneath it a strong connecting rod fitted with oil cups to prevent any dripping of oil upon the floor.

The Balance Wheel is large and heavy to make operation easy and is fitted with the best ball bearings, the balls being contained in ball retainers so that they cannot possibly wear upon each other.

The Pitman is solid nickel plated steel and is fitted with an adjustable head so that the slightest amount of lost motion can be instantly taken up by tightening the screw.

An attractive feature is the Automatic Belt Replacer which instantly and without attention belts the balance wheel when the treadle is operated.



THE METEOR ATTACHMENTS.

The following complete set of Attachments is included with the Meteor without extra charge and packed in a velvet lined metal box:

Ruffler, Tucker, Feller, Binder, Four Assorted Hemmers, Cloth Guide, Twelve Needles, Six Bobbins, Filled Oil Can, Two Screw Drivers, and Book of Directions which is easily understood.

THE SEWING TEST.

All Meteor Machines are thoroughly inspected and operated by an expert before being crated and a sample of the perfect sewing done on each machine is placed under the presser foot. They are, therefore, ready for immediate use when uncrated and are in perfect condition.

No. 300—METEOR, 5 drawers, drophead, automatic lift, ball bearings, adjustable pitman, crated weight 120 lbs..... each $30.00

FREIGHT CHARGES. BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

"LA BELLE SPECIAL" SEWING MACHINES

Fully Guaranteed For Ten Years

The "La Belle Special" is another example of a combination of features heretofore found only on higher priced and expensive machines with the sterling values of a medium priced pattern without any increase in price.

This machine will be found especially valuable in combating certain styles of competition and we do not know of another machine of corresponding value to be had any where at our price.

THE LA BELLE SPECIAL HEAD.

The "La Belle Special" head is one which we have very carefully tested, and know to be capable of doing, in a satisfactory manner, the sewing necessary in any household.

The working parts are made of hardened tool steel so that they will wear practically a life time. The "La Belle Special" has a Spring Steel Tension, around Needle Bar, a Four Motion Feed, a Stitch Regulator allowing six to twenty stitches to the inch, a Reciprocating Self-threading Shuttle and an Automatic Bobbin Winder. When winding bobbins, the main shaft may be disconnected by means of the thumb screw attached to the hand wheel. The Presser Bar can be lifted to two different heights and the Presser Foot can be easily removed in order that the attachments may be placed upon the Presser Bar. The Shuttle Race is equipped with a small oil well so that the point of the Shuttle is slightly oiled every time a stitch is made, guaranteeing that it will always run smoothly and quietly.

THE LA BELLE SPECIAL CASE.

The imitation hand carved embossing very attractively sets off the selected solid dark oak and the touch of color around the brass tipped drawer pulls heightens the artistic effect.

The drop apron front which is also artistically decorated conceals the rear iron work and is drawn up, leaving plenty of knee room for operation when the head is raised by the automatic lifting device which is attached to the cover lid. The drawers are the full length of the table and fully finished on both sides. They are very solidly made and will not warp or shrink, running smoothly and easily on the runways of the drawer cases. They are equipped with strong locks.

This case is given a high finish which is very attractive and agrees perfectly with the glossy finish of the stand. An eighteen inch tape measure is on the table in front of the head. Owing to its construction, this machine presents a finished appearance in the rear as well as in the front.

THE LA BELLE SPECIAL STAND.

The "La Belle Special" stand is remarkably strong and of a very pleasing pattern. It is modeled to insure rigidity so there will be no vibration when the machine is in operation. The back brace is also strongly constructed. The treadle which extends the entire distance between the frame work has beneath it an additional strengthening bar which has two oil cups directly underneath the treadle bearings so that oil will not drip upon the carpet or floor.

The dress guard is larger than is found on many machines. The entire iron work is given three coats of glossy black enamel.

All bearing points are hung on hardened steel cones which are provided with means of adjustment in case this should be necessary after many years of use.

THE LA BELLE SPECIAL ATTACHMENTS.

The "La Belle Special" steel attachments are supplied without extra charge, consisting of the following:

Ruffler, Tucker, Binder, Braider, Feller, Quilter, Four Assorted Hemmers, Cloth Guide, Twelve Needles, Six Bobbins, Filled Oil Can, Two Screw Drivers, and book of directions which is easily understood.

THE SEWING TEST.

All "La Belle Special" machines are thoroughly inspected and operated by an expert before being crated and a sample of the perfect sewing done on each machine is placed under the presser foot. They are, therefore, ready for immediate use when uncrated and are in perfect condition.

No. 250—La Belle Special, 4 drawers, drophead, apron front, automatic lift, crated weight 110 lbs.....each $30.00

FREIGHT CHARGES, BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

"LA BELLE" SEWING MACHINES.

Fully Guaranteed for Five Years.

This is the best low-priced machine on the market, beyond question. It is an example of what our large buying capacity enables us to do. Compare it part by part with other low-price machines and the superior value becomes apparent. The "La Belle" is thoroughly dependable and will give excellent service.

THE LA BELLE HEAD.

The head of the "La Belle" is of a pleasing pattern and the arm affords a generous space for sewing of heavy and bulky material. The working parts are made of tool steel. All of the exposed parts are heavily nickel plated including those on the under side of the head. Those on the upper side of the head are nicely polished.

The Shuttle is self-threading and reciprocates perfectly in connection with the action of the Needle Bar which is round and carefully fitted in position. The Presser Foot has two different lengths of lift and can easily be adjusted for sewing either thin or heavy goods. The Needle is firmly held in place by the needle clamp and has only one flat side so that it is impossible to set the needle wrong. The Tension is easily adjusted and released. It is conveniently located on the top of the arm.

The "La Belle" head also has Positive, Four Motion Feed, Improved Stitch Regulator, Automatic Bobbin Winder, Releasing Device when using Bobbin Winder and Nickeled Steel Removable Face Plate.

THE LA BELLE CASE.

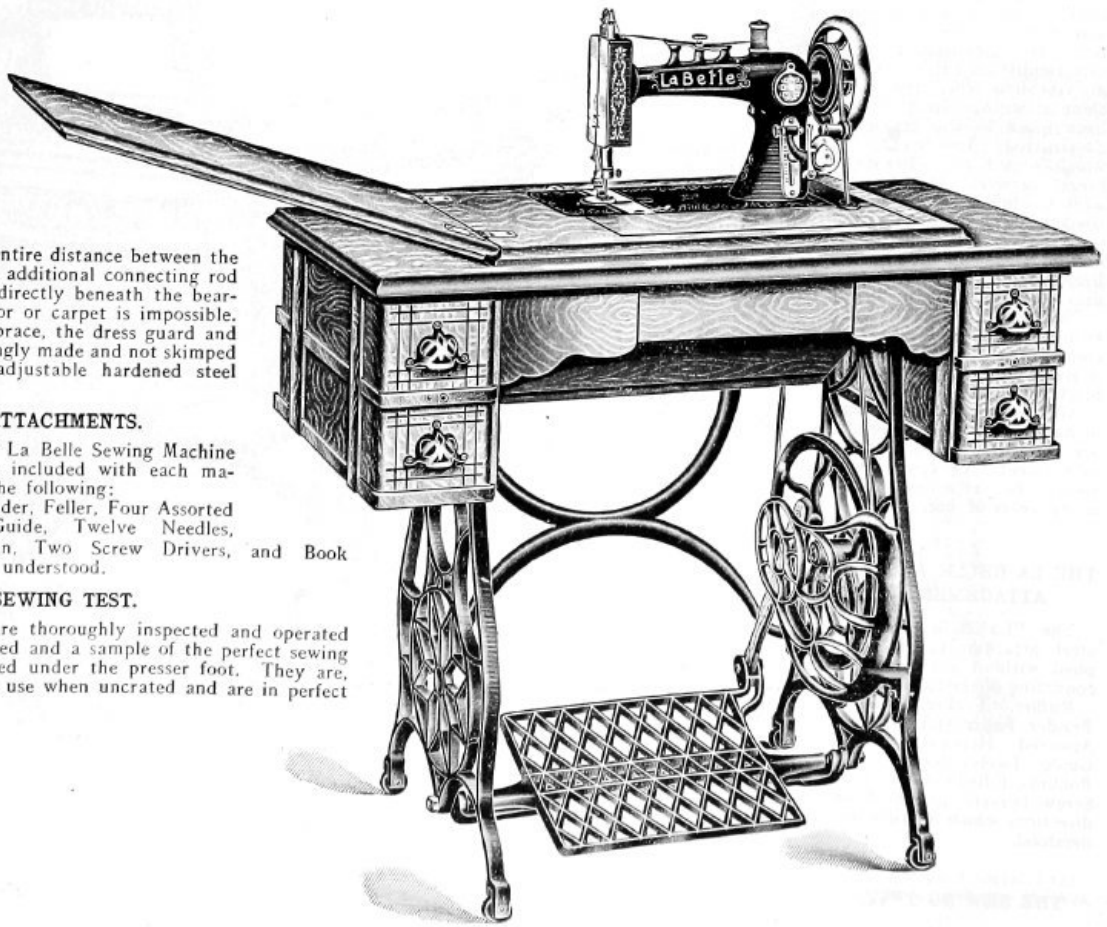
The "La Belle" case is strongly and attractively made. There are two roomy drawers on each side of the table and one swinging drawer in the center. The drawer fronts have an attractive rectangular pattern of crossed lines, and are fitted with nickel plated drawer pulls and locks. These drawers are full length of the woodwork and fully finished all around.

Upon the table, there is an 18-inch tape measure which is very convenient. The "La Belle" woodwork is given a gloss varnish finish which retains its lustre for a long time.

THE LA BELLE STAND.

The iron stand upon which the "La Belle" woodwork is mounted is much better quality than is generally found upon a machine of this kind.

The treadle, instead of being mounted on a single connecting rod, between the two stand parts, extends the entire distance between the two legs and beneath it is an additional connecting rod which is fitted with oil cups directly beneath the bearings so that soiling of the floor or carpet is impossible. The two stand legs, the rear brace, the dress guard and also the balance wheel are strongly made and not skimped in size. All bearings have adjustable hardened steel cones.



THE LA BELLE ATTACHMENTS.

No extra charge is made for La Belle Sewing Machine Attachments, a full set being included with each machine. Each set consists of the following:

Ruffler, Tucker, Binder, Braider, Feller, Four Assorted Hemmers, Quilter, Cloth Guide, Twelve Needles, Six Bobbins, Filled Oil Can, Two Screw Drivers, and Book of Directions which is easily understood.

THE SEWING TEST.

All "La Belle" machines are thoroughly inspected and operated by an expert before being crated and a sample of the perfect sewing done on each machine is placed under the presser foot. They are, therefore, ready for immediate use when uncrated and are in perfect condition.

No. 200 La Belle, 5 drawers, drophead, complete with attachments, crated weight 105 lbs.....each $25.00

FREIGHT CHARGES, BOTH WAYS, ON MACHINES RETURNED FOR ADJUSTMENT, MUST BE PAID BY CUSTOMERS.

SEWING MACHINES.

THE CONOVER HAND.

No. 1000.

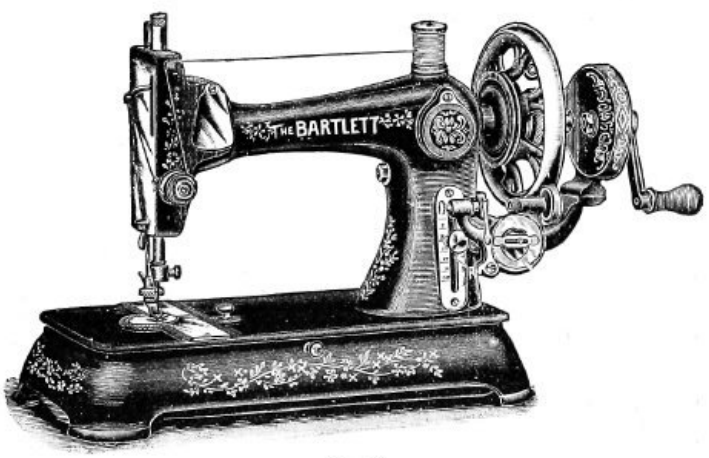
No. 1100.

No. 1000—Iron base, weight 35 lbs., - - - - - - - - - - - - - - - - each $12.00
No. 1100—Oak wood base, bent oak cover, with handle for carrying, weight 48 lbs., - - - - - - - - " 15.00

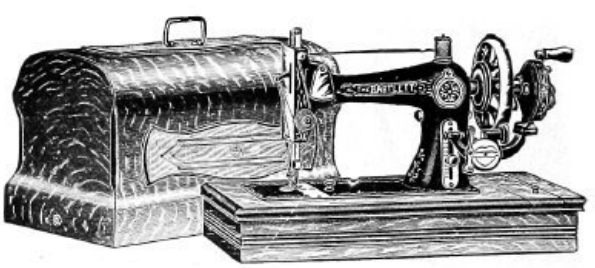
The above illustrates our Conover Hand Sewing Machine. This is a first-class, reliable machine, capable of doing the widest range of work, and assuring utmost satisfaction, and withstanding long usage without getting out of order or wearing out. It makes what is known as the double lock stitch, by using two threads that are locked together in the center of the goods. It has what is termed the eccentric shuttle movement and a positive four-motion feed. This machine takes the latest style straight flat shank needle and the needle is self-setting. It is also provided with a modern automatic bobbin winder, with the latest style self-threading cylinder shuttle, made of hardened steel carefully polished, and is also fitted with a device by which the gearing is readily released, thus enabling the operator to wind the bobbin with the automatic bobbin winder without operating the working parts of the machine. It is handsomely finished in black enamel, highly decorated.

The following attachments and accessories are furnished: Hemmer and feller, sewing gauge, gauge screw, quilter, oil can (filled), 6 needles, 3 bobbins, 4 plate hemmers, and plate binder.

THE BARTLETT, HAND.



No. 11.



No. 12.

No. 11—With iron base, japanned and handsomely ornamented, - - - - - - - - - - - - each $14.00
No. 12—With inlaid wood base and cover, - - - - - - - - - - - - - - - - " 18.00

The Bartlett Hand Sewing Machine is the finest machine of this style ever offered to the trade. It is fitted with the improved disc tension, positive take-up, capped needle bar, etc., which mark the up-to-date sewing machine of to-day. All of the working parts, screws, plates, levers, etc., are nickel plated and highly polished. The needle bar is round and thoroughly hardened. The tension release is automatic and operates when the presser foot lifter is raised. The automatic bobbin winder is the same as is found on the regular treadle machines. The shuttle is of a large size and self-threading. The Bartlett Hand Machine is thoroughly reliable in every way and all kinds of practical sewing can be done with it.

With each machine we furnish an instruction book in English or Spanish, 2 screw drivers, oil can (filled), 6 needles, 4 bobbins, 1 binder, 4 hemmers of assorted sizes, quilter and gauge.

SEWING MACHINE SUNDRIES.

We can supply all kinds of Parts, Needles, Shuttles, Bobbins, Spooler Rubbers, in fact, anything you may have call for, for all kinds of Sewing Machines.

When you have calls for Repairs, takes orders to be filled at Reasonable Prices and send to us.

No. 10—8½×9½×9¾ in. case, 24 compartments for needles, one lower drawer for extra stock, contains first-class American needles. The case is made from heavy cardboard and has a hinged cover. On back of case is a list of interchangeable needles of 92 machines so that the dealer can supply practically any needles called for, two 8×10 display cards with each assortment.

150 Packages of 2 needles each, for all kinds sewing machines, at 5c..... $7.50

50 Packages of 3 needles each, for N. F. Singer machines, at 5c..... 2.50

Per assortment $10.00

⊕Y⊕ Bartlett needles are the highest quality possible to manufacture and are not sold by any sewing machine supply houses. They have perfect eyes, accurately ground points, and are true to size. The ⊕Y⊕ Bartlett needles also fit the Lake Shore, Meteor, La Belle, Mars and the Conover and Bartlett Hand Machines. "Cheap" needles cause 50% of sewing troubles because they are poorly made. Our machines are guaranteed to work correctly only when genuine ⊕Y⊕ Bartlett needles are used.

These needles are put up two in a paper to retail at five cents per paper. Papers are plainly marked, giving size of needles, name of machine, and whether for cotton or silk.

INTERCHANGEABLE NEEDLES.

On request, we will send any dealer an interchangeable needle list which will enable a dealer to supply needles for 125 different machines from a stock of only 14 kinds in different sizes.

⊕Y⊕ SEWING MACHINE OIL.

This is a double filtered oil, free from gum. It is odorless and will not become rancid. Will not stain white cloth. Works very freely in the small bearings of a machine, and has great lubricating properties. Will last longer than any other oil for the purpose.

BURGLAR PROOF CHESTS.

This chest is built of 5-ply Burglar Proof Plates. Door is 2 inches thick. Double acting boltwork, crane hinges, pressure bar. Dial and handle are built in and are detachable.

These chests can be placed in following safes:

Furnished with **No. 450 to 520** inclusive.....extra, each $150.00
Furnished with **No. 600 to 640** inclusive..... " 150.00
Furnished with **No. 650 to 660** inclusive..... " 165.00

Give number of safe desired, and specify "Burglar Proof Chest."

DESCRIPTION OF "REV-O-NOC" FIRE PROOF SAFES.

CONSTRUCTION. Rev-o-noc Fire Proof Safes are constructed by forming outer and inner boxes of wrought steel, between which secretly prepared concrete filling is introduced in a semi-liquid state, permeating and reaching into every crevice, making the whole structure, when hardened, a solid mass.

The filling soon becomes hard and dry as limestone rock, and never corrodes the steel, which is sufficiently thick to cause great strength in connection with the filling, and yet not thick enough to prove injurious as a conductor of heat.

The secret of the cement concrete qualities is the chemical change that takes place when it is subjected to a great heat, generating a vapor that fills all the pores in the cement, forming a cool, moist wall around the contents during its subjection to the heat.

WALLS. These are built from the outside inward. When complete, no screw point or head can be seen from the outside, making it impossible to locate a screw head from any point at the outside. All screws pass through one plate and half through another. The next plate covers the heads of the preceding set of screws. The edges of all plates are ground true to insure a perfect fit at every point.

The outside steel box is formed of one continuous plate, bent around at the corners, forming top, sides, and bottom, which is securely attached to heavy front and back wrought iron angle frames, forming in outline an all-round-cornered safe.

DOORS. The outside door measures 4 inches thick, from the outside surface to the inside of lock cap. This, of course, includes the space occupied by the lock and bolt mechanism, solid thickness of doors being 2 inches of alternate layers of wrought iron and steel plates.

TEMPERING AND TESTING. Every piece is carefully inspected before it enters the workshop. Not a flaw is excused or overlooked. Every piece of steel is tested after being put through the tempering process. A magnificent system of inspection in every department precludes any possibility of poor material or workmanship entering into these safes.

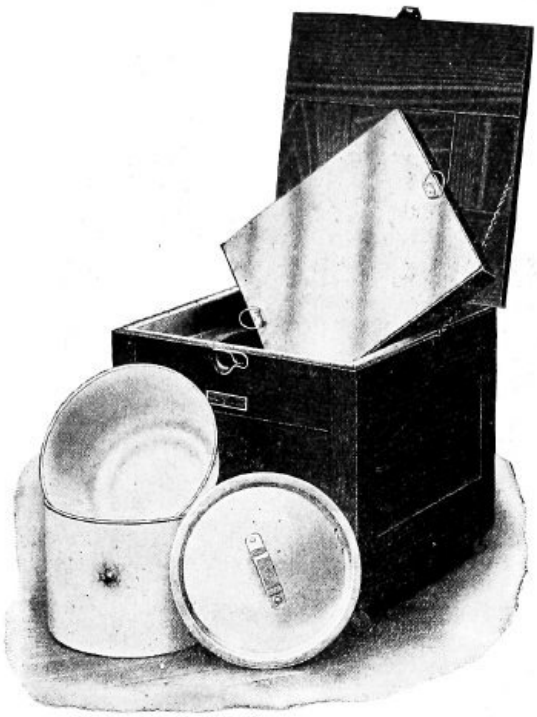
LOCKS AND SPINDLES. Our patented combination lock has four tumblers, also a patented changing device so that combination can be changed at your will. All safes are numbered, and purchaser's name, town and number and original combination retained at factory to be used in case of accidents.

WEIGHT. We give you an approximate weight only for guidance in ascertaining freight rates, as two safes of the same size may differ very widely. We, therefore, cannot agree to supply any special weight. We sell by size, NOT weight.

A WORD. Every public and private place of business or residence should have a fire proof safe of some kind. It will assist you very materially in securing prompt adjustments of insurance, and at the same time preserving valuable papers which can never be replaced. The small expense of the safe pays for itself time and time again. Price is no object in a safe. GET A GOOD SAFE THAT HAS STOOD THE TEST FOR NEARLY ONE-HALF A CENTURY.

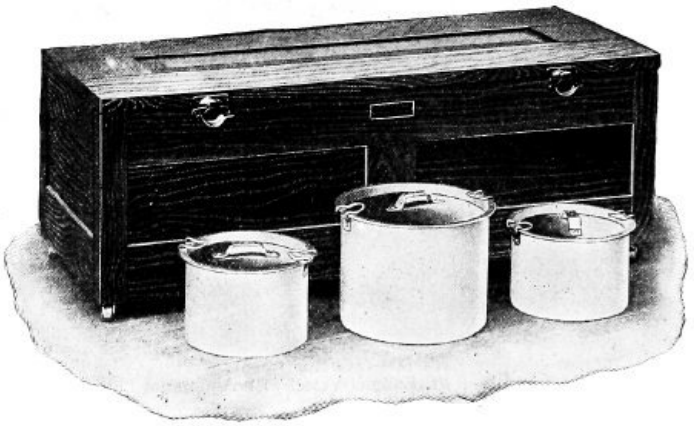
PURITY FIRELESS COOKERS.

With Metal Pads.



No. 15—1 Compartment.
(1 Combination Aluminum Kettle and Cover, Bottom 9 qt, and Top Pail 5 qt.)

No. 25—2 Compartments.
(1 Combination Bottom 9 qt. and Top Pail 5 qt. Aluminum Kettle and Cover and 1-6 qt. Aluminum Kettle and Cover.)



No. 35—3 Compartments.
(2—4 and 1—9 qt. Aluminum Kettles and Covers.)

From Stock or Factory, Northwestern Illinois.

The Improved "Purity" Fireless Cooker embodies all of the features of the original "Purity,' together with many improvements, which places it on a pedestal by itself, as being the finest and most sanitary cooker made.

Material—The box is of a selected, clear hard white pine, which as a result of exhaustive tests, has proven that it is the greatest non-heat conductor of all woods. This box is packed with a tested non-heat conducting material, special care having been used in the selection thereof. The wells and exposed surface are both lined with heavy asbestos board, all of which is covered with a heavy coated bright tin, making an absolutely sanitary construction. The pads are packed with a pure, non-heat conducting material, being covered with coated tin, making them absolutley sanitary. The tin, not being joined together on the edges, makes a perfect insulation. The ends are covered with felt, making tight joints. The cooking vessels are of a pure, spun aluminum, fitted with aluminum covers. This makes an anti-rust vessel, with a perfecty tight cover, and will last a life time. All hardware is old copper finish.

Utility—Undoubtedly fircless cookers will save fuel, time, worry, cooking odors, cooks food thoroughly, and are without any question a wonderful convenience in any kitchen.

Operating—Bring the food to a boil a certain number of hours before mealtime, as explained in the big free cookbook, with each cooker, place the food in the same vessel in which it has been cooked, into the cooker, cover up immediately and perfectly tight, and you will have a most delicious dish when you open the cooker at meal time.

Selling—Fireless cookers are being advertised in the leading magazines very extensively, and we would suggest that merchants follow up this advertising by inserting an ad in local papers, cuts for which we will furnish free of charge. Also distribute circulars among your better customers. We will gladly furnish you with orders of sufficient size, a quantity of circulars for this purpose.

From Stock or Factory Northwestern Illinois.

The Original "Purity" Utilizes the modern method of cooking, without fire or fuel. The fireless cooker age is at hand. As a result of the enormous advertising this process in cookery is receiving, every man or woman who has the saving of fuel, labor and health at heart, will be interested in a fireless cooker. The "Purity" is the result of scientific experiment and embodies all essential features of a successful fireless cooker, together with the sanitary feature.

There are thousands of "Purity" fireless cookers in use throughout this country, and all giving universal satisfaction.

Material—The box is made of a selected, clear white hard pine, which is the greatest non-heat conductor of any wood known, and is in accordance with exhaustive tests that we have made. This box is packed with a pure non-heat conducting material, thoroughly lined with asbestos and with a heavy coated bright tin, making it easy to keep clean and sanitary, and at the same time free from rust. The pads are durable, well made, fitting absolutely tight, covered with a high grade of English denim. The cooking vessels are of a high grade of enameledware, fitted with aluminum covers,—anti-rust, which can be clamped down perfectly tight on the vessel, preventing any of the steam or heat from escaping. (Sizes approximate.)

Utility—Saves over half of the fuel bill, saves over half of the time, saves cooking utensils, saves worry, scorching, uncooked food, also prevents cooking odors from circulating through the house, and keeps the kitchen many degrees cooler.

Operation—Bring the food to a boil early in the day, put in cooker and it will be thoroughly done by noon. (See directions in big cook book free with every cooker.) Be sure that you cover the vessel up with the pads tight, and also close the cover. Fireless cookery is not a secret. It is simply retaining the original heat by means of perfect insulation.

Selling—As to marketing this "Purity," we suggest that the merchant try one in his own home, all users become enthusiastic, and imparting this enthusiasm to others creates a demand.

Also follow up the extensive magazine advertising by advertising in the local papers, and give a demonstration in the store. Get into the fireless cooker business with energy and your profits will be big. Fireless cookers are now past the experimental stage and are being sold all over the country, the same as refrigerators, kitchen cabinets, etc., and are just as essential to a home.

COLLAPSIBLE GO-CARTS.

"PULLMAN COLLAPSIBLE."

In the "Pullman Collapsible" we offer a cart that has all the style and finish resulting from years of experience. The solid wood sides give as much protection and attractive appearance as the regular carriage, and at the same time the cart can be collapsed into a close package. This cart also saves the purchase of a regular carriage for the very young child, as it makes an ideal reclining vehicle, the springs being very sensitive. The depth of adjustable dash affords plenty of room when child sits up.

For style, finish, durability and attractiveness we recommend the "Pullman Collapsible."

Frame—Of Shelby steel tubing, all joints electrically welded, no rivets, frame practically one continuous piece of steel. Two heavy braces hold wheels rigidly in place.

Body—Is made of wood veneer set in metal frames highly polished, to match finish of cart.

Upholstering—Fine grade leatherette, hood to match, with double nickel spreader, fitted with new feature; no thumb screws.

Finish—Of 3 coats enamel baked on; nickel trimmed.

Springs—Are very sensitive and placed under the seat to take up all jar.

Reclining Feature—Adjustable solid reclining back, operated to any angle by means of a lever on back of seat. No pinching of fingers in adjusting. Dash is adjustable, also fitted with a cover, forming convenient place for packages.

Pusher—Of ⅝ in. Shelby seamless tubing, with nickel plated handle. Wheels are 10 in., of cold rolled steel, tin plated with pressed steel spokes electrically welded to rim and hub. No wire spokes to break and bend. ½ inch pure rubber tire is used.

Folding—Fold dash and seat flat, fold sides by releasing side thumb catches, fold handle down, release braces between wheels. To open reverse the operation.

No. 101BL—Finished in black enamel, upholstering and hood to match, nickel trimmed.....each $14.00

No. 101G —Finished in green enamel, upholstering and hood to match, nickel trimmed.....each 14.00

STORM APRONS.

Storm Aprons, with mica window, can be furnished for *all* collapsible go-carts.....each $2.00

COLLAPSIBLE GO-CARTS.

GEM, ONE MOTION.

The "Gem, one motion," is made with as great care as any of the higher priced go carts. The style, finish and appearance will surely attract the buyer who has a limited sum to put into a go cart. The frame is built unusually strong, the folding mechanism is very simple and will never fail. The large well made hood adds greatly to the appearance. It is fitted with adjusting device, simply lift hood and place it in any of its positions and it will stay.

The nickeled handle and arm rests add greatly to appearance.

We ask your attention to the wheels, adjustable dash and spring, all the features of the more expensive carts.

Frame—All steel "Neverbreak," electrically welded joints, no rivets, wheels held in place rigidly by two braces.

Upholstering—Good grade leatherette, large hood to match with nickeled spreader.

Finish—Of three coats enamel baked on, nickel trimming as follows: arm rest, spreader, dash arrangement, and handle.

Springs—Are under seat and take up all the jar.

Reclining Features—Adjustable solid back and deep dash.

Pusher—Of ⅝ inch Shelby seamless tubing with nickel plated cross-handle.

Wheels—10 inch, of cold rolled steel, tinned with pressed steel and spokes electrically welded to rim and hub, fitted with 1½ inch pure rubber tire.

Folding—Release two hand braces, pick up front of cart with left hand with handle in right, bring both hands together and cart folds in one operation. To unfold throw it forward.

No. 103BL—Finished in black enamel, upholstering and hood to match, nickel trimmed.....each $9.00

No. 103G —Finished in green enamel, upholstering and hood to match.....each 9.00

PACKED IN A TIGHT CARTON, COMPLETE WITH HOOD; SHIPPING WEIGHT 25 LBS.

CRUSO, ONE MOTION.

The Cruso, one motion, has been added to the line to put our customers in a position to meet any and all competition on a low priced go cart.

We have made this cart entirely of steel, except arm rests and handle, giving a most durable vehicle.

We intend the cart to "stand up" under any ordinary conditions. The folding device being simple, effective and strong, and is absolutely **one motion.**

We believe we have the best one motion go cart on the market at the very lowest price.

Never before have our customers had an opportunity offered to buy a strictly one motion cart at such figures.

Frame—All steel, "Neverbreak," with wood arm rest, wheels firmly braced.

Upholstering—Good grade of leatherette, with hood to match.

Finish—Enamel, baked on and of good gloss.

Reclining Features—Adjustable back and dash, making perfect sleeper.

Pusher—Of flat steel, with fancy cross handle

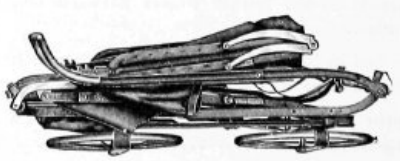
Wheels—10 inch, with 12 steel spokes and fitted with ⅜ inch rubber tire.

Folding—Release catch at base of handle with the toe, pick up front of cart with left hand with handle in right, bring both hands together and cart folds with ONE MOTION. To unfold, throw cart forward.

No. 104G—Finished in Brewster green enamel, upholstering and hood to match.....each $7.50

No. 104B—Finished in brown enamel, upholstering and hood to match.....each 7.50

ONE IN A CRATE, COMPLETE WITH HOOD; SHIPPING WEIGHT 25 LBS.



This cut shows how all our carts illustrated on this and other pages, collapse.

Note the wheels fold flat. Makes a compact package easy to carry.

COLLAPSIBLE GO-CARTS.

"Rev-o-noc" with Automobile Hood, Curtains removed.

"Rev-o-noc," with Hood and Curtains.

REV-O-NOC ONE MOTION.

We have responded to the large demand for a go-cart that is a specialty—something different, not only with pleasing lines, but of a style in keeping with the present age.

The "Rev-o-noc" one-motion cart is the result of this demand and at the same time it places the merchant who handles it far ahead of his competitors and enables him to enjoy a fair profit without interference.

The "Rev-o-noc" is an all-metal cart with 4-bow automobile hood, full set of curtains with window, automobile dash and mud guards over wheels, presenting a most pleasing and attractive appearance. The fond parent after seeing the "Rev-o-noc" and comparing with any other cart, will quickly realize that nothing will do but the "Rev-o-noc."

Frame—All of steel, "never-break," lightly but rigidly constructed, thoroughly braced throughout. The nickel mud guards prevent the clothing from hanging in the wheels and becoming soiled, and at the same time giving the cart a more thorough automobile effect.

Upholstering—Is a fine grade of leatherette, the hood and curtains all matching. The hood has a patented adjustable arrangement, doing away with thumb screws. The curtains, consisting of two side curtains, one back curtain and one front curtain with window, are stored in a compartment under the seat, out of sight and can be quickly put on. Seat and back are fully padded.

Springs—Are under the seat and are very sensitive and prevent all jars.

Reclining Features—Adjustable solid back and dash, making an admirable reclining cart.

Pusher—Is of one-piece tubular steel, the handle part being nickeled, the balance enameled.

Wheels—Are 10 inch, 12 spokes, equipped with mud guards and with ½ inch pure rubber tires.

Finish—Beautiful enameled, carefully baked, will last a long time.

The nickel parts of this cart being as follows: Nickel mud guards, nickel hub caps, nickel spreaders, nickel front rail, nickel arm rests, nickel handle and many other parts as per the cut.

Folding—Raise horizontal catch at base of handle with the toe, pick up the front of cart (always close dash and hood) with left hand, handle in right, bringing both hands together and cart folds with one-motion. To open, throw cart forward. It opens and locks automatically.

No. 105B—Brown enamel and upholstering ..... each $16.50

No. 105G—Green enamel and upholstering ..... " 16.50

ONE IN A CRATE. SHIPPING WEIGHT 40 POUNDS.

Cupid with Hood and Dash up.

CUPID ONE MOTION.

The "Cupid" one-motion cart has the same body as the "Rev-o-noc," however, not quite as elaborately trimmed, and it has the regular hood and no curtain.

Frame—Is made of steel "never-break," with wooden arm rests.

The wheel mud guards, keep the clothing from catching in the wheels and becoming soiled.

Upholstering—Is of a fine grade of leatherette, the hood is made to match and has the new adjustable device instead of the ordinary thumb screws The seat and back are padded. The seat rests on very sensitive springs, preventing all jar.

Reclining Features—Are adjustable back and dash, making an admirable reclining cart.

Pusher—Is of tubular steel, nickel plated handle.

Finish—Beautifully enameled throughout and has nickel front rail, nickel mud guards, nickel hub caps and handles; tinned hood and dash spreaders.

Wheels—10 inch, 12 spoke, half-inch pure rubber tire.

Folding—Release horizontal catch at base of handle with the toe, pick up the front of cart (always close dash and hood) with left hand, handle in right, bringing both hands together and cart folds with one-motion. To open, throw cart forward. It opens and locks automatically.

No. 296—Full Turkish upholstered, imperial edge extra quality hair top.each 34.00

The most satisfactory spring for brass or iron beds—unexcelled for comfort and durability, each full sized spring, contains 72 best spiral steel springs, oil tempered and japanned, tied together eight times with strong manilla hemp, and built upon the same idea as are fine sofas. In ordering box springs always give us the outside measure; namely 4 ft. 6 in.×6 ft. 6 in., etc., also be sure and mention whether for wood or iron bed.

We specially recommend Nos. 291 and 294 as a felt top will stay in position better than any other material.

OPEN BOLSTER ROLLS.

No. 187—Each	$37.50	45.00	52.50	60.00

WHEN ORDERING BE SURE TO SPECIFY SIZE WANTED.

ELASTIC FELT MATTRESSES.

Elastic felt is made of pure, long staple cotton, thoroughly cleaned and purified, woven and interlaced or felted to form sheets or layers the size of the mattress, laid one upon another, compressed and ticking drawn over them, making mattresses that will not pack, spread or become lumpy. A felt mattress, if given a sun bath occasionally, will expand and retain its resiliency for a lifetime. We handle two grades, the difference in cost being due to the relative cost of the fibre used.

B Grade Felt, Unbleached, but Absolutely Clean and Sanitary.

Width.....	3	3½	4	4½ ft.
No. 272—Each	$12.75	13.50	14.25	15.00

Pure Snow White Fibre, Guaranteed Equal or Superior to Any Felt Mattress Made.

Width.....	3	3½	4	4½ ft.
No. 273—Each	$17.00	18.00	19.00	20.00

Sanitary Silk Floss (Kapok) Mattress.

Width.....	3	3½	4	4½ ft.
No. 274—Each	$19.00	20.00	21.00	22.00

The particular advantage of this mattress lies in its exceeding lightness and buoyancy. The full sized mattress weighs but 28 pounds, which is lighter than the larger section of a two-part mattress of any other filling. The consequent ease of handling will appeal strongly to the housekeeper. It has long life, and even after it may have become depressed by use, will resume its original buoyancy if placed where it can secure strong rays of the sun.

WHEN ORDERING BE SURE TO SPECIFY SIZE WANTED.

STEEL COUCH MATTRESSES.

No. 251—Cotton mattress or pad, fancy cretonne ticking, for steel couches, w't 20 lbs.....each $6.00

No. 252—Felt mattress or pad for steel couches, w't 20 lbs.....each 8.00

The felt used in No. 252 is the same grade as that used in our felt mattress No. 272, and has either fancy cretonne or regular felt mattress ticking.

(Mattresses can be made in two parts if so desired; extra, each $1.00).

Made and guaranteed by A. A. Waterman & Co., fitted with fully warranted 14-K gold pens. Filled from ordinary ink bottle by simply twisting end of holder.

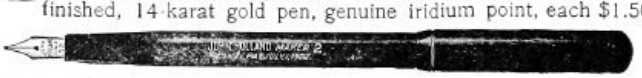
The soft rubber reservoir is twisted to right to empty and then untwisted to fill. Reservoir guaranteed for two years. No joint to stick, break or soil the fingers.

The gold pen points supplied in all numbers are fine, medium or coarse; or in all sizes above No. 2 stub points are supplied. When no points are specified on the order, medium points are sent.

HALF DOZEN IN A BOX.

HOLLAND.

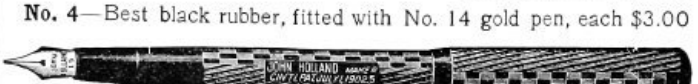
No. 1—Fountograph, good grade hard rubber, well turned and finished, 14-karat gold pen, genuine iridium point, each $1.50



No. 2—Best black rubber, fitted with No. 12 gold pen, each $2.00

No. 3—Best black rubber, fitted with No. 13 gold pen, each $2.50

No. 4—Best black rubber, fitted with No. 14 gold pen, each $3.00



No. 5—Best black rubber, fitted with No. 15 gold pen, each $3.50

Directions:—To fill the pen, unscrew the section, use a good fluid ink (never use a copying or combination ink), fill the ink dropper, place the point of the dropper against the inner side of the barrel, and press gently, allowing the ink to escape slowly into the barrel, thus avoiding air bubbles. Fill the barrel to within one-half inch of the top. Replace the section and screw moderately tight, and the pen is ready for use.

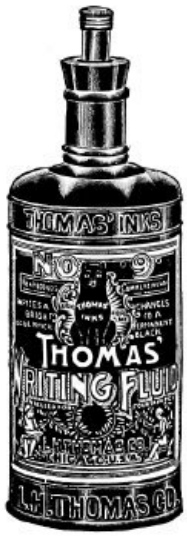
Whenever ink appears on the section, clean out the inside of cap with a piece of soft paper or a rag and wipe off the holder and you will not be bothered again, unless you handle the holder carelessly, or from accident.

If pen is clogged and dirty with ink, clean it by letting water from a faucet run through the section; that is, the part which holds the pen, or squirt water through the feeder with your glass filler until the sediment is dissolved.

ONE IN A BOX.

WRITING INK.

LARGE BOTTLES.



No. 91.

No. 111.

Writing Fluid.

No. 91— 1 qt. bottle, w't per doz. 47 lbs., - per dozen $9.00
No. 92— 1 pt. bottle, w't per doz. 24 lbs., - " 5.25
No. 93—½ pt. bottle, w't per doz. 14 lbs., - " 3.25

Writes blue, turns black. This is the best ink for any use where copying is not required, as it has great fluidity, and is free from sediment. It is not intended for a copying ink, but will take one copy if taken immediately after writing.

POUND'S MERCHANTS' BILL BOOKS.

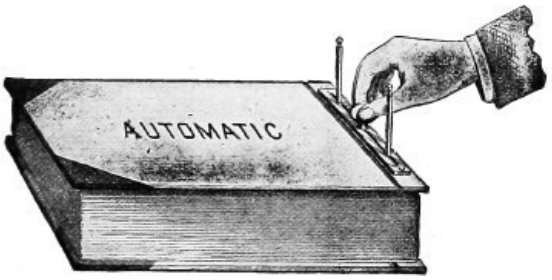
A Book of Ready Reference for All Merchants, Cloth Sides, Russia Back and Corners, Good Quality White Paper.

No. 100—188 pages, size 11⅛×8¾ in., ruled with special reference to requirements, printed titles and column heads, divided as follows: "Bills of Purchase," 132 pages, sufficient for 3,000 items; "Bills Receivable," 32 pages, 650 items; "Bills Payable," 10 pages, 220 items; "Inventory Resources and Liabilities," 5 pages, 88 items; "Insurance," 6 pages, 132 items; "Summary Accounts," 6 pages, each divided into months, w't 2 lbs., each, - - - - - - - - - $3.00

In this small book can be kept an account of all transactions in complete and condensed form, making it possible to know the exact standing every day in the year.

BLANK BOOKS.

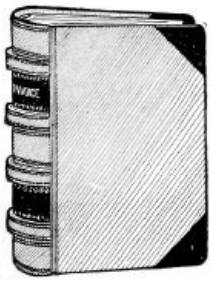
AUTOMATIC BINDERS.



No. 4—8½×11 in., one-piece finely tempered steel binding device, self-locking, double army duck covered over heavy tar-board sides, with leather corners, holds 2,000 sheets, - - - - - - - - each $2.00

This binder will hold the same sheets as the loose leaf ledger shown on page 1213 and can be used as a transfer binder. No blank pages are furnished. The binder is the day or sale book. By its use it is unnecessary to post in the journal, thus saving time and the liability of error in transcribing. Will hold 2,000 sheets of regular order blanks and locks automatically at any point. To open binder insert key, and by one-half turn, spread the clamping device and the binder is open. By removing key the binder is automatically locked. This binder combines simplicity, strength, and never can get out of order because the locking device consists of only one piece.

INVOICE.



Full Canvas, Russia Corners, Indexed in Front, Heavy Manila Paper.

These cards cover the lines in hardware, tools and house furnishing goods, having a large variety of sizes or numbers, save marking each package or article in retail stores. They are printed in distinct type, on good paper, appropriately ruled with blue cross lines, and red down rulings, for noting in pencil—list, cost, jobbing and selling prices. Mounted on both sides of tough, heavy cardboard, specially adapted for this use, protected on the edges by being cloth bound, which saves framing.

REESE'S ADJUSTABLE STENCILS.

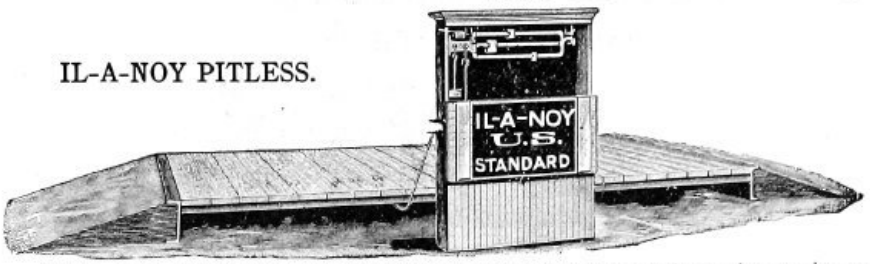
WAGON SCALES.

IL-A-NOY PITLESS.



Triple Beam.

In the Il-a-noy Steel Pitless Wagon Scale, we have adopted the direct steel lever construction which embodies many of the valuable features of a high grade Pit Wagon Scale, with the improvements and advantages of a Pitless Scale.

Frame—Made with heavy steel channel end sills connected by tubular steel cross pieces secured at each corner by strong gray iron brackets which hold in place the heavy hardened loops that support the steel levers in scale frame.

Scale Levers—A single piece of T shaped rolled steel, the two long levers being trussed with heavy steel bars making them perfectly rigid.

Stringers—Heavy steel I beams are used, which support the platform planks, provision being made for fastening planks to I beams.

Pivot Bearings—Throughout the entire scale are made from best tool steel carefully tempered and ground to a knife edge, insuring sensitiveness.

Brass Beam—Three bar, solid, combination, graduated to full capacity of scale and fitted with brass faced sliding poises.

Beam Pivots—Are of best tool steel carefully tempered, each one being secured in beam by hard friction steels.

I Beams—Are made of heavy steel supported on the steel levers in frame of scale by carefully chilled bearing feet that rest on tempered tool steel pivots in scale levers.

Levers—Are of heavy rolled steel, supported at each corner of scale frame by heavy hardened loops hung over the corner brackets.

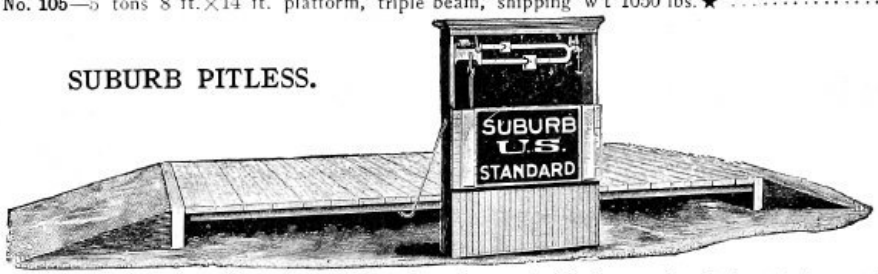
Beam Box—Is of selected one-inch tongued and grooved lumber, painted, and is provided with lock and key, also a heavy molded top.

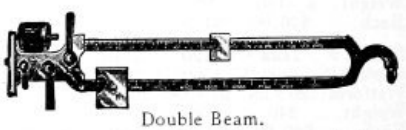
Guarantee—Sealed to U. S. standard weights and against defective workmanship and material.

Shipping—Each scale is carefully boxed and crated for shipment with complete printed directions for setting up and installing. Purchaser is required to furnish only the platform planks.

No. 104—4 tons 8 ft.×14 ft. platform, triple beam, shipping w't 1000 lbs.★ ..... each $110.00
No. 105—5 tons 8 ft.×14 ft. platform, triple beam, shipping w't 1050 lbs.★ ..... " 116.00

SUBURB PITLESS.





Double Beam.

Our "Suburb" Pitless Wagon and Stock Scale with solid double brass beam, is well constructed in every particular and suitable for ordinary uses, being provided with full capacity double brass beam fitted with brass sliding poises.

Levers—Made from T shaped rolled steel and supported in frame of scale by tubular steel cross pieces, which hold wood end sills in place.

Platform Stringer—Next to the beam box is made from a heavy steel I beam and supported on levers by carefully chilled bearing feet.

Beam and Lever Pivots—Throughout the scale are of heavy tool steel ground to a knife edge and carefully hardened, thus insuring sensitiveness, accuracy and durability to all parts of scale where the wear and strain is greatest.

Beam Box—Is made of good materials, well painted and provided with lock and key.

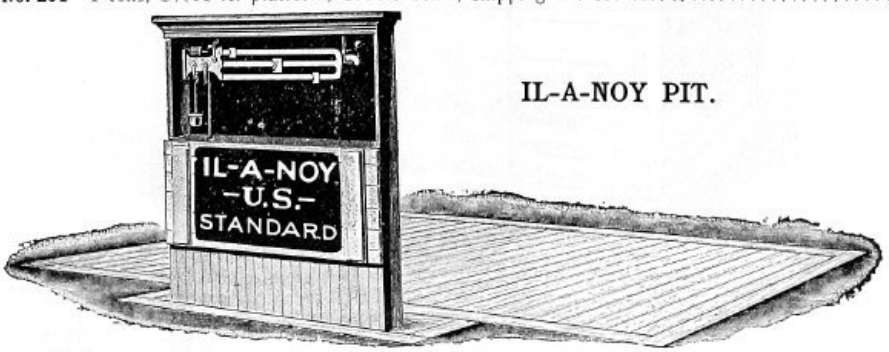
Guarantee—Sealed to U. S. Standard Weights and against defective material and workmanship.

Shipping—Each scale is carefully crated and boxed for shipment with full and plain printed instructions for setting up and installing. The purchaser is required to furnish only the platform planks, two wood end sills 8 feet by 12 inches wide by 3 inches thick, and one platform stringer 14 feet long by 8 inches wide by 6 inches thick, this stringer being placed on the outer end of scale.

The printed instructions show and describe how all wood parts are cut and how foundation should be constructed.

No. 203—3 tons, 8×14 ft. platform, double beam, shipping w't 640 lbs.★ ..... each $72.00
No. 204—4 tons, 8×14 ft. platform, double beam, shipping w't 650 lbs.★ ..... " 80.00

IL-A-NOY PIT.



Triple Beam.

Il-A-Noy Trussed Steel Lever Pit Wagon Scale, is a high grade weighing machine and has many exclusive improvements not found in any other type of pit wagon scale. This scale excels in quality of materials used, accuracy in weighing, and is built to withstand the heaviest strain. It is intended for coal and grain dealers, manufacturers and others who use a scale constantly under all conditions and require them to stand under any test.

Beam—Furnished with double or triple solid brass beams graduated to full capacity of scale and fitted with brass faced sliding poises.

Levers—Made from rolled T shaped steel, each being strongly trussed.

Bearings—Throughout the scale are of best tool steel carefully tempered and ground to a knife edge.

Guarantee—Il-A-Noy Trussed Steel Lever Pit Wagon Scales are made from high grade materials throughout by skilled scale mechanics and guaranteed to be sealed to U. S. Standard Weights and against defective material or workmanship.

Shipping—Scale is carefully boxed and crated complete with building plans for setting up and installing. Purchaser is required to furnish platform planks and timbers for stringers and pit foundation sills. Building plans give bill of lumber required and how each piece is cut.

No. 7803 Section—Comprises Nos. 7300, 7015, 7656.....per section 417.67

No. 7728 Combination—Comprising the six Warren cabinets and three bases as illustrated above, forming a total length of 25½ ft. by 11 ft. 7½ inches high, cabinets 15⅜ in. deep, base 30 in. deep, ledge 14⅜ in. clear, approximate w't packed, 4180 lbs.....complete $1377.99

Above combination is similar to the St. Louis World's Fair combination that received the highest gold medal prize and consists of the most practical inventions of the Warren system.

Illustrations for all Warren cabinets and bases show lengths of only 25 feet, they are expected to be extended to such length as required by each store, and for this purpose, these combinations show hair lines running between each cabinet and base that separates each unit by itself, so that if a combination is not desired as arranged, or wished in greater length, any part of one combination can be taken and combined with those of others, and the price ascertained at once, as the number and net cost of each cabinet and base is printed separately under each one, thus enabling any one to select an equipment.

CABINETS ARE 100⅜ IN. LONG, 54 IN. HIGH, 15⅜ IN. DEEP. BASES ARE 100⅜ IN. LONG, 31½ IN. HIGH, 30 IN. DEEP.

No. 7429—Drawers to be assorted as desired.

Antique Oak.

No. 7475 Cabinet—For bolts, the various compartments are made with a tilting front, which saves much time, as in a second it is easily slid back, giving instant access to any compartment, and after selecting the article desired it is as quickly closed, keeping each size separate and forming the appearance of a cabinet with drawers. The exertion of sliding a drawer containing from 10 to 40 lbs. weight is avoided without losing any of its conveniences, and the tilting front is not obstructed with scales or dust, as a sliding or hinged front would be. On the outside of the tilting front is a brass card frame to show size of the bolt or kind of goods; below this is a neat knob by which the front is lifted. The pigeon holes are assorted sizes, suitable for all average stocks, 100⅜ in. long flush (103⅞ in. with end cornice), 54 in. high; 15⅜ in. deep (17⅛ in. including cornice), approximate w't packed, 600 lbs.....each $103.44

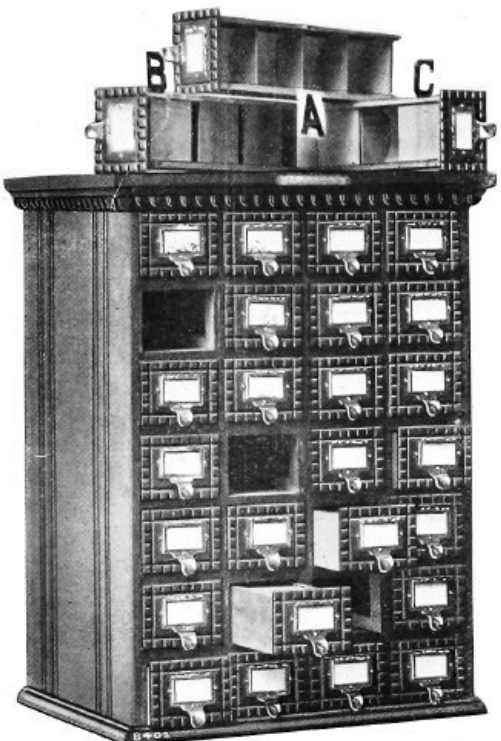
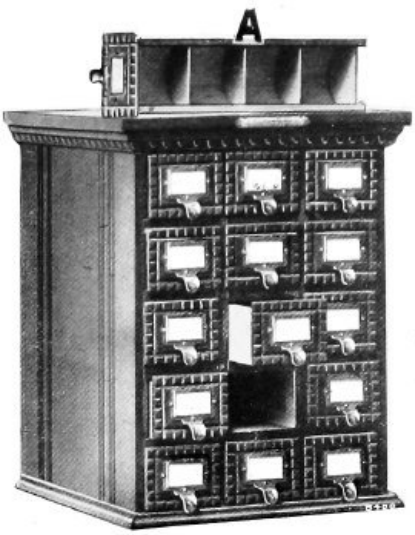
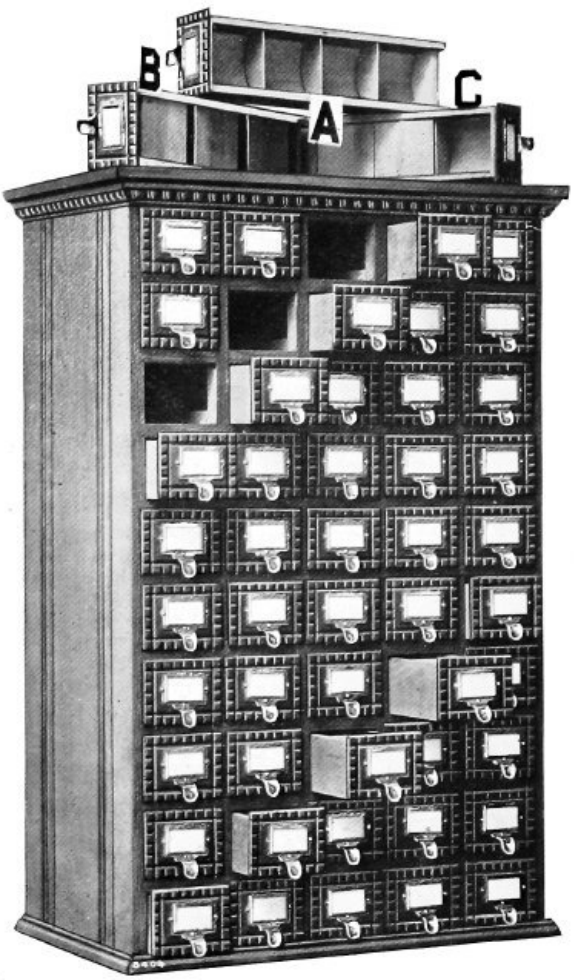
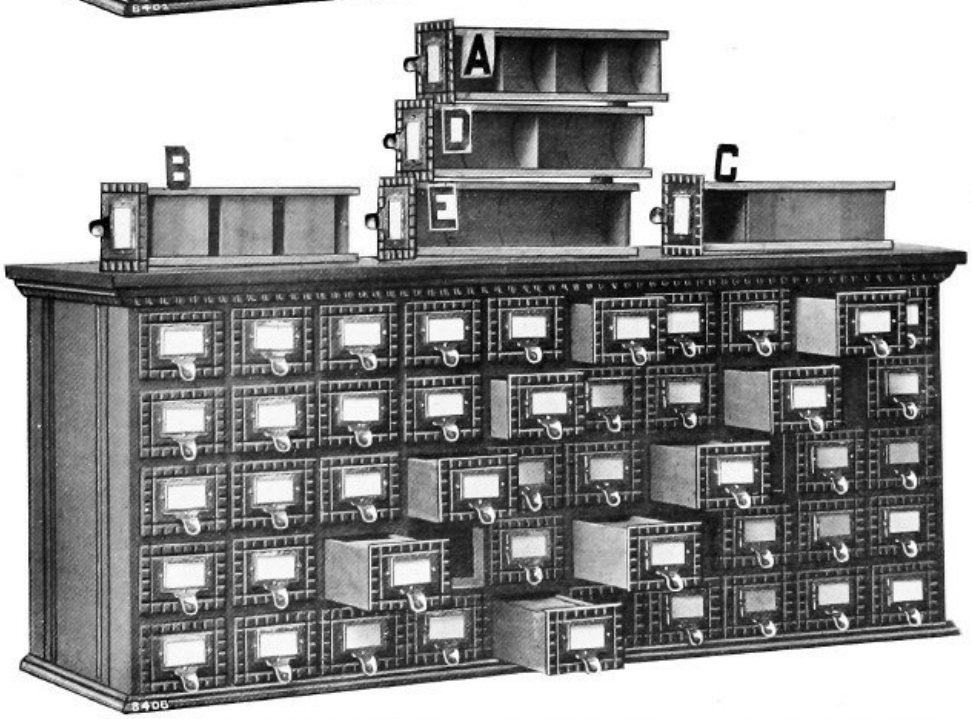
WARREN SCREW CABINETS.









Antique Oak, Hand Rubbed Finish, Ornamental Oak Front Drawers, Circular Inside Bottoms, Three Removable Partitions, Brass Pulls and Label Holders, Rich Cornice Moulding, Beaded Ends, Matched Backing.

Adapted to all kinds of screws, screw hooks and eyes, small nuts and bolts, small butts, cotter pins, belt hooks, rivets, etc.; each drawer is divided into four spaces by removable partitions and furnished with solid brass pull and label holder, the smallest space will hold one gross 1 inch No. 10 screws; two spaces (removing one partition) will hold one gross 3 inch No. 12 screws; three spaces will hold one gross 4 inch No. 12 screws; four spaces will hold one package (one-half gross) 4 inch No. 20 screws. The compartments of each drawer save space and contain different sizes that are before the customer for selection and often save the trouble and time of looking into another drawer.. The drawers have sliding glass or wood covers, which close all but one of the four spaces in each drawer, prevents mixing, and enables instantly selecting the desired size, a few can be picked out, or a portion, or all quickly poured out, without spilling the contents in the other spaces. Thoroughly practical in storing and rapid in operating.

No. 8400—15¾	in. long, 18⅜	in. high, 15¾	in. deep, contains 15 drawers 3×4×14½	in., capacity 60	spaces, shipping w't 100 lbs.....	each $16.94
No. 8402—20	in. long, 26	in. high, 15¾	in. deep, contains 28 drawers 3×4×14½	in., capacity 112	spaces, shipping w't 125 lbs.....	" 27.12
No. 8404—24	in. long, 35	in. high, 15¾	in. deep, contains 50 drawers 3×4×14½	in., capacity 200	spaces, shipping w't 155 lbs.....	" 44.00

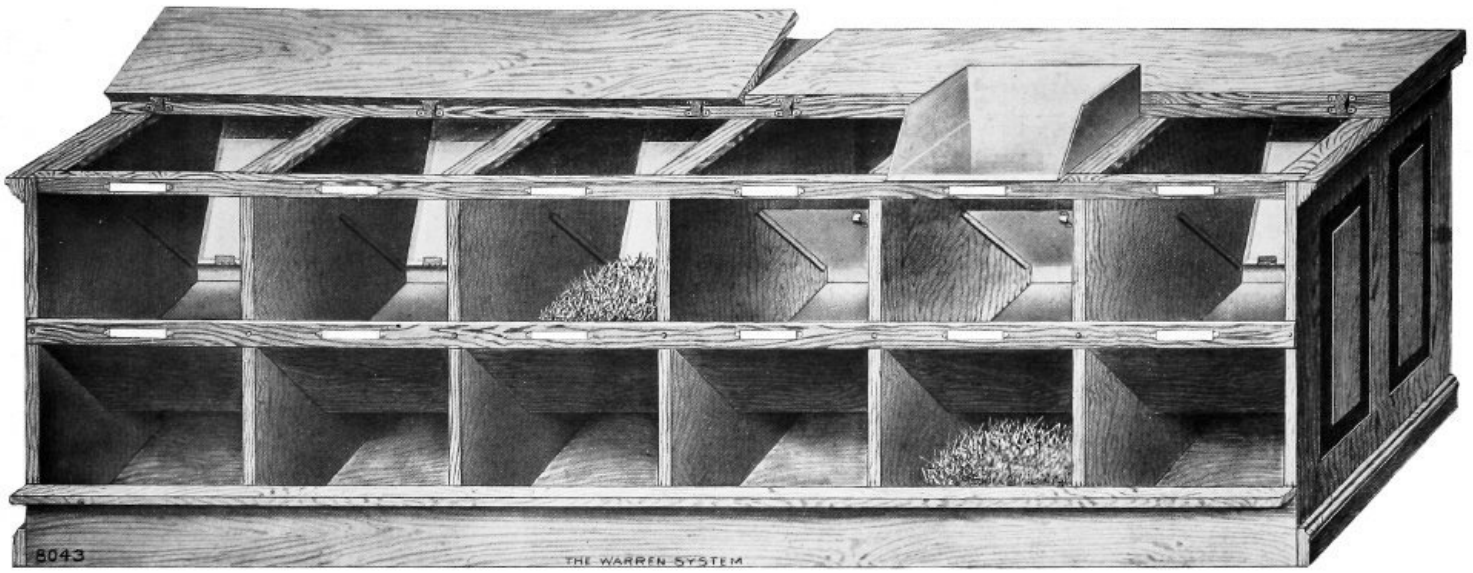
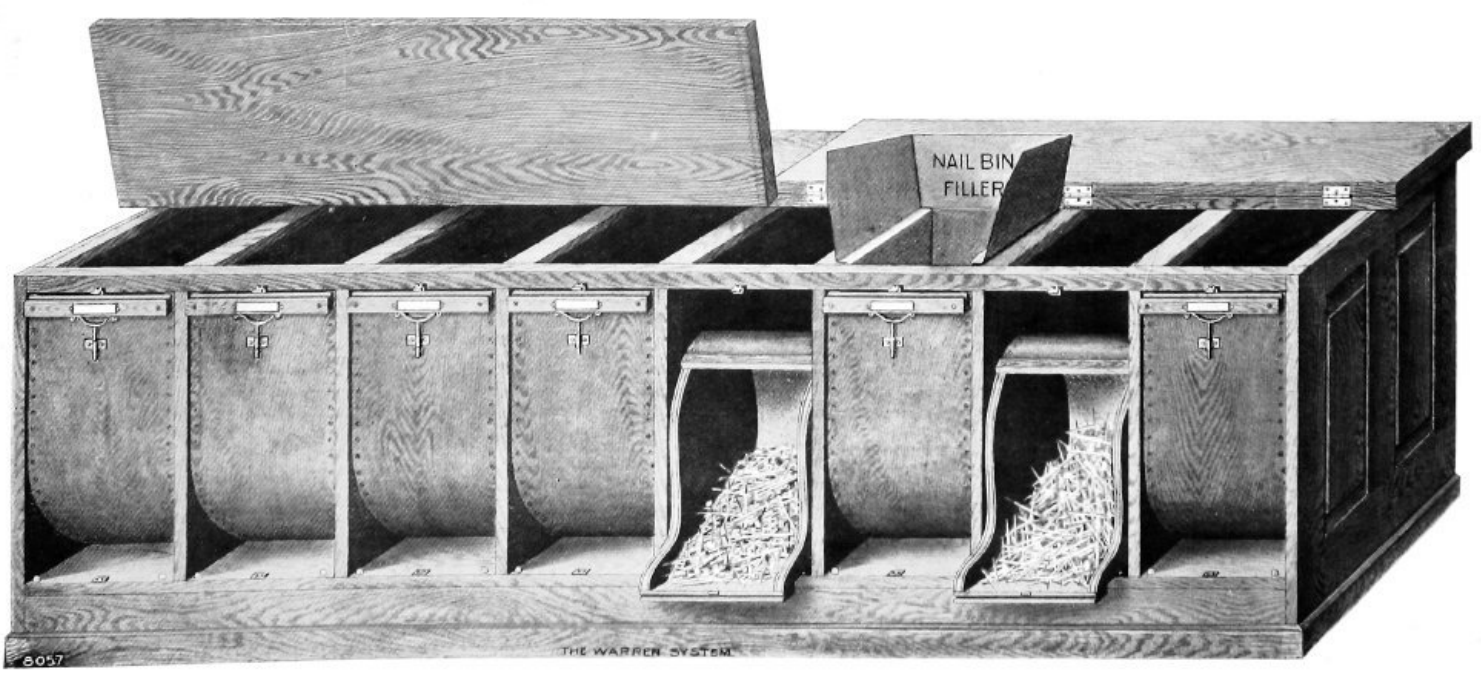
WARREN NAIL BIN COUNTERS.

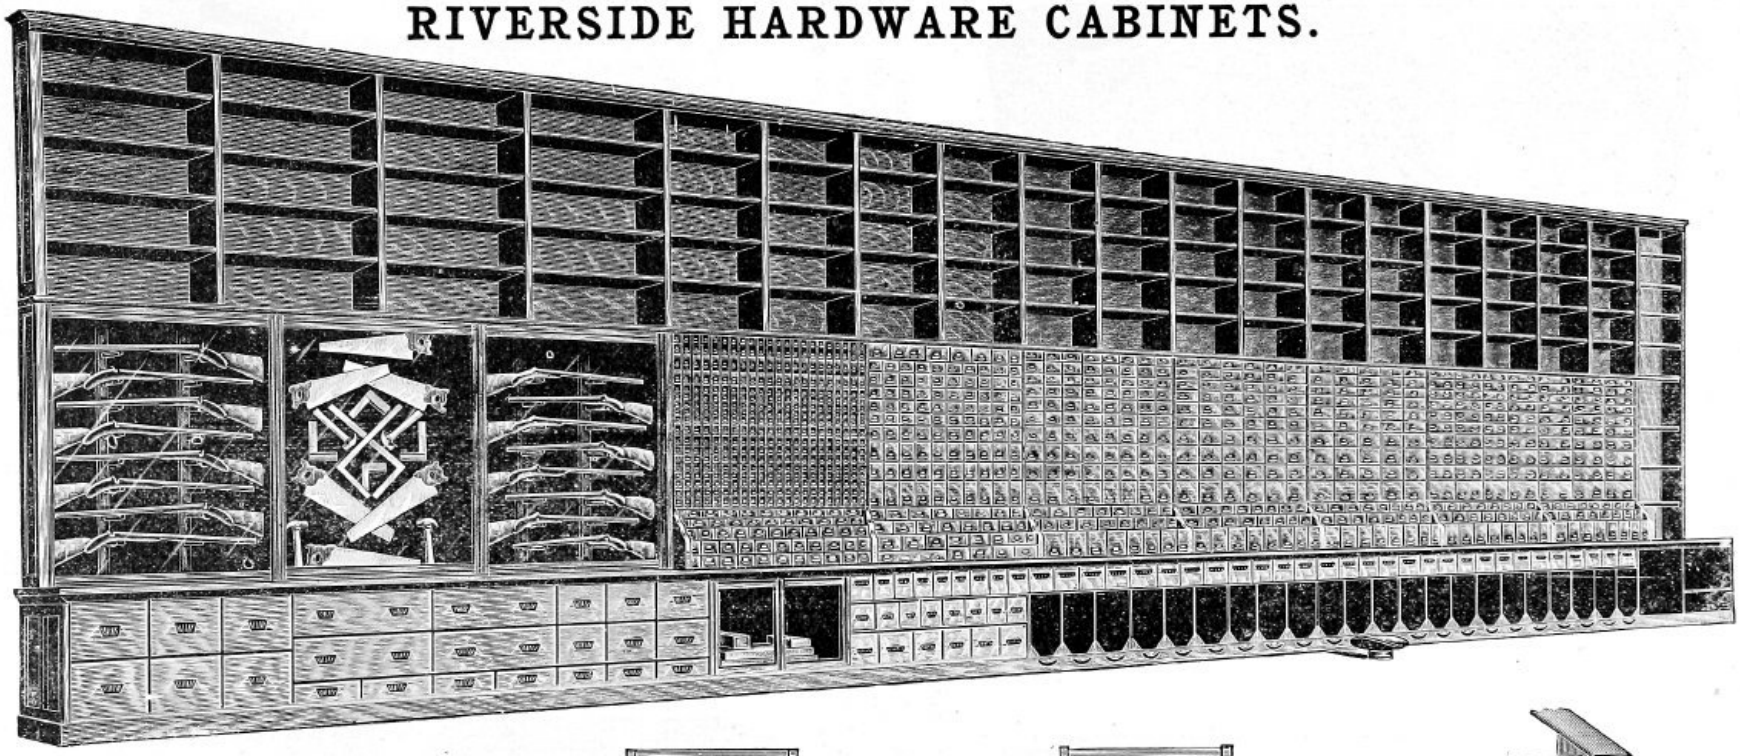


No. 8043 Counter—For nails, contains 12 bins, each holding 150 lbs., bottoms of bins recede toward the center from front and back, with projecting ledge in front of all bins to place scale scoop under. Through an ingenious device, any bin in upper or lower row can be quickly filled (while the other bins are full) through the raised top, which, when closed has the appearance of a solid top; 104 in. long, 31½ in. high, 30 in. deep, approximate w't packed 400 lbs. each..... $85.50

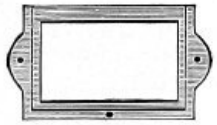


No. 8057 Counter—For nails, contains 8 revolving bins, each holding 150 lbs. of nails, into which a keg of nails can be emptied and removed in less than a minute. The bins are filled through the raised top, which, when closed has the appearance of a solid top. Each bin is independent of the other, and through a very unique device is self-balancing and only a slight effort is required to raise and lower to any position. Each bin, when open, projects out over the scale scoop, thus preventing nails being scattered; 104 in. long, 31½ in. high, 30 in. deep, approximate w't packed, 450 lbs..... each $92.35

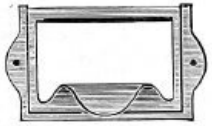
RIVERSIDE HARDWARE CABINETS.



Pulls for Large Drawers in Cabinet.



Label Holders for Large Drawers in Cabinet.



Label Holder and Pull for Small Drawers in Cabinet.

Corner of Drawer Showing Fold of Tin.

The day of the slip-shod hardware store is past. System and neatness pay an increasing dividend in saving of time and protection of goods from injury. The modern hardware store must not only be clean, but the stock must be available for the intending purchaser, without the petty delays and annoyances of being unable to locate an article when wanted. The old adage of "goods well bought are half sold" should read, "goods well bought and properly kept can always be sold."

The modern hardware store (because of the great diversity in the wants of the people) must carry a stock commensurate with the demand of its trade. Under the most favorable circumstances the space usually available in a store of this character is limited. The usual hap-hazard arrangement of the shelving and boxes prevents flexibility or expansion. Counters are usually a necessity and simply add to the confusion existing.

The cabinet system, properly arranged, has been found by experience to be the most practical arrangement of a hardware stock, or in fact any general stock of a like nature. It saves enough space at the start to pay for itself in a short time. Counters are not necessary—in fact it is better to do away with them entirely, as every item in this store has a definite place. There is no need of losing sales on account of not being able to find an article when wanted.

To all wide awake modern hardware merchants, we offer the Riverside hardware cabinets and shelving as the simplest and most economical form of arranging a modern hardware store.

They consist of cabinets, open cabinets, bases, shelving and wall show cases. The bases are sub-divided into bolt bases, nail bins, open bases, etc.

They are made of the best quarter sawed oak, finished in natural color, thoroughly filled, rubbed and coated with Berry's white shellac varnish. They present an appearance not surpassed by any interior store finish. The drawers in cabinets are of Old Process roofing tin bottom and sides with oak front and basswood back. The tin is so shaped and folded, as shown in cut, that the drawer is very stiff, keeps its form, occupies little space and is easily cleaned. The pulls and label holders are bronze metal.

The drawers in the bases are of wood complete partitioned for the articles desired. The handles are of oak, strong, neatly modeled. The moulding, cornice, etc., are all of neat design. If one cabinet or base only is ordered, it is finished complete. If more than one, the mouldings and beadings are continued so that they present one unbroken front.

The general arrangement is the result of years of experience by hardware men, salesmen and dealers. One piece may be purchased at a time and may be added to as the stock increases and trade warrants. They are carefully crated and shipped so that the customer receives them in perfect condition. If you would do a modern business equip your store in the modern way.

Quarter Sawed Oak, Natural Color, Hand Rubbed, Bronze Metal Pulls and Label Holders.

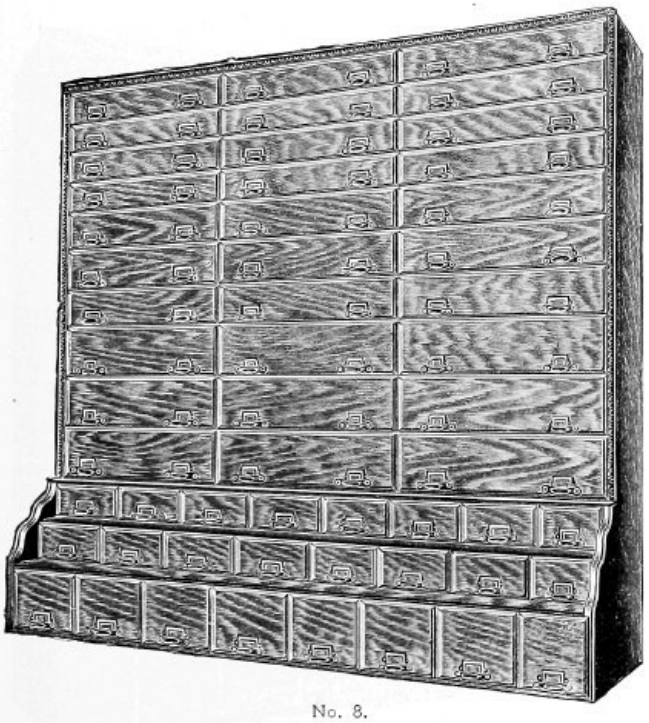
No. 5—84 drawers from 10⅞×9¾×3 to 19×7½×6½ in., with sub-base same as No. 4, height of cabinet 63 in., length 64 in., depth at top 12 in., depth at base 20 in., complete with set of blank labels, shipping weight 475 lbs., - - - - - - - - each $75.00

No. 6—74 drawers from 11×11¾×3 to 19×7⅞×6½ in., with sub-base same as No. 4, height of cabinet 63 in., length 64 in., depth at top 12 in., depth at base 20 in., complete with set of blank labels, shipping weight 450 lbs., - - - - - - - - each 68.75

No. 7—64 drawers from 10⅞×15×2⅞ to 19×7¾×6½ in., with sub-base same as No. 4, height of cabinet 63 in., length 64 in., depth at top 12 in., depth at base 20 in., complete with set of blank labels, large drawers have two handles, shipping weight 450 lbs., - - each 62.50

FOR FURTHER DESCRIPTION SEE PAGE 1252A.

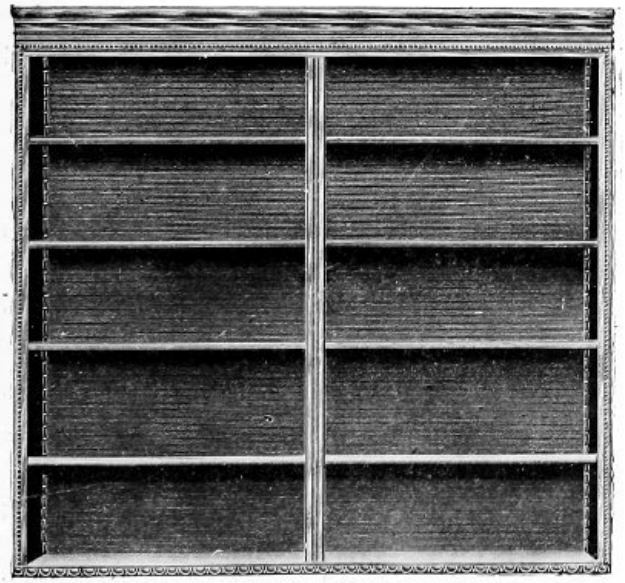
RIVERSIDE HARDWARE CABINETS.



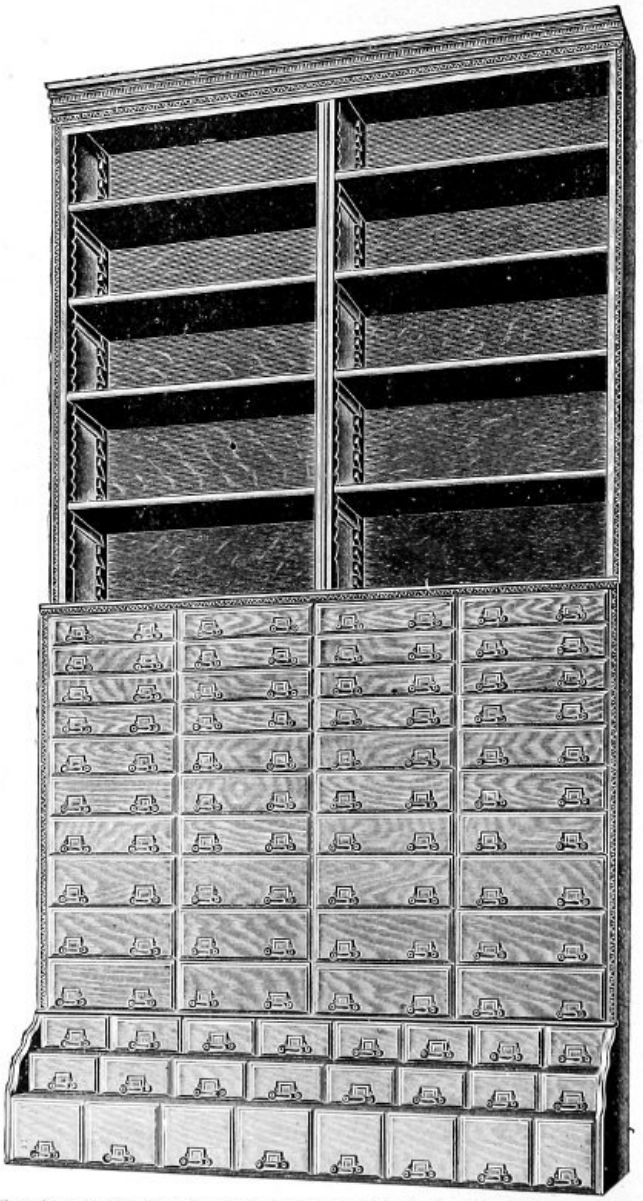
No. 8.

Quarter Sawed Oak, Natural Color, Hand Rubbed, Bronze Metal Pulls and Label Holders.

No. 8—54 drawers from 10⅞×20×3 to 19×8×6½ in., with sub-base same as No. 4, height of cabinet 63 in., length 64 in., depth at top 12 in., depth at base 20 in., complete with set of blank labels, shipping weight 450 lbs., - - - - - - - - each $56.25



No. 130.



This shows a No. 70 Cabinet with an open Cabinet above it, giving an idea of how the shelving appears when in actual use.

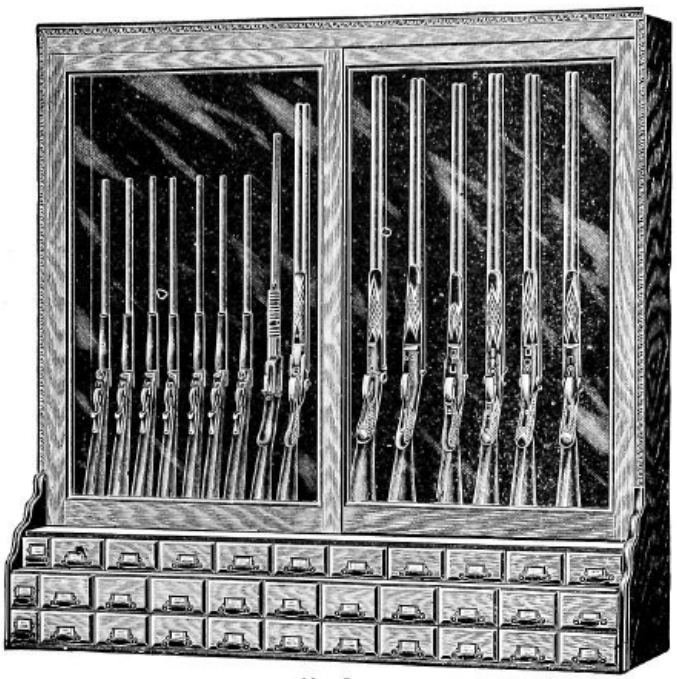
Quarter Sawed Oak, Natural Color, Hand Rubbed.

No. 130—Open cabinet, placed between the regular cabinet and ceiling to carry surplus stock, finished in the same careful manner as the cabinets, and makes fine and most substantial shelving, can be made any height to fill space between regular cabinet and ceiling, but unless otherwise ordered, is shipped in regular size as follows: height 63 in., length 64 in., depth 12 in., with back, furnished with removable shelves one foot apart, as illustrated, shipping weight, 250 lbs., - - - - - - each $16.88

FOR FURTHER DESCRIPTION SEE PAGE 1252A.

RIVERSIDE HARDWARE CABINETS.

GUN SHOW CASES.

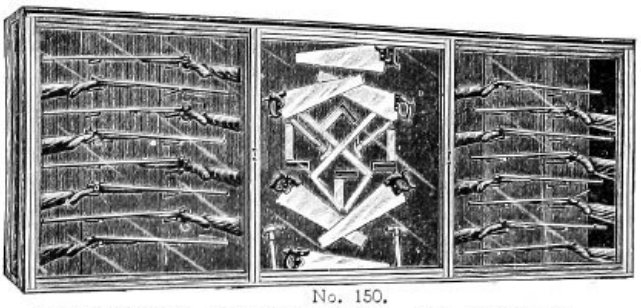


No. 9.

Quarter Sawed Oak, Natural Color, Hand Rubbed, Bronze Metal Pulls and Label Holders.

No. 9—Height 63 in., length 64 in., depth at top 12 in., depth at base 20 in., sliding glass door, holds 20 guns, has 33 drawers in base for ammunition and gun supplies, each - - - - - - - - - - $56.25

WALL SHOW CASES.



No. 150.

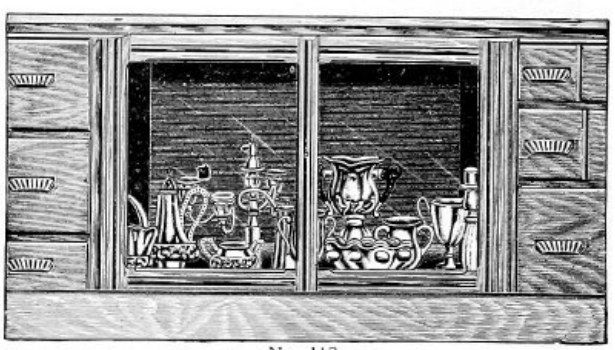
Quarter Sawed Oak, Natural Color, Hand Rubbed.

No. 150—Without shelves but with brackets as shown, per running foot - - - - - - - - - $6.25

No. 155—With shelves, one foot apart, per running foot 7.50

This is one of the most indispensible articles to a well ordered store. It is made of highly seasoned quarter sawed oak panelled and beaded, with fancy top cornice same as on the cabinets, sliding glass doors on metal runs, double strength AA glass and lined with black cloth. Complete with brackets or shelves as ordered, specially designed to show guns, rifles, sporting goods, tools, etc Height 63 in., depth 14 in. outside.

SILVERWARE BASES.



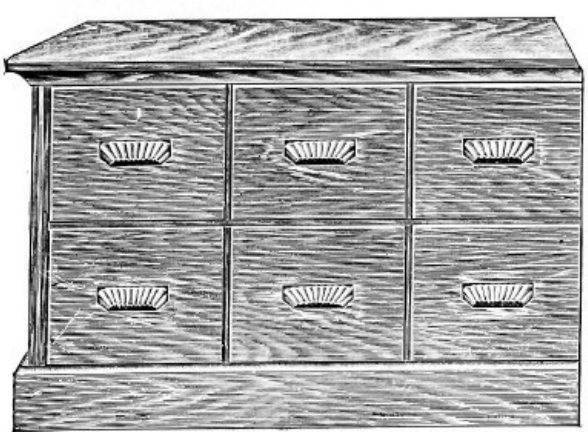
No. 113.

Quarter Sawed Oak, Natural Color, Hand Rubbed.

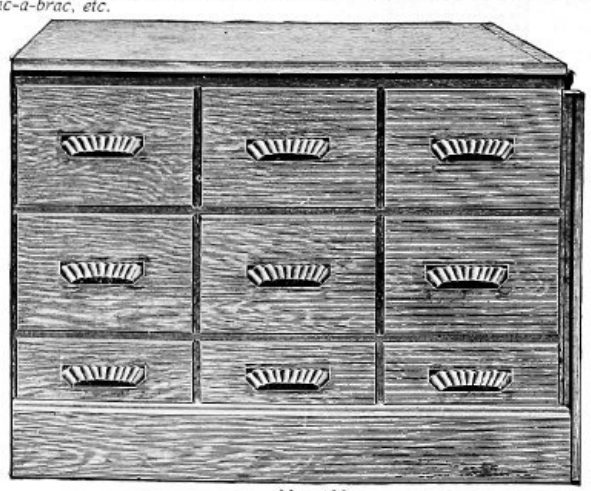
No. 113—Double strength sliding glass doors on metal runs; is practically dust proof, height 33 in., depth 32 in., shipped as shown, unless otherwise ordered, per running foot $7.50

This is the base that can be used for display of silverware, tinware or fancy goods, bric-a-brac, etc.

BASES.



No. 100.



No. 102.

Quarter Sawed Oak, Natural Color, Hand Rubbed.

No. 100—6 drawers all same size,—23×14×11 in., height of base 33 in., depth 32 in., shipped as shown but made up with any size drawers, as ordered, - per running foot $7.50

No. 102—9 drawers 23×12¼×8¼ to 23×12½×3½ in., height of base 33 in., depth 32 in., shipped as shown but made up with any size drawers as ordered, - per running foot 7.50

Shipping weight on all the above Cases per running foot, 45 lbs.

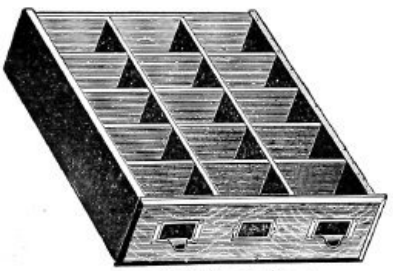
Card of Labels.



Interior of Drawers.

No. 210. 14 Drawers.

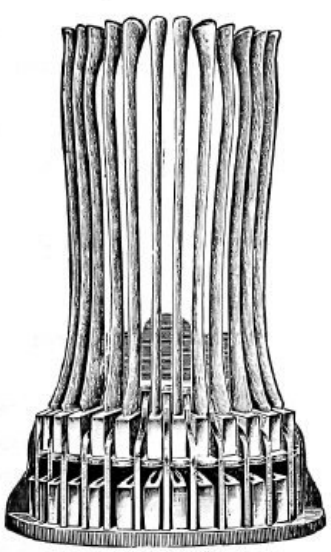
Oak Front Drawers, Cherry Stained Case, Brass Pulls and Label Holders.

No. 150—10 drawers, 150 compartments, height 23 in., width 30 in., depth 16½ in., weight about 80 lbs., - - - each $15.00

No. 210—14 drawers, 210 compartments, height 31½ in., width 30 in., depth 16½ in., weight about 100 lbs., - - - " 18.00

These cases are designed especially for screws, small bolts and fittings. Each drawer is divided into fifteen compartments, size 2½×3¾×3 in., with strong wood partitions. The spaces are large enough to hold a package of any size screws. The drawers are fitted with a safety appliance to prevent accidental dropping and spilling of contents.

With each case are furnished seven cardboard sheets of labels, marked so that they can be readily cut apart and exactly fit the holders supplied to each drawer. The long strips designating the class of goods can be attached to or between the drawers as desired. By putting all screws of a length in separate rows, this will allow five numbers for each. Stove bolts can be arranged in the same manner, 3/16 and ¼ in. round and flat head being in one series of compartments. By this arrangement one large case can be used for several kinds of screws, stove and tire bolts; the balance of these goods being in full packages on the shelves.



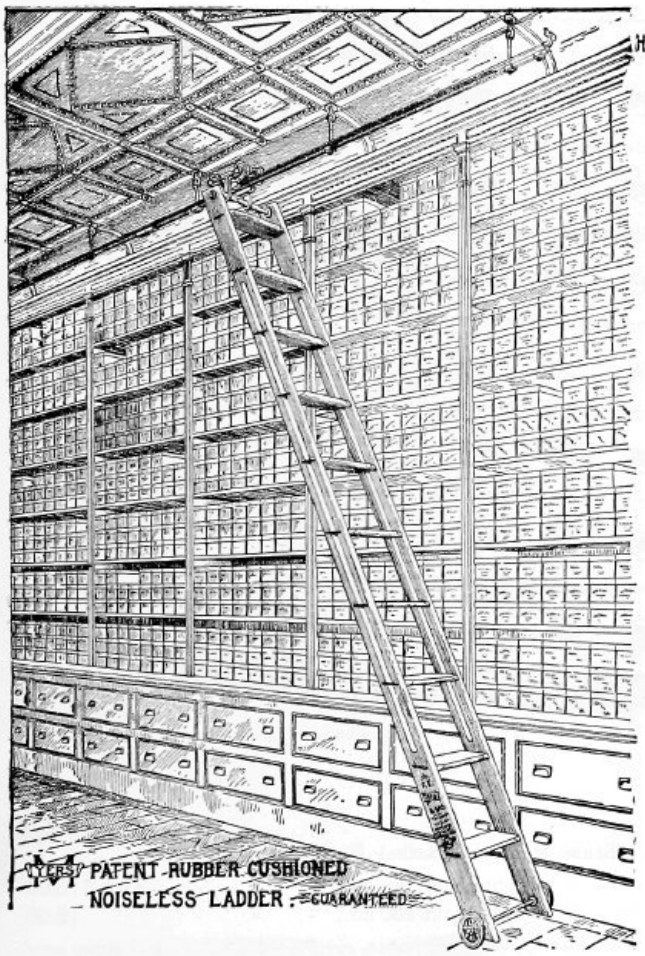
SENSIBLE AXE RACKS.

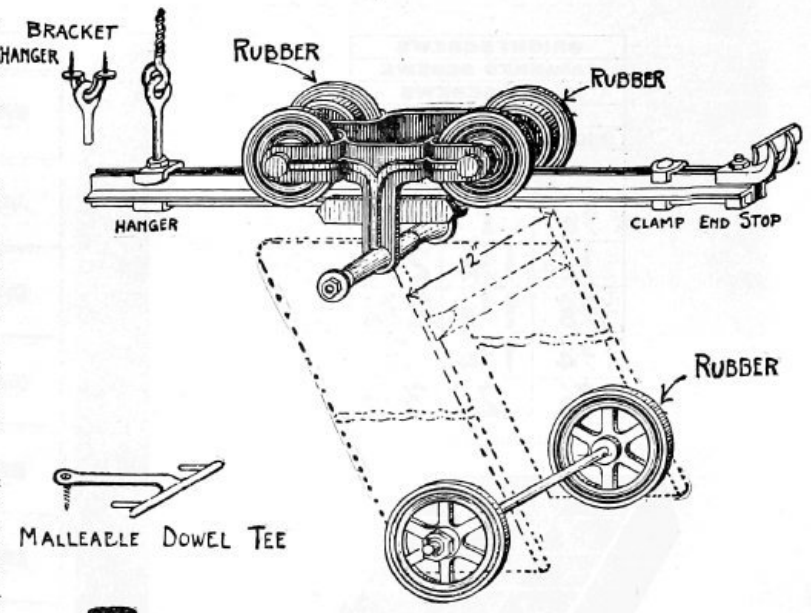
Can be used on the counter or on the wall by supporting with brackets. For counter use a fine display can be made by placing two racks back to back. The rack is ornamental and attractive, and will save its cost by keeping axes off the floor, away from the dirt and sprinkler.

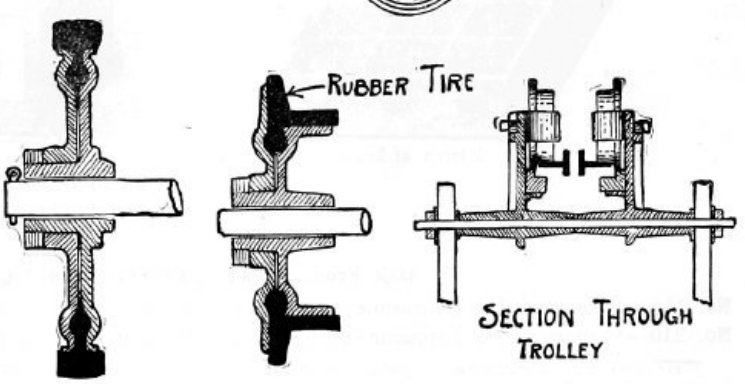
No. 10—Width 28 in., depth 14 in., holds 16 handled and 16 unhandled axes, painted red, weight 21 lbs., - - - - - - - - - - - each $4.50

ONE IN A CRATE.

MYERS' CUSHION TIRE STORE LADDERS.







For Shipment from Factory.

Ladder and Trolley, complete, average weight 60 lbs., - - - - - - - - - - - - - - each $16.00

Track, complete with hangers, weight per ft. 2 lbs., - - - - - - - - - - - - - - per foot .30

DIRECTIONS FOR FITTING.

To find the required length of store ladder for any room, subtract from the height of the room 11 in. (this being the amount of space required by hangers, track and trolley); multiply the remainder by one and one tenth; the result will be the length of the ladder from hole at top to bottom of ladder.

The track is the well known double angle steel rail, which is very neat and strong, and is suspended from ceiling by means of lag screws, either jointed or rigid, or by flanged plates and wood screws. By this means the track is placed close to the ceiling and can be leveled on an uneven ceiling without the least trouble, and without any blocking or bridging, as is the case in many other tracks.

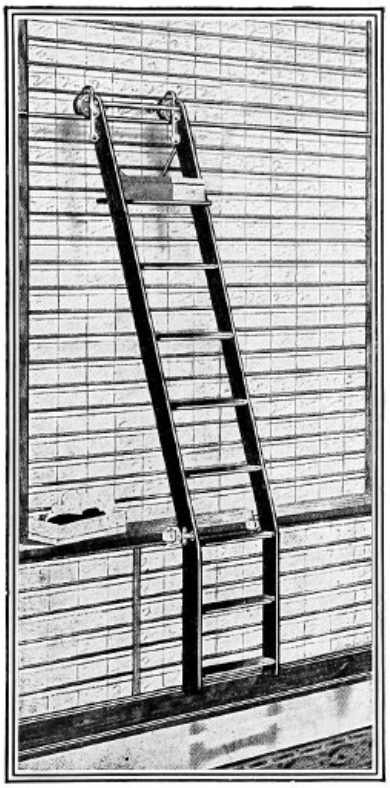
The ladder is constructed of the best clear Georgia pine, nicely finished, filled and varnished; has open panel sides 5 in. wide, with 5 in. steps. Each step is supported at each end with a special malleable dowel tee, which makes the strongest construction possible. The width of the ladder is 12 in.

The trolley is self-adjusting and made of malleable iron fitted with turned steel bearings and 3 in. anti-rattler wheels, turned and bored on lathe and fitted with special rubber tires.

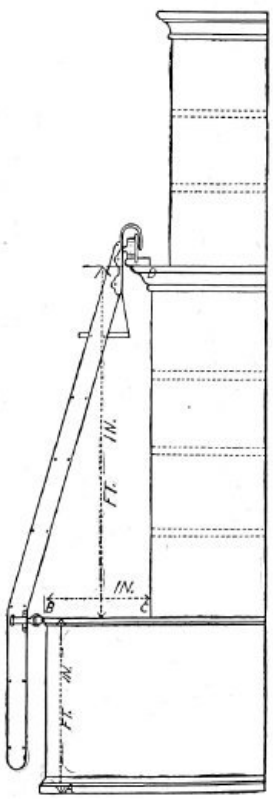
The floor travelers are 5 in. in diameter, composed of metal sides with rubber cushion tires clamped in such a position as to be impossible to get off or come loose. These wheels are placed on a steel axle which revolves with one of the wheels, the other running loose. In this manner the ladder will adjust itself to the floor. With this style trolley, which is noiseless, a great objection in other ladders is overcome.

When the ladder is not the proper length for ceiling, cut off at the bottom and replace the lower traveler shaft by boring new holes at the proper point so as to have the steps of the ladder level.

MILBRADT BENT ROLLING STORE LADDERS.



Showing No. 1 bent ladder, which runs on a track fastened to shelving near the top and runs close to wide base shelf.



Showing No. 10 bent ladder, which runs on track screwed on top of original low shelving.

The MILBRADT rolling step ladders are all made to order, and to fit each particular place, of good oak lumber, in the most artistic and neatest style, handsomely finished, are durable and perfectly safe, as they cannot jump the track. They take up the least possible space, run noiselessly and so easily, either empty or with operator upon them, that a slight push will propel a ladder the length of an ordinary store. These ladders have an extra wide shelf at the top, which affords great convenience in handling stock. All iron work on ladders, as well as the brackets to hold up steel track, is malleable, artistic and strong and aluminum finished.

No. 1—Runs on steel track which is fastened to shelving near the top and has rubber rollers attached to the lower end, that run against the edge of base shelf. This ladder is best for all-around purposes, where shelving is reasonably strong.

No. 2—Is intended for shelving that is not very strong, as most of the weight of the ladder and operator rests on the floor. This ladder runs on a hardwood track fastened to shelving near the top to guide it and has attached at the bottom cushion tired wheels that run on the floor, but no track is used on the floor.

No. 10—Is a bent ladder that runs on a flat hardwood track that is screwed on top of original low shelving. When top of shelving is reasonably strong this is very often the most convenient way to apply a ladder to this style of shelving.

No. 15—Is a Trolley or Ceiling ladder that suspends from a track fastened to ceiling. Ladder has attached at the top, suitable iron in which paper filled wheels run noiselessly on the steel track. It also has attached at the bottom, cushion tired wheels that run on the floor. This ladder is very strongly built and specially adapted for Hardware stores or any place of business where heavy goods are handled.

Steel Track—For No. 15, including brackets and screws,	per foot	.35
Hardwood Track—For No. 2, complete,	"	.25
Hardwood Track—For No. 10, complete,	"	.20

HOW TO ORDER.

Ladders as Nos. 1 and 2 give the exact height from floor to top of base shelf; the exact width or projection of base shelf and then the exact height from top of base shelf to top of shelf to which track is to be fastened and the track should be fastened to a shelf that is about 3 ft. down from the top.

Steel track for ladders No. 1, both regular and extra strong, are 1 inch in diameter and therefore do not block up any space, when fastened up opposite the edge of shelf. When ordering steel track give the total length of each line of shelving; second, give distance from center to center of uprights and state how many brackets are required to hold up the steel track. For regular steel track the brackets cannot be more than 4 ft. apart. When the uprights to which brackets are to be fastened are more than 4 ft. apart it is necessary to use extra strong steel track.

Ladder No. 10, give the exact height from floor to top of base; the width or projection of base and then the exact height from base to the top of shelving or cornice on top of which track is to be fastened. Also state how much the cornice or moulding on top of which track is to be fastened projects out over lower part of shelving.

Trolley ladder No. 15, it is only necessary to give the exact height from floor to ceiling and the exact length of each line of track wanted.

To order wood track for ladders No. 2 and 10, it is only necessary to state the number of feet required.

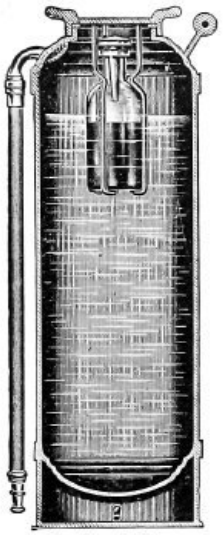
FIRE EXTINGUISHERS.

H. S. B. & CO.'S.

Outside View.



Sectional View.

No. 10—Copper cylinder, height 21 in., diameter 7 in., capacity about 3 gals., brass screw top, w't 22 lbs., - each $15.00

No. 15—Copper cylinder, height 23 in., diameter 9 in., capacity 5 gals., w t 30 lbs., - - - - - each 20.00

Made of special cold rolled Lake Superior copper, which is very homogeneous and of great tensile strength. All seams are riveted by hand and lead sweated. Actual tests have proven these seams much stronger than the solid metal. All fittings are of brass, carefully fitted by expert workmen. Improved goose-neck hose-connection, which leaves the hose hanging straight down and prevents moisture remaining therein to decay the rubber. Extra heavy, chemically treated rubber hose. Solid lead nozzle, without stopcocks or valves to get out of order. Each extinguisher before being packed is tested with a pressure of 300 pounds to the square inch, which is more than double the pressure generated when the extinguisher is used.

Insurance statistics show that ninety per cent. of all fires are discovered in their incipiency, and if means were at hand for extinguishing them, nine out of every ten could be put out as soon as discovered.

A chemically charged stream, as a fire extinguisher, is forty times as effective as water. An H. S. B. & Co. Fire Extinguisher is charged by filling the copper cylinder with water to within four inches of the top and mixing into this 1½ pounds bicarbonate of soda in No. 10 and 2½ lbs. in No. 15. Attached to the removable head of the extinguisher is a brass cage holding an 8-ounce bottle in No. 10 and 12-ounce bottle in No. 15, which is half filled with sulphuric acid. This bottle is closed by a tapering-shank solid lead stopper. To discharge the extinguisher it is turned bottom up, when the lead stopper at once drops out, allowing the sulphuric acid to mix with the soda solution, and creating a large volume of carbonic acid gas. This gas produces a pressure sufficient to throw a stream of the chemical fifty feet, reaching into places which it is otherwise difficult to get at. This stream will instantly put out an oil or gasoline fire, which water alone would only spread.

Equally well adapted for use in stores, factories, barns, stables and residences

In shipping, the sulphuric acid is retained in the bottle by a rubber stopper. This should be removed and the metal stopper inserted in place. The extinguisher can be used innumerable times with no other expense than the cost of sulphuric acid and soda. Extinguishers should be re-charged once a year. Where exposed to zero temperature, add two pounds of salt to the solution. There is nothing to get out of order, no cocks to open or close; simply leave it alone until wanted, then invert and it will do the rest.

HARDEN HAND GRENADES.

No. 4.

No. 7.

No Corrosion, No Freezing, No Danger of Explosion.

No. 4—STAR, capacity 1 qt., w't per dozen 60 lbs., per dozen, - - - - - - - - - - $10.00

No. 7—Tubular, floral design, capacity 1 qt., size 2½ × 18 in., w't per dozen 58 lbs., - - - per dozen 10.00

To extinguish a blaze throw the grenades as near the base of the fire as possible, in quick succesion. In using the tubular pattern, grasp the lower end of the grenade and with a quick blow break off the top just under the cork, throw the liquid at the base of the flame vigorously

HALF OR ONE DOZEN IN A CASE. WE DO NOT BREAK CASES.

ONE DOZEN IN A BOX. WEIGHT 9 LBS. PER DOZEN.

Lacquered Spring Steel, Closed Back.

No. 110—8 bars, with rubber scraper, - - per dozen $4.00

ONE DOZEN IN A BOX. WEIGHT 9 LBS. PER DOZEN.

The back of these curry combs is made of spring steel and is very elastic and flexible. The bars are held only at extreme ends, allowing the center to spring slightly. The eight bar combs have more spring than the six bar on account of their extra length.

The new construction makes a curry comb far less liable than a rigid bar to lacerate the skin, besides the vibrations tend to keep the dust and dirt from sticking to it. The rubber scraper attached to No. 110 is of great assistance in scraping off sweat, mud, water or hair from a shedding animal.

Closed Back, Shank Run Through Handle and Riveted.

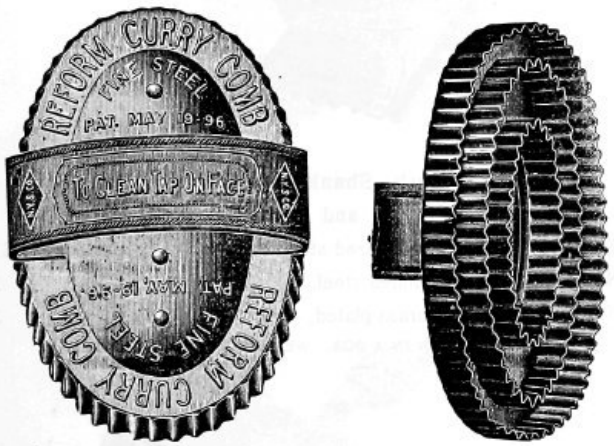
CURRY COMBS AND CARDS.

REFORM CURRY COMBS.



No. 150—6½×4¼ in., 3 shallow corrugated cold rolled steel trays, riveted, inned and bronze lacquered, heavy russet leather strap, - - - - - - per dozen $4.00

Will clean with equal thoroughness a short coat or the long, furry ones incident to the winter season, as not the smallest part of the coat can escape the many teeth, which, however, will not irritate the most sensitive skin, nor will they tear or otherwise injure the brush. It is self-cleaning, and there are no facilities for the storage of hair. A gentle tap on the face will rid it of all the dirt.

ONE DOZEN IN A BOX. WEIGHT 5½ LBS. PER DOZEN.

It is made from pure lubricating oils, contains no lumps, and has great wearing qualities. This grease contains a large percentage of graphite, which is unsurpassed as a lubricant. It will not run or gum, and is not affected by heat or cold. It is adapted for light and heavy wagons, drays and farm machinery. The graphite adheres to the spindle and prevents the grease from running.

No. 909—7×12 in., w't per doz. 9 lbs., per dozen 13.70

BRIDGE NECK.

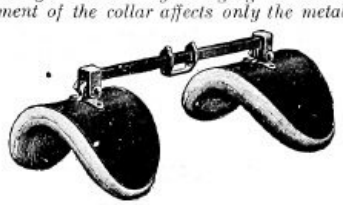
No. 80—CYCLONE, w't per doz. 30 lbs., per dozen $6.00

The padded plate rests on the horses neck, surrounding the sore while the elevated bar holds the collar clear of the afflicted parts.

No. 50—OSCILLATING, size 2, w't per doz. 8½ lbs. ..... per dozen $7.50

No. 60—OSCILLATING, size 3, w't per doz. 10 lbs. ..... per dozen 8.80

The pad is made of the highest grade of sole leather and is so shaped as to adjust itself to the neck, having an open space in the center, thus leaving the afflicted part free. The metal plate is elevated and secured on each side to an under plate permitting the necessary swinging motion. Any movement of the collar affects only the metal top.



No. 70—SUN, w't per doz. 33 lbs., per dozen $13.10

The padded plates at either end of the connecting bar rest on the neck and shoulder of the horse and are so attached to the bar to permit a swinging motion which allows the pads to adjust to any position without interfering with the collar.

No. 90—WABASH, w't per doz. 28 lbs., per dozen $14.40

The advantages of the Wabash are many. It is convenient to put on the horse. Is quickly attached by straps to the hame staples and is left attached to the harness. By using the "Wabash" a sore necked horse can be worked every day.

CART SADDLE.

No. 102—All white drill, composite stuffing, size 19×22 in., w't per doz. 34 lbs., per dozen $7.70

PAGE 1600.

We have indexed all articles in Harness and Saddlery Hardware which are not included in pages 1301 to 1359 under page 1600.

As soon as possible we will send the balance of this section with a special department index.

HARNESS LEATHER

We claim for all our oak and union tanned harness leather the following qualities; **greatest tensile strength, fine texture, flexible grain, close trim and good selection,** and always quote the lowest market price for such leather.

No. 15—No. 1, selection, - - - - per pound $0.74
No. 16—No. B, selection, - - - - " .70

Unsurpassed by any brand of oak leather. Made from selected packer steer hides, pure oak tanned, absolutely free from all adulterations. Finished by the most skilled labor that can be obtained. Closely trimmed, plump shoulders and flanks, and what is most appreciated, a strong fiber. The best leather on the market for fine custom trade.

TEN SIDES IN A ROLL. WEIGHT 160 to 220 LBS.

Chicago

No. 30—No. 1, selection red label, - - per pound $0.74
No. 32—No. B, selection yellow label, - - " .70

Unequalled at the price. Made from all packer steer hides, pure oak tanned and shaved all over by hand. Stuffed with oil and tallow only. No adulterations. Recommended for economy in cutting and for unsurpassed wearing quality. Close trim honest leather.

TEN SIDES IN A ROLL. WEIGHT 185 TO 230 LBS.

Star Oak

No. 20—No. 1, selection, - - - per pound $0.74
No. 21—No. B, selection, - - - " .70
No. 24—No. B, selection trace, - - " .76

Made from packer steer hides, thoroughly tanned with pure chestnut oak bark. Stuffed with the highest grades of tallow and New Foundland cod oil. No adulterations. Finished in the most skillful manner. Cleanly shaven, closely trimmed, straight backs and plump shoulders. Star Oak leather has a natural grain that finishes elegantly and is conceded the best wearing leather on the market.

TEN SIDES IN A ROLL. WEIGHT 160 TO 220 LBS.

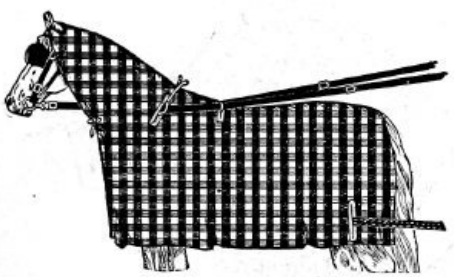
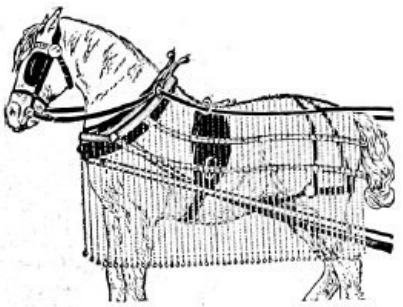
SEASONABLE GOODS IN SADDLERY HARDWARE.

LAP DUSTERS, FLY NETS, HORSE SHEETS AND COVERS.



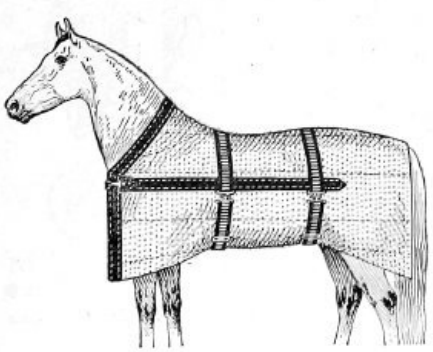


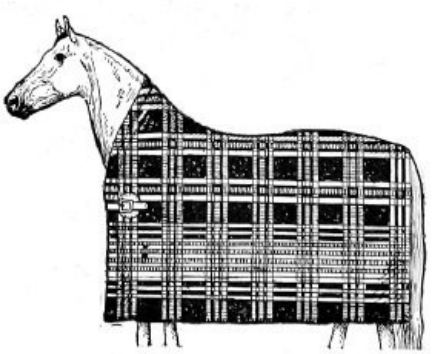
We find it inexpedient to attempt listing these goods in our Loose Leaf catalogue, as the styles change with every season.

We issue a catalogue of summer goods in the early spring, in which we illustrate and describe about 100 styles and patterns of lap dusters in fancy and embroidered momies, linen and embroidered whipcords, plain and embroidered broadcloths. Horse sheets are shown in burlap sheeting, ducks, linens and wool finish, horse covers in burlap, fancy sheeting, drills and ventilating. Fly nets are carried in cotton mesh of all styles and combination, team and express in patent cord and leather; buggy, in fine round leather and fine round calfskin lash. Most all of these are furnished in "body and breast" and "to head."

The catalogue also includes many additional articles in season. Please write for it.

CARRIAGE AND AUTOMOBILE ROBES, AND HORSE BLANKETS.





As the styles in these lines change from year to year, we do not print catalogue pages for our Loose Leaf catalogue. These goods are fully illustrated in a special catalogue of fall and winter goods devoted to this department, which is issued about Sept. 1st of each year.

In this catalogue we illustrate and describe our full line, including about 150 styles and patterns of plush, wool, Montana, automobile and fur robes, and a greater number of horse blankets consisting of "shaped" in burlap, ducks, kerseys and fancy printed plaids, storm or lumbermen's and squares in a great variety of sizes, weights and patterns.

This catalogue will be mailed to any dealer in these goods, upon request.

WATERPROOF HORSE COVERS.

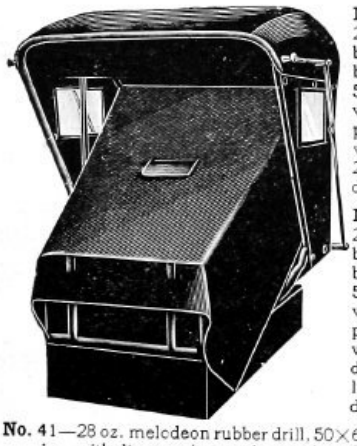
STORM APRONS, FRONTS AND HOODS.

STORM APRONS.

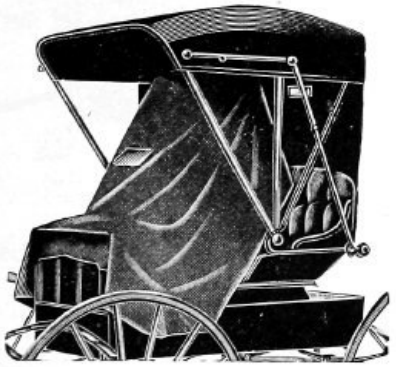


No. 46—22 oz. black rubber drill, 50×54 in., with line pockets, w't per doz. 24 lbs., per doz. $18.00

No. 47—22 oz. black rubber drill, 50×60 in., with line pockets, w't per doz. 30 lbs., per doz. $20.00

No. 41—28 oz. melodeon rubber drill, 50×60 in., with line pockets, w't per doz. 39 lbs., - - - - - per dozen $23.00

Are easily adjusted to any size buggy dash, by the two steel clamps fastened to the apron, which fit over the dash like a clothes pin and hold apron securely in place.



No. 73—28 oz. melodeon rubber drill, 50×54 in., with line pocket, w't per doz. 42 lbs., - - - - - per dozen $28.00

Will adjust to any size buggy dash by two steel clamps. The apron is so cut and shaped that a perfect water shed is formed, preventing the water collecting in a puddle over the knees.

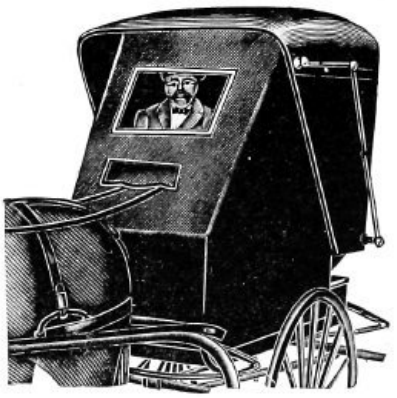
No. 48—22 oz. black rubber drill 50×72 in., with line pocket, w't per doz. 36 lbs., per dozen, - - - - - - $24.00

No. 42—28 oz. melodeon rubber drill 50×72 in., with line pocket, w't per doz. 42 lbs., - - - - - per dozen 32.00

Made expressly for and will fit any phaeton dash, is adjusted by two steel clamps, the sides of apron extend well down over the feet.

STORM APRONS.

No. 85—Heavy Canton flannel, with line pocket, one side coated with a black oiled waterproof material, fleece lined, 50×60 in., w't per doz. 36 lbs., per dozen, - - - - - - - $25.00



No. 5—22 oz. black rubber drill, with transparent celluloid window and line pocket, w't per doz. 42 lbs., - per dozen $48.00

No. 4—28 oz. black rubber drill, otherwise same as No. 5, w't per doz. 53 lbs., per dozen, - - - - - - 56.00

No. 3—28 oz. melodeon rubber drill, otherwise same as No. 5, w't per doz. 57 lbs., - - - - - per dozen 64.00

No measurements required: fits any size piano box buggy. The line pocket is 14 in. wide and reinforced with a piece of light metal. Is adjusted to buggy top and dash by hooks.

AUTOMATIC APRON SHIELDS.

No. 55—W't per doz. 132 lbs., per dozen, - $80.00

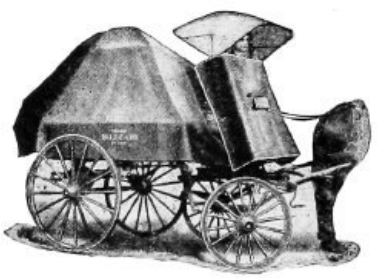
No measurements necessary. The upper part is a light metal hood 6 in. wide, in two pieces which slide together and can be adjusted to fit any buggy top by the action of the turn-buckle and rods with a right and left thread. The shield, with a 12×20 in. transparent celluloid window, is hung on the turn buckle rods with hooks. On each rod is a spiral spring which throws the shield up in the top when not in use and holds it in place. The apron is large and is made of best quality rubber cloth, with line pocket, and can be used for slight showers or when the weather is too warm to use the shield.

CLOSED CAB FRONTS.

No. 50—W't per doz. 168 lbs., per dozen $168.00

No measurements required. The Closed Cab Front is made of light japanned metal hood and frame with best quality of green back rubber cloth curtains and front which has two 10×18 in. transparent celluloid windows and line pocket. It is constructed in such a manner that it is adjustable and fits tops 35 to 39 in., measured inside the bows, and fits dashes 18 to 30 in. wide. The windows can be opened or closed from the inside. The side curtains work on rollers and can be opened or closed instantly. This Closed Cab Front can be attached in a few minutes with no trouble whatever, and when in place, becomes a part of and looks like a made-to-order closed buggy.

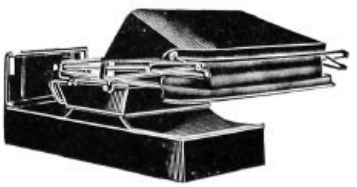
WAGON APRONS.



No. 80—Heavy brown oiled duck with line pocket, 54×72 in., w't per doz. 32 lbs., per dozen, - - - - - - $36.00

At the bottom of the apron are two straps and buckles so that the apron can be fastened to any foot board. At the top are three straps and snaps, and the apron can be hung to suit the driver. Suitable for express, grocery, laundry, transfer wagons and all wagons with tops.

ADJUSTABLE DUST HOODS.



No. 6—22 oz. black rubber drill, will fit any piano box buggy top, w't per doz. 21 lbs., - - - - - per dozen $20.00

Is put on the top when thrown back, and protects the inside lining of the top from dust or mud. It fits any buggy and can be put on or taken off in a few seconds. When adjusted there is no wrinkling nor puckering.
